Read the following lette

To T. Pycroft Esqre.

Secretary to the

Board of Revenue

Fort St. George

(41.)

From the Collr. of Guntoor

Submitting three detailed Statements in English and Telugoo exhibiting the new rates and mode of settlement introduced the Coast llages for ly 1257 alled for the Boards ceedings f the 4th ecember ast.—

Sir,

Para 1. As promised in Para 24 of my last Jamabundy Report I have the honor to submit in English and Telugoo a detailed Statement No. 1 Exhibiting the rates and mode of settlement in the Coast Villages which existed in Fusly 1256; the change made therein, and the results of the change in the actual settlement for Fusly 1257. No. 2 is a Villagewar abstract of this Statement shewing the extent of Cultivation and revenue for Fusly 1256, the revenue that would have been derived on the same cultivation under the new rates, and the actual settlement of 1257 with a Comparison of these three several results and No. 3 a Tabular view of the varieties of rate previously prevailing and now settled.—

The

2. The Villages to which this report has reference, comprise the sandy tract lying between the Sea and a line drawn from near Vellatore near the Kistna and Chena Ganjam and are 39 in Number, being 15 in Bauputtah including two acquired from Nellore 1 in Ponnoor and 23 in Repully.

Note.
In Para 24 of last Jamabundy report the Villages are mentioned as 32 - Seven other Villages which had then been classed as Muctah Villages are now included -
1- Cheeralah } Nellore
2- Rudillapully } Nellore
3 Cadacudaree
4 Ventapolem
5. Peda Ganjam
6 Chena Ganjam
Sottanapully
7 Do. Chelakalorepaud.

3. Although the surface of the ground is for the most part sandy it is in some places Muddy and there are hollows which retain the rain and flood water and form marshes - Most of these are more or less cultivated with rice, which will be settled and reported on with the rest of the rice lands of the Talook. The sand is generally covered with an inferior kind of Grass, and in some places with Shrubs, and near the Villages and hamlets Palmyras grow extensively. - The distinguishing feature however of this locality is the facility of finding fresh water throughout the year at the

depth of about 6 feet or less. -

4. Two methods of Cultivat have prevailed. - One by the plough an sowing broad Cast Raggy horsegram Arega and some other grains. - If the Season be favorable and Manure ha been used, the returns from this method are good, especially of raggy otherwise very small - The other Method is called Jareeb or Garden and is carried on by hand labor, a small patch of the sandy ground is selected, and some times enclosed by a fence or Mudwall, and watered by the hand with Pitchers from a Pond dug for the purpose. - The usual productions are chayroot, Raggy, Tobacco, and chillies. - If sheep have been pend on the land the returns are very large, and cultivation can be carried on without either stock or Ploughs, a common hoe and a Couple of Chatties being all that is required by a Jareeb cultivation whether for dry or Garden Cultivation, a new spot is commonly selected each year, and there being no defined fields, annual measurements are necessary.-

5 The following are the peculiarities of the old System, For Jareeb Nominal rates prevailed in each Village varying very greatly not only with the Crop but with the different Classes of Cultivators, as will be seen on inspecting the Statements, and in addition to these rates large sums were collected for Curnums fees and Village expenses. The standard of measurement was the Coonta, nominally the square of a line of 32 Cubits but both the measure and the mode of measuring were very loose.- Dry Cultivation was commonly under share.- Under the Zemindars, these Villages were almost always under rent, and they continued to be so until the Board's instructions received in

the close of Fusly 1255, discouraged this mode of settlement.-

6 It was then that the anomalies and defects of the existing system came for the first time prominently under my notice and attention was directed to its improvement.- The revision was first commenced in the Banputta Villages by Mr. Newill, and the revised rates proposed by him, with some trifling modifications, were adopted and directed to be brought into operation in Fusly 1257- As Mr. Newill had been, as a special case, allowed by Government to have three Talooks equal to the ordinary charge of a Sub Collector with a provision that the result of the arrangement should be reported, I thought it not inconsistent with the spirit of the Board's orders to require from him a Jamabundy report which was forwarded to the Board but returned with Mr. White's letter

of the 2nd December 1847 as not being necessary, I now forward an Extract from his Report so far as it relates to this subject.—

Paras 34 to 36.

