

No. 130

DESCRIPTIVE MEMOIR OF KODANKULAM OF THE NANGUNERI TALUQ.

Situation. This village is situated ten miles east of Nanguneri.

Area. The boundary of this village remains unchanged by Settlement.

The area prior to Settlement was, omitting fractions, 672 acres; by Settlement it is 694 acres; net increase by Settlement 22 acres.

It must be distinctly borne in mind that a deduction of 10 per cent. has been made in calculating the rates of assessment, on all fields, wet or dry, on account of any roads, channels, paths, banks, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any such Government poramboke in any Survey field, does not confer on the cultivator of that field the right of entering on such poramboke, or of in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

Demarcation. This village, as now formed by Settlement, contains three Kandams or sub-divisions, and 91 Survey fields.

The demarcation marks erected are :—

Boundary stones.	Off-sets.	Stones at corners of fields.
20	59	205

The village officers are now responsible for their up-keep.

Census Statistics. The Statistics of the village, as ascertained by the Census of 1871, are as under :—

Housees.	Bazars.	Population.	Land Pottahs as per Settlement.		Walls.		Cattle.	Sheep.
			Single.	Joint.	Old.	New.		
40	—	140	6	2	6	1	38	55

Irrigation. This village is irrigated by a rain-fed tank. The situation and irrigation are both indifferent. This village has accordingly been placed in the third group.

The revised area and assessment under the tank are as follows:—

Area.	Area.		Assessment.	
	Acres.	Cents.	Rs.	As.
Kodankulan rain-fed tank	31	06	182	4

Kud Maranai. The ryots have undertaken to keep the sluices clear of silt to erect ring bunds in front of breaches, and to clear the distributing channels when needed, at their own cost, as per separate statement.

Crops. The acreage of the crops cultivated in Fashi 1285, as per Curman's accounts, is as under:—

Name of crop.	Irrigated or dry.	Area in acres.
Rice, 1st crop	Irrigated.	20
Raggy		3

Settlement. The area under Kodankulan, a rain-fed tank, is assessed in Class V, except Nos. 20 to 23 which are assessed in Class VI. The lands supplied by Government wells are assessed in Class III dry. The dry lands are assessed in Class IX.

The following table exhibits the revised assessment of the village:—

Deducting fixed remissions only, the net average of the land assessment for the past five years, is Rupees 392; by Settlement it is Rupees 284; total reduction Rupees 108. The former wet land assessment was calculated on the village average (Mottasarasari) which was Rupees 7-9-2 an acre for a single crop (Peshanam) and Rupees 3-12-7 an acre for a second crop (Kar.). The former commutation rate was Rupees 2-13-2 per gram corah of five bushels for both Peshanam and Kar paddy.

The dry lands were held at three annas, six pie an acre.

Palayaras. 2,931 trees paid an assessment of Rupees 148 in Fashi 1285.

These were classed as under:—
