For the Inams belonging to the Abhishekakattalai the Pattolai account of Fusly 1221 is not available — The earliest Pattolai the manager the manager of the Kattalai has containing any details of extent &c. is of Fusly 1231. All previous accounts are said to have been lost in fire. In the account just referred to one hundred and seven Inam Tottams or Topes are entered as appertaining to this Kattalai and their extent as Velis 54 — 51 15/16. In the Pattolai of Fusly 1225 received from the Collectors office the same No. of Inam Topes as entered but the extent specified is less The difference may be due as I have stated in Register No. 64 to the fact that the extent recorded in the Pattolais represent the extents cultivated rather the entire areas of the Inams. Though accounts 50 years old are wanting, yet I think there is enough to prove that the Inams are valid. The District having been assumed more than 50 years ago such a large extent of Inam could not have possibly originated in fraud and looking to the entries in the account of Fusly 1225-1231 and 1239 in the last of which the former extents are quoted, I think it is not fair to charge these Inams any Fruit Rent.
