Madura 11th July 1847 E. E. J. Pr. (Signed) R. D. Parker Collector

To, R. D. Parker Esqre
Collector of Madura.

Sir.

I have the honor to submit a report on the Settlement of the 4 Taluks of Tadicombo, Iyempully, Nellacottah and Tenkarai, forming the Sub Division of the Collectorate of Madura, for the official year 1256.-

I assumed charge of the Sub Division on the 8th of April, at which date the arrangement for the Settlement has been in force in the preceding year.-

Season

As far as I have been able to learn from enquiries that I made, the season, though unfavorable for the Kanjai, does not appear to have been so for the Poonjai Cultivation.-

The first crops of Rice, in this District, or as they are called, Adi madangal Kadai, are gathered in about the middle or end of July, the second or Kadum which is the greatest, is reaped early in March.-

The dry Grains, in ear are reaped

reaped from the Month of September to the end of November, being sown in June, July and August. The Pulse and other inferior Grains, are sown in July till November, and are gathered from November to July.

6. The Kodai Crops were good. The rain fell abundantly in April and May 1847; and the Cultivation during these months, which was brought to account in Fusly 1256, exceeded the Cultivation of the same season, in 1255, by Cawnies 2763.

7 In August and September, there were seasonable falls of rain, and the Cultivation of the dry grain, was carried on with same vigor. The Punjai Cultivation for Fusly 1256/1846/47, during these months, also shews an increase over the Cultivation of the same period in 1255/1845/46 to the extent of Cawnies 1296 3-13½. In January, the dry grain Cultivation amounted to Cawnies 110,952-6½ or Rupees 204,458-15-7.

8. The season was not so favorable for the Rice Cultivation. The first burst of the N.E. Monsoon, seemed to promise well, but the small quantity of rain that fell afterwards, occasioned a Decrease in this description of Cultivation.

Cultivation in the Taloks, whilst, from the almost entire cessation of it after the Month of December, the Crops were scanty, and Remission became, in many instances necessary, from their entire failure.

9. The following Tables will shew the number of Villages in which Rain fell, in the four Taloks, during the first six months of the harvest year, and the number of days on which it is known by the Village Accounts to have fallen.

Months

6732. Fort St. George 4th May 1848

December	11	4	12	"

Prices. 10. The deficiency of produce was, however, in a great measure, made up to the Ryots, by the unusually high prices which the Grain secured thereDuring the 1st quarter of the year, the price of Skemba rice, had risen to Rs as ps 2-2-10. During the next quarter, it was 2-1-10; and during the 3rd quarter, it had fallen to 2-1-4. In the last quarter it was as low as 1-15-

11. A list of the prices of all Grains, during the Fasly is appended, compared with the prices during the last 4 years.

Prices

0734. Fort St.t George 4.th May 1848

Collections- 12 - . The Revenues have almost all been collected without any difficulty. The small balance remaining unpaid at the date of writing this Report, amounting to Rupees 25-12- will I hope, be shortly realized, without the necessity of bringing the property of the Defaulters to sale.

13 The net Settlement amounted, in the aggregate, to Rupees 3,69,114-6-8; and exceeded that of Fusly 1255, by Rupees 3,650-10-8 as exhibited in the following Comparative Statement.

The

Fort St. George 4th May 1848

Cultivation

11. The extent of lands included in the Settlement for Fusly 1256, was Cawnies 1,44,167—14—, the survey assessment on which amounted to Rupees 1,52,791-10-3 exceeding by Cawnies 6788-5¼ and Rupees 7,512—7—4, the extent and survey value of the Lands on which the Settlement of the preceding year was framed. The extension of Cultivation took place chiefly in Tenkarai

15. In that Talook there was an Increase of Cultivation under the general head of Poonjai of Cawnies 4174-6¼ and a Decrease under that of Nunjai of Cawnies 329-2¼. In the Sadicamboo Talook there was a Decrease under the head of Nunjai of Cawnies 791-8¾ and an Increase under that of Poonjai of Cawnies 2498-9. In the Talook of Nellacottah there was a Decrease under the head of Nunjai of Cawnies 38-7, and an Increase under that of Poonjai of Cawnies 292-4. In the Iyeimpully Talook, there occurred a Decrease under the head of Nunjai of Cawnies 135-11½ and

Fort St. George 4th May 18. 1848

and an Increase under that of Po
of Cawnies 1117-15½ Rupees 1,655

16. The deductions from a Talook
full survey assessment, allowed
the Settlement of Fusly 1256 amou
in the aggregate, to Rupees 84,027-
of which Rupees 29,020-13-7 were
remitted in Sadicamboo, Rupees
7953-10-8 in Iyempully Rupees
19,418-1-3 in Nellacottah, and Ru:
:pees 27,634-7-1 in Tenkarai or Ra:
:pees 4,180-4-4 more throughout
the whole Sub Division, than
were similarly granted in the pre:
:ceding Fusly.

17. The Remission made
in Fusly 1256, on account of Shavy
or Crops destroyed by drought, in
consequence of the unfavorable nat:
:ure of the season, was Rupees 4,252-
12-4 more than in Fusly 1255.

Shavy 18. The subjoyned state:
:ment will shew the items for
which Shavy was granted.—

19. The Tadicombo and Nel-
:lacottah Talooks are chiefly de-
:pendant on small Tanks filled
by Rain:- In these the Percentage is
therefore higher than in the Talooks
of Syempully and Tenkarai which
are chiefly irrigated by channels.-

20- By the annexed State-
:ment it will be seen that Shaiy accum-
:ted in 67 Villages in the Sub Division
In Tadicomboo it was consider-
:able The amount reported by the
Village Officers was Rupees 4,796-
9-11- Out of this amount, Rupees
613-10-11 were struck out as unfit
for remission, on the report of
the

Fort St. George 4th May 1848

the Officers deputed to examine the
crops.-

21 In Syempully, the amount
reported by the Village authori-
:ties was Rupees 193-8-4. of which
Rupees 25-10-8 were rejected by
the Talook authorities as unfit.-

22- In Tenkarai, the amount
originally sent in was Rupees
2,669-1-4. This was reduced, on ex-
:amination, by Rupees 2,050-7-9-

23- In Nellacottah, the
sum claimed was Rupees 1,648-
15-1- The Talook Servants -
disallowed Rupees 1,494-11-3

The

Fort St. George 4th May 1848.

24 The total amount rejected, on the report of the Talook authorities, out of Rupees 9,308-2-8 claimed, was Rupees 4,184-6-8, or nearly one half, leaving the sum of Rupees 5,123-12-0, which they recommended should be remitted.—

25 The Talook authorities were directed to reject all claims for short produce; crops destroyed by Cattle, or withered crops not present, as well as cases in which it appeared that a 2d. Crop had been raised on Shavy lands.—

26. The accounts submitted were fully scrutinized in the Hoozoor, and Remission was only granted where the withholding exceeded 10 per cent of the Ryots produce and in every case in which Remission was granted, the usual Deduction of 10 per cent on the total holding was made.

27 The preceding Tables shew that the amount originally reported, underwent a reduction of Rupees 2,170-8, in the Hoozoor, beyond that made in the

the Talooks; and that the sum of Rupees 1,655-8-0 which had been rejected in the Talooks, was admitted in the Hoozoor under the head of Matalivoo. The peculiar circumstances under which this amount was allowed, will be hereafter explained.—

28. The claims of 118 applicants were rejected entirely, because their loss from Shavy was not shewn to amount to ten per cent of their holdings.— The price of Rice was, during the harvest time of wet grain, 130 per cent in excess of the commutation prices.— The grain, by price, was therefore, in these cases, more than sufficient to make up the loss from deficiency of produce.—

29. In the case of 80 persons, Rupees 1,765-1-0 were deducted under the rule referred to in the latter part of the 26th Paragraph.—

30. In 162 Cases the deduction was made, though the whole of the Ryots produce was lost.—

Statement.

Fort St. George 4th May 1848.

Statement shewing particulars of the deductions made in the Fuzzool [illegible] the accounts submitted by the Talook Officers, of individuals entitled to remission on account of Shavy—

By a reference to the 9th & 31. Parah of the Proceedings of the Board of Revenue, under date 18th October 1832, it would appear that this Rule was adopted in order to cover suspected losses arising from exaggerated demands and frauds, and was objected to by the Board of Revenue, on the ground of its tendency having rather to create than to cure such exaggerations, and in Parah 5 of the Board's Proceedings of the 20th June 1833, it was ordered to be discontinued, under orders from Government of 8th February 1833.—

32. The imperfect state of the records of my Office, does not enable me to trace out the cause of the continued observance of a rule, which, though it may meet with advocacy in cases where the losses of the Cultivator are small, cannot, I think, be justly maintained, where the whole, or nearly the whole, of his Crops have perished.— It undoubtedly, is a most essential, as well as most politic consideration, in every Settlement, that the Cultivator should enjoy such a fair profit, after deducting for the return of

of labor and stock, as shall render his occupancy of the land, a valuable interest. Substantial Cultivators afford the best security of Agricultural improvement, and best ensure stability to the Government revenues.—

33. The Board, in their Proceedings of the 12th July last, have permitted the relaxation of the rule, so far as it affects the Cases of parties proved to have lost the whole of their produce.—

34. I was not aware of the existence of the two former orders quoted above, till a late date, and the Proceedings of the 12th were only received on the 27th July, after the Settlement had been completed under the existing rules, from which I did not consider myself at liberty to depart, especially under the peculiar circumstances of my very recent appointment to the District.—

35. In regard to the Remission of Rupees 1,655—8—"— allowed under the head of Matalivoo, I deem it necessary to explain that the Ryots of the Village of Cotampolliem, attached to the Talook of Tenkarai, and of the

the Ryots in the Villages of Vannampetty, Combapetty, and Poojaripetty, in the Nellacottah Talook, refused to receive their Pottahs, in consequence of no Remission having been granted them for their shavy, which was returned by the Talook authorities under the head of Malavoo.—

36. After a long and detailed personal enquiry into the periodical accounts of Cultivation, and of the returns of water, as well as after an examination of the Inhabitants, and Village Officers deputed to examine the Crops; I felt satisfied, from the quantity of water shewn to have been received, that the Crops could not have been matured; and that the Cattle had only been permitted to graze on the withered grain, after the people had been wearied out by delay in waiting for the inspecting Officers, who did not arrive till the expiration of 3 months from the date of the first Report. I considered therefore that these were cases in which I should be justified in availing

availing myself of the discretion allowed in the Board's Proceedings of the 12th July; and accordingly, granted Remission where the loss sustained, constituted a considerable portion of a Ryot's whole cultivation.—

37. The Cash Remission in the Fasly under report, fell short of the Remission allowed in Fasly 1255, by Rupees 14—13—"—

38. The Moonasib or Discretionary Remission amounted to Rupees 14,933. 11—5. in Fasly 1256—, exceeding the reduction made in Fasly 1255, by Rupees 1,470. 15—2. in consequence of the cultivation of lands on which the Remission was ordered by Mr Peter, being increased in the past Fasly, but, though there is an increase in the Remission, the percentage will be found lower in the latter than in the former Fasly.—

39. The Decrease in the Kooloomaut, has arisen from a larger quantity of land enjoying the Remission, being brought under Cultivation in 1256.—

The

Fort St George 4th May 1848

40 The Remission on account of Beetle &c Gardens, is trifling, amounting to Rupees 55—13—11 or 89—7—0 less than in Fusly 1255. It is caused by the Gardens being destroyed.

