The lands are now cultd by the Shrotriemdars themselves. They say they have no regular account of the ten years out turn. They have however given a return showing the extent of cultivation in each of the past ten years. According to that the highest cultivated dry was K 58 in F1264 & in wet K 79 in the same Fasli. As they say they have no account of the outturn of cultivation they have charged the cultivated extents at the old rates of assessment. The average cultn in the ten years is 52 Kanis in dry 64 in wet & 5 in garden. According to the highest [illegible]
