 Ma-hanum consisting of 8999 Villages in the Taluk of Kattaracuru  
 Kottai For a period of 15 years

| From 1256 to 1270 | Cultivated area in acres | Proport | Of which Zamindari share at 45 percent | Average prices per anna | Value of grain per acre in Col 4 | Rates per acre |
|-------------------|--------------------------|---------|----------------------------------------|-------------------------|----------------------------------|----------------|
| 7948-4            | 5620                     | 80      | 56444-8-4                              | 25547-0-0               | 1-7-7                            | 3829-2-5       |
|                   |                          |         |                                        |                         |                                  | 4-15-1         |

Valuations

1. Salug is defined upon one small Tank - If it is upon 10 it is fed by...  
 Temple Revenue - There are no significant Village House it is necessary to lengthen  
 - Remark - The average income of the Village as per statement of the Mahasamam 38 to per  
 - Annam - This is not true. The Salug is not a fixed amount, it varies from one or two Annam  
 - Soil is of a medium fertility generally. Salug is not full of water & land  
 - The fontymore from Village - The average anna Salug anna of that Village  
 - For a period of 12 years from 1256 to 1270 accounts are available comes to 70 per  
 - For ann - This may be higher. The land of the Dammanam is not so fertile as  
 - Valugudem - After weighing the fertility of soil  
 - I give the valuations of the Village as follows with the aid of the following table

Set 10 Ann at 5 1/2 per anna 55  
 Set 75 per 20 per anna 18  
 Total 56-8-0

Rounded }  
 10 1/2 }
