The area prior to settlement was, omitting fractions, 2,178 acres; by Settlement it is 2,347 acres: net increase by Settlement, 569 acres.

It must be distinctly borne in mind that a deduction of 10 per cent. has been made in calculating the rates of assessment, on all fields, wet or dry, on account of any roads, channels, paths, banks, &c., that may have been contained in with the cultivated area. The fact of the inclusion, therefore, of any such Government paranabake in any survey field does not confer on the cultivator of that field the right of entering on such paranabake or in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

**DEMARICATION.** This village, as now formed by settlement, contains 6 Khaddams or subdivisions, and 699 survey fields. The demarcation marks erected and standing are:

| Boundary Stones. | Objects | Stones at corners of fields. |

| 59               | 52      | 1,355                        |

These have all been inspected, and the field stones have been sunk to the level of the ground. The village officers have given receipts for this, and are now responsible for their upkeep.

**CENSUS STATISTICS.** The statistics of the village, as ascertained by the Census of 1871, are as under:—

**IRRIGATION.** This village is irrigated by the North Ramnadi channel from the first anicut on the Ramnadi river, by the Kallakal channel, and by two tanks, and the Kuttalampillakulam channel which are all supplied by the first named channel. The irrigation is good, but the situation is indifferent, and this village has accordingly been placed in the third group.

The revised area and assessment under each source of irrigation are as follows:—

**KUDI MARAMAT.** The Ryots have undertaken to keep the sluices clear of silt, to erect ring bonds in front of branches, to clear the distributing channels and the drainage channels, when needed, and to repair all regulating dams in these channels at their own cost, as per separate statement.
