DESCRIPTIVE MEMOIR

---

This village is situated 17 miles south-west of Kulittalei on the high road to Karur, and is to the south of Mayam. It is watered by the Ambavati channel, and the irrigation is extremely scanty. The soil is much mixed with soda and saltpetre, and consequently 200 numbers on a high level at the end of the channel are assessed in the 7th taram, and the remainder in the 6th. A large tract of upland panjai is assessed in the 5th taram. There is no permanent double crop. The wet lands are placed in the 5th group, and the dry in the 3rd.
