No. 79.

DESCRIPTIVE MEMOIR OF KAMANERI OF THE NANGUNERI TALUQ.

Situation. This village, the seventh under the irrigation of the Sivalaperiyar channel, is situated six miles west of Nanguneri.

Area. The areas given below have been merged in this village by Settlement.

No.	Name of village.	Portion merged.	Area.		Remarks.
			Acres.	Cents.	
1	Kamaneri	Part.	119	71	
2	Kuturankulam	Part.	...	7	A fragment of a village interspersed in the fields of Kamaneri.
Total...			119	78	

The area prior to Settlement was, omitting fractions 120 acres; by Settlement it is 113 acres; not decreased by Settlement 2 acres.

It must be distinctly borne in mind that a deduction of 10 per cent. has been made in calculating the rates of assessment on all fields, wet or dry, on account of any roads, channels, paths, banks, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any such Government poramboke in any survey field does not confer on the cultivator of that field the right of entering on such poramboke or in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

Demarcation. This village, as now formed by Settlement, contains one Kandam or sub-division and 37 survey fields. The demarcation marks erected and standing are:—

Boundary stones.	Officers.	Stones at corners of fields.
16	32	76

These have all been inspected and the field stones have been sunk to the level of the ground. The village officers have given receipts for them, and are now responsible for their up-keep.

Census The Statistics of the village as ascertained by the Census of 1871, Statistics are as under:—

Houses.	Bazaars.	Population.	Land Patacha as per Settlement.		Wells.		Cattle.	Sheep.
			Single.	Joint.	Old.	New.		
91	2	429	1	1	4	2	486	1,088

Irrigation. This village is irrigated by a tank supplied by a branch of the Sivalaperian channel from the first or Talai anicut on the Karumandiyamankal. The situation and irrigation are both good. This village has accordingly been placed in the second group.

The revised area and assessment under each source of irrigation are as follows:—

Name.	Area.		Assessment.	
	Acres.	Cents.	Rs.	As.
Kannurikulam channel-fed tank	46	5	381	15

Nadi Maranai. The ryots have undertaken to keep the sluices clear of silt, to erect ring bunds in front of breaches, and to clear the distributing channels, when needed, at their own cost, as per separate statement.

Crops. The acreage of the crops cultivated in Fash 1285, as per Government accounts is as under:—

Name of crop.	Irrigated or dry.	Area in acres.
Rice, 1st crop...	Irrigated.	38
Betel vine		2
Total...		40
Cotton	Dry.	4
Pulses		8
Sami		2
Total...		14
Grand Total...		54

234

settlement. Commencing from the north block A, consisting of most of the Nanjah in the village, comprising Nos. 1 to 4, 8, 9, 15, 17 to 23, 27, 28, 37, is assessed in Class IV; included in A, Block B, compounded for as permanent double crop, comprising Nos. 5 to 7, 10 to 14 is assessed in Class IV. The lands supplied by Government wells are assessed in Class III dry. The dry lands are assessed in Class IX.

The following table exhibits the revised assessment of the village. Block B has been compounded for as permanent double crop at $\frac{1}{2}$ additional to the single crop assessment in Class IV.

Description of land.	Block.	Class.	IRRIGATED.						Dry.					
			Area.		Amount.		Rate per acre.		Area.		Amount.		Rate per acre.	
			Acres.	Cents.	Rs.	As.	Rs.	As.	Acres.	Cents.	Rs.	As.	Rs.	As.
Goodred loam ...	A	IV	31	47	235	1	7	8	...	...	...	...	...	...
Do do ...	B	IV	15	49	145	14	10	...	...	...	...	...	...	...
Garden ...	...	...	...	...	...	...	...	...	111	...	47	1	3	2
Worst red mud...	...	...	...	...	...	...	...	...	18	33	99	2	...	4
Total...	...	...	46	6	381	15	...	...	35	37	10	3	...	...

Deducting fixed remissions only, the net average of the land assessment for the past five years is Rupees 624; by Settlement it is Rupees 392; total reduction Rupees 232. The former wet land assessment was calculated on the village average (Motianasari) which was Rupees 10-11-7 an acre for a single crop (Peshanai), and Rupees 13-14-11 an acre for a second crop (Kari). The former commutation rate was Rupees 2-14-7 per grain cotta of five bushels for both Peshanai and Kari paddy.

The dry lands were held at four annas, ten pice an acre, subject to a remission of one anna two pice an acre as Chaturlagan and of two pice an acre as Stalunkaval.

Palayur, 1,070 trees paid an assessment of Rupees 38 in Fash 1285.

These were classed as under:—

Class.	Number.	Rate.		Amount in Rupees.
		Annas.	Pice.	
Paruvam	471	...	10	25
Kattu	434	...	5	12
Oleiveta	165	...	1	1
Total...	1,070	...	...	38

Besides these there are 78, growing seedlings that have hitherto paid no assessment. The charge for palm-trees growing on patiah lands owned by the land-holders has now been fixed at Rupees 17-0-0 per annum. The remaining trees on patiah-lands owned by others than the land-holders, as well as all trees on Government waste, &c., are now chargeable at one anna each for Paruam, six pice each for Kattu and Kai, and three pice each for Oleivetta. The seedlings on such lands will be charged for as they come to maturity. Such fields as are now free from tree-tax, will be free from all charge for trees grown during the term of the present Settlement.

Palmuyras are not to be planted on, or within, the bank of any irrigation work belonging to Government without the Collector's permission, and should the Collector think fit to cut the trees now growing on tank or channel banks, or on any other description of Government waste land, no claim for compensation on the part of the persons at present using such trees on payment of an annual tree-tax will be attended to, but the assessment of all trees so cut will be deducted from the tree pattaahs.

Bulldozing site. Is sufficient for present requirements.

Inams. The Chaturbagum and Stalamkaval deductions amounting to Rs. 1-14-0 and Rupees 0-6-9 respectively have been resumed.
