Alphabetical No. 77. Survey Map No. 5.

DESCRIPTIVE MEMOIR OF RAYAMBARAM OF THE UDAIYARPALAIYAM TALUK.

1. The Re-settlement was introduced into this village in Fasli 1304.

2. SITUATION.—This village is situated about 10 miles west of Udayarpalayam.

3. The area prior to Re-settlement was, omitting fractions, 2949 acres; by Re-settlement it is 2896 acres; decrease 53 acres.

The present Re-survey village comprises the under mentioned villages which up to 1895 formed separate Villages

Old village.	Corresponding new
Rayambaram	1 to 400.
Kaveri palaiyam	401 to 471.

The areas under each description of land as per Revenue and Re-settlement accounts are given below:—

As per Re-settlement accounts...	271	1508	1779	4	174	178	131	808

It must be distinctly borne in mind that a deduction of 10 & 20 per cent. for wet and dry respectively has been made from the gross produce on account of unfavourable seasons and on account of any roads, channels, banks, paths, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any Government poramboke in any survey field does not confer on the cultivator of that field the right of entering on such poramboke or of in any way interfering with it, and any unauthorized encroachment on such poramboke will be severely dealt with.

4. DEMARCATION.—This village, as now formed by Re-settlement, contains 24 blocks or sub-divisions and 471 Re-survey fields.

No new fields have been laid out since Re-survey.

The demarcation marks erected and standing are noted in the margin. The village officials have given receipts for them. The ryots are responsible for the maintenance of the survey marks. It is the duty of the village officers to prevent the destruction, injury or alteration of any survey mark and to report any such destruction, injury or alteration to the Revenue Inspector without delay.

10. IRRIGATION FROM WELLS WHICH HAVE SEPARATE AYAKAT.—Nil.

11. The unirrigated lands are placed in Group I.

(Note.—If the lands in a village are placed in more than one group, the fields under each group should be specified here.)

12. CONVERSION OF DRY TO WET AND VICE VERSA.—The adjoined table shows the rates of assessment to be adopted in converting lands from dry to wet and *vice versa* :—
