Average Value of Grains of Rulers on each load in Jeedipanchas kingdom

containing 31 Ryen Villages in Richard Selon for a period of 15 years.

A

From Fasli to Fasli	Cultivated area in Acres	Grass autturn	Of which Enmdar's share at 45 per cent	Average prices of Grains	Value of the quantity of Grains given in Cash	Rates per Acre
1. In 6	A C	A In 6	A In 6	R A 6	R A 6	R A 6
35 " 5	7094-54	74286-8-2	2809 06	1-8-3	4171-13-4	5-14-9

Dated 1826

The genuineness of the document dated 1797 is much doubted of there

Pursues, naturally, upon that the document is genuine one - I think the first

N° 1 to 5 of 16 forged the document to show that the Village was held as a perpetual

grant since long - The fact of my informer that the above document is a forged

one is proved by the Bill of sale produced by the Trustee of the Settlement

N° 5 of 16, which was executed by the ancestors of the persons N° 1 to 5 of 16 -

It is said in the Bill of sale N° 5 that half of the Village was sold to the Manager

of the Mattam N° 5 of 16 by the "Rakkans" of the Village - In the Dictionary

the term "Rakkans" used for the managers of Temples & Settlements

From this it is evident that this Village was only a Settlement

endowment that it was sold by the ancestors of the person N° 1 to 5 of 16.

N° 6 who gave Rakkans & not purchase N°

or Landlords, even in the English account of A.D 1815, copy of which is

forwarded to the Board of Revenue it is said that this is a Settlement endowment

N° 6 to the Settlement N°

However it is clear that the proceeds of the Village were appropriated since the last

38 years from the date on which portion of the Village was sold to the Mattam

I recommend to enfranchise the Village upon the terms follow N° 2 of assessment -

Another point for consideration is whether the N° 6 of the Village purchased by the

N° to the N°

Manager of the Settlements belongs to the Mattam or to the Manager who died 2 years ago.

as he held & retained any person It is not said in the Bill of sale of 1825 & 1856 that

N° 11 to 7 N°

the Village was purchased for or from the funds of the Settlement However it is

proved that the Manager purchased the 7/8 of the Village from the funds of the Mattam

that the proceeds of the Village (purchased portion) are appropriated for the use of the

N° interest N°

Mattam since the date of the purchase - That the Manager had not any personal interest

- He was mere "Servant" - managing the affairs of the Mattam under the superintendence of

the Trustee of the Mattam - Hence the Mattam has right to 7/8 of the Village the Settlement

& Devastanam Village, whose funds are appropriated to the use of the Institutions are settled since annexed

by the zemindars Ancestors. The Village N° does not seem to have been N° included in the settled accounts since long or from the

N° getting the zemindars N°

of our memory - The funds of the Settlements are thus misappropriated from the very beginning the Trust

the Trustees of these Villages under their management for the selfish vanity -

Any Remittance granted N° to Villages at N° Rs are on personal grounds -

Dismissed

Register No. 681

Sheet No 885

2nd sheet of Vilapillai Vadagoulam in Malavarayanpalaiyam Zemindary

II No talk now about the area or about the boundaries on the part of the Ramji Vakeel - The boundaries inserted in the remuslanama tally with the Correspondence in the account of Fasli 1246 - Area Rs 287 Annas 8 for lands entered within the said boundaries are registered here -

III The Village is engaged as shown in the margin of Rs ½ of the first sort of the first class lands are mortgaged - Peishcush is paid on the number of Veilahs equally & permanently -

III The Vakeel of the Ramji of Sivaganga says that the Sayer Chattrams is fallen into ruin long ago & that no charity is conducted therein - He does not seem to care much regarding the settlement of this Village - The person of this village pointed out the entries in the accounts of 12 are false & that this Village is a Dasavaram grant like any in the taluk - He has no arguments on the bills dated 1797 - 1826 & 1856 above alluded to -

II ..... Wet lands depend upon two Tanks of moderate size - Dry are in regard - They are fed by a Jungle Stream - They are good by the Tank Water of the contiguous Villages - The Tanks are filled annually - Scarcity of Water is not felt generally - The leaders of the Village say that 21 Annas of Wet & 24 Annas of Dry are cultivated annually & the remaining lands are of long waste - They again say that the waste lands can be cultivated within a period of 5 or 6 years if encouraged by improving the Tanks & by bringing water into the Village - This is a depopulated Village - The Ramji Vakeel says that he got the lands of the Village measured & found the results of the same to the tune of the entries in the Fasli 475 of the Register - The leaders of the Village admit the accuracy of this measurement - But I cannot place much reliance upon this measurement - Wet lands are measured at the rate of Dry as appears from the measurement - Some of the Wet lands are cultivated annually 2 times - Navjah & Punjah lands are of a medium sort & are generally - Some are red in colour & some are black in colour - No garden crops are raised - The Village is not in such a state as it ought to be from the negligence of the leaders of the Village - The Trustee of the Sattram No 57 of 46 who is an influential person being Manager of the Temple of Alwar at Koby Ammaan at Madura

The average in any the Village is 31 Rupees per annum - This is not true at all - In consideration of the fertility of soil &c I frame the valuation of the Village as follows - The contiguous Agrm Villages are of great antiquity - The average Wet assessment of these Villages calculated for a period of 12 Fasli previous to Fasli 1270, for which accounts are available, comes to Rs 8-8-11 per acre - The average Dry assessment of the Agrm Village varies from 1 to 9 As per acre - In consideration of the fertility of soil &c I frame the valuation of the Village as follows. The average Wet assessment of the Agrm Village is somewhat light - The Melvaramam - Wet 21 Annas cultivated at 7 Rupees per acre — 147

Wet 23 Annas Waste yet to be cultivated at 2 Rs per acre — 46 — 193-0-0

Dry 25 Annas cultivated at 1 2 per acre 28-2-0.

Dry 200 ½ Annas Waste yet to be cultivated at 8 As per acre — 100 — 128-2- 321-2-0