7. The leading principles of the change now made, and which, subject to confirmation or alteration by the Board, has been brought into operation under the general instructions of the Board for extending throughout the whole district an uniform Ryotwary System, are as follows.—

The Acre has been adopted as the standard of Measurement, personal distinctions or different rates for Curnums Brahmins, Shepherds &ca have not been recognized.— In the dry Cultivation no distinction has been allowed with reference to the Crop, In Jareeb however, some distinction seemed still unavoidable so far as to allow one rate for Chayroot and Tobacco, and another for Raggy &ca in each Village.—

Jareeb Dry Cultivation.
Repully 12 to 5. 2 to 1-8.
Bauputtah 40 to 5. 2-8. to 1-4.

8. It will be observed that the new rates in Repully are considerably lower than those in Bauputtah, with reference to the previously existing difference.—

Land Revenue
acres
1256 – 9734 – 48,382
as per new rates – 42,688
1257 – 7498 – 33,759

9.— The immediate result of the change has been a considerable decrease in the Revenue partly aggregated by an unfavorable season, but still more by

by the prejudice and mistrust wh the Curnums and others who have an interest in maintaining the old system, succeeded in keeping up, in the minds of the Cultivators.— The decrease in the Village of Motoopully – Naeinepully alone amounted to 8,271-13-" Rupees in the article of Chayroot, the Cultivation of which, I have reason to think, the Curnums managed to check in order to get a better sale for their old stock of the previous year, and also because they had lost the great advantage they previously enjoyed over actual Cultivators.—

10. There can be but little doubt that the principles now introduced are intrinsically better than those they have superceded and I confidently hope that they will tell beneficially on the revenue, at the same time the experience of one or two seasons will be required to watch their operation and to make such modification as may appear necessary.—

Guntoor Zillah
Collector's Office
Datchapully
9th February 1849

(Signed) H. Stokes
Collector

Statement

No 4

Extract from the Report of Mr Newill dated 15th November 1847.

31. In the Bauputtah Talook the experience of the past has shewn the necessity of settling several items either upon better principles or a modification of existing ones. The first is the revenue of detached patches of land in the sandy tract along the Coast found capable of yielding Crops of grain, Natcheny, Varega &ca alluded to above in Para 8. They have hitherto generally been rented, otherwise they have been settled under the sharing system, which owing to the scattered localities, has occupied much of the time of the revenue servants which could have been better employed. The fixed Moctah rates are inapplicable to these lands, as they are frequently changed and seldom Cropped in Consecutive years, and the only alternative is to assess them in the same manner as garden lands, leaving them like those to be

measured

measured every year. It has been difficult to form any average sist upon the extent of land for past years, partly owing to the renters detailed accounts not being very credible, and partly owing to the quantity of land being only stated at random, accuracy not being required under the sharing tenure. The following are the rates now proposed upon consideration of the relative qualities of the soil in the different Villages and the produce of the same.—

No

No.	Villages	Amount of Ambarum sist Fusly 1256			Proposed rate per acre

13	Cadacoodur	"	"	"	1	4	"

These

These rates to be applied without any distinction of crops or of the Classes of Cultivators and without any diversification in the same Village, as the difference in the soil has been sufficiently provided for in fixing the rate of each Village. The sist of the present year upon the sharing system has been appended above, in specifying the rates. The Numerous complaints which necessarily arise under the old mode of Settlement, as well as frequent conference with the Ryots on the subject when at Bauputtah, lead me to Conclude that the proposed arrangement both as regards the principle, and the amount of rates will be generally acceptable; and with your permission I have taken steps for it's introduction in Fusly 1257.

Revision of Garden Assessment in Bauputtah.

