

**DESCRIPTIVE MEMOIR OF SITTANTANGAL OF THE
KALLAKURCHI TALUK.**

1. SITUATION. This village is situated about 18 miles north of Kallakurchi.

2. AREA. The boundary of this village remains unchanged by Settlement. The area prior to Settlement was, omitting fractions 215 acres; by Settlement it is, 460 acres; increase 245 acres.

3. It must be distinctly borne in mind that a deduction of 20 per cent. has been made from the gross produce on account of unfavourable seasons and on account of any roads, channels, banks, paths, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any Government Poramboke in any survey field, does not confer on the cultivator of that field the right of entering on such Poramboke, or of in any way interfering with it, and any unauthorized encroachment on such Poramboke will be severely dealt with. This applies to both Government and Inam lands; Survey excess to the extent of 10 per cent, being allowed free, in respect to Inams, under Board's Circular No. 127.

4. DEMARCATION. This village, as now formed by Settlement contains 1 Khandam or sub-division and 60 Survey fields.

No new fields have been laid out since Survey.

The demarcation marks erected and standing are:—

Boundary Stations.	Division Stations.	Field Stones.
28	...	241

The village officers have given receipts for them and are now responsible for their upkeep.

5. STATISTICS. The Statistics of the village, as ascertained by the Census of 1881, are as under:—

Bazaars.	Houses.	Population.	Land Pattahs as per Settlement.	Cattle.	Sheep.	Wells.
...	20	120	23	59	50	15

6. IRRIGATION. The revised area and assessment under each source of irrigation and the class assigned to each with reference to its supply, capacity and the quality of the irrigation are as under:—

7. The unirrigated lands are placed in the 2nd Group.

8. BALING. None.

No deduction for lift is made in the case of lands partly supplied by wells in the wet ayacut.

Lands irrigated solely by Doravu, Itifac and Dasabandham wells, are not liable to any charge for 2nd crop.

9. WITHIN WELLS LIABLE TO TIRIVAJASIT. None.

10. CROPS. The acreage of the crops cultivated in Paali 1299, as per Karmams account, is as under:—

11. **SETTLEMENT.** Commencing, block A, surrounded by B, a tract of best red sand, in which the village-site, is situated, comprising Nos. 3 to 11, 15 and 17, is assessed in class V dry. South of A, block B, a patch of good red loam, comprising Nos. 19 to 23 and 27 to 29, irrigated by the joint sources, of Periya Yeri and Sittiri, is assessed in class V wet. Almost surrounded by B, block C, a spread of ordinary red loam, comprising Nos. 12 to 14, 16, 23 to 26 and 30 to 44, irrigated by the same source, is assessed in class VI wet. South of C, block D, a patch of best red sand, comprising Nos. 43 A, E and F and 56 B and C, irrigated by the above mentioned sources, is assessed in class V wet, and Nos. 43B to D, 49, 50 and 56A, in class V dry. South of D, block E, a spread of good red sand, entirely surrounding the whole village, in which Periya Yeri and Sitteri, are situated, comprising Nos. 1 H and 45 to 47, irrigated by the same joint sources, is assessed in class VI wet, and Nos. 1A to G, 2, 18, 51 to 55 and 57 to 60, in class VI dry.

The above classification does not apply to the Peramboko lands included in these blocks.

The lands in parts of blocks B, C and E, have been compounded for as permanent double crop specially at $\frac{1}{2}$ the 1st crop assessment, a rate lower than the ordinary one having been allowed in consideration of the existence of numerous wells in wet ayacut.

The remaining single crop lands of the above blocks as well as those in block D, may be compounded for as permanent double crop at $\frac{1}{2}$ the 1st crop assessment as above.

12. The following table exhibits the revised assessment of the occupied area in the village:—