41 The Seervai Cammee amounts to Rupees 4,164—15—2, as detailed in the statement, and, on a comparison with Fusly 1255, shews a Decrease of Rupees 455—10—5. This reduction is occasioned by the reversion of Cultivation of a more valuable Kind, to that of an inferior description.—

42 There is a small Remission of 30—12—5 on account of Crops destroyed by water.—This was occasioned by the sudden and unusually heavy falls of rain in April.—

43 The Remission of half the tax on Gardens cultivated with one Crop, was granted on the receipt of a letter from the late Principal Collector of Madura, dated 18th February last, communicating the Boards permission of the 8th idem, to that effect, with reference to the unfavorable state of the weather. The quantity of land brought under Cultivation, in consequence of this indulgence, was nearly 52 Cawnies, and belonged to the Ryots of 17 Villages attached to the Talooks of Tadicomboo and Nellacottah, as seen below.—

Statement

Fort St George 4th May 1848

Statement shewing particulars of Garden land Cultivated with one Crop.

Total	17	51 15/2	310 15 1	147 2 .	163 13 1

44 The small remission for waste lands, improperly entered in the accounts as Cultivated, seems to need no remark.—

Sugar-cane 45 The same rules were acted upon in Fusly 1256, which were in force during Fusly 1255, regarding the Assessment of the Sugar-cane Cultivated on alleged one Crop lands.—The accounts in the possession of the Village Curnums, as far as I have been enabled to examine them, afford very imperfect data for ascertaining what lands were assessed as two Crop and what as one Crop, by Mr Burdis.—

Out of several Village accounts

46

accounts examined, I found in only two this distinction maintained in the Fysul accounts. In the Village of Battagoontah, I found that the double Crop lands under Tanks are arranged under 4 Classes, ranging from 50 to 36 Fanams, and that double Crop lands, watered by Channels, were only in three Classes, from 45 to 27 Fanams. — The one Crop lands were also distinguished as those watered by Tanks and those watered by Channels. — The first contain 5 Classes, the second 7, varying respectively from 27 to 10, and from 27 to 6 Fanams. — From this Statement it will be seen that the highest Class of one Crop lands, is rated equally with the lowest class of double Crop lands. — And, hence the necessity for some modification in the rule now in force, which is based on the assumption that all double Crop lands are more highly assessed than those producing only one Crop. — This will be still more apparent from a consideration of the following Tables, shewing the different survey rates of Assessment fixed by Mr Hurdis on the wet land of Battagoontah and the Munasib rates of Mr Peter. The latter Remission does not appear to have been moderately. — The Assessment of all the double Crop lands, with the exception of the last Class of lands watered by Channels were reduced to 27 Fanams. The last Class of lands watered by Channels was fixed at 20 Fanams. — The 1st Class single Crop lands were also reduced to 20 Fanams; and reductions were made on the 3rd 4th and 5th Classes of one Crop lands

lands: the remaining Classes were unaltered. —

		6	6

47. If it is imperative and proper that an additional rate should be imposed on all one Crop lands used for this kind of Cultivation, it is obvious from the rule fixing 19 Fanams as the maximum assessment of single Crop lands that the 1st Class one Crop lands of Battagoontah, which are assessed at 20 Fanams would evade the payment of the additional tax.—

48. The rule is therefore not, as the Board have observed, sufficiently perfect to meet all Cases, and, adverting to the variety of rates found to exist in Villages Cultivated with single and double Crop lands—a variety so great as to lead Mr. Burdes, in his report of the 16th February 1803, to remark that "without explanation it would," be a matter of astonishment."—I conceive it would be impossible from any number of averages, even to approximate to a standard, which could with safety or justice be assumed as the limit of two Crop lands.—

49. It is only by going to the fountain head, the Fysul Accounts that we can hope to clearly to ascertain, distinguish and apportion, with practical exactness, to Known or measured portions of land to which they were originally made applicable, the rates fixed by Mr. Burdes.—

50. To collect a number of averages from different Villages, unite them, and be sure of coming to a right conclusion, from which to form a just comparative standard for future settlement, would be impossible, without retrospective enquiry, and following the settlement of each Village in its course, from the place of original outset, and therefore to nothing can be more vague and uncertain than the result of investigations thus instituted, to acquire a knowledge of the method pursued in the first Settlement.—

51 As an illustration of this I may refer to the extra rate of assessment assumed to have been fixed by Mr. Hurdis on double Crop lands.—

52 In the 2d Parah of his letter of the 19th March 1838, Mr. Blackburne States that in fixing the assessment on two Crop lands in Dindigul, Mr. Hurdis seems to have estimated the produce of one Joontah for the Rodai (or mid Summer crop say at Sulums 12½ and that of the Peshanam (or Spring) at . . 10 .

Total . . 22½

Deduct 20 per cent for Village Commun expenses (podooseluvoo) . . . . } 4½ / 18

The Government half Share, is . . . 9

Commutation at 4 Cully fanams per Cullam, is Cully fanams . . . } 36

53 From this Statement it was assumed that the Peshanam was estimated by Mr. Hurdis in the rates of 80 per cent to that of the Rodai Crop.—

54 It may perhaps be sufficient to let Mr. Hurdis speak for himself. In the 73d Para of the Report above quoted, it is Stated.—

55 "The lands in Paddy fields yielding 2 Crops, are ascertained to be 562 5/8 Joontahs; and

"and giving per Goontah from 28 to 44 Fanams as
the birkar rent, the highest of which was follows.—
"The 1.st Crop of the best of wet lands 17 — "
"The 2.d Crop from the same grounds 8 — 6

Total 25 — 6

"Sotundrums @ a equal 12½ per cent 3 2 4/4
22 — 3 4/4
"Ryots Share 11 — 11 10/16
"Circar Share 11 —
"The fractions being let go to the Ryots, gives
"at the rate of 4 Fanams per Cullam 44 Fanams
"per goontah."—

56 It is clear from this that the Produce of the 2.d Crop was rated at half that of the 1.st and that the ratio would therefore be 50 and not 80 per cent. Again, the Sotundrums are fixed by Mr. Hurdis at 12½ and not at 20 per cent as assumed by Mr. Blackburne.—

57 In the 74.th Parah Mr. Hurdis shows that the lowest rate of the lands giving two crops is thus settled.

1.st Crop produces 10 — 6
2.d Crop 5 — 4
Total produce 16 —
Sotundrum 4.th of 12½ per cent 2 —
Remainder 14
Ryots Share 7
Circar Share 7 which

which at the same price gives the lowest rate noted 28 fanams.—

58 Here again are fixed the proportions as two to one and the Sotundrum fixed at 12½ per cent.—

59 It is true that these instances apply to only one Village, that of Melonangkum, but there is no reason why we should assume that these principles of assessing double Crops was departed from in other Villages.—

60 The following quotation from Mr. Campbells Report of the 6.th November 1826, addressed to Sir Thos. Munro at the close of his tour in the Southern Provinces, would indicate that he, at least, was under the impression that the additions placed upon two crop over the assessment of one crop lands, was 50 per cent. He says, "and if some opinion is required from "me, I should add that if in addition to this for "the two crop wet lands, one third is deducted — "when a Second crop is not grown."—

61 While the 99.th Para of Mr. Hurdis' Report clearly shews that 12½ per cent was the extreme amount deducted on account of Sotundrums

62 "The general assessment on the Vaunjee paddy lands, is made on the Cadamary division

"division of the crop, after deducting the Sotundrum
"which cover all the proper expenses that the
"Cultivator should attend to, and which amount to
"12½ per cent."—

63 The above appears to be sufficient to shew the danger of depending on Statements framed on averages, and shews the necessity of using the only safe criterion, the Fysul accounts.—

64 But the subjoined Extract from the 15th Parah of Mr. Campbell's Report to the late Sir T. Monro dated 6th November 1826 would lead to the Conclusion that detailed accounts of the rates of Peeravi of all the Villages are not to be found.—

65 "That such instructions are urgently
"requisite, seems evident from the fact that though
"Ryotwar Settlements founded on these Surveys have
"been now in operation during the last 12 years the
"Collector, under date the 28th October last reports,
"that of 705 Villages in Madura and 455 in Dindigul
"the Accounts for 182 in the former, and 27 in the
"latter are not now forthcoming either from
"their destruction by fire or white-ants
"whilst in the Curnams hands, or by the
"non-delivery of them to the Successors of
"those Curnams, who have died or been dis-
-missed, that those for only 28 Villages in Madura and 166 in

"in Dindigul exist in the Hoozoor; and that
"those for 523 Villages in the former and 412 in
"the latter District exist only in Tamil in the
"hands of the Village Curnams alone."—

66 From this it would appear that out of 455 Villages in Dindigul, the Accounts for only 166 exist in the Hoozoor, though there were stated to be 412 Copies in Tamil in the hands of the Village Curnams alone.—

67 The value to be attached to Accounts pro-
-duced by the Village Curnams and the difficulties experienced by Mr Campbell, in obtaining Correct Accounts, with all the authority and appli-
-ances at his command are strongly set forth in Paragraphs 183 and 184

