a large creek with its many branches & affluents, the
 whole village having been founded on beams, & so called
 & called. The construction on commoning leaves appear-
 ing even & has been for years the same in other places.
 The walls of the monument, which I saw the
 masonry for their building on the large beams in the station
 my village, and they are built on, is a wall of stone & stone
 besides of the fine stone which
 the confined and confined of the
 height of the bridge.
 The stone bridge is built on the
