Para 1. The Right Honorable the Governor in Council regrets to observe from the foregoing letters the great increase in the number of Village Officers brought to trial in 1847 for offences punishable under the Provisions of Regulation IX of 1822. The subjoined Statement exhibits at

at one view the prosecutions during the last five years.—

The prosecutions in the year under review were the most numerous in Guntoor and Cuddapah; in North Arcot and a few other Districts the number of trials was also great but in the generality they were limited while in some few Districts no trials took place under this Regulation. It is somewhat remarkable indeed that while in Cuddapah there were no less than 270 persons brought to trial and convicted in the adjoining and sister district of Bellary there were only 4 Cases.—

3. In the Minutes of Consultation of the 28th May 1839 No. 672 the Government remarked that the very unequal operation of this Regulation led to "the conclusion that whilst recourse is unnecessarily had to its provisions in some Districts they are altogether avoided in others - An error either way - and - one which it is the especial duty of the Board of Revenue to see that the several Collectors carefully guard against for as on the one hand it is most improper to convert the Law into an engine of oppression, so on the other wholesome provisions when they can be properly administered ought not to be allowed to remain a dead letter" Notwithstanding that the Board of Revenue communicated those views in their Circular of the 15th July 1839 to the several Collectors and that their own attention had been drawn to the subject generally at different subsequent periods, the results, year after year including the Returns of the year under review and the results noticed in the preceding paragraph

those cases in which the Police Officers have been prosecuted for acts done in the discharge of their duty, and which have been reported to the Board of Revenue, and by them to Government, as required by the Regulation, and in which the Police Officers have been honorably acquitted, and the Prosecutions declared to have been malicious and vexatious, and the Prosecutors punished, as in the case of Ramasawmy Moodelly, Tahsildar of Cuddapah, and Ramasawmy Moodelly, Shanbogue of Cuddapah, noticed in the Proceedings of the Board of Revenue of the 28th February 1842 No. 284, and in the Proceedings of Government in the Judicial Department of the 31st December 1842 No. 1513.

"including in those returns cases of a trifling description not properly coming under the Provisions of the above regulation and which practice the Board had directed to be discontinued" has made no alteration in the Results of subsequent years whether those results are owing to the Returns for Cuddapah being prepared on a principle different from that observed in other Districts whether they are owing to a too frequent recourse to the provisions of the Law in petty cases properly disposable under other powers vested in the local officers, or whether they are owing to cases being included which do not come under the provisions of Regulation IX of 1822 are points demanding the attention of the Board, and the Governor in Council requests that the Collector of Cuddapah may be directed to afford explanation on the subject with reference to the foregoing remarks and that the Board will at the same time call up some of the decisions and satisfy themselves of the real causes by which the results apparent in Cuddapah are influenced, reporting the result of their investigation for the notice of Government.

5th The Governor in Council thinks that it would be advisable to repeat the Circular letter of the Board of Revenue of the 15th July 1839 and again to direct the attention of the local officers to the views and wishes of Government.

Resolved that a copy of the foregoing Extract be communicated for the special attention of the Collector of Cuddapah.-

Mr. Cochrane is requested to state his opinion as to the cause of the large number of prosecutions of Village Officers that has taken place in his District annually of late years. The Board observe that of the 270 persons, all of those class who were brought to trial and convicted under Regulation IX of 1822, during the past year, upwards of 200 were tried for concealment of cultivation. In Extract Minutes of Consultation 31st December 1842 the Government had occasion to remark that the "Monthly Returns for the period under review submitted to the Board shew that the parties charged are invariably Village Officers and that the offence is an invariably concealment of land liable to assessment" and these facts they were led to add "argued either an extraordinary decree of remissness on the part of the Talook Revenue Officers or some peculiarity in the circumstance of the Reddies and Curnums affording unusual

From the Collector of Guntoor, submitting for sanction of the Board of Revenue proposals for renting the Abkarry and Sundry small farms of the Guntoor

Sir,

Para 1. I have the honor to submit for the sanction of the Board of Revenue, a proposal for renting the Abkarry and Sundry small farms of this District for Fusles 1258-59 and

Fort St. George 10th July 1848.