68 "It will hardly, however, be safe to make
"this new distribution of the Draught upon the
"Accounts hitherto received by the Collector the Hoo-
-bas assessment. It was stated to me that of the in-
-equalities in the Hoobas itself, even secular demon-
"stration might be obtained by personal inspection
"of the fields in the Village mentioned in
"Paragraph 177- I accordingly rode over them with
"the Principal Collector and his Cutcherry, who
"directed my particular notice to the very first field
"No 1. on which the original Hoobas was stated to
"be six fully Fanams, whilst the other six fields

around

"around it Stood assessed at ten, thirteen and
"fifteen Fanams. It certainly was the nearest to the
"Village, the easiest manured, and both in Soil
"and in the crop growing upon it, at the time in
"ferior to none of the others. So far as a Single
"instance could affect the Survey of a whole province.
"I was at first inclined admit its full force, but,
"on passing to other fields, complaints of the excess
"of the Hooloos thereon having been made to
"me by Natives who, to my Surprize, on reply
"to my enquiry as to its amount, declared their
"own ignorance of it, and referred me to the
"Curnam for information— I, on return to my
"Tents, requested the Collectors Cutcherry to produce
"to me from the Hoozoor Records the Original
"Mahratta accounts of the Hooloos, I was told
"that it was not forthcoming; but having Stated
"to the Deputy Sheristadar that if he did not
"produce it, I Should be obliged to find an
"others who Could do So, Search was made an
"amongst the old records, where it, with the
"accounts before mentioned as Containing
"notes of Mr. Hurdis's Takeeds respect-
"ing the manufs. was found and produced
"next morning to me— It is now in the
"hands of the Boards Head Sheristadar;
and on inspection of it, I was certainly
astonished

"astonished to find the Original Hooloos on
"the field No. 1 entered at 15, not 6 fanams,
"to which it had been reduced in the Curnams
"Accounts only; he having likewise reduced
"the measurement of the Field No. 3 to
"Hoolies 2 — 6 3/4 when it stood in the
"original at Hoolies 3 — 6 3/4 :—
"A more Conclusive proof than
69
"this could not perhaps be offered of the
"general equality of the Hooloos, where the
"original accounts are forthcoming, of the
"existence of, at least, Some of the old
"Mahratta accounts, which have too easily
"been Supposed lost, of the too implicit
"Confidence with which the Curnams ac-
"counts have thitherto been relied on in
"these Districts and of the want of proper
"management on the part of the head Cut-
"cherry people, in leaving to moulder amongst
"much neglected records, accounts framed for no
"other purpose than to be Constantly in their hands,
"as the means of checking Such frauds by the
"Village or Talook Servants under them. Indeed, it
"obliged the Cutcherry to Confess that all the Ele-
"ments, Statements and Reports, which of late years
"have been Submitted to the Board of Revenue
have

"have been forwarded without any examination
"of the Original Mahratta Survey accounts."—

70. I have thought it right that the diffi-
=culties in the way of arriving at a satisfactory
settlement of what lands have been assessed
as one crop, and what as two crop lands, should
be exhibited, not with a view of avoiding the
trouble entailed in the proposed search into
the records and accounts, but in order that
I may derive all the assistance from you which
your judgment, experience and access to ex-
extensive records, may enable you to afford
me, as to the best mode of Commencing ex-
=my search, and in order to prevent future ex-
disappointment arising from an unsuccessful
issue. —

71 There are however some anomalies which
the imposing an additional charge on one
crop lands cultivated with Sugar-Cane would
introduce, to which I desire to draw your ex-
attention. —

72 In the Village of Buttagoontah
the highest Class one crop lands are now ex-
assessed at 20 Fanams per Cooly. The imposition
of the additional Teeruai of 80 per cent would raise
the assessment to above 30 Fanams, a ex-
higher

higher rate than is now paid for any lands
cultivated with Rice in Buttagoontah — The
same may be said of 2d Class one Crop lands. —

73. The same anomaly Could be ex-
=hibited to be produced in other Villages, while
the distinction of Classes would be wholly ex-
absorbed. —

74 Whether it was Mr Hurdis's
intention that the assessment on Rice lands
in Dindigul should vary according to the num-
=ber of Crops grown upon them, does not ex-
appear from his Report, but it has always
been the practice to fix the assessment on ex-
all Punjai lands according to their original
Classification, and therefore Punjah lands ex-
originally assessed as one Crop, which have since
been made to yield two Crops, are not subjected
to a higher rate of assessment, nor is any abate-
=ment allowed on two-Crop lands yielding ex-
only one Crop. —

75. By practice the tax in this ex-
"District is Consolidated and paid whether the
"Ryot Crops once or twice" according, therefore,
to the principles laid down and enlarged upon
in the Boards letter of the 16th August 1837,
especially

especially in Para 37. no extra assessment should be charged upon the Cultivation of Sugar Cane. For as an extra assessment is only demandable on Lands Cultivated with Sugar Cane, when by the Rules an extra assessment is charged upon such lands, where it is made to produce a 2d Crop of Rice by means of water from a public &c tank or other public Source of Supply; so it seems reasonable that as no extra assessment is charged when the lands are made to produce two instead of one Crop of Rice, no additional Charge should be made where instead of two crops of Rice, they are made to produce a crop of Sugar Cane which Cannot be grown except with the irrigation Sufficient for two crops.—

76. Not to demand an additional tax would also seem to be more in accordance with the principles prescribed by the Court of Directors, viz.th that the assessment of land appropriated to the growth of Sugar Cane, should be subjected to the same assessment as land of the same quality and advantages and ordinary Crops, which may be simply taken to mean

mean that lands equally productive should be equally taxed &c whatever they are made to produce.

77. The following Statement shews the extent of the lands Cultivated with Sugar Cane, in the Sub Division, during the last 11 years. These lands are chiefly situated in the Village of Pulney, attached to the Ayenpully Talook; that of Boodeepoorum in Tadicomboo Talook; and those of Bereacollum and Goollapoorum in the Tenkarai Talook respectively.—

Statement shewing Sugar Cane Cultivation

Fort St. George 4th May 1848

6769

78. With the exception of two years viz. 1247 & 1248 when the high rates imposed by Mr. Hurdis on this kind of produce, were in force, and the year 1250, the Collections made in the present year exceed those made during the period embraced in the Statement for Sugar Cultivation, but it is remarkable that the extent of land under Cultivation, is not equal to that cultivated before the imposition of the additional tax, commenced in Fasly 1250. It is however satisfactory to find that the cane is being annually more extensively cultivated though this increase is indeed trifling; and there is reason to hope that if the advantages conceded to other Districts, were granted to this, the culture of this product would be proportionably increased.

Dittum

79. No instructions having been received in regard to the Dittum and the introduction of agreements for lands taken by Ryots, the usual custom has been observed.

80. In this Division, the making Puttadapro or Dittum, is a mere form, whereas permission

permission to cultivate for the season is granted,
certain lands indeed being pointed out, but the
Cultivator being at liberty to take what quantity
he pleases, and the amount of his assessment
being fixed by a measurement of his Cultivation.

81. As early in the season as practicable,
the Tahsildar, with a certain number of his
native Establishment, makes the Circuit of
his District, to ascertain the lands parties
are willing to occupy; and their names are
affixed to an account, shewing the quantity of
land proposed to be cultivated by them, with
all the usual particulars defining it: and
these accounts, which are called the Pullad[illegible]
accounts, are retained in the Talook Cutcherry
/ Copies being taken by the Village Curnums) and
an abstract of them, shewing the extent of
Cultivation in each Village, is transmitted to
the Huzoor. In the month of December, when
the Cultivation is supposed to be concluded, an ac-
count, termed the Dowle account, shewing the actu-
al state of the Cultivation, is prepared by the Vil
-lage Curnums, and forwarded through the Talook,
to the Sub Collectors Office, and, on this account
the

the settlement of the year is based.

87. In cases in which Durkhasts are given
for lands lying waste, it is customary to call upon
the last Cultivator of those lands, either to cultivate
or relinquish them; and, in the event of his consenting
to occupy the lands, he is bound to pay the Teerva
whether cultivated or not, unless he can assign any
sufficient reason for his neglect.

83. It seems to be the general impression
that, at present, Cultivators would not generally
undertake to cultivate specific parcels of land, be-
cause, tho' the Cultivation may be profitable, they
are not prepared to bind themselves to cultivate
under all circumstances. Gradually the apprehensions
which deter them from the undertaking, will no
doubt cease, if care be taken fully to explain
to them the object of the rule; and if great con-
sideration and firmness be shewn at the Settlement.

84. It is a part of the Dittums rules
that if a Ryot is desirous to reduce his holding
he is to be required to throw up the good with
the bad land. I am led to question the applicabi-
lity of this part of the Rule to the Talooks forming
the Sub Division. Where there are large tracts of un-
cultivated land, it does not seem desirable to force
the application of labor and capital to lands on
which

which yield but small or inadequate returns, and the artificially maintaining any rule or practice leading to such a result, seems, in theory, objectionable. Wherever labor has been free and population abounds, all apprehensions of loss, from the desertion of inferior soils, seems to be unfounded. Particular portions of land, may not appear to yield a profit, taken by themselves, and yet it may be profitable to the occupant to retain possession of it, or to cultivate it, to employ stock or labor that would otherwise be unemployed, or some other advantage, but rather than cultivate at a loss, for the sake of retaining the more valuable kind of land, the Ryot will relinquish all his Cultivation, and the interest of Government will not be advanced, by imposing on a Cultivator a losing speculation to make up for inadequate rent on profitable lands. On the whole, it seems, therefore, desirable that the Ryot should not be forced to cultivate lands that do not yield him a profit, and that it would be safer to leave inferior soils to the natural operation of the monopoly of the superior kinds, or at least, for the present. From easy

rates,

rates, and the security thence resulting to the general body of Cultivators, it is natural to expect such an increase of wealth as would tend to the extension of Cultivation, to an extent which cannot be looked for under a system of restriction such as that proposed.

85. Many Ryots now agree for land at the Puttadappoo, simply to prevent its occupation by others, and with no intention of ever cultivating it, and in order to secure a pasture for Cattle, or to enable a portion of their lands to lie fallow. Near Palney, where large cattle fairs, are held during the three annual Festivals, pasture is in great demand, and no pains are spared to prevent the cultivation of the lands in the neighbourhood of the Town. In such places, the introduction of the proposed Rule, would, doubtless, be considered a great hardship, in as much as it would interfere with privileges and gains long enjoyed, though of very questionable right. In order, therefore to lessen the burthen, which, the introduction of the rule might impose on Ryots, similarly situated with those of Palney, it might perhaps, be found advisable to adopt the system in force in Coimbatore, in regard to pasture lands.

Pasture

86. The subjoined Table shews the proportion which waste lands bear to cultivated lands in the Sub Division

Fort St. George 4th May 1848.

88 The result would seem to indicate an improving state of Cultivation and prosperity In 3 of the 5 Villages, the Increase has been progressive, and the Collections of the present, exceed those of many previous years. This increase is most marked in the Village of Sandicoody which, in the year 1251, gave only a Rental of 310 Rupees. In the first year of Amany management, the assessment amounted to Rupees 1,675-3 more than 5 times the amount of the Rent. In the present year, the assessment is Rupees 2,135-9-7 or a little more than 28 per cent in excess of the first assessment in 1257.

