DESCRIPTIVE MEMOIR OF PARAITANKULAM OF THE
NANGUNERI TALUQ

Situation. This village, the fourth under the irrigation of the Sim'apertayan channel is situated seven miles west of Nanguneri.

Area. The areas given below have been merged in this village by Settlement.

No.	Name of village.	Portion merged.	Area.		Remarks.
			Acre.	Cents.	
1	Terkai Parayankulam ..	Part.	140	7	Fragments of villages forming the new village of Paraitankulam.
2	Kiltsankulam ...	Part.	1	90	
Total ..			141	1	

The area prior to Settlement was, omitting fractions 137 acres; by Settlement 141 222 acres; net increase by Settlement 55 acres.

It must be distinctly borne in mind that a deduction of 10 per cent. has been made in calculating the area of assessment on all fields, wet or dry, on account of any roads, channels, pollen banks, &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any such Government potturbaki in any survey field does not confer on the cultivator of that field the right of encroaching on such potturbaki, or in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

Demarcation. This village, as now formed by Settlement contains one Kamiam or sub-division and 74 survey fields. The demarcation marks erected and standing are:—

Boundary stones.	Offsets.	Stones at corners of fields.
13	23	188

These have all been inspected and the field stones have been sunk to the level of the ground. The village officers have given receipts for them, and are now responsible for their up-keep.

Census
Statistics.

The Statistics of the village as ascertained by the Census of 1871, are as under:—

Irrigation. This village is irrigated by a tank supplied by a branch of the Sivapattinam channel, from the first or Talar ament on the Karumandiyen-mankal. The situation and irrigation are both good. This village has accordingly been placed in the second group.

The revised area and assessment under each source of irrigation are as follows:—

The former net land assessment was calculated on the village average (Mottammaru) which was Rupees 11-9-1 an acre for a single crop (Peshnam), and Rupees 5-9-5 an acre for a second crop (Kar). The former estimation rate was Rupees 2-14-6 per grain cottah of five bushels for both Peshnam and Kar paddy.

as well as all trees on Government waste, &c., are now chargeable at one anna each for Paravani, six pice each for Kattu and Kai, and three pice each for Olevetta. The seedlings on such lands will be charged for as they come to maturity. Such fields as are now free from tree-tax, will be free from all charge for trees grown during the term of the present Settlement.

Palmyras are not to be planted on, or within the banks of any irrigation works belonging to Government without the Collector's permission, and should the Collector think fit to cut the trees now growing on tank or channel banks, or on any other description of Government waste land, no claim for compensation on the part of the persons at present using such trees on payment of an annual tree-tax will be attended to, but the assessment of all trees so cut will be deducted from the tree patta-tax.
