

The pond is provided by the Government. $\frac{1}{4}$ Village of land is an endowment for the pond. The pond is open during 6 months in a year. The charity of feeding mounds in feeding. The pond is open during 6 months in a year. The charity of feeding mounds in feeding.

VI. The Talukdar about the brown series on the peak of the Range. The boundaries now inserted in the revenue statement correspond to those in the Account of 1844. Hence the brown series are confirmed here & the 242 Acre & 70 Cents situated thereon are registered here.

VII. A copy of the Register whose name is given in of 1813 is said to be a descendant of the individual who acquired $\frac{1}{4}$ of the Village in gift in A.D. 1787.

Valuation

VIII. The land in this Village depends upon ^{the Government} the Government. They are fed by one of the branch channels of the River which is an important source of water. The tanks are filled annually. Scarcity of water is not felt generally, but the 2 & 3 of dry are placed as full water tanks. The rest as the tanks are full water only. The land is of superior quality. The Village is in a flourishing state. The average income of the Village as per statement of the Trustees of 1816 is Rs. 205 and 10 As. This is not true. I found that the matter of water is exaggerated. The contiguous village is Tungurai. The average water assessment of the village calculated for a period of 15 years previous to 1870 is Rs. 882 per annum. The average water assessment of the village calculated for a period of 15 years previous to 1870 is Rs. 882 per annum. The average water assessment of the village calculated for a period of 15 years previous to 1870 is Rs. 882 per annum.
