For 1825

No account because there was no Car = garth made for the Village

The Topa land (Sub No 67) is just like the Real Minaha Gardens of the Kistna Dt. It was originally covered by a Topa, what is now brought almost under plough — these being now 4 to 5 Tamarind trees only, now the Theertham is 60 or 70 — Declustering the Topa land and enjoyed by the Institution for upwards of 60 yrs upon the remaining area of the Inam is 7-90-10 when I compared with F 1212 is a decrease — The account of F 1212 however is not a standard account — It has been superseded by that of the Survey of F 1216 according to which the Inam has kept & the Topa. In the account of F 1226 when the Lagam was Inam is not to be had, having been destroyed — For F 1229 there is an account of Daryaft — but the Daryaft does not seem to have continued to this Village — The Karnam recognises that the whole of this Inam is Dr — To be confirmed free six one F-C-60 long as the Pagoda exists — 7-R 16/12/64

The above correction was made on the strength of the Accounts of F 1216 when the Karnam & Jamin Vaikal stated that there must be the Topa area now in cultivation —
