- I have no materials to enter the average assessment of the adjoining open lands. The Mangrove accounts are preserved. Village accounts of crops produce are not preserved in some cases carefully. The average Dry assessment of the adjacent open villages varies from 12 to 60 per acre - Varogor, Lumbor &c are assessed with the minimum rate. Average per fatha of the Village as per statement of the Debbarans are 3230 per annum. This is quite false compared with the fertility of soil & extent of lands in the Village. In consideration of the fertility of the soil &c, I frame the valuation of the Village as follows with the aid of the Debbarans.

1. Wet 91 Acres full cultivated annually, & partly fallow 2 times } 56 6-0-0
 at 60 per per acre
 1. Wet 17 Acres all cultivated, waste &c at 20 per per acre = 34 0-0-0

Dry 42 Acres at 1/4 open per acre
 The Assessment is a fair valuation.

Total - 577-0-0
 31-8-0
 Grand total - 628-8-0
