

# DESCRIPTIVE MEMOIR OF VADAKARAI MELPIDAGAI OF THE TENKASI TALUQ.

**SITUATION.** This village, the second under the irrigation of the Anumanadi river, is situated eight miles north of Tenkasi, on the Atchenkóvil branch of road No. XI, from Tenkasi to Madura via Strivilliputtúr.

**AREA.** The western division of the large village of Vadakarai now forms this new village of Vadakarai Melpidagai. The area prior to Settlement was, omitting fractions, 1053 acres; by Settlement it is 1191 acres; net increase by Settlement 141 acres.

It must be distinctly borne in mind that a deduction of 10 per cent has been made in calculating the rates of assessment, on all fields wet or dry, on account of any roads, channels, paths, banks, &c. that may have been measured in with the cultivated area. The fact of the inclusion therefore of any such Government poramboke in any survey field does not confer on the cultivator of that field the right of entering on such poramboke or in any way interfering with it, and any unauthorized encroachment on it will be severely punished.

**DEMARICATION.** This village as now formed by Settlement contains 9 Kandams or subdivisions and 588 survey fields. The demarcation marks erected and standing are:—

| Boundary stones. | Offsets. | Stones at corners of fields. |
|------------------|----------|------------------------------|
| 30               | 155      | 1425                         |

These have all been inspected and the field stones have been sunk to the level of the ground. The Village Officers have given receipts for them, and are now responsible for their up-keep.

**CENSUS STATISTICS.** The Statistics of the village, as ascertained by the census of 1871, are as under.

**IRRIGATION.** This village is irrigated by the Karusakál and Panbulikál channels from the second and third alicuts on the Anumanadi river, and by two tanks fed by the Karusakál and Máttukál channels, the latter leading from the first alicut on the river; also by five tanks fed by two jungle streams. The irrigation is fair but the situation is indifferent. This village has accordingly been placed in the third group.

**KUDI MARAMAT.** The ryots have undertaken to keep the sluices clear of silt, to erect ring bunds in front of breaches, to clear the distributing channels and the drainage channels, when needed, at their own cost, as per separate statement.

The revised area and assessment under each source of irrigation are as follows.
