Register No 24

Sheet No 540

1842 which is produced.

Poma Ditchit followed his examples and obtained similarly possession of another 1/5 share for him subsequently. He died, some time before his death, bequeath his 1/5 share to No 3 and her husband exclusively under a simple Cooper deed of 1st August 1852 which is also produced. Thus No 3 come to inherit 2/5 which she would give to No 1 & 2 to whom she is attached. The remaining 3/5 shares are got the common property of No 1, 2 and 4 in consequence of Ammani Ammal widow of Ramanuja Ditchit having withdrawn her interests in the Sham and having obtained from them a maintenance under the decree of the Arcadia Ditchit herself in O. S. No 326 of 1852 which is produced and which was confirmed on appeal with a slight alteration of the amount originally adjudged as the maintenance. But the unfortunate & strong is the ill feeling which exists between No 4 as one party & Nos 1 to 3 as the other that No 4 wishes to secure for himself greater shares in the Sham than No 1 & 2 and would also engross to their exclusion the 1/5 now enjoyed by No 3 whenever she should die on the ground that he performed the funeral rites for his deceased brother Poma Ditchit. Under this difference among the members of the family the present state of enjoyment is quite unsettled. The rents are received in advance by the two parties from Cultivators even at a sacrifice of their interests. Each party would not scruple to give receipts to them for any sums short of the true payment received, the only object in view being to deprive the other party of his share. The disputes between the two parties regarding the shares of each and that regarding the future reversion of No 3 1/5 is left to be adjusted by them amicably or their rents and it is recommended that the Sham may be confirmed to No 1 to 4 without recording the individual shares in one T. D. subject to a J. R. of 1/5 annually to Rs one while is agreed to.
