Average Value of grain of Meluarum on wet land in Marandei
 Marandei Consisting of 47 new Villages in the Taluk of Mangalam
 for a Period of 10 years

From 1250 to 1270	Cultivated area in Acres	Crop out turn	Of which Zamindar's share at 1/6 per cent.	Average price per Mund	Value of grain at 1/6 per cent given in Mund	Rates per Acres
8896-7-5	6227-59	22432	22159-10-1	1-8-8	34145-4-11	5-7-8

III. In the alleged account of 1721, 87-151 is entered as Pongu of the Dintan portion of half Village. From the Zamindar's Ameni Mirabam of 1806 it appears that the Dintan portion was originally Parva Maragan & that 20-7-12 is fixed as in that year as the Pongu of the 1/6 of the Village or 3/6 of the Dintan portion. The Zamindar's account also shows that 1/6 of the Village held by the person N 1 to 5 of 16 was the Pongu of 20-7-12 & 1/6 of the Village was in possession of the Zamindar & he has no Pongu. The sum of paper 89-151 is entered as Pongu of the Dintan portion of half Village is therefore nominal one. Hence it is not in the settlement 1/6 of the Village as Pongu Village & 1/6 as Parva Maragan Village. It is clear on referring the papers that the Pongu of the person N 1 to 5 of 16 who appeared for the person N 1-2-3 & 4 of 16 say that they are all

III. The person N 1 to 5 of 16 who appeared for the person N 1-2-3 & 4 of 16 say that they are all doing the service for which the Dintan was granted - that is they are still employed in training of horses. The Range Officer says that since the person N 1 to 5 of 16 was transferred to the Range, these persons have no business with the Dintan & that he does not know whether they had work in the time of the Zamindar. I don't think that the persons N 1 to 5 of 16 are fit for the duty as they are good for nothing now. However as they say that they are doing service & as the nature of the service is of an occasional one, I recommend to confirm the 1/6 of the Village on 1/6 of assessed rate 1/6 on the person N 1 to 5 of 16 & 1/6 on the Range & all other Nachiger N 6 of 16. Though the Zamindar is enjoying the 1/6 of the Village since the last half century as personal grant, still it does belong to the service tenure. Hence I have also changed it with 1/6 of assessment. The ultimate decision will of course rest with the Revenue Officer.

IV. No statement about the area or about the boundaries on the part of the Range Officer. The boundaries now inserted in the revenue settlement correspond to those in the account of 1721. Hence the boundaries are confirmed here & the 1/6 of 80 pints are registered here as the area of the entire Village. 1/6 of the belongs to the Dintan portion. The Range Officer admitted that the 1/6 of the Village should be registered in the name of the Range as it is a portion of the Dintan portion of half Village shown in the account of 1721-1212 & as the Dintan was deducted from the area upon which the Permanent Settlement was based.

Valuation of half Village

V. Wet lands in this Village depend upon one large Tank. It is in repair. It is fed by a Jungle Stream. The Tank is filled annually. Plenty of water is not felt generally. The person N 1 to 5 of 16 claimed 35 Annas of water as follows: 1 Annas as water for the Range Officer & the person N 1 to 5 of 16 & 34 Annas as water for the Dintan portion of half Village. The Range Officer says that of the 35 Annas of water, 1 Annas is for the Range Officer & the person N 1 to 5 of 16 & 34 Annas are under cultivation as per Zamindar's account of the Zamindar on an average. Thus there is a trifling extent of water. The Range Officer & the person N 1 to 5 of 16 please that there is no excess in this Village over & above the Dintan area. This is not worthy of reliance. No jungle cultivation at all in this Village. Some of the wet lands are cultivated annually 2 times. No garden crops are raised. No sugar is of a superior quality generally. The average income of the Dintan portion of half Village as per statement of the person N 1 to 5 of 16 is 2480 Rupees per annum. This is deducted from the Zamindar's account. This comes at 6 Rupees per acre. Calculated for a period of 12 years previous to 1720 comes to 311 Rupees. This is deducted from the Zamindar's account. Hence the Zamindar's income of 3110 Rupees of the 30 Annas belonging to the half Village. The average assessed of the Range portion of half Village comes to 6 Rupees per acre. Hence the Zamindar's income of 3110 Rupees of the Range portion of half Village is confirmed as the value of the Dintan portion of half Village. It is said that the Range Officer & the person N 1 to 5 of 16 are all good for nothing now.
