The area prior to Settlement was, omitting fractions, 2,317 acres; by Settlement it is 2,495 acres; net increase by Settlement 178 acres.

It must be distinctly borne in mind that a deduction of 10 per cent. has been made in calculating the rates of assessment, on all fields, wet or dry, on account of any roads, channels, paths, banks, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any such Government poramboke in any Survey field does not confer on the cultivator of that field the right of entering on such poramboke or in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

Boundaries. This village, as now formed by Settlement, contains 7 Kandams or sub-divisions and 1,110 Survey fields. The demarcation marks erected and standing are:—

Boundary stones.	Obelisks.	Stones at corners of fields.
73	299	3,696

These have all been inspected and the field stones have been sunk to the level of the ground. The village officers have given receipts for them, and are now responsible for their up-keep.

The Statistics of the village, as ascertained by the Census of 1871, are as under:—

This village is irrigated by the Kunnadiyan channel, from the third ascent on the Tamburparai river and by four rain-fed tanks. The situation and irrigation are both excellent. This village has accordingly been placed in the first group.
