MEDICAL BOARD.

Return of Sick in the various Civil Institutions and in the various jails at and throughout the Presidency during the year 1851, reviewed

Male Orphan Asylum.—Prevalence of ophthalmia in this institution observed.—The number treated being no fewer than 424 cases

Female Asylum.—Inmates healthy. No casualty had occurred for the three last years

General Hospital.—Increased number of admissions into the — attributed to the withdrawal of the certificates formerly required of patients

Hospital Stoppages.—Introduced in June last. A more general use of the institution expected from this measure

House of Industry.—Sickness and mortality considerable but sufficiently accounted for

Disconnection in future reports of the sanitary condition of the jails from that of the Civil Institutions, approved.—The reports on the Civil Hospitals and Asylums to be added to the general report on dispensaries annually submitted to Government in the Public Department and the report in the Judicial Department to be confined to jails at Madras and in the Mofussil

Jails.—Their general healthy condition ascribed to the remarkable cheapness of grain

Malabar and Canara.—Sickness and mortality not one-half the average of the nine preceding years

Ceded Districts.—Mortality more than double the average and sickness one-half more. Augmentation ascribed to the great amount of sickness which prevailed in the Cuddapah Jail

Southern Division.—Mortality in some jails considerable, but on the whole below the average of the last twelve years

Northern Division.—Remarkably healthy

Presidency do. do.

Cuddalore.—Mortality considerably below the average of the last twelve years.—Improvement attributed to the mixed diet allowed the prisoners and to their being frequently inspected with a view to the detection and prevention of disease

Mercara.—Mortality great—the prisoners being admitted into this jail in a very weakly state

Trichinopoly.—Sanitary condition of this jail very favorable, which is attributed to the use of the newly-constructed jail

Coimbatore.—Mortality, though heavy, was somewhat less than that of the deaths caused by diarrhoea, which was considerably mitigated after an allowance of animal food had been granted to the prisoners

Combacum.—Mortality above the average of last 12 years though less than in 1850

Salem.—The present healthy state of this jail contrasted with its former unhealthiness

Rajahmundry.—Ratio of deaths to strength in this jail less than the preceding year—attributed to the less crowded state of the jail

Cuddapah.—Unhealthy state of this jail ascribed by the Medical Officer to the nature of the diet given to the prisoners

Mangalore. Sanitary condition very satisfactory