89. In Poombary, there is a Decrease of Rupees 21-9-11 In Veeroopatchee, though there is an Increase of Rupees 747-15-5, the assessment has not yet reached the standard of Fusly 1253. The Decrease in Poombary, is attributed to the diminished Cultivation, arising from the assigned cause of a partial failure of Rain.

90 During the months of September last I was enabled to visit 3 of the Villages. One, the Village of Shembaganoor, is almost wholly deserted, and has been hitherto included in the Pattah of the Vadagherry Zemindar. The only family residing there cultivates a small quantity

of

of Potatoes and Grain. The greater part of the Produce, of which they complained, is usually carried off by the Merchants of Tinchurai and Devadanapatty, who resort to the Hills, and who make this Village, which is situated on the top of those passes, their chief halting place. Means have been taken, which, it is hoped, will put a stop to this spoliation.

91. The other two Villages, Vilputty and Poonibary, were in a more flourishing condition, and Cultivation seemed to be carried on with some vigor, but the people are still in a low and abject state, and do not appear yet to have recovered from the effects of the previous oppression sustained during the period of the Rentals. The inhabitants, though in great poverty, appear extremely indolent and imprudent; the necessary results of oppression and tyranny; for where the laborer is not secured in the enjoyment of the fruits of his labor, or the more distant advantages of his prudence, it would be unreasonable to expect the efforts of either.

92. Every suggestion or attempt to introduce improvements in their mode, or implements, of Cultivation, is met by suspicion and

and resistance, under the fear that an increased assessment will be the result. As an instance of this, I may mention that it was only after repeated disappointment and unceasing perseverance that the Villagers could be induced to substitute good corn seed for the deteriorated kind now use among them. The shifts by which they attempted to prove that it was unsuited to the Soil, are almost incredible. Pounding, and bruising the seed, before sowing it, and destroying every blade that appeared, were among some of their devices.

93. The people on the Hills, are dependent on the Plains, for almost all the necessaries of life, which they obtain at very great cost; giving, in exchange, for the most ordinary articles, produce of the Hills, to the quantity of 3 and 4 times the market value of the bartered article.

94. There are no shops, but the Hills are visited, at the regular periods of harvest by Merchants from the Plains.

95. The articles of Export from the Villages I visited, were wheat, Barley, Vendiam, Mustard, Vajsamboo or Sweet flag, and Garlic, which is the staple. In addition to these, a very inferior kind of Rice is grown, which

Fort St. George 4th May 1848.

which is unsaleable, also small quantities of Italian panniclo, Jeruc, a kind of red bean known as as Mochicollai, Varagoo, and Samè or small Millet. There were a few Plantain trees grown in one or two Gardens, and a few dwarfish lime trees. I saw also a poor stunted Tamarind tree which had never borne fruit. The Imports are Cloths, house-hold furniture of every description, including pots and pans, implements of husbandry, Salt and every article of food, But Rice.

96 The Hills, though perhaps of limited agricultural capabilities, with a large portion of unproductive soil, possess much fertile ground, which is uncultivated. The people are few and insufficient for even the culture of the lands which belong to their Villages. In the cus Fusly 1741, the Villages were visited by cholera, which nearly depopulated them, since then, there has been a gradual increase in the numbers of the Population, but depressed and ill is treated as they have been, it is not matter of surprize that this increase should not have been so great or rapid as the physical capabilities of the country they inhabit, and the circumstance of there being such ample

means

Fort St. George 4th May 1848.

means of support for growing numbers would have led me to expect.

97 Trade one of the inlets to improvement is wholly unknown to them. Though compelled annually at the time of the settlement to visit the Plains they never are known to bring any of their products to the Markets below, nor is any trade carried on between the Hill Villages.

98 Where land is abundant and easily cultivated, the thing necessary to improvement appear to be light rates that shall leave the Cultivators a considerable profit from their labors, and induce the rapid increase of Population. The rates now fixed appear light. It only remains that these rates which holds out ample encouragement to tillage, shall be fixed on sound principles and that it become established and known among the people, that the Government demand can only rise in proportion to the extensions of Cultivation.

99 Every stimulus to exertion should also be held out to them, and they should be made sensible of the great and manifest benefit which industry secures to them. As one of the means

to

Fort St. George 1st May 1818

to this end, the improvement of the Roads between the Hills and the Plains, as well as between the numerous small Villages scattered over them, seem to demand immediate attention.

I may also observe here that the several Sheds and Choultries built some years back for the accommodation of the Merchants resorting to the Hills, are now either in total ruin, or in a state bordering upon it.

101 I had no time to make any enquiries into the subject of the Devastations of the Hills, nor to ascertain on what the people ground their right to grants of Manium for that purpose. It appeared however that certain lands had been alienated for many years during the Rentals for the support of Pagodas, but I could learn nothing satisfactory as to the authority for such alienations. The payment of the Village Officers in money, was strongly objected to by the Village Officers of Pomberry, and I confess that at present, I cannot see any reason why a different system should be followed here from that which obtains on the Plains of granting lands.

Kalimonday Moottah

102 The following Table exhibits the Assessment on the six Villages composing the

Fort St. George 1st May 1818

the Kalimonday Moottah. The statement, it will be seen exhibits a Decrease on the Cultivation of the preceding Fasly to the extent of Co. Rupees 1165 9 5.

Statement shewing particulars of the Kalimonday Moottah.

	Villages	Fasly 1255	Fasly 1250	Increase	Decrease
		Rupees A P	Rupees A P	Rupees A P	Rupees A P
1	Kalimonday (Casbah	2320 3 2	1149 59	- -	591 10
2	Karkampatty	2027 10	1491 83	- -	535 87
3	Chinnaustampatty	79 38	98 91	19 53	- -
4	Poraloor	2812 139	2067 28	- -	1951 11
5	Kottyam	2334 1110	2130 15	95 37	- -
6	Varakeycottais	300 11 6	528 12 3	22 - 9	- -
	Total	10181 - 10	9057 5	136 11 9	1302 52

Nett Decrease 1165 95

The

103 The decrease is attributed to the unfavorable nature of the season not permitting an extension of Cultivation

104 I see no reason to question the correctness of this explanation

105 The following Statements of the Statistics of the Sub Division shew that there is but little or no emigration of the agricultural classes, and indeed it is found from enquiries which I have personally made in conversations with the people, that parties who have emigrated to Ceylon and other Places return to take up land they had abandoned.

Here-

6783

Fort St. George 4th May 1848

There is no doubt that the produce
108 and profit of Agriculture are increasing. The com-
parative prosperity of the people generally may be
gathered from the rapidity with which villages
are increasing in number, size and population,
and the large amounts vested in the improve-
ments of the soil, both to remedy defects in it
as well as to preclude the evils of the casual
calamity of seasons. As a remarkable instance of
the latter I may allude to the construction of a
Dam and Channel in Veerapandy by Palaney
appa Chetty and 10 other share-holders, at an
estimated cost of 5000 Rupees. The work has
occupied them 3 years. It will be seen that 277
wells were repaired and constructed and also
4 new Tanks.
107 In conclusion I beg to acknowledge the assistance
I have derived in making the Settlement from
the Sub Division Serishtadar Venkata Row, whose
experience and local knowledge, arising from a
service of 15 years in the District give him advan-
tages which are enjoyed by few of his class.
108 Since closing the Report the sum of Rupees
25-12- reported in Parah 12 to be outstanding
has been collected.

Dindigul
Sub Collectors Office
30th November 1847

/Signed/ S. Clarke
Acting Sub Collector

Fort St. George 4th May 1848.

35

Proceedings
Relative
to the Settlement
of the Land
Revenue in the
District of Ma-
dura for
Fasly 1256.

thereon, 1. The actual settlement was conducted
entirely by Mr. Parker although he did not join the
district till the 1st April and this circumstance
together with the necessity for a protracted examination
of claims to remission occasioned by the severe drought pro-
tracted the closing of the Demands to a later date
than usual.

19th January in Com. 8th Feb. 1847.

2. The season was much less favorable
in Madura than in the Dendigul Sub division,
a special report on the unfavorable prospects of
the season was received from the late Principal
Collector in the beginning of the year. Up to that
period the showers with the exception of a seasona-
ble fall at the commencement of the North East
Monsoon (October) had been partial and slight throughout
out the Principal Division but these were sufficient
for the cultivation of the Dry Grains. It was that
time the deficiency was more marked so as to
interfere seriously with the ripening of the Koongalo
produce and with the irrigation of the Nunjah
crops. This drought was succeeded by almost a
deluge in April and May 1847, filling the tanks
and bringing down the river freshes. The results
were of a mixed character. The dry crops in the areas
of tanks were wholly submerged, but the spring

rice

rice (which is reaped within the Fusly) was cultivated successfully. These vicissitudes affected the Sub Division in a much less degree. Its position with reference to the Ghats insured a more equal and general distribution of the rains and though the wet crops were not so plentiful as usual the season on the whole is considered to have been "tolerably favorable" in Dindigul.

" 1256	3—6—4	3—7—2

Para 11 & 12

3. The price of Grain was very high affording compensation to the Ryots for any losses sustained by the season. The district was generally healthy.

4. A further increase (of 17) is reported in the number of Hamlets. It does not appear to what cause such frequent extensions of habitable sites are attributable. Mr. Parker explains that no separate accounts are kept for them, but the Board of Revenue would be glad to learn something more of the nature of these new locations and to be informed whether they are owing to increase of population, extension of cultivation (a supposition favored by the increase in the Nos. of Ryots, Puttahs and Ploughs) or to other permanent indication of prosperity or whether they are attributable to motives of temporary convenience only. The increase

Para 17.

of

of Wells in the Subdivision points to an increase of Capital and to a spirit of improvement in that province which are highly gratifying. The Board are glad to observe that the wants of the neighbouring island of Ceylon have led to a considerable export of agricultural stock. They would be glad to know whether the 273 horses sent thither and valued at 61 Rupees are the bona fide produce of the district.

Paras 19 & 25

The Board approve of the reasons which have led Mr. Parker to defer the issue of the new Hookumnamahs. When ready they desire to have a copy in English and Vernacular transmitted for their approval in a separate communication. With reference to the observations on the relinquishment of land it is sufficient to remark in this place that the object of the restriction is not to compel cultivators to retain possession of unprofitable lands, but (as understood by the Coll. in Para 22) to prevent individuals from culling particular favorable spots to the exclusion of others naturally dependent on them, and which, if thrown up, could not in consequence be occupied by other persons. It is also intended to obviate those inevitable discrepancies in a minutely subdivided field assessment against which no system of taxation however carefully devised can altogether guard

guard. To suffer particular individuals to select some fields, merely because the demand happens to have fallen more lightly upon them and to reject others quite as good, on which it may have been fixed at a somewhat heavier rate, would evidently lead to the sacrifice of the interests not only of the Government but of the less influential members of the Community. Some such restrictions as those familiarly known by the expression of "taking up good and bad lands together" have been resorted to in all districts and must of necessity find a place in all well regulated communities where the property of checking a monopoly of advantages by some to the detriment of other interests is admitted. The Board will not object to the modified clauses proposed by Mr. Parker if based on these principles. They are also favorable to the introduction of a provision for giving the dry lands an occasional rest by leaving them fallow, but they are of opinion that the duration of indulgence should be defined.

