

DESCRIPTIVE MEMOIR OF SIVARAM OF THE
ARCOT TALUK.

1. **SITUATION.** This village is situated about 14 miles east of Arcot.

2. **AREA.** The boundary of this village remains unchanged by Settlement.

The area prior to Settlement was, omitting fractions, 177 acres; by Settlement it is 184 acres; increase 7 acres.

3. It must be distinctly borne in mind that a deduction of 20 per cent. has been made from the gross produce on account of unfavorable seasons and on account of any roads, channels, banks, paths, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any Government Peramboko in any Survey field, does not confer on the cultivator of that field the right of entering on such Peramboko or of in any way interfering with it and any unauthorized encroachment on such Peramboko will be severely dealt with. This applies to both Government and Inam lands. Survey excess to the extent of 10 per cent. being allowed free in respect to Inams, under Board's Circular No. 127.

4. **DEMACATION.** This village, as now formed by Settlement, contains 2 Khandams or sub-divisions and 35 Survey fields.

The demarcation marks erected and stand:

Boundary stations.	Division station.	Field stones.
13	1	306

The village officers have given receipts for them and are now responsible for their upkeep.

5. **STATISTICS.** The Statistics of the village, as ascertained by the Census of 1881, are as under ---

8. **WATERING.** None.

No deduction for lift is made in the case of lands partly supplied by wells in the wet season.

11. **SETTLEMENT.** Commencing from the frontier of Simanvalpattu village, block A, a tract of worst red loam, comprising Nos. 77 and 78, irrigated by Atankahavoy, is assessed in class XVI wet and Nos. 68 to 75, in class IX dry. South of A, block B, a spread of ordinary red loam, comprising Nos. 7 B and C, 13 to 15, 28 to 33, 40 to 43, 52 and 77 to 85, irrigated by Atankahavoy, is assessed in class XI wet and Nos. 7 A, 8 to 12, 53 to 55 and 87, in class VII dry. South of C, block D, an expanse of ordinary red sand, comprising Nos. 1 to 6 and 21 to 24, is assessed in class VI dry.

The above classification does not apply to the Porambo lands included in these blocks.

The lands in parts of blocks B and C, have been registered as permanent double crop and charged with one half in addition to the 1st crop assessment.

Fields unclassified in them in seasons when the supply of water fails will be assessed to remission of 2nd crop assessment. (Vide G. O. No. 680, dated 14 July 1874).

The lands in block A, as well as in the single crop lands of blocks B and C, may be compounded for as in future.

All farms have been registered as single or double crop with reference to the entries in the Tithe-decree issued by the Income Commissioner and in the case of such as have not been dealt with by him according to the present Revenue accounts.