Guntoor District for fusties 1258 59. and 60 by Comaravole Nangaswarow amounting to Rupees 31,320 — for each year.

and 60. by Comaravole Nangaswarow Amounting to Rupees 31,320 — for each year.

2. These items of Revenue were sold to public action, the highest bid being that of the above individual in conjunction with one Pidaya Ramayya. The latter having failed to name satisfactory or sufficient securities, his share in the Contract has been disallowed and the former individual has agreed to take the whole upon himself and has offered sufficient security which will immediately be taken in the proper form.

3. It is to be observed that the proposed amount of rent is considerably higher than has been realized either before or since famine so far back as fusly 1230: the highest revenue of the first period being that of fusly 1238 Rupees 27,393 — — In the former year it decreased to Rupees 18033 in fusly 1245, since which period it has, with slight fluctuations risen to Rupees 25,455 in fusly 1257. to which sum 1,406 is further added as the amount of Taxes transferred from the Nellore and Masulipatam Districts, making a total of Rupees 26,861.

Fusly 1257 - 26,861
Proposed 31,320

The increase of the present proposal therefore is Rupees 4,459. above last year.

Fort St. George 10th July 1848

the sale that in view of some rule being introduced as proposed in my letter of the 26th April 1848 regarding the assessment of Palmyras the renters should not be considered as having any claim as they have hitherto to the toddy or produce of the trees which will be assessed as belonging to private individuals and the estimated sum of Rupees 2,000 for the loss of this previlege was deducted from the highest bid. The real increase therefore of the present proposal may be stated as Rupees 6,459 an advance of 24 per Cent upon last year.

5 It appears more than questionable whether it is expedient to raise this branch of revenue so suddenly to such an extent as well as doubtful whether the renter has not been induced by the competition of parties to undertake these farms at a rent, to meet which it will require a considerably increased quantity of intoxicating liquor to be manufactured and sold, as well as probably enhanced terms of agreement with the toddy drawers and under renters, both of which must be productive of much evil.

6 I would therefore suggest that some reduction should be made upon Condition that the renter will engage to manufacture toddy into Jaggery to some extent, a practice which it is to be

Fort St. George 10th July 1848.

be regretted, is so very rare in this District, and one more desirable to encourage. The renter has in hope of some reduction agreed to manufacture during the first year 100 Candies of Jaggery 150 Candies in the second, and 200 Candies in the third year of his rent. It is stated that the profits of arrack and Jaggery are in the proportions of about 4 to 1, so that in the first year of his engagement by manufacturing the 100 Candies of Jaggery, he would lose about 300 Rupees as the 100 Candies would sell for about Rupees 1000, while if the toddy used for the Jaggery should be converted into arrack it would yield about Rupees 4,000 without fixing the proportions, it is evident that Jaggery is not nearly so profitable a manufacture as arrack to the

7 If the Board approve of my suggestion I consider that the highest bid before the sale plus the amount of Revenue of the Villages to be transferred from Nellore and Masulipatam would be about a fair standard which it should

The deduction from the amount of the proposal or highest bid, would thus be Rupees 2,520 which would be a Compensation for the loss by the introduction of the more exclusive manufacture of Jaggery.

8 In every respect the acceptance of the proposal for 3 years seems preferable to letting it for a single year.

Resolution thereon -

(16-17)

The Board of Revenue are disposed to question the expediency of the arrangement suggested in paras 6 and 7 of the foregoing letter - It appears to them that the conditions regarding the manufacture of Jaggery proposed to be introduced into the Ahkarry lease would be difficult of enforcement, and that they would be pleaded as an excuse by the Renter in the event of his failing to fulfil his engagement - It may also be doubted whether any reduction in the sums bid

lish at the late auction would tend to prevent abuse on the part of the Contractor who it is to be supposed will make the most of his farms under any circumstances. The amount also does not seem large compared with that realized in other districts, or more than might be expected to be derived from Guntoor in its present improving condition. Under these considerations the Board authorize the acceptance of the offer of 3,320 Rupees for the Alkarry and Sunda farms for 3 years 1258. 1259 and 1260 made by Comaranale Nunguvnarow and direct that he be placed in possession on his depositing one months Rent and furnishing security for three Rents more - or on his lodging a deposit of 2 Monthly instalments in money without Security.