The late Principal Collector on a former occasion stated that the usage of the province restricted the exclusive retention of fallows to a period of two years.-

From Princ. Coll. 18th March
In Cons. 23rd March 1840.

6- The Collector has rightly omitted the Colvy formerly found in Statements 3 and 4 for "Lands Cultivated

cultivated without engagement" but it was not only to the form of account but to the practice itself that the Board objected. This latter appears still to be retained, for Mr. Parker enquires whether he was right in including such land in the Demand and the Sub Collector states "that the cultivators generally would not undertake to accept specific lands" Para 83. "because they were not prepared to cultivate under all circumstances," and again that "many Ryots agree for land simply to prevent its occupation by others and with no intention of ever cultivating it, but only to secure pasture for cattle or to enable a portion of their land to lie fallow" Such a practice is directly opposed to the formation of a regular Dittum which is so much desired to introduce into Madura. If the Ryots were fully assured that every consideration would be extended to failures of cultivation occasioned by circumstances of season, they could make no reasonable objection to entering into definite engagements. This should be provided for in the revised Hookumnamah.

1255 — 11,11,4,15
1256 — 11,78,944
67,529.

7- The cultivation of the year under review exceeded that of the preceding fusly by Rupees 67,529. From which the deductions at the Settlement on account of waste amounted to the large sum of 1,39,895-15-10 being 44,085-5-5 in excess of the similar item in the preceding season. Farther deductions amounting to

to 161,701–13-9 were granted for the various incidents detailed in para 28 of the Collector's report, the largest of which was 76839–5-9 for withered crops, being 7449 in excess of the same item in 1255 Fusly inclusive, of which the whole amount remitted exceeded that of the preceding season by the sum of Rupees 78,211-15 y. Thus notwithstanding the fair promises held out by the Dittum at the commencement of the Fusly the actual Settlement fell short of that of the preceding one by the sum of 54,767-12-- 8.

Paras 29 & 39

Great attention seems to have been paid to the Settlement of claims for withered produce, by the Collector and the Sub Collector, The amount demanded was 115070–8-9 of which 38,181–3 were disallowed and 76,839–5-9 admitted as per Statement of particulars in para 30 of the Report. By far the largest proportion of loss occurred in the Meyloor Talook of the Principal Division, upwards of 1/4 of the Beriz of which was written off on this account. Mr Parker has explained at considerable length the principles by which he was guided, in the course of which he gives an account of the origin of the practice peculiar to Madura of disallowing 10 per cent on all claims brought forward for Shavee remission. This custom after having been discontinued for several years by the orders of Government dated 8th February 1833 seems again to have been

Sub Collector's Report Para 17 @ 37

See Para 34

Demand of Meyloor } 17,288

Shavee Remission } 47,447

In Cons 14th Feb 1833

been revived. Mr Blackburne's latest practice was to allow no remission unless the withered crop exceeded 10 per cent, when the whole loss was deducted. The Board in their Proceedings on the Settlement of 1253 remarked that this was unnecessary and expressed an opinion that the indulgence should be confined to such losses as exceeded 10 per cent. The local Officers appear to have understood that these expressions required a return to the old rule and that 10 per cent was to be deducted from the claim for remission and on this principle all losses caused by short produce was settled in 1255 and 56 Fusslies both by Mr Parker and his predecessor.

Sub Collectors Report Para 26 @ – 39

9. The Board desire to observe that the grant of remissions must always be left very much to the discretion of the Settling Officer. It is impossible to lay down any specific rules which will meet all cases. In the remarks in their former proceedings which have been understood as suggesting the observance of a positive general rule they intended only to convey an expression of their opinion that an absolute remission in all cases where a ryots loss exceeded 10 per Cent of his whole produce was unnecessary and could not be equally applicable in every instance. It is obvious that the substitution of another undeviating rule of a similar

similar tendency must be liable to the same objection. This was also their object in desiring the Collector to act according to his own discretion in their Proceedings of the 17th July last; the only safe course in such cases is to prescribe the general principles by which the proceedings of the Settling Officers should be guided and these have been so explicitly recorded on former occasions that nothing further is required than to refer to them. The Board request Mr. Parker's particular attention to the orders of Government of the 4th March 1825 and to the Circular from their Office dated 13th June 1831, and they desire that on future occasions the Collector will be guided solely by the principles therein laid down to the exclusion of all special rules howsoever originating. The gist of these as contained in the following summary shews how much must depend on the judgment of the Collector and how futile the attempt must prove to devise instructions suitable for all occasions. "The only bar" it is observed "to the realization of the demand is the ryot's inability to pay it; and this is to be inferred not from the state of a particular field but from all the fields which he has cultivated and from a combined consideration of the produce and the price."

In Cons 10th March 1825

Paras 43-44. 10 The Board approve of Mr. Parker's desire to

to introduce uniformity of practice in the grant of remissions on wet land cultivated with dry produce, more particularly in cases where land originally classed as Poonjah had become Nunjah and again reverted to Poonjah. The custom of the Principal Division, which was in such cases to deduct 1/3 the wet assessment under the head of Serwa Commee, owes its introduction to a recommendation of Mr. Blackburne in July 1743, but looking to the importance in Surveyed Districts of preserving the Survey accounts free from alteration the Board are of opinion that the system pursued in the Sub Division of reverting to the original Poonjah demand is more regular and consistent with principle and they would therefore prefer that it should be observed generally in both divisions of the District.

Pro. 17th Sept. 1835. Para 11

Paras 45, 46. 11. The measures adopted in the case of dry lands brought under irrigation and cultivated with wet crops appear proper.

Para 47. 12. The remission for Sugar Cane cultivation in the Sub. Division exceeded that of the preceding Fusly by Rupees 137-7-5. No change has yet been made in the practice of levying an additional cess of 80 per cent on all land so employed. The Sub. Collector has gone at some length into the question of the proper mode of assessing the additional tax on the ground of such land being liable to the terms imposed on

Sub Coll.r's Report Paras 45 a 53.

on a 2nd Crop. Mr. Parker states his inability to offer a decided opinion without further examination of the Survey accounts, but Mr. Clarke's observations on the information derivable from these is far from encouraging. The Board still believe however that a more searching examination of these documents and of the data on which they were prepared must explain what lands were then considered capable of producing a second crop and in what manner the right of Government to levy a larger amount of assessment was maintained. It is hardly possible to believe that a revision of the Land Tax based on a Survey and conducted on fixed principles can have led to the imposition of equal or nearly equal rates on the inferior as well as on the very best irrigated lands. If however, as appears to be the fact in some instances, the original accounts of the Survey are no longer in existence, some other means of settling the question must be devised, but at present it is unnecessary to pursue the matter further. Mr. Parker having promised to renew his enquiries and to state his views at a future period which will better be done in a separate communication.

Proceedings 22nd Oct. 1846. Para 11 Sub Collectors' Report Para 49 & 77.

Sub Collectors Report, Para 65 & 66 From Collector 29th January In Cons 14th Feb. 1848- Enclosure No. 1 Para 7

13. None of the other items of Decrease or Increase call for particular remark in noticing a small increase in the amount of pasture the

the Collector states that he has prepared the particular information on this subject required by the Board in their Proceedings on the settlement 1244 Fusly. An examination of this Statement forming Enclosure No. 20 shews that the custom of retaining large tracts of pasturage at ¼ the usual assessment prevails throughout the four Pollams of Ramgherry, Comarwaddy, Veeramaly and Jogamaly comprising 52 Villages and that the extent of grazing land is considerably in excess of the arable. Thus for instance in the 21 Villages of the Ramagherry Pallipat.

22nd Oct. 1846.

	Ryots	Cawnies			Demand Rs.		
The Total cultivation-	1852	12,449	15	12	24,485	11	9
of which the amount held by grazing ryots	1240	10,653	11	4	21,038	8	2

Besides which others hold pasture without arable land at all.-	32	113	7	4	56	1	6

14- It is clear from this that the occupation of land for grazing purposes is extremely profitable, since it has led to the laying down in grass of some of the richest arable land which had heretofore been reserved for the most valuable description

description of cultivated produce. It becomes a question therefore whether 1/4 tax on pasture is a sufficient equivalent for the full arable assessment. The predilection for stock farming is still more strikingly exhibited in particular villages, as for instance in Coomboor and Goodaloor.

	Coomboor No. 11. Ryots	Land	Carnatic	Berij	Gs.	Goodaloor No. 19. Ryots	Land	Carnatic	Berij
In these the cultivation is	86	—	486	963	—	140	801	151	3.
Of which the amount in the hands of the graziers	63	—	454	898	128	778	1176.		
Of which wholly in grass	—	—	509	237	—	1714	745		
Of those who have no cultivation	3	—	9	4	8	29	13.		
Total pasturage	66	—	518	241	136	1944	739		

15. It is probable that the large exports of agricultural stock noticed in para 17 is maintained by means of these extensive pasture farms, and if they did not tend to throw the arable land out of cultivation such speculations deserve every encouragement. It is clear however that the unrestricted permission to retain land on 1/4 tax has operated prejudicially to the regular cultivation in these Pollams and the Collector's attention should be carefully directed to the subject in order that one branch of industry may not be allowed to obtain undue advantages over another. Mr. Clarke recommends that the custom of the neighbouring District of Coimbatore should be introduced by which the

the proportion of pasture land on 1/4 tax in the holding of each ryot is limited to one fifth, all in excess of which is subject to the full assessment. Some such check appears to the Board to be very necessary and the Collector is requested to state his views on this subject on the next fitting occasion.-

6800 Fort St. George 4th May 1848.-

The Board desire to take this opportunity of noticing the orders conveyed to them by Extract Minute in Consultation 15th April 1848 regarding the report of the late Commissioner on the revenue administration of Madura. The letter from this Office to the Chief Secretary of the 29th July 1844 entered fully into the different points referred for consideration in connexion with Mr. Drury's report. This was followed by the submission of the late Principal Collector's explanation on the 27th December 1844, which called forth the orders now under reply in which the Most Noble the Governor in Council expressed his dissatisfaction at the absence of a more distinct expression of opinion on Mr. Blackburnes Statements and required the Board, of which the late Commissioner had then become the Senior Member, to bring the matter to issue. Mr. Drury for reasons which are obvious was unwilling to join in the discussion of matters in which he was directly a party concerned. He therefore when about to proceed on leave for the recovery of his health recorded a Minute on returning the papers to the Office, in which he reiterated the expression of his objections to become a party to Proceedings on the question at issue and again referred to the various points noticed in his report, on which he stated that his opinions remained unchanged. Meantime Mr. Blackburne has resigned the Service and returned to England and it does not appear

