IV From the foregoing correspondence it appears that the Village was under attachment in 1810
 & that it was restored to the person of 1816 on at the recommendation of the then collector
 Mr Blackburne & on the creation of the Board of Revenue.

II The Range Patent pleads that as the Village was granted as gift to the person of 17th of Oct. by Martin Vainyanosha Tson, occupying the Patimnar Peminan & the Grand Father of the Esquimaux, & that the Village should be registered in the name of the Range Rattama Nachingan as the record of the Range shows that the Grand Father of the Esquimaux who is ~~now~~ succeeded the Patimnar Peminan is one of the unlawful leaders of the tribe.

From the correspondence, etc. above, above, copy of which is given in the Report of the
Tillage of Littleton, which is placed within this, it would appear that the Tillage was granted
by the September Commission; that this was the private or purchased property of the said Commission
- & that the Tillage was granted to the person of 16 in 1827 as gift - Hence the following

D. 1 The persons N^o 1-2 & 3 of 16 are Consens - before the person N^o 1 of 16 acquired this
 Willage when the family was ^{at 1843} ~~an~~ an undivided one, he retained for himself 1/3 of the
 Willage & apportioned the rest among his Consens in A.D. 1847 when the family was
 divided - the person N^o 2 of 16 acquired one third as his paternal share in dividing the family
 property with the person N^o 1 of 16 in A.D. 1847 & purchased the 2^d third in A.D. 1854 for papers
 & 73 from one illustrious person from the younger brother of the person N^o 1 of 16 - both of which is
 a stamped paper for Transaction proved to be genuine - being not proved -

III. The person 137016 assigned one Tully as a share in his patrimony in dividing the family property with the person 1417016 in 1847. & received another share in exchange of certain lands which he had in the village of Tullally, the register of which is placed with the Transactions proved to be bonafide. Enjoined proved -

III Wet lands in the Village depend upon one Tank of moderate size. It is in repair. It is fed by a single
 Tank & filled naturally. Scarcity of water is not felt generally. Wet & Dry lands are cultivated annually in fall & a few acres
 annually. Mangala & Pungala lands are of a superior quality generally. Some of the wet lands are cultivated annually & some
 once in eight years raised. The average income of the Village is 40 Rupees per annum appropriated to the period of 16. This is not true
 because the Village is Purnapally & Cheluvu. The average of the assessment of these Villages calculated for a period of 15 years per
 comes to 91271 Rs. & 4 annas respectively. This is high. The average Dry assessment of the Purnapally & Cheluvu
 varies from 12 to 24 Rs. per acre. The Mohayamma say that the soil of the Village may be placed on par with that of
 the average Wet assessment of which comes to 91271 Rs. per acre. I don't think it is far distant. Wet above 8000 per
 annas assessment is not really high. In consideration of the fertility of soil & I grant the valuation of the Village as follows.