In Cons.s 2d Augt. 1847. Collector of Bellary stated, that the Salt Modas or hillocks of his district might be considered as referrible to 16 Classes, distinguished according to the number of men and cattle employed in them — but taxed very unequally even as respected those of the same class, and without any regard to the value of the Salt produced.- These several classes their maximum, minimum and average rate of assessment with other particulars are shewn in the annexed table.-

2. With a view to equalize the assessment and proportion it to the value of the manufacture on which it was to fall, the Collector proposed, by combining some of the classes above given, to reduce them to eight and to assess each class of Moda at 10 or 12 per cent on the value of the Salt produced in it. This plan will be seen more clearly by reference to the subjoined table.

3. The total amount of revenue which would be raised at a percentage of 10 per Cent: would be Rupees 11,230 or Rupees 1,875 — 4 — below the beriz of Fusly 1255. that to be yielded at 12 per Cent would be Rupees 13,476 or Rupees 371 above that beriz. the maximum or minimum rates at 12 and 10 per Cent, are Rupees 12 and Rupees 1 — 8 — and Rupee 10 and Rupee 1/4 respectively. The value of the earth Salt was taken at 100 Rs per Garce being less by nearly one third than the average selling price / Rupees 145 — 1 — 4 / stated in Mr. Mellor's letter of 28th April 1844, but it is represented that the manufacturers are in the habit of disposing of their produce at prices much below the bazar rates.

In Cent. 30th May 1848.

5. In Cuddapah the manufacture of earth Salt was prohibited in 1812, prior to which date house tax or Moturpha tho' to no considerable amount, seems to have been collected from the Woopparwars or salt manufacturers since the prohibition, tho' Salt has continued to be made, no tax on this article specifically has been levied from those engaged in the manufacture. The Salt Modas in Cuddapah are reckoned to be 1708, of which 906 produce Salt of the

letter

Fort Saint George 10th July 1848.

letter, and 802 that of an inferior quality. The quantity of Salt yielded daily by one of the latter description is double that derived from one of the former, but the 2d class Salt is of only half the value of that of the first. Thus the value of the quantities produced in each class of Salt hillocks in equal times, is the same, being as an average 1 Rupee in two days, or 45 in the three months which constitute the working season. Of this Rupees 35-12 are supposed to be absorbed in charges, and Rupees 9-4-0 to represent the profit realized annually from each hillock- the average selling price of earth Salt in Cuddapah being given at 75 Rupees per Garce. It was proposed to tax the Modas at rates varying from 5 to 2 Rupees and average 3½ Rupees each, and the aggregate revenue thus derivable would be Rupees 5978 per annum, or Rupees 5-3-6 per Garce, on the total quantity produced.

5. In their Proceedings of 30th September 1847 in Commenting upon the reports which an abstract has been above given the Board remarked that Mr. Mellor's plan did not appear to provide for those of the existing

Fort Saint George 10th July 1848.

Modas which did not exactly fall under any of the classes contemplated in his scheme. It was their opinion that none of those now worked should be suppressed; but that they should be assessed according to the number of men and cattle employed upon them, or with reference to the quantity of Salt manufactured. It was further suggested that the same rates might be made applicable to both Bellary and Cuddapah- the Collectors of those Provinces were therefore directed to communicate with each other, and to state whether uniform rates of tax might not be adopted throughout the Ceded Districts. at the same time it was resolved to refer to the Government Agent at Kurnool with a view to ascertain the practice obtaining in respect to the assessment of earth Salt in the province under his management, and how far it might be assimilated to that proposed to be carried out in Cuddapah and Bellary.

In Cont. 1st June 1848.