In Cons 1st May 1845

In Cons 23rd June 1845.

on the 1st July 1847.

appear desirable or necessary to pursue the subject farther. The Board's letter to Government of the 29th. July 1844 explicitly stated their disapprobation of many of the irregularities brought forward in the Commissioners' report and showed that they had already attracted attention and had been animadverted upon with a view to their discontinuance and correction on several occasions previous to the commencement of the special enquiries. On these therefore there was no real difference of opinion between them and Mr. Drury. The system of Revenue management in the Southern unsettled Districts has never been so perfect or so well organised as in the Northern, some of the defects observable in Madura were owing to this general cause, while others doubtless originated with the late Principal Collector himself. Amid considerable eccentricity of character Mr. Blackburne exhibited strong feelings of kindness and benevolence towards the people under his charge. He frequently made it a boast that he had concluded the annual Settlement without in any instance having kept the ryots more than a few hours from their homes. His orders for causing the cultivation Returns and the preliminary enquiries for the Settlement to be prepared by the Village Officers all

arose out of this anxiety to avoid drawing the people away from their industrial occupations, and exposing them to the attacks of Cholera when assembled at his Cutcherry. The greater evil incurred by these attempts to avoid the less were fully pointed out & and eventually admitted by Mr. Blackburne himself. Many of the improvements suggested by this Office were adopted by him before he left the country and have been further perfected by his successors.

The

appear desirable or necessary to pursue the subject farther. The Board's letter to Government of the 29th July 1844 explicitly stated their disapprobation of many of the irregularities brought forward in the Commissioners' reports and showed that they had already attracted attention and had been animadverted upon with a view to their discontinuance and correction on several occasions previous to the commencement of the special enquiries. 34-36

Minute by G.H. Drieberg Esq.r 2d Member of the Board of Revenue

Read in Cons.n 4th May 1848.

Reiterating the expression of his objection to become a party to the Proceedings of the Board conveying their opinion on Mr. Blackburne's statement in explanation of the irregularities brought forward in the Commissioner's report and on a review of the whole subject; stating that his opinion of the irregularities and error therein noticed remain unchanged.

10th May 1848.

Minute.

In the Extract Minutes Consultation dated 15th April 1845 the Most Noble the Governor in Council remarked that it was incumbent upon the Board of Revenue to ascertain whether the alleged defects in the Revenue administration of the Madura District as pointed out by the Commissioners in their Report originated with Mr. Blackburne, and that it was still due to that Gentleman that the Board of which the late Commissioner was the first Member, should bring the subject properly to issue.-

The papers have been with me for a considerable period, and have occupied much of my attention with a view to their disposal-it has however occurred to me on reviewing the various circumstances of the case that in the Proceedings to be submitted to Government I should not be a party, as the circumstance of my having occupied the position of Commissioner in the enquiry which brought to light the objections to the administration of Mr. Blackburne's Revenue System, might be considered as just grounds for

for my undertaking the duty of personally passing judgment upon those portions of the administration already pronounced as erroneous and irregular.

As it would seem however especially incumbent upon me with reference to the direct advertence to myself in the above Extract Minutes Consultation, that my sentiments should be expressed at length upon the several points upon which the Government would seem to require further elucidation, I proceed to record my views on the subject in the following Minute. I may add moreover that I shall feel constrained to dissent from the recorded opinion of the Board as expressed in their letter to Government under date 23d January 1815. On these joint considerations therefore I deem it desirable to withdraw from personally engaging in the Board's Proceedings in reply to the requisition of Government.

The Commissioners had noticed the mode of keeping the Accounts of Cultivation and of regulating the annual abatement of Lands taken up for cultivation by the Ryots and the Board were desirous of learning the circumstances under which the system

From Jt. Coll.r 18th September 1816.

of Pattadaspor Settlum had been discontinued

27th Decr 1814 in Con.n 28th January 1815. Para 4.

Mr. Blackburne has expressed "his belief that "it never had other than a nominal existence "and on which the little good of the system "was negatory whilst its evils might have "flourished and that the negative proof of "the view may be found in the absence of "any allusion to such a system in any Report "on account of settlement from 1821. to 1833" In reply to these remarks it may be observed that the Records of the Board's Office afford ample evidence of those furnished by the Commissioners were not already sufficient, that the systems in question had not during the time of his Predecessors or indeed on his own appointment to the District a mere nominal existence as approved by Mr. Blackburne, but was a vital impediment to the due administration of the settlement under Ryotwar principles. In support of this assertion it will be merely requisite to allude to the copy of the Kookoonnumah issued by the then Collector to the Tahsildars in the District to encourage the inhabitants to extend their cultivation in Fasly 1234, and again to the Copies of the Cultivation Kookoonnumahs circulated by

From Jt. Coll.r 15th in Con.n 28th October 1824.

by Mr. Cleveash in publics 1238 and 1842 —
which were submitted by that Officer to the
Board under date 19th September 1832 thereby
shewing that at those periods the system
was in operation and those Records bear out the
fact. On the other hand however it will be seen
on referring to the Collectors Circular for publ.
12th that the duty previously imposed on the
Talks. Aduars of Talooks by Mr. Wroughton and
by other Collectors who preceded him, was
transferred by the modified Circular issued
by Mr. Blackburne from those Superior of-
ficers to the Curnums and Pattamgars —
in the terms of this Circular "to make
"allotments of lands that occupants are willing
"to cultivate and obtain their relinquishment
"in Cadjans of such as they are unable to cul-
"tivate", the Village Officers are further enjoined
to be "very careful in this respect as it forms
"an important part of their duty" and thus it
is apparent that a change was made in the
system of regulating the cultivation of lands
which was not consistent with the principles
of the Ryotwary settlement —

Mr. Blackburne has expressed
his opinion that the Pattadaporn Dittum
is

1st Con. 8th October 1832

"is a vicious system to be deplored" but he re-
frains from troubling the Board with explain-
ing his objections to it, and merely offers two
Abstracts in elucidation of its results
which he would seem to consider conclusive
with respect to the first Statement
given in the Mar. 1st Con. and to the Set-
tlement Accounts referred to, The Board in
their Proceedings on the Settlement for publ.
1252 made the following remarks "In Statement
"No. 3 and to the entry of the Dittum or Cabooliat
"is not correctly made the proper way to obtain
"the Amount to be entered in the Dittum
"Column is to add to the land agreed for
"by the Ryots at the time of Dittum the other
"land cultivated besides that so agreed for
"It can then be seen at a glance by comparison
"with the Columns whether the whole of the
"Dittum has been cultivated, or how much
"of it is waste" "If the circumstances of the
Ryots had been taken into consideration
& engagements for the cultivation of lands at the
time,

Publics	Taxed or Sandy waste thereon entered in the Pattadaporn	Revenue from Cultivated lands not entered in the Pattadaporn	Remarks.
1252	157390 —	127785 —	See Col. 3008 304 of Statement No. 4 of Settlement accounts to the Sub Coll. dated 17th July 1813.
1253	135718 —	90370 —	

6th March 1845. Para. 28.

tune of Puttadapoo or Kittums has been received from them according to their means, the extent of cultivation after much engagements could not have been so great, and when the lands are carefully distributed at the commencement of the season the Heads of Villages can never have the same opportunities of practising fraud by ~~~ omitting to bring to account lands which had been agreed for and entered in the Puttadapoo.

The second abstract Comparative of Cultivation as furnished by Mr. Blackburne "during existence of the annual Puttadapoo System prior to his administration and during its non existence" under his administration "does not exhibit a result favorable to the Comparison he desires to draw. The subjoined Memorandum prepared from the records of the Board's Office shews that notwithstanding the increase in the number of Ploughs and Pots during Mr. Blackburne's administration above the highest years previous to it, the increase and decrease of Cultivation was dependant upon the nature of the seasons.

Para 4.

Taalies

	Talukas	Villages	Number of Ploughs	Number of Pots	Extent of Land Cultivated
					Cawnies
Mr. Peter	1236	843	39,361½	69,202	3,31,528
Mr. Vincash	1242	839	42,858½	67,371	3,30,353
	1243	839	42,966	68,840	3,32,015
	1244	840	45,425	74,211	3,62,244
	1245	856	47,267½	77,937	3,90,478
Mr. Blackburne	1246	858	45,529	75,041	3,36,316
	1247	852	44,565	73,666	3,30,062
	1248	836	45,656	74,745	3,57,116
	1249	836	46,959	76,503	3,76,579
	1250	836	47,667	77,315	3,71,724
	1251	833	48,794	79,998	3,87,412

Shows

6811 Fort St. George 4th May 1848.

Thus while the number of Ploughs and Ryots in fusly 1247 exceeds those in fuslies 1236 and 1242 the extent of cultivation is less than in either year and on a Comparison

Fuslies	Number of Ploughs.	Number of Ryots	Extent of Cultivation
			Cawnies
1236	39,361½	60,202	33,1528
1251	48794	79998	38,7412
Increase	9432½	19796	5,5884
per Centage	24	33	17

of fuslies 1236 and 1251 both favorable years it will be seen that the number of Plough and Ryots above those of fusly 1236 amounted to 24 per Cent and 33 per Cent respectively. Yet the increase in the extent of Cultivation exceeded the Cultivation in that year only by 17 per Cent. The extraordinary increase in the number of Ryots which was exhibited in the settlement of fusly 1244 in a season of remarkable potality did not fail to attract notice and one cause of which was explained by Mr. Blackburne to have occurred in consequence of the influx of Foreign Ryots from the Country of Bodoocottah and the Sheyagunga Zamindary and of the Tinnevelly District. It is obvious to remark that in good seasons & with such a sudden influx of new occupantis it was

Boards Proceedings on the Settlement for fusly 1245 dated 24th October 1836 Para 2 — from Pt. Coll. 23d. November in Con.s 5th Dec.r 1836. Para 4.

the

6812 Fort St. George 6th May 1848.

the more incumbent upon the District Authorities to take Cultivation agreements for the lands the Ryots were willing to Cultivate and not have left the occupancy of them to their own caprice & to the will of the Village Officers.

