| 1870      | 57              | 36200          | 16201                            | 18 88                  | 10 90                       | 10 90                       |

Two of parcel given to a boundary one =

Thinks

1/2 of land is given for land - they are in upon - they are fed by

single stream across influence the land is fed annually

Oct 4 84 land is cultivated annually in full of it waste is per-  
statute of the village - land is not full into 20 years

No single land is fed to be committed into the village and is 7  
a superior quality generally with grass crops in rows the village is a good  
the lake the adjacent by village - the country is open the grass is

Proportion of land & the lake - the average of the  
from 1801 to 1870 of the proportion of the lake the account are available

shows the account for one acre to 5 83 per acre - thus for account =

The average income of the village as proportion of the village is 1/3 of the  
for account the average of the account of the village is 1/3 of the  
income from 1801 to 1870 1/3 of the income is 1/3 of the income

it and land is not given in the village - the grass is given in the village

In considering the grass of the village - the value of the village is  
followed in the way of the lake. The land of the village may be placed with the  
Representative

Aug 21 1/2 - Well cultivated annually at 5 1/2 per acre - 106 60

Aug 16 1/2 - Well cultivated annually at 5 1/2 per acre - 20 100