6. In his reply of the 22d May last recorded at the head of these Proceedings the Collector of Bellary has pointed out that the rates proposed in his previous classification of the Salt Modas were based upon the supposition that the value of the article produced by each man or buffaloe was Rupees 12-8-0 the tax

on

on which at 10 p% would be Rupee 1-4. Thus in
his first class the number of men and cattle
employed are 8, the value of the produce is taken
at 100 Rs the tax at 10 being thus respectively 12½
Rupees and 1¼ Rupee per man or bullock
as already stated. On this principle it will
be easy so to arrange the rates of assessment
on the various classes of modas as to admit
of their adoption to any number of men
or cattle that may be employed.

7. In his answer of the 24th April
last the Collector of Cuddapah has stated
that he does not consider it practicable to
assimilate the rates of assessment in his
District to those proposed for Bellary, more
as it would seem from the superiority in the
quality of the Salt produced in the
latter District, and the greater quantity
which is yielded by the same amount
of labor. He is of opinion that a
higher tax than 8 per cent ad
valorem could be imposed in Cud-
dapah that proposed for Bellary
being 10 or 12. He has at the same
time more fully developed his
original plan and introduced

modifications. It is now intended to
have six classes of Modas distributed
according to the number of men or
buffaloes employed at them, and
to the quantity produced and for each class there are to be
three rates of assessment graduated
according to the value of the
of the earth used and its
distance from the place
of manufacture, as shewn
in the subjoined state
ment.

The highest rate will be 8 Rupees the lowest 1 Rupee and the aggregate assessment will be Rupees 6,007-4-- or about 8 per Cent on the value of the salt produced, the highest rate which could be imposed in Mr. Cochrane's opinion. It is not expected that more than four buffaloes will be worked in any one Moda. Should more men be employed than are provided for in the table for each class, they may be taxed additionally at rates varying from 12 to 8 annas per man.

12th Feb.y Inclosure

8. From the report of the Government agent at Kurnool it will appear that the number of Salt Modas worked in his District is only 60. distributed according to the number of men or Cattle into 10 Classes assessed at rates referrible to no fixed principle but ranging from Rupees 17 to Rupee 1. The Salt is represented as being inferior in quality to that made in Cuddapah or Bellary, and the profit gained by the manufacturers as small. The total revenue derived from these Modas is also inconsiderable being for Fusly 1256 only Rupees 347 Mr. Phillips expresses himself averse to any interference with the existing rates unless it be to reduce them by levying 10 or 12 per cent on the value of the article produced, under which arrangement the Salt cultivators will be benefitted to the extent of Rupees 132½ or Rupees 89½ according as the lower or higher per centage be adopted. It is however suggested "that to rent the privilege of making "earth Salt for a few years would lead to a "knowledge of the assessment which the cultivators "can fairly bear. better than any other plan; for "it is obvious that they would abandon their "Salt Cultivation if the renters attempted to enforce "unreasonable rates; and those which would be "found in force when again taken under Amani "would perhaps be as good a guide as can under "present circumstances be secured for levying "the tax."

Fort St. George 10th July 1848.

Bellary 9. It has been shewn in para 3 of these proceedings that the total Amount to be derived from a tax of 10 per Cent on the value of the earth Salt produced in the Bellary Modas would fall considerably below the present revenue, whereas that which would be realized by adopting the rate of 12 per Cent would exhibit a small increase above it

The

The Board are not aware why any reduction should be made in the present beriz under the new arrangements. They have no reason to believe the tax now levied to be excessive in the aggregate, and the manufactures must of course have benefit by the abolition of the inland duties, and will also derive further advantage when the Frontier Custom shall also be discontinued. Taking therefore the rate of 12½ on the value of the Salt produced in each heap the scale proposed by the Collector will be as under shewn.

