The particulars of the different Shares and the documents by which the alienations from the original families are supported are however set forth as far as those particulars have been ascertainable in regard to a grant of so ancient a date & one over which the Authorities have hitherto exercised no sort of Control.

The three villages were originally Granted together in one Grant & have been hitherto treated as such & the Jodi levied is also a lump Contribution for the three villages together. The Shares however are thus Held. The villages of Ranjanedu & Karatéra are together divided into 10 Shares & Nine Shares parts of a Share expressed in 20ths

Certain Notes —

Supposing the villages are to be treated as other ordinary Inams, it is best to deal with them according to the Karais & the Peria & are shown accordingly in a separate statement appended tho' the exact share of Shrotriem held by each individual C is also shown in Col: 18

There was a simple Paimash or survey but no Saravaie settlement of these villages and in that Paimash the villages of Kunjimédu & Kanapoi were almost all [illegible] & the rest as Punja & so to speak such lands have been since Converted for the Shrotriam duty into Punja (Nett) and the proper quota of the expences of Keeping up the irrigation Channel which distributes water to these Villages in Common with certain Agrm villages is levied by the Government — These particular lands are therefore more valued as by according to the rates prevailing in Neighbouring villages &
