

DESCRIPTIVE MEMOIR OF ARASAPATTU OF THE
NANGUNERI TALUQ.

Situation. This, the only village under the irrigation of Arasapattu channel is situated ten miles west of Nanguneri.

Area. The boundary of this village remains unchanged by Settlement.

The area prior to Settlement was, omitting fractions, 477 acres; by Settlement it is 594 acres; net increase by Settlement 117 acres.

It must be distinctly borne in mind that a deduction of 10 per cent. has been made in calculating the rates of assessment on all fields, wet or dry, on account of any roads, channels, paths, banks, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any such Government poramboke in any Survey field does not confer on the cultivator of that field the right of entering on such poramboke or in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

Demarcation. This village, as now formed by Settlement, contains four Kandams or sub-divisions and 85 Survey fields. The demarcation marks erected and standing are:—

Boundary stones.	Offsets.	Stones at corners of fields.
43	42	165

These have all been inspected, and the field stones have been sunk to the level of the ground. The village officers have given receipts for them, and are now responsible for their up-keep.

Census. The Statistics of the village, as ascertained by the Census of Statistics, 1871, are as under:—

Houses.	Bamars.	Population.	Land Patches as per Settlement.		Wells.		Cattle.	Sheep.
			Single.	Joint.	Old.	New.		
			1	...	...	...	...	...

irrigation. This village is irrigated by the Arasapattu channel a branch of the Karumandiyammankal and by a tank supplied by the same. The situation and irrigation are both fair. This village has accordingly been placed in the second group.

The revised area and assessment under each source of irrigation are as follows:—

Name.	AREA.		ASSESSMENT.	
	Acres.	Cents.	Rs.	As.

Kadi Maranet. The ryots have undertaken to keep the sluices clear of silt, to erect ring bands in front of breaches, and to clear the distributing channels when needed, at their own cost, as per separate statement. The average of the crops cultivated in Fasil 1285, as per Curnam's accounts, is as under:—

Name of crop.*	Irrigated or dry.	Area in acres.
Rice, 1st crop	Irrigated	10

Settlement. Commencing from the south-west block A, comprising Nos. 57 to 65, 68 to 71, is assessed in Class V; north-east of A, block B, comprising Nos. 16 to 35, 75 is also assessed in Class V.

The following table exhibits the revised assessment of the village. Block B has been compounded for as permanent double crop at additional to the single crop assessment in Class V.

Deducting fixed remissions only, the net average of the land assessment for the past five years is Rupees 27; by Settlement it is Rupees 223; total increase Rupees 101. The former wet land assessment was calculated on the village average (Mottasarasari), which was Rupees 5-6-4 an acre for a single crop (Peshanam). The former commutation rate was Rupees 2-10-10 per grain cotton of five bushels for both Peshanam and Kar paddy.

There is no Building site in this village. The cultivating ryots dwell in the neighbouring villages of Kalakad and Pattai.

The following lands are held tax-free or on favorable terms:—
