

Sheet No. 611

X Ruppel and Petty -

I This one of the Villages in the Zemindary of Pungroo - $\frac{3}{4}$ of this Village is $\frac{1}{2}$ of the Village is Darnas anwar - or did not from the
assets upon which the firm and settlement was based. Hence $\frac{1}{4}$ of the Village above is brought on the Register - & remains settled -
The $\frac{1}{4}$ Village is a hereditary grant. No Patta No break in enjoyment. The $\frac{1}{4}$ of the Village being Darnas anwar & $\frac{3}{4}$ of the Village being
Agar is proved by all the accounts of 1821 & 1823. The Village is omitted from the English Account of 1825 by some mistake or other -
No Talk was about the Area or about the boundaries of the entire Village on the part of the King's Vakil. The boundaries correspond to those
in the Account of 1826. Hence the Area of 146 Acre & 70 Guntas is confirmed here. Of this area $\frac{1}{4}$ do belong to the Darnas anwar portion -
The Darnas anwar portion is in possession of the person of 16. In A.D. 1854, the person of 16 purchased the Darnas anwar portion for Rupees 6828
from Vannayammur. Parwal - who one grandfather purchased it previously in A.D. 1799, for Rupees 1917. - from one Ram anand one Setty.
The father of the latter purchased $\frac{3}{4}$ of the Darnas anwar portion in A.D. 1763 - from one Rappayam. It is not known how the remaining portion
of the Darnas anwar portion fell in possession of the father of the said Ram anand one Setty. - The Bill of sale of A.D. 1854 is on a stamped paper leaf
Other Bills of sales are on plain paper leaves. The above transactions proved to be valid by tradition & - Enjoyment proved -

Dry 1-5-8

Wet 4-8-1

Average Value of grain of Meluarn on wet land in Sittatungudi
Majaram consisting of 8 Ayer Villages in Katerankata Salag
for the period of 15 years

Value of 1/4 Village

II Wet lands depend upon one Lake of large size - It is in repair - It is fed by
a Pungla Stream & by Waste Water of the adjacent Ayer Villages. The Tank is filled
annually. Scarcity of Water is of a rare occurrence - No Pungla lands within Village -
Some of the wet lands are cultivated annually 2 times - Pungla soil is of a medium nature
generally - The average income of the Damaramangurk is 50 Rupees per annum - This is
not true - The average Wet assessed of the 3/4 Ayer Village calculated for a period of
15 years previous to July 1870 comes to 5728 Rs per acre - The Village is in pretty good state
For consideration of the fertility of soil & I frame the valuation of the Village as follows -

Wet 15 Ams cultivated at 5 3/4 Rs per acre 86-2-0

Wet 3 1/2 Ams Waste at 2 Rs per acre 7-0-0

Parabur	}	Totals -	93-6-0
