Regemusa's Valack after looking the entries in the Account of 1721, brought to the notice of the Deputy Collector that there must be 5 Hallas of seed land or 3 Ams + 50 futs of seed land. The Jemusa in the Village admitted that the Jemusa has no enjoyment of the land. The person N^o 2 of 1766 stated that these lands were alienated to his Father in gift by "Mama Saivai", the Minister of the Jemusa, in A.D. 1800 (Rongy) in a written deed of gift & produced in support of which the following documents -

1 Dead of 2 fls. granted by Manooar Sarvai in A.D. 1800 to the Father of the People of the 12th of 16th.
- on a plain of a leaf -

- on a plain paper on leaf -
1 An order issued by the Scherangammah in A.D. 1807 to the Manager of Darnesaram (Juteh)
- directing to transfer the Cash to Darnesaram in the account, where the eggs were guarded
- See also Letter of the person of 27/10/18 some time ago, & collect Pongu from the Darnesaram
- Make any more.

1. Taken care by the Manager of Pomroy lands a sum of money of the Government to the Treasury
Money in A.D. 1807, directing to transport the lands to the person taking of the person of the
deducting the same from "Pomroy" or Government lands - as directed by the Government -

1. Talked with you by the Messrs. of Ponnai in Dec 1807 to the Messrs. of the Ponnai
directing to transfer the land to the father of the p. N 2 of 16 as directed by the Commission.

In dependence of the above instruments, the enjoyment of the four N^o 1 to 4 lots of the lands is
 satisfactorily proved. The generous Vakil has no materials to disprove the above facts. Hence
 the lands are registered in the name of the persons N^o 1 to 4. These lands form ^{the portion of} the Pongors in the
 Village.

Johnston

1 Wet lands depend upon one fault of moderate size. It is in repair. It is fed by Ponnabylakayan. an insignificant river in the District. The Malabarans complain and the encroachments of which I note security of the land - The Malabarans of course mark the lands as to be seen or 80 fathoms of wet lands as Ponnabylakayan wrote a remark in the Register that they are unfit for cultivation - They say that the lands flooded as waste are plenty Malabar and the I cannot believe. No Ponnabylakayan in the Village - The Malabarans say that 1/8 of the wet area may be said to be cultivated annually 2 times - Soil is of a superior quality generally. There are some alluvial ~~low~~ soil to be - But the whole the Village is a valuable one though small in size - As I have no materials to enter the average assessment of the neighbouring open lands, the average of the Malabarans in which the Village is situated is given as the margin. Average profits of the Village as pretended by the Malabarans are 60000 per annum. This quite false - In consideration of the fertility of soil &c, I frame the valuation of the Village as follows with the aid of the Malabarans.