Buffaloes.	Men.	Value of Salt Manufactured in each Modas.	Tax on each at 12½.	No. of Modas.	Total Rupees

7	"	2	25	3	75
8	"	1	12-8	1-8	140	21
				Total	13475

The maximum and minimum rate will be respectively 12½ and 1-8. The highest and lowest rates at present are Rupees 28 and 3-6. Thus it will be seen that while the plan proposed will effect a great reduction in the higher rates now in force it will raise the lowest rates by more than 600 per Cent. The Board regret this latter circumstance, but it seems to them to be inseparable from any attempt to introduce regularity and uniformity into so anomalous a system as that which now prevails, and they do not see how it is to be remedied without departing from the principle laid down by the Court of Directors, Viz.t that of proportioning the tax to the quantity and value of the article manufactured.

From Govt 13th February 1846 No. 191.

10. It was objected to the scale of rates submitted by Mr. Mellor, that it excluded some of the present clases of Salt Modas. On referring however to the existing distribution as shown in para 1 of these proceedings it will be perceived that the number of Modas in some of the Clases is very small. Thus the number worked by 4 Buffaloes and 8 men is only 4, that by 3 Buffaloes and 6 men is also 4- that by 3 Buffaloes and 5 men only 2- by 3 Buffaloes and 4 men only 4- & the number of those worked by 4 Coolies without

Fort St. George 10th July 1848

without cattle is but 6- that worked by 3 Coolies is but 3- All such cases may therefore the Board think be referred to the classes nearest to them in the proposed revision. Thus the Modes worked by 4 Buffaloes and 8 Coolies may fall under the first class- those by 3 Buffaloes and 5 men, 3 Buffaloes and 5 men, or 3 Buffaloes and 4 men may be referred to the second Class- an Extra charge of 1—8 being made on each for each additional man employed. It is however observed that the number of Modas worked by 2 Buffaloes and 4 men amounts to 99, and that it is not contemplated that this shall form a distinct class under the new arrangement- The quantity of Salt produced by each man and Buffalo being estimated by the Collector as the Viz.th 12—8—0, that of the Salt manufactured by 2 Buffaloes and 4 Men may be regarded as equivalent to that produced by 3 Buffaloes and 3 men, and the Modas of the former description may be ranged under the head of the new classes. This adaptation of the old to the new classes will be more clearly perceived in the following Statement

Cuddapah

11. The Board concur with the Collector of Cuddapah in opinion that it is not necessary to enforce uniformity in the rates of assessment to be imposed on the Bellary and Cuddapah Salt Modas, both for the reasons which he has urged and because, whereas the present measure as it respects the former Districts is but the revision of a long existing impost it is in Cuddapah tantamount to the introduction of a new tax, no assessment having been levied upon the Salt manufactured in that province since 1812, and the amount realized before that period being it would seem inconsiderable. Under such circumstances the levy of a per centage of 8 per Cent on the value of the Salt manufactured will in the judgement of the Board be sufficient for the present at least. They do not however approve of that part of Mr. Cochrane's plan which would vary the rate payable by each class of Moda according to its distance from the earth used in it and similar considerations. The arrangement

would it appears to them be one difficult to carry out in practice, and which would leave too much to the discretion of native revenue servants. They would therefore adopt the average rates which he has given uniformly according to the annexed table.

Class	Buffaloes	Men	Value of produce	Rate of Tax.	
1st	4	4	90	7–4	
2nd	3	3	67–8	5–4	10 annas additional
3rd	2	2	45	3–8	to be added for
4th	1	1	22–8	1–12	each Cooly employed
5th	"	4	30	2–8	above those entered in
6th	"	2	15	1–4	the several Classes

12. From the foregoing remarks it will be perceived that the principal on which the Collectors of Bellary and Cuddapah have proceeded is the same, and is in accordance with the instructions of the Honorable Court. Both Officers have ascertained to the best of their power the value of the Salt manufactured in the several descriptions

descriptions of hillocks in their districts, and have attempted so to arrange their proposed classes of Modas, and the rates of assessment leviable upon them; that the tax shall bear an equitable and uniform per Centage to the value of the article on which it is to fall_ the per Centage being higher in Bellary than in Cuddapah for reasons already explained. It is of course evident that the difficulty of gaining information in such enquiries where much must be taken on the assertion of interested parties is considerable; but the Board regarding the suggested arrangements as explained in the preceding Paras 10 and 11 to be on the whole satisfactory, would recommend that they be sanctioned for five years from the commencement of the approa

Fasly 1258. at the expiration of that period they shall be open to such revision as greater experience and knowledge of the subject may shew to be requisite.

