

No 11

General Remarks. Small the Village of the Great Valley, with the exception of those, which possess a portion of the late American title, the Indians were civilized and a few years since. The extent entered in this Register is averaging little currency, was by Mr. Smith in 1735, and the extent of agreement shown, or those according to the revised scale introduced by Mr. Barclay in 1750 on the Great Plains. The rates have invariably been applied to be as and which have never to be put on to have since the revision - All? 1721 late rates are never sought either for Great or small lands.
