VII. Wet lands in the Village depend upon Tank II. They are in repair. They are fed by Sanyale Stream.
 The Tanks are filled annually in full. Scarcity of Water is not felt generally.
 The holders of the Village possess 21 An of Wet as salt water lands & 7 An of 4 to 8 futs as water.
 They say that there is no increase in the Wet area. I find that all the Wet lands are
 being cultivated. Some of them are also salt water & some. Soil is of superior quality generally.
 It is said that there is no Dry Arable lands in the Village. The average income of the Village is
 Rs 70 per annum - as per statement of the holders of the Village this is not true.
 The contiguous Ryot Villages are Parakhole and Purnhole. The average Wet area of these
 Villages is 6-6-4 & 6-12-2 futs are respectively. Soil of the Villages is not in any way
 superior to the soil of the contiguous Ryot Villages. Parakhole is a degraded village.
 In considering the fertility of soil I find the water in the Village is follows.
 - Wet 28 An 8 futs cultivated at 5 1/2 Rs per - 150-12-