Kurnool

Considering the small number 160 of the Salt Modas in Kurnool and the little revenue derived from them, the Board are not of opinion that any revision of system is very urgently required. They are however inclined to support the Agents recommendation that the mode of Assessment in his District be assimilated to that to be adopted in Cuddapah and

and Bellary, and a tax of 12 per
cent on the value of the Salt
produced in them levied on
the different Hillocks in lieu of
the present rates, which it is obser
would involve a reduction of
this branch of revenue to the
extent of 89½ Rupees. The
Board are not inclined to sup
Mr. Phillips suggestion for remit
out the privilege of
making Earth Salt.

June were somewhat partial. In August,
September, and until late in October the rains
were partial and generally deficient, but
towards the end of that Month and in No-
vember heavy rains fell, so that most of the
tanks received a full supply with the excep-
tion of those in the Poloor Taluk where
but little rain appears to have fallen
during any part of the Season. In the
last mentioned Month a violent hurri-
cane occurred which breached or
injured many of the tanks, blew down
many trees and destroyed the Crop of
fruit

fruit &c. of the year.— There was little or no rain in the months of January, February, March and April. The horse Grain and other pulse were attacked by an insect which did great mischief in many Cases almost destroying the Crop entirely. The District continued healthy throughout the year and few Cases of Cholera occurred and the Cattle were also free from disease.—

Cowle lands. 23. The remission for lands held on Cowle during the Fusly 1255 amounted to Rupees 839-7-2 and in Fusly 1256 Rupees 109-11-8 as p being a decrease of Rupees 729-11-8 as p in the latter occasioned in part by the land having come under the full assessment on the expiration of the Cowle and partly by certain land which was taken in Cowle in Fusly 1254 in the Cavery part Talook having been given up and incorporated with the other

Circar

Circar land, the Cowledar having declared himself unable to fulfil his engagement.

Colwadah lands or fixed rents

24. The remission granted under this head was Rupees 6,012-12-6 in Fusly 1255 and Rupees 5972-5-3 in Fusly 1256 being a decrease of Rupees 90-7-3 in the latter. The difference is occasioned by the relinquishment of their Colwadah lands by two individuals in Chendraghirry Talook of the Tripatty Talook. The lands are added to the other Government lands.

Teazzarry.

25. The remission under the head Teazzarry in Fusly 1256 amounted to Rupees 12,981-9-8 being an increase of Rupees 2,336-6-8 above the preceding year arising from the increased Cultivation of the lands.

39 The Settlement of the Sub Divisio
was made by Mr R. P. Cotton. A report of the
by Mr Birming, the present Acting Sub Collecto
is herewith forwarded. The Coolie lands as
mentioned in Para 17 of the report are the same as the
which were the subject of my letter dated 10th August 1847
The lands having been relinquished at the
the end of Fasly

as therein explained, such of them as were
cultivated in the year under report paid the full
teerwah and the remainder have been incorpo
-rated with the other waste lands. The remarks
of the Sub Collector on the conduct of the
Manigar of the Malay alumor Hill Villages
seems out of place in a settlement report
particularly as it would appear that Mr
Birming has not yet completed his
enquiries on the Subject.

There was a falling off in the
40 Cultivation of Sudgo in consequence probably
of the high price of every description of
Grain, and also in the Cultivation of Sugar
canes arising from the fall in the price of
Sugar. In the quantity for which Certificates were
taken for export to England there was a
decrease of Maunds 66697 271/320. No progress has
been made in the introduction of
the Mauritius or any other superior
description of cane. The Ryots appear to object
to it on the grounds of its being too large and
hard to be conveniently crushed by their simple
and imperfect Machinery. The Manner in which
the Sugar Cane is cultivated in this District
in detached and distant patches seems
unfavorable to improvement either in
