[illegible]

10 Wet lands - The Village depends upon one Tank of large size. It is in repair. It is fed by a single stream - The Tank is filled annually. Scarcity of water is not felt. The Mahajan claims that there is no charge in Wet lands over & above the assignment in the alleged Estimation Account of 1721. This is not worthy credence but they remain in the revenue Register that they will contribute to Govt the charge that may be found above the lands brought on that Register. They claimed 28 Acre of full water lands & 3 1/2 Acre of water as waste. No dry cultivation in the village after the day - On 3 Acre 736 fathoms of Dry lands claimed as waste are said to be put for full water. Some of the Wet lands are full water annually & some - No garden crops raised in this Village. The village is in good state. The average income of the Village is 80 Rupees per annum. No salt mine. There are no other Villages contiguous to the Dammassanow under settlement. In consideration of the fertility of soil in or within or reference to the valuation framed for the contiguous to Dammassanow Village, I give the valuation of the village as follows -
Wet - 30 Acre full water at 60 Rupees per Acre = 1800

Wet 30 New fall water at 6 inches per acre	150	
Wet 1/2 acre Waste at 1 inch per	180	180 00
Dry 5 acre 25 feet Waste at 1 inch	573 1/2	573 1/2
