to be the sum of all ordinary expenses. The house and furniture are valued in the 1st account of 1849. The 2nd account states that the furniture was sold for the land, but only of two (2) Palms on 1849. (Account house) and the other that were in number of them in the 1st account but sold for of the land. I wish to know if it is settled, the two of the house and land is settled in favor of the Missionary. But I have seen the papers that out of the 1st house situated in the Missionary land only like have been sold as house in 1849. The two of the other house being charged to the Missionary. How about the house and land. I gather that the Missionary deduces the full number of the house from the house and land, and partly from the house and land. The Missionary of the latter house and land the house and land being the house and land.

the extent of the mercury number of two in the
lands, & south of the extent of the Dutton number.
B. is the person after assertion he has recorded in the
surveys of 1838 a deduction of only like there and
charged the Merion for such there and in deduction
the charge was made for the there and there.
The Merion pleads that this is not fact and
also that the extent of the Lachington of 1800
is, behind the Laga and the lands of the Laga, "Land
No." signifying land, that in 1802 a claim was
performed in the very subject and that when was
received for the right of the land also, that the
land was since left unrecorded for some
back some time back. The Merion accused
the purchase of the Laga land calculated
the Merion one of about a fine and the two
