This is a Circumference

This image shows a close-up of a page from an old book. The paper is heavily yellowed and stained, particularly with large, irregular brown and tan water stains. There are some faint, illegible markings at the top, possibly remnants of text or a signature. The texture of the paper appears rough and aged.

(flower garden) Now or when it came to be denoted to this
use there is no record whatever. The appearance of the
trees would lead to the belief that they are much more than
50 years old. The probability is that in the times when Govern-
ment was it was not matched so sharply as now, some one
connected with the Pto. occupied the land perhaps with
the connivance of the village officials and formed a
flower garden and that in time the existing trees grew
up and took up the garden.
