alone was made to the extent of 1-16 ¹⁸⁹³
 as shown by the Ecuador. The bank appears to be
 Aguakut to belong exclusively to the people, & it is kept up
 at the cost of the ~~same~~ people. There is no use of the
 bank water seems to be a vestige of the Ecuador. As a general
 rule where the Impetuous source belongs exclusively to the Ecuador,
 the Ecuador is allowed being both to the crops as to the water as on
 one & the same river. The appt. on the river at one crop is 8/129-8-3.
 I think on the 2^d crop 72-0-9. I have been to the whole extent of one and gets
 a 2^d crop. I did therefore share the 2^d crop. It seems a 2^d crop is yielded
 on the average on an extent of 4 acres. It is a 2^d crop appt. for 5
 years is 43/8-0-4. I think Andamian 22 1/2. I did 2 for estimated
 the 2^d crop Andamian value at 22 1/2. I think it with the 2^d
 As regards the 1st crop 22 1/2

See the Azadat and the Saam is
Described as containing the Azadat
of the rank of nothing of rank. The
Expend was stated as 6-4-6 or 10-0-0
The 10-0-0 to Azadat Expend was stated
as 6-16-6⁰⁰ but this seems to be a blunder.
The Survey of Azadats in which the above appears
as 6-4-6 is a true copy of the original one at the
Survey, Kergan got by the Karam on Kadgar
chaupar with British initials.

[illegible]

3 The straw was all one crop raised at the same time & crop
occasionally raised. In 1871/72 for instance, the straw was raised
as the 1st crop also as usual. but no orders are found as to the 2nd crop.
In 1874 the 2nd crop cultivation was recorded as 1st - 2nd on Potatoes
hence. During the last 4 years, the 2nd crop *Andamanicum* has
been 25-4-8 - on average & the 1st crop *Andamanicum* was 70-13-10
In 1874, the Potatoes cultivation was raised but the cultivation

 But it is to appear in 40th December
 therein as ~~shown~~ ^{shown} in the ~~January~~ ^{January} ~~and~~ ^{and}
~~very~~ ^{very} the actual extent of cultivation has
 recorded as ~~shown~~ ^{shown} in the ~~Register~~ ^{Register} of ~~1890~~ ¹⁸⁹⁰ to
~~heavy exposed~~ ^{heavy exposed} was recorded as ~~7-3-24~~ ⁷⁻³⁻²⁴ which
 figures agree with the ~~actual~~ ^{actual} ~~shown~~ ^{shown} recorded
 above.

above -
2 As in the preceding case, in this also, an
expenditure connected with my 1815 is included
in the Jamaica fund from same year, (exact period cannot
now be ascertained). As recommended in Chas.
Surcharge $\frac{1}{2}$ £R given this additional trust which was
both required by the Surinder under peculiar circumstances.

[illegible][illegible]

4 - I will therefore include in the value of the stock, the one acre of crop
highest possible extent of 20 crop cultivation. The one acre of crop
has been raised on 6 bushels of land. It is a gift as per 65-6-
5- As regards the fluctuation of the 1st crop from black to 15 to 18,
it remains black. The negro proceeds in the settlement

5 - No report
a peculiarity remained the same. When the plant
is anomalous & there grows a double panicle. If the plant
reported that the seed yield was as 1st crop, the 1st crop was changed as
10-14 - per seed stalk - & when the 1st crop was 1st crop, it was
as 21 to 22% per seed stalk of land. The amount of seed for
to continue Pashanum cultivation in

Aug 2. Shows the full tendency to antique Pashanum cultivation
May 15th - 16th. It matters little whether the cultivation was
more first, or the Pashanum. The lands were all one
Pashanum. I think the Pashanum a step for the
step. Aug 2. to 10. The above explanation