35. The next item requiring special Notice is the revenue of the Garden Cultivation of Villages along the Coast. In the annual Measurement of these, the English acre has been this

year introduced, and the rates of aſseſsment proportioned to it, the land has thus been correctly ascertained; but the mode of aſseſsment likewise requires revision. The Villages have belonged hitherto to different Zemindars, and have been some times rented, and generally subjected to numerous Extra Collections. The present aſseſsment also is levied upon the objectionable distinction of the claſs of Cultivators, and with more distinction of Crops, than appears Neceſsary. The accompanying Statement shews the present rates, and those proposed to be substituted, the present Sist and the effect the new rates would have upon it. By reference to the united Village of Motoopully and Nainepully, it will be seen that there are at present no leſs than 13 rates upon Chayroot, varying, not with reference to the soil, but according to the Cast or claſs of the Cultivators, from Rupees 52—1—8 to Rupees 14—11—7 The same principle holds in the other Villages and some have as many as 5 rates for different Crops, each varied again according to the claſs of Cultivators. The partiality, if not injustice, of the present

mode

mode is obvious.

36. It is now proposed to retain only two claſsifications of Crops in each Village; Cheyroot, Tobacco, Chellies &ca forming one, and Tameda or Natcheny the other; as the profits of these seem to require this distinction. To each of these claſses a single rate is applied in each Village, (with the exception of Nainepully, where two are retained) fixed partly with reference to the relative productiveneſs of the soil of each Village and aſsimilated to the present average Sist. The rate of 1st Claſs crops of Cheyroot, Tobacco, Chellies &ca as now fixed, will generally range between 20 Rupees and 16 Rupees an acre, and of 2nd Claſs of Natcheny generally from 10 to 8 Rupees the acre. In Ninepully and Motoopully where a portion of the land is very excellent Rupees 40 for Chayroot and Rupees 15 for Natcheny have been, as an exception, retained with reference to the former Sist as the 1st rate; and 20 Rupees and 8 Rupees forms a second rate; these are to be distributed upon divisions of the land. The Cheyroot raised on ground watered by Pacottahs, which is not nearly so productive as that raised in the more usual mode, is rated at half the full aſseſsment of this item, which however is some-what above the present Average, but not too high. The whole extent of this Cultivation for Fusly 1256 is 1,113 acres, which yielded a

revenue of Rupees 25,431 — 10 — 10 — by applying the rates now proposed, a Revenue of Rupees 21,687 — 8 — 7 would be the result, involving a deficiency of Rupees 3,743 — " — " But it must be admitted that some of the old rates were much too high, and some cases, such as appears in the remark to the Village of Epoorpolem would call for reduction in any case. The new rates also could not be raised much higher without imposing upon Many parties a vexations increase of Kist above their present rates — as it is, the total amount of increase is Rupees 306, which, from the remarks attached to the items upon which it arises, will appear not to fall at all heavy upon the parties. It is also to be taken into account that the encouragement afforded by this revision of the assessment will probably contribute much more to the revenue than may now appear to be sacrificed for its establishment — Engagements are being entered into with the Ryots according to the revised rates for the Current year, in anticipation of the sanction of the Board of Revenue, as you have expressed your concurrence in the above view, and approval of taking steps for carrying it out — The annual Measurements of the lands will still be necessary as the Chayroot and other productions are not generally raised upon the same ground in consecutive years.

Collector

Proceedings.

DG.

