*Fair copy*

III The land depends upon one tank - It is in repair - It is by a Temple, Sada-Radi  
 & by the water of the town village of Vainy - The tank is filled annually - Quantity  
 of water is not full generally. The Mahabharatans say that the water in the village  
 are full water annually in full - Some of the water lands are full water annually 20 times -  
 The water & Pungah lands are not of a very superior quality - The average income of the  
 village is 35 Rupees per annum - This is not true - The contiguous town village is Vainy -  
 The average water-amount of the town village is 7-7-7 per acre - The average day  
 of amount of the town village varies from 2-6-0 to 0-1-6 per acre -  
 The Mahabharatans say that the soil of the village is not as superior as that of  
 the town village - This seems to be true to some extent - In consideration of the quality  
 of soil & I presume the valuation of the village as follows -

Water 12 1/2 feet full water at 6 1/2 Rupees per acre 78-6-0  
 Day 8 Acres 0-0-0 at 1 1/2 Rupees per acre 12-0-0

*Handwritten note*

Water 13 feet & 23 feet at 6 1/2 Rupees per acre - 85-15-0  
 Day 9 Acres 4-5-0 at 1 1/2 Rupees per acre - 12-4-0  
 Total 100-4-4

*Handwritten signature*

1 This is one of the Villages in the country of the Piamattin People in the government of Livingston. We go particularly the remarks in paras I to III & IV of the  
Regarding the Village of N. amma-nappa - It is taken about the Area or about the boundaries on the part of the Range District. The boundaries now inserted appear  
some earlier statements correspond to those in the Account of 1726. Hence they are confirmed here & the 1257 and 79 fathoms altitudes there are registered here.

Valuations.

The Estates in the Village depend upon 4 Tacks - Of these one is large & 3 are small. They are in respect thoroughly - they are paid by Single Straws &  
by the last Tack of Purnoy an important first year Village with an important Tack - The Tacks are being letted annually in fall.  
Scarcity of Water is not felt generally. The Village is very important one - But the Valuation of that Village exaggerates the result. Waste is a vast  
extent - the Valuation of that Village & the farmstead of the Village of Cairn 25<sup>th</sup> Aug of Wet 985 Aug of Dry no further lands & 280 Aug of Wet &  
352 Aug of Dry as waste - This is not true - The results of <sup>the inquiry at</sup> ~~wet~~ <sup>to prove as accounted</sup> the Valuation of that Village is not shown by the amount of Wet waste.  
The old owners of that Village & others say that there is not above 150 Aug of Dry as waste. It appears that from the wet of 150 Aug of Dry are of long waste  
fit to be cultivated. Some of the lands are of superior quality generally - I have seen the lands myself - Part of the Wet Area is said to be salted & some  
on an average annually - 22 odd Acre are cultivated with garden crops - such as Melons, Tobacco, etc. There is no ground to grow fruit in the two Villages  
(This note added)
