This is a Sava Sava land
 In the Survey, the whole of the tract
 Agabak was one crop land
 & the village & average is only the
 Peshawar crop. When surveyed
 land is cultivated with a 2^d crop,
 one half of the Peshawar crop is charged
 in addition & according collected. This
 Sava which was one crop land as others at
 the survey, has been yielding a 2^d crop. The
 Karnam Jodas Jambabadi Act of 1243/1244
 which shows that the Sava yielded 2 crops which
 may payment of 1/2 of the 2^d crop, to be made
 was described as one crop land. It yielded 2 crops
 in 1243/1244 & was allowed as Sava Sava.
 There has been no established rule, to regulate
 the charge of 2^d crop. People have been
 paying the 2^d crop also without payment. Some
 Karnams charge 1/2, & others do not as they please.
 The cases do not appear to have been settled each in its
 merits. But in cases of Pitham, an order was passed
 in 1847 by the Officer of P. D. B. that the 2^d crop
 of one crop which had been followed settled up & that in Pitham
 for the 2^d crop should remain undisturbed.
 In the present case there is no order on the
 subject, it is generally believed that Sava
 Sava fruits are allowed to benefit of the 2^d crop.
 As in this case, the 2^d crop enjoyed has been estimated as
 from 1243, by Karnam's Act, I recommend that 1/2 of the
 may be charged for the 2^d crop, & that the 1st crop
 be confirmed as Sava as matter of course.
 In one crop rate is 8-7-1. In 2^d crop rate is 4-6-7.
 But this 2^d crop is only occasional
 when the crop is not Sava Sava
 allowed as 2^d crop.
