The Berij according to the Agraharadars Returns & the proposed Valuation of the Village.

The Ayakat value is	358-11-2	
The return of the Agraharadars [illegible]	108-12-0	
In the Rayat [illegible] the Cultivation Berij	254-0-0	
In the year of the Survey	235-5-6	
In the year [illegible] 35	57-2-0	

Set the [illegible] 244 acres [illegible] at 166-1-2 + 29 acres [illegible] at 69-4-1 [illegible] 273 acres [illegible] 235-5-6 was under cultivation

This shows the fluctuations of the Berij from the time of the Survey to the present date. The ~~average~~ the Berij according to the Returns of the Agraharadars is 108 Rs or a little more than 1/3 of the Ayakat Berij. It is true that the soil is rocky in a few places, [illegible] [illegible] any good [illegible] for believing such a low Berij [illegible] the [illegible] diminution in the Dry cultivation - [illegible] the [illegible] cultivation with a little reasonable care. The main cause of a fall in the cultivation is that the bank breached in F1227 - since when it has not been repaired - owing to the [illegible] of the Inamdars - But [illegible] how far this could form a [illegible] in favour of the community cannot be [illegible] settled. It is a fact, however, that the Berij never went higher than 254 Rs (Rayat [illegible] Berij) - & [illegible] [illegible] the bad soil, [illegible] the long ruined state of the bank [illegible] allow 25 percent on the whole [illegible] ~~[illegible]~~

~~[illegible] at the Survey [illegible] effect the [illegible] the average [illegible] value of the village~~

The reduction is therefore called for, as a matter of justice. For [illegible] the value I suppose they might claim the [illegible] [illegible] as on all the [illegible]. I therefore recommend [illegible]

xx [illegible] the Berij may be fixed [illegible] at 358-11-2 [illegible]

As the [illegible] village [illegible] [illegible] value [illegible] [illegible] in value -
