waivers among these sums.

The village is very poor and a wretched abode. A Reckon Village and so the valuation cannot be made on this point. But with a strong application the task may be compressed and the value of the village considerably raised. In 1837, the Crocker share, however, was only Rs 15-6-2. Owing the last 5 years it varied from a maximum of Rs 37-11-5 to a minimum of Rs 7-0-0. I wish to propose that the average Crocker share may be fixed on the basis of the highest year among the 5. The Crocker share in which is 37-11-5 denoting therefore for the purpose of the task, 1/2 of the same is 18-11-5. The remaining is 24-11-5. Add to it 1/2 of 24-11-5. 12-6-1. Add and
