

# DESCRIPTIVE MEMOIR OF KULASEKARAPATTI OF THE TENKASI TALUQ

**SITUATION.** This village, the third under the irrigation of the Aludakannir river, is situated four miles east of Tenkasi.

**AREA.** The northern portion of the large village of Kulasekarapatti now forms this new village.

The area prior to Settlement was, omitting fractions, 4993 acres; by Settlement it is 5602 acres; net increase by Settlement 609 acres.

It must be distinctly borne in mind that a deduction of 10 per cent. has been made in calculating the rates of assessment, on all fields, wet or dry, on account of any roads, channels, paths, banks &c., that may have been measured in with the cultivated area. The fact of the inclusion, therefore, of any such Government Poramboke in any Survey field does not confer on the cultivator of that field the right of entering on such Poramboke or in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

**DEMARICATION.** This village, as now formed by Settlement, contains 6 Kandams or subdivisions and 1129 Survey fields.

The demarcation marks erected and standing are:—

| Boundary stones. | Objects.                                                                          | Stones at corners of fields. |
|------------------|-----------------------------------------------------------------------------------|------------------------------|
| 107              |  | 2763                         |

These have all been inspected and the field stones have been sunk to the level of the ground.

The village officers have given receipts for them, and are now responsible for their up-keep.

**CENSUS STATISTICS.** The Statistics of the village, as ascertained by the Census of 1871, are as under.

**IRRIGATION.** This village is irrigated by two tanks fed by the Semkulam Channel, from the second anicut on the Aludakannir river. There are also two rain-fed tanks in this village. The situation and irrigation are both indifferent. This village has accordingly been placed in the third group.

The revised area and assessment under each source of irrigation are as follows:—

**SETTLEMENT.** The river irrigated portion of this village under the Kulasekaramper and Avarantavikulam tanks, poorly irrigated and far from the ancient, comprising Nos. 905 to 915, 917, 918, 920 to 937, 939 to 979 is assessed in class VII. The area under Puhungulam, a rain-fed tank, is also assessed in class VII, and that under Mahadevankulam, another rain-fed tank, is assessed in class VIII. The lands supplied by Government wells are assessed in class II dry.

The dry lands are assessed in classes VI and VII.

The following table exhibits the revised assessment of the village. The whole of the irrigated area has been compounded for as permanent double crop at  $\frac{1}{2}$  additional to the single crop assessment.

Deducting fixed remissions only, the net average of the land assessment for the past five years is Rs. 3,398; by Settlement it is Rs. 3,491; total increase Rs. 93. The former wet land assessment was calculated partly on the village average (Mettasarasari) and partly on the irrigation average (Peravurarasari.) These varied from Rs. 3-8-0 to Rs. 4-11-0 ah acre for a single crop (Peshnam) and from Rs. 1-12-0 to Rs. 2-9-1 an acre for a second crop (Kar.) The former commutation rate was Rs. 2-1-11 per grain cottah of five bushels for both Peshnam and Kar paddy.

The dry lands were held at thirteen annas and seven pice an acre, subject to a remission of five pice an acre as Stalamkaval.
