Total Avg 51-6-1.

The Nattam is levied at 2-7-2 of grain for a Kottah of land for each crop.
Of the Inam 9-13-7 7/8 is under cultivation, the remainder or 18-5 3/4 is the site of a bund
thrown by the Pagoda people for the protection of the arable land. This extent appears to be from time to time
for cultivation. The aggregate Jodi of the 1st crop is 53-12-, but if [illegible] under cultivation [illegible]
49-4-4. In course of time a portion of the [illegible] land may be brought under cultivation. [illegible]
therefore propose that the Jodi of the 1st crop be taken at 50 or [illegible]
This is a [illegible] [illegible] [illegible] land. No wet 2nd crop has ever been [illegible]. [illegible] appears there
is very little chance of the 2nd crop being cultivated with [illegible] no water is available [illegible]
the [illegible] crop.

About the [illegible] of land was cultivated with betel (Kodikkal) in F 1269 & 70
& 9 [illegible] in F 1271 & 72. This crop stands for 3 years. In the [illegible] season the betel crop was
[illegible] as 2nd crop & in the [illegible] season the same crop is [illegible] as 1st crop. Hence the
collections on account of the crop in F 1269, 70, 71 & 72. The aggregate Jodi of the 2nd crop
is 53-12-. The average collections during the last 3 years on account of the 2nd crop is 2-3-8.
No Betel garden was cultivated ~~[illegible]~~ in F 1273. It appears that the Betel cultivation [illegible]
there having been no water in the reservoirs. [illegible] for [illegible]. I recommend [illegible]
may be deducted from the [illegible] of the Inam ~~[illegible]~~ on account of the 2nd crop, [illegible] changing a Jodi
of [illegible] for the 2nd crop. The total Jodi for the entire Inam then becomes 53 [illegible] which may be
[illegible] taken as the Jodi to be fixed once for ever.

As to whether so small
an extent as the Inam is
of land is cultivated
with betel, the whole
Inam cannot be
treated as 2 crop.
In fact, no 2nd crop was ever raised.
I would confirm the
whole Inam as one crop
land, without prejudice
to the Inamdar's right to raise
the betel garden
on the ~~[illegible]~~ usual extent of
land.
The average 51-6- appears to

Sankaralinga
Swāmi Kovil
Tiruppani Inam.

Managed for the time being by the
Zemindar of Sivagiri
Varagunarāmapāndiya

These lands bearing an assessment of Rs 634-11-5 were granted by the Collector on Tax free tenure in lieu of the Tiruppani Inam Tithe on a gramam Inam of the value of Rs 634-11-5 on the 11th October 1856.

The assessment of the dry land Ac 3-1-4½ is Rs 54-13-10
Do of the wet land 71-9-6⅛ is Rs 639-13-7
74-11-2⅝ = 634-11-5

It is thus clear that 1 crop alone was granted as Inam.

In F1269. 12-12-5 was cultivated with a 2nd crop & assessment of the Fasal Jasti on is 56-6-3.

In F1271. 37-19-1 was cultivated with a 2nd crop the Fasal Jasti assessment of which 169-11-2

In F1273. 64-17-2 was cultivated with a 2nd crop the Fasal Jasti assessment of which is 290-2-9.
516-4-2

The 2nd crop revenue on these lands in F1269, 1271 & 1273 were treated as Inam. This exemption is not supported by the orders of the Revenue authorities. The non collection of Fasal Jasti is evidently an omission & is in contravention of the Collector's [illegible] to the Sub Collector No 161 of 1862 & the Sub Collector's order of the 28th June 1862 issued to the Tenkasi Tahsildar authorising the levy of half assessment as Fasal Jasti on Ayan or Tiruppani one crop lands when cultivated with 2nd crop. The second crop should go to Govt. This omission has been brought to the notice of the Collector.

* He does not know of what use they make of the Inam proceeds & requests that the Inams may be registered in his name as he is the Gurukkal of the Pagoda in question. The Wakdars contend that the Gurukkal has nothing to do with the management of the Kôvil, his duty being confined to preaching. This is a question of a private nature. The Inam is recommended to be confirmed to the Pagoda under Rule 1.
