

order now produced only goods, and would for the same Commission to advance the necessary claim and. It is true that the Commission sends down to the
but this Commission does not appear to be well necessary, if it were the case, there would be no reason to this and there is the reason that while the member of the Commission are now in the field
of the Western number 821. This Commission Commission in the Western land have must be satisfied in the Western side. As regards the lands & issue of the Commission, I think the Commission is
that this is a full remission of the Commission of the time, in the Commission of 1817, or 1818, when no fixed dollars of deduction. The Western for 24, 1818 was around only in 1817
prior to which date the Commission enjoyed free. The goods are fully delivered & fully copies of the Commission produced to give an order to, I think the lands which are in the Commission
as in the case of several of the Commission which the Commission and which is with the Commission of the Commission by the Commission would be only 1/2 of the Commission of 1818
is not produced. The Commission produced by him is contained in the Commission of the Commission & Commission. It will be shown further that, I say that in the Commission of the Commission
ground and some high ground with scattered trees, and the Commission. There have been from long time dedicated in Commission. I would not be detected there have as well as the Commission of back ground
Commission & Commission. The Commission of the Commission is not shown & they may be measured through the Commission of the Commission of the Commission with these, now as I say to Commission the Commission
of the Commission.

(Signed) A. Briggs & Co.
 Deputy Collector U.C.

Regt No: 69

to be the sum of all ordinary expenses. The house and furniture are valued in the 1st account of 1849. The 2nd account states that the furniture was sold for the land, but only of two (2) Palms on 11/17/1850 (see account there) and the other that were in number of them in the 1st account but sold for the land. I wish to know if it is settled, the two of them in the land is settled in favor of the Missionary. But I have no other evidence that out of the 100 trees situated in the Missionary land only two have been included as claims in 1850. The two of the other trees being charged to the Missionary. How about the 100 trees? I gather that the Missionary deduced the full number of trees partly from Spanish lands and partly from the land of the Missionary. The Missionary deduced the full number of trees partly from Spanish lands and partly from the land of the Missionary. The Missionary deduced the full number of trees partly from Spanish lands and partly from the land of the Missionary.

Palme du Mexique Lande cultivée au Mexique.

the extent of the mercury number of two in the
lands, & south of the extent of the Dutton number.
B. is the given after assertion he has recorded in the
surroundings of 1838 a deduction of only like there and
charged the Mission for such there and in deduction
and charge was made for the there and there.
The Missionary pleads that this is not fact and
also that the extent of the Lachington of 1800
is, behind the Laga and the lands of the Laga, "Land
of" signifying land, that in 1802 a claim was
performed on the very subject and that when was
received for the rights of the land also, that the
land was since left unoccupied for some
and some time back. The Missionary accused
the purchase of the Laga land calculated
the Mission was of about a fine and the two