The next point which it appears desirable to notice is the system of keeping the Accounts of Cultivation since fusly 1245 Mr. Blackburne states that the general tenor of all his Circulars "has been to have the Cultivation returns prepared by the Village "Authorities, and controlled and superintended by "every superior grade" But he affords no explanation of the cause of his having deviated from the practice of obtaining Cultivation Accounts twice in every Month, and of holding the Talook Servants responsible for the exactness of the annual Account of Cultivation under their personal examination. The Bookrummanah for the Cultivation of fusly 1242 contained instructions to the Tahsildars for their guidance to the following effect—

Para 5.

From Pt. Coll.t of Madura 19th September Con.s 18th Oct.r 1832.

Para 4.

"You are to make a Report every 5 days of what "you have done in obedience to the above orders "and every 15 days transmit a report of the state of "the Reine, the quantity of water received into the

Tanks,

1813

Fort St. George 4th May 1818

"Tanks the extent of the Punjah Cultivation,
"the state of the Ryots and every other circumstances
"whether favorable or unfavorable to the inhabitants"

The Circular orders issued by Mr.
Blackburne are not consistent with these
rules. The Tamil order marked "Enclosure
J K" dated 23d January 1841 of which a translation
has not been furnished, but of which document
a translation was submitted to Government
in para 5 of the Commissioners' Report
marked D, is addressed to the Curnums and
Nattangars in Talooks. They were directed
to examine the exact Cultivation of their
respective Villages for fasly 1250, to prepare
an individual Statawary Accounts ac-
cording to the respective dates of their ins-
pections and to send in total accounts
immediately to the Talook and to be ready on the
1st of May 1841 for the individual Statawary
Settlement. It is observed that a copy of these
instructions was furnished to the Zilladars
who were directed to inspect the Cultivation
of every Village and forward the returns
with their signature in proof of their ins-
pections. The responsibility however of the
exact truth of the accounts still rested with
the

1814

Fort St. George 4th May 1818

Para 6

the Village Officers, so that in the Abstract of
the verification of the Village returns of Cul-
tivation for fasly 1248, in the four Talooks com-
prising the Principal Collectorate division by
the Talookes and Collectors
Establishments the accounts
of 332 out of 625 Villages were
examined by the Village Of-
ficers only. the Zilladars who

	Villages
By Village Officers	332
By Zilladars	171
By Talook Servants	94
By Coll.rs Establishment	28
Total	625

had been expressly appointed by the Govern-
ment to "preserve the Revenue from fraud
which must be anticipated by trusting implicitly
"to the Curnums Accounts or the report of the
"inspectors temporarily employed / examined
the Village returns of cultivation of 171 Villages
and then not to the full extent of cultivation
but as it would seem restricted their en-
quiries to Puttah waste lands and to Cul-
tivation newly made. The attention of the Ta-
sildars was reserved when doubts existed
by the correctness of the Village accounts
94 Villages were examined by the Talook
Establishment and 28 by that of the Collector
thus it will be apparent that the system
of Control and supervision by every superior
grade including the Tahsildars Talook
Servant, Tahsildars and Collectors Establishment
was

was not in effect carried out, whatever may have been the intentions of Mr. Blackburne, it may be sufficient to add that the latitude thus allowed to the Village servants in the preparation of the Cultivation returns was contrary to the Rules and principles of the Ryotwary System which had been previously followed, and from which as well as from any other detail of management it was not left to the discretion of the "Local European Authority" to deviate, without the knowledge and confirmation of the Board of Revenue.

In reference to the explanation

Para 10 of the Principal Collector respecting his order of the 11th March 1810 it is stated that the object in view was to avoid the risk of Cholera and hence the necessity arose for expediting the preparation of the settlement accounts and Puttahs by the Curnums before they came to the Summa bundy Cutcherry. It may be remarked that no mention is made of Cholera in the order itself for the year in which it was issued and the necessity for issuing such an order on that account should have been especially brought to notice.

Board's Proceedings on the Settlement of Fusly 1216. Dated 21st June 1838 Para 3. the despatch with which Puttahs had been distributed in previous years as noticed by the Board,

had

had never been accounted for by their separation in the Villages before they were received in the Office of Settlement until the Commissioners had the opportunity of observing the irregularity of such a Course.

Adverting to Mr. Blackburne's order of the 19th July 1834 that "non resident Ryots" and "Women" should not be allowed to carry away and dissipate their produce so long as they were in arrears to Government it may be observed that this order emanated from himself and is opposed to the principles of a Ryotwary Settlement in not allowing to Ryots the use of the produce from which their rent was to be paid. It is self evident that no circumstance as explained by Mr. Blackburne could justify his resorting to a measure tho apparently made applicable to the cases of "Fraudulent" non resident Ryots" was clearly liable to become an instrument of abuse and oppression.

Marked K Para 10

The circumstances under which the punctual realization of the Revenue was completed, as noticed by the Commissioners are borne out by the statements of Mr. Blackburne himself

Para 36. The

Fort St. George 4th May 1848.

the transactions under which they occurred might not, it is true, have been known to, or authorized by him - but with a knowledge of the facts as brought to their notice the Commissioner had no option but to record the means which were resorted to by the Talook authorities to complete their Collections.-

With these observations based on the review of the whole correspondence connected with the the subject it remains for me to add that there are to my mind just grounds to consider that the system pursued in the administration of the District of Madura was not free from irregularity and error and that the changes adverted to in the Commissioners Report originated with Mr Blackburne

Sir

I have the honor to acknowledge the receipt of your letter of the 13th Ultimo

(47)

From the Bd. Collector of Commutations — Submits the result of the resurvey of Major Minchins Property at Conoor with Copy of Communication from Captain Ouchterlony and two Plans —

Para 1

Sir

I have the honor to acknowledge the receipt of your letter of the 13th Ultimo relative to Major Minchins claim to a refund of Quit rent alleged to have been overpaid by him on land in his occupation at Conoor

Under the orders of the Board a resurvey of the Estate was made by Captain Ouchterlony in the presence of Major Minchin and my Assistant Mr. Chamier, the boundaries being pointed out by the Tahsildar of the Taluk of Ootacamund, the result of which is exhibited in the accommanded, the result of which is exhibited in the accompanying Copy of communications from Captain Ouchterlony bearing date the 29th Ultimo

The Board will observe that Captain Ouchterlonys measurement amounts to 100 Cawnies 3 Grounds and 1050 Square feet, whilst that of the Tahsildar who had measured the land in February last gives 110 Cawnies 7 Grounds and 1440 Square feet, the cause of this discrepancy is sufficiently explained by Captain Ouchterlony the one being a Pygonometrical Survey and the other an superficial measuration

Vide para 3 of letter Dated 29th March 1848.

Should

Fort St. George 4th May 1848

4 Should the Board consider that Major Minchin is not liable to pay for more than 100-20-1050 a similar concession will on the score of uniformity require to be made with reference to the lands held by other Parties on the Koilly basin, a measure which I consider unnecessary and inexpedient, for, the undulations of the ground, the measurements of which are left out in the trigonometrical Survey are as well suited for agricultural purposes as the Level lands.

5 The boundaries pointed out by the Tahsildar were not objected to by Major Minchin at that time. Neither has any communication been since addressed to me on that point and I have therefore no hesitation in saying that he has established no sufficient claim to the refund of the amount alluded to.

6 The slight difference of 3-19-624 which was discovered in the 2nd measurement

Former Meast.	120-3-—	taken by the Tahsildar considering the nature of the ground is too trifling to demand notice, and is below 6¼ per Cent.
Present Do.	116-7-1776	
Less	3-19-624	

7 The two plans connected with the Estate in question are forwarded herewith and I request that they may be returned when no

Fort St. George 4th May 1848.

no longer required for reference.

8 With adverence to para 4 of the communication under reply I have to observe that an extent of 109-0-900 was entered in the name of Captain Vallancey, afterwards Captain Reynolds and ultimately in the name of Major Minchin, and the transfers from one Party to another were also communicated to my Office, but Major Minchin having so frequently stated that he has given up that portion of the ground which measures 69-3-900, the net quantity 120-3-— was retained in that Gentleman's name.

9 No regular application was made to my Office for a Government Grant for this Property either by Captain Vallancey or Captain Reynolds, the latter Gentleman having been precluded from doing so in consequence of the want of a correct Plan of the Premises, no Surveyor being then on the Hills employed under my orders.

10 Major Minchin has been furnished with Copy of Para 3 of your communication and his wishes to give up any portion of his Property will meet with prompt attention.

Coonoor 5th April 1848

Fort St. George 1st May 1848.

To

J. C. Broughton Esqre
Principal Collector of
Coimbatore

Sir I have the honor to forward herewith a Plan of Major Callaways (now Major) Minchins land near Conoor in pursuance of your letter of the 20th Instant and in accordance with the original limits assigned on the spot by the Tahsildar of Ootacamond and under the sanction of your Assistant Mr. Chamier

2 The content of the entire (Original) Property amount to 100 Cawnies 20 Grounds and 1050 Square feet.

3 Any discrepancy which may be found to exist between this and the amount stated by the Tahsildar, may I conceive be accounted for by the circumstance of it being his practice to carry his chain over the undulations of the ground, while my measurements are Trigonometrical or reduced from Hypothenuse to base.

Supt. Neelgherry Survey.

6831.

Fort St. George 1st May 1848.

To

T. Pycroft Esqre
Secretary to the
Board of Revenue.
Fort St. George.

48

From the Pr. Collector of Coimbatore. Forwards an original communication to the Secretary to the Board of Revenue from Major Minchin dated 11th April 1848 also five documents to shew that the aggregate quantity of land originally applied for and obtained by Captain Methuen and ultimately transfered to Major Minchin is Cawnies 120/k and requests that the Board will determine whether the claim set up by that Gentleman for a refund of the amount alleged to have been overpaid is admissable upon sufficient grounds or otherwise.

I to V

Sir

Adverting to my Letter of the 5th Instant No. 22, I have the honor to forward an Original Communication to your address from Major Minchin of the Madras Army bearing date the 11th ident, subsequently received.

2 I have been prevented from transmitting the said reference at an earlier date in consequence of the necessity of further information which has been furnished by that Gentleman only this day.

3 It would appear that Major Minchin has committed a great error in asserting that the entire extent of land which he has cleared, cultivated or enclosed amounts to only 43 Cawnies and 10 Grounds - for in defendent of the statement contained in his previous communication, Copy of which was submitted to the Board on the 19th August 1845, the accompanying Copy and Translation of the Documents numbered as per margin will prove beyond a doubt that the aggregate quantity Originally

Fort St. George 4th May 1848

originally applied for, and obtained by Captain Medham, and ultimately transferred to Major Minchin contains an area of 120 Cawnies and 3 Grounds or 120 3/8 Cawnies.

