Ratio of Government & Taluq produce

Madras

1899

10133

Average ratio of Government & Taluq produce

1899

10133

Average value of grain of Madras on wet land in Taluq
Nagaram consisting of 18 villages in the Madras Taluq
for the period of 15 years.

From 1870 to 1890	Cultivated area in acres	Grains sown	Of which 45 percent of grain	Average price of grain	Value of grain	Rates per acre
1870-80	14589 32	42117 5 3	18537 1 5	1 5 11	25436 4 2	5 9 3

Valuation

The wet lands in this village depend upon one tank of moderate size. It is in repair. The roughly - It is fed by one of the branches of the Kistamala river. The tank is filled annually. Scarcity of water is not felt generally. The Mahajanams claimed 14 Ann of Wet & 28 Ann of Dry as full watered lands & 3 1/2 Ann of Wet & 27 Ann of Dry as waste. They state as usual that the waste lands are of 3 or 4 years uncultivated lands & that they are fit for full water early or within 3 or 4 years. I cannot place reliance upon this statement. I think some consideration may be shown for minimum real waste lands. Some of the wet lands are full watered annually 2 times. Nanjath & Panjath lands are of a superior quality generally. The average income of this village is 62 Rupees per annum as per statement of the Mahajanams. This is not true. The contiguous villages are to the Darnasaram under settlement. The other villages of Kalijanam & Viananam are at a distance of about a mile from the Darnasaram & contiguous to the Darnasaram of Patti aniam & Varkakulam. which are contiguous to the Darnasaram under settlement. The average value of the village is 8 8 1/2 & 5 5 3 per acre respectively. The dry ratio is from 1 1/4 to 2 00 per acre. The Mahajanams say that the wet of this village may be placed on par with that of the said other villages. The gross average assessment of which comes to 5 9 3 per acre. (Vide map case)

Vide preceding side

In consideration of the fertility of soil &c, I frame the valuation of the Village as follows -

Oct. 17 $\frac{1}{2}$ in full water at $6\frac{1}{2}$ A. for per. acc - 11372 -

Aug 30 new fall wheat at 1-2 per acre —
 being not first rate soil as to bear the highest rate — } 3312-0-
 of Aug annual —————

Dry 25 skin of 3 or 4 years waste pit blue } - 1872 -

Call water nearly at $\frac{3}{4}$ depth
