Wet lands depend upon 3 tanks & large eye. They are in repair. They are fed by one of the branch channels of Vayagai. They are filled annually. No scarcity of water is felt generally. The Mahajanams feared 85 Acres of Wet & 80 Acres of Dry as waste. & say that the remainder consists partly Mettakkal & partly Waste-lands. This is quite like as appears from the adjacent Villages & from the individual statements of the Mahajanams & the Mahajanams feared all the except lands together with some of the lands as waste. It is usual in all the Villages that one man is to come forward & prepare accounts as these pay & not with reference to the real state of the Village. Some of the Wet lands are cultivated 2d time annually. No Varaku is raised in this Village. Nanjah & Punjah lands are of a medium character generally. The Village is in flourishing state. The contiguous Ayan Village is Vanni Yennireswaram. These two Ayan Villages are most important ones. They consist of good soil. The average assessment of this Village calculated for a pound of 16 feet per [illegible] comes to [illegible] & 6-8 respectively. The average of these two Rates comes to an aggregate to 6-8 per acre. This is a fair assessment compared with the superiority of soil. The Mahajanams say that the soil of this Village may be placed with those of the said two Ayan Villages. The Dry an average assessment of the contiguous Ayan Village [illegible] varies from 2-4 to 0-13-6 per acre. The average of the Village as per statement of the Mahajanams is 528 737. This is quite like & Petitioners I see no defects in the Village. It is good Land & good soil. On consideration of the fertility of soil & from the good soil valuation of the Village as follows.