4 The meaning of Major Minchins statement is I imagine that as he did not enclose the land he is not liable to pay rent thereon, but I hold to the opinion that the purchase and transfer of it on his part renders his liability to pay the Government demand as good and just as if he had actually enclosed and cultivated the ground.

5 The boundaries pointed out by the Tahsildar of Ootacamund to Captain Ouchterlony, were precisely those described in the document No. IV.

6 With this explanation the Board must determine whether the claim set up by Major Minchin for a refund of the amount alleged to have been overpaid is admissable upon sufficient grounds or otherwise.

7 Major Minchin has now handed over certain other documents referring to lands said to have been purchased from Burghers, and at the sales have passed into different hands, not a single instance of transfer has

Vide Secretary's Consultation letter of the 19th April 1848

Fort St. George 4th May 1848

has been made known to my Office. I have called upon that Gentleman for further explanation on this point, and so soon as it is received shall communicate with the Board on the subject.

Signed J. C. Houghton
Principal Collector

Coonoor
27th April 1848

No. 1

To
The Secretary of the
Revenue Board of
Madras.

Sir In reference to an extract of your letter dated 13th March 1848 which has been forwarded me by the Principal Collector of Coimbatore, I have the honor to inform you that agreeably to the request therein contained I accompanied Captain Ouchterlony and pointed out to him the entire extent of land which I have at different periods since my residence here either cleared cultivated or enclosed and which amounts to 43 - 5 - 10.

The Tahsildar of the district who accompanied us on the above occasion pointed out a large Tract of Waste Land, and declared that in the year 1840 this tract of land was included in the Land which he then measured and by the addition of which the Land nominally held by my Predecessors (for I did not arrive on the Hills or purchase the Land till February 1844) has been erroneously.

erroneously put down as amounting to upwards of 120 Cawnies I have simply to state to prove the erroneous nature of the charge for Dutrent that the Ditch which I dug at an expense of Rupees 100 has been well known as my Boundary for the last 3 years, and a reference to my continued correspondence with the Principal Collector of Coimbatore will shew how I continually resisted the charge for 1206 Cawnies, and at last only paid it on protest with the advice and concurrence of the Principal Collector.

I take this opportunity of bringing before the Board of Revenue that the Jungle Rent as by the Rules of the District I could have held the whole Land for 5 years on a Cowle free of Rent, and I do hope the Board will take a liberal view of the position I now occupy, having failed in an attempt to establish an extensive Silk Culture on the Hills after a large outlay chiefly spent on the wages of the Barghers and Coolies employed, not from any want of care and precaution as may be judged of by the late Report of the Horticultural Society at Madras a Copy of which I annex, but from a sudden and probably permanent fall of about

about 40 per Cent in the price of Silk in the London Market owing to the immense importation from China.

Coonoor 11th April 1848. (Signed) Fred.k Minchin Major Madras Army

Silk The only Specimen of this article has been reported on as follows by Messrs Nelson and Haylett. "It is flattering to Major Minchin's labours and should prove an incentive to further exertions in the Manufacture.

"The samples of Raw silk shew a decided improvement in the preparation of this article since last year's exhibition. The Silk is more even and not of that coarse fine of thread which is considered so objectionable by the throwsters. It is clean and of a good bright Color and will bring a good relative price in the London Market. It is much to be regretted that the cultivation has been found unprofitable for the improvement in the Manipulation is so marked, that there is no reason to doubt that the best description of Raw Silk can be produced and prepared in this Presidency. For having so pursued his experiment to this point Major Minchin is fully entitled to the thanks of all parties interested in the prosperity of Southern India.

Recommended for a prize of Rs 300

Ordered that the following letter
be sent in reply.—

47-49

To the Princl. Collector of Coimbatore

To
The Principal Collector of
Coimbatore.

Sir,

I am directed by the Board
of Revenue to acknowledge the receipt of
your letter of the 5th Ultimo with its enclosures,
submitting

submitting the result of the Survey of Major Minchin's property at Coonoor.—

2. From this it would appear, that the extent of land held by Major Minchin at Coonoor, as determined by Captain Ouchterlony, is, Cawnies 100-20-1050 which falls short of the contents of the same holding, as measured by the Tahsildar of Otacamund in February last, by Cawnies 15-27-926; the difference being sufficiently accounted for by the fact, that the former was a Trigonometrical, and the latter a superficial measurement.— It further seems that Major Minchin was present at the Survey, and that on the boundaries of his property being pointed out by the Tahsildar, he made no objection, nor has he since made any.

3. The Board concur with you in opinion that, in determining the amount of assessment chargeable on Major Minchin's land, it is not necessary, and would form an inconvenient precedent, to have recourse to any other than the superficial mode of mensuration usually followed by native revenue Officers— and as the measurement recently made by the Tahsildar differ but slightly from

*by C 3-19-6 2/4 under 6th per Cent—

from the original measurement at which the land is entered in your accounts, they think that Major Minchin may properly be required to pay for his land according to the quantity for which he has hitherto been charged, and that he has no title to any refund— Should he hereafter wish to give up any part of his land the extent of the portion to be relinquished should be ascertained by the Revenue Officers in the usual manner, and the public demand upon him will be adjusted accordingly.—

4. Since the above was written the Board have received your communication of the 22d Ultimo with its accompaniments from which they learn that Major Minchin objects to pay for more than 43 Cawnies being as he states the extent of land which he has cleared, enclosed or cultivated— From your letter and its enclosures it would however seem that the land recently Surveyed by Captain Ouchterlony according to the boundaries pointed by the Tahsildar, was in part sold by its native owners, and in part made over from the waste by the Village authorities to Mr Medhans that the entire property after passing thro' several

Resolution thereon,-

(54-55)

Resolved accordingly that one Tamil Almanac for the ensuing Current year be furnished to the Collector of Madras in compliance with the request contained in the foregoing letter.-

G.O.

1855 Fort St George 4th May 1848.-

To, J. Pycroft Esqre
Secretary to the Board of Revenue

(56)

From the Supt of Spinnies-
Submits four Tenders together with Samples of the Paper and Cadjans proposed to be supplied and solicits Sanction for entering into a Contract with Veerasawmy for three years from the 20th Instant.-

Sir,

With reference to an advertisement from this Office dated 14th ult. and published in the Official Gazette of 17th March last page 246, inviting Tenders for the supply of Paper and Cadjans for the use of this Office, I have the honor to submit for the inspection of the Board four Tenders received by me together with the Samples of the Paper and Cadjans proposed to be supplied during the next three years.-

The rates at which the parties Tenders to supply the Paper and Cadjans is stated in the Margin, and it will be observed that the late Contractor Veerasawmy No 3 has again tendered to supply the water Mark Paper A and Cadjans at the same rate as he formerly did, and as the Samples produced by him appear to me to be of the best quality, I beg to solicit that you will be good enough to obtain the Sanction of the Board for my entering into a Contract with

for the supply of Paper and Cadjans for the use of the Stamp Office for three years from the 20th Ultimo upon the terms specified in the foregoing letter provided the Superintendent is satisfied with the security offered for the due performance of the Contract.

Read the undermentioned lists.

58 From the Collector of Rajahmundry. List of letters addressed to the Board and remaining unanswered to the 31st March last.

59 From the Collector of Rajahmundry. List of letters received from the Board and remaining unanswered to 31st March last.

60 From the Collector of Madura. List of letters addressed to the Board and remaining unanswered to the 31st March last.

61 From the Collector of Tinnevelly. List of letters received from the Board and remaining unanswered to the 31st March last.

62 From the Principal Collr. of Coimbatore. List of letters addressed to the Board and remaining unanswered to the 31st March last.

63 From the Principal Collr. of Coimbatore. List of letters received from the Board and remaining unanswered to the 31st March last.

58-64 Order on the abovementioned Lists. Ordered to be lodged in the Office.

Read

Fort St. George 4th May 1848.

Read the undermentioned Registers

65 From the Collector of South Arcot. Registers of Endorsements passed by him on Petitions referred by the Board from August 1847. to March last.

65-66 Order thereon. Ordered that the Collector be requested to specify at the foot of every future Register of Petitions the number of Petitions on hand which remain for investigation.

67 From the Collector of Tanjore. Register of Endorsements passed by him on Petitions referred by the Board during the Month of September 1847.

68 From the Collector of Tanjore. Register of Endorsements passed by him on Petitions referred by the Board during the Month of April 1848.

69 From the Acting Collector of Trichinopoly. Register of Endorsements passed by him on Petitions referred by the Board during the Month of March last.

67-70 Order on the three abovementioned Registers. Ordered to be lodged in the Office.

Resolved that the following letters be dispatched.

To The Chief Secretary to Government.

71 To the Chief Secy. to Government

Sir

I am directed by the Board of Revenue to submit for the information of the Right Honorable the Governor in Council the accompanying General Statement prepared in the usual form from the Monthly accounts shewing the Collections of Ordinary Revenue from 12th July 1847 to 31st January 1848 of Fusly 1257 compared in the Collections in the same period of Fusly 1256.

A

Abstract B shews a net Increase in the aggregate of Rupees 397,803-11-11 resulting from

Increase in the Collections of arrears 184,938 — 5½
Dr in the Collections of Current — 136,516 — 14 — 11
+ 321,454 — 15 — 4½

a net increase of Rupees 321,454-15-4½ in the Collections of Land Revenue and a net Increase of Rupees 76,350-12-6½ in the Collections from Extra Sources of Revenue.

Abstract C. shews the Increase and Decrease in the Collections of Land Revenue and the Revenue from Extra Sources in the several Districts.

Revenue Board Office
Fort St. George
4th May 1848.

To

The Chief Secretary to Government

(72)

Sir,

To the Chief Sect. to Government

I am directed by the Board of Revenue to submit for the information of the Right Honorable the Governor in Council the accompanying General Statement prepared in the usual form from the Monthly Accounts shewing the Collections of Ordinary Revenue from 12th July 1847 to 29th February 1848 of Fusly 1257 compared with the collections in the same period of Fusly 1256.

A

Abstract B shews a Net Increase in the aggregate of Rupees 7,59,713-9-2 resulting from a Net Increase of Rupees 5,53,253-6-4½ in the Collections of Land Revenue and a Net Increase of Rupees 206,460-2-9½ in the Collections from Extra Sources of Revenue.

Increase in the collections of arrears } 193731-8-2½
Increase in the collections of current } 359521-14-2
+ 553253-6-4½

Abstract C shews the Increase and Decrease in the Collections of Land Revenue and the Revenues from Extra Sources in the several Districts.

Revenue Board Office
Fort St. George
4th May 1848