Reviewing the revision of the rates of assessment in 39 Villages in the Sea Coast in the Baupetslah & Reypully Talooks in Guntoor — Para. 2 —

(48-42)

Proceedings thereon; The Villages here referred to are situated in a peculiar Sandy tract stretching along the Sea board of the Guntoor District, the physical character of which is fully described in the Collector's letter and in the Survey Report of the Commissioner of the 18th December 1845. It is not for the most part permanently occupied but is cultivated with rice here and there on low spots where the water lodges. — Other parts of it are ploughed when rain is plentiful and sown with dry Grain or cultivated with Garden produce by the hand. Water is always to be had for the digging within a few feet of the surface and a fresh location is generally selected every season These spots are measured by a Native Village standard subject to much variation. The engagements for the revenue varied both with the nature of the Crop and the description of person raising it, but in the wet and dry Crops the Government share is taken in kind. Thus for instance in Bapetla Cusbah there are 7 Classes of persons each paying according to their particular Casts and 8 Sorts of produce each with a particular rate of assessment and in other Villages still more.—

Note. The accounts show 13 classes of inhabitants and 23 rates of Assessment for the tract.-

2. The alterations proposed are 1st. to substitute the acre as a standard of measurement for the Coontoo.—

2nd. To commute the Government share of the produce in dry Grain lands for a Money payment (leaving the Wet lands to be settled with the rest at the same time as the rest of the Nunjah throughout

the district) and to simplify the existing rates in the irrigated lands which are of two kinds those producing Jareeb or Garden produce and those yielding ragee or common Grain.—

3d. To do away with the distinction of classes among the inhabitants and to treat all alike.—

3. The proposed rates of Commutation in the Dry lands are very few not exceeding 4 for the whole tract. No Village (with 2 exceptions) has more than one rate. The proposed rates are 2½ Rupees per acre in six villages, 2 Rupees per acre in twenty three, Rupees 1—12—" in one, and Rupees 1—4—" in three Villages.—

4. The same process has been followed with the existing rates in the Jareeb lands. In every Village except two the previously existing rates have been amalgamated into one and the number for the whole 39 Villages has been reduced to eight ranging from 8 Rupees to 40 per Acre. In the two instances abovementioned 3 rates in one case and 4 in the other have been allowed

subject to much variation.- The engagements for the revenue varied both with the nature of the Crops and the description of person raising it, but in the wet and dry Crops the Government share is taken in kind. Thus for instance in Bapetta Cusbah there are 7 Claſses of persons each paying according to their particular Casts and 8 Sorts of produce each with a particular rate of aſseſsment and in other Villages still more.-

Note.
The accounts show 13 claſses of inhabitants and 23 rates of Aſseſsment for the tract.-

2. The alterations proposed are

1st. to substitue the acre as a standard of measurement for the Coontoo.-

2nd. To commute the Government share of the produce in dry Grain lands for a Money payment (leaving the Wet lands to be settled with the rest at the same time as the rest of the Nunjah throughout

the district, and to simplify the existing rates in the irrigated lands which are of two kinds those producing Jareeb or Garden produce and those yielding ragee or common Grain.-

3d. To do away with the distinction of claſses among the inhabitants and to treat all alike.-

3. The proposed rates of Commutation in the Dry lands are very few not exceeding 4 for the whole tract. No Village (with 2 exceptions) has more than one rate. The proposed rates are 2½ Rupees per acre in six villages; 2 Rupees per acre in twenty three, Rupees 1-12-" in one, and Rupees 1-4-" in three Villages.-

4. The same proceſs has been followed with the existing rates in the Jareeb lands. In every Village except two the previously existing rates have been amalgamated into one and the number for the whole 39 Villages has been reduced to eight ranging from 8 Rupees to 40 per Acre. In the two instances abovementioned 3 rates in one case and 4 in the other have been

allowed. The aſseſsment thus revised was applied to the Cultivation of 1257 Fusly but the result has not been favorable. The Settlement exhibits a decrease of 14,623 Rupees in comparison with 1256 or nearly 30 per Cent leſs occasioned both by the difference of the old and new rates and by the relinquishment of land subsequent to the introduction of the latter.

5. Mr. Stokes attributes this defalcation partly to the season partly to the prejudice and mistrust of the Curnums interested in keeping up the old rates.—

6. That the Anomalies and inequalities of the old system were very great and called for reform cannot be doubted. The only question is whether the revision has been conducted on equitable terms and whether the inhabitants have any fair grounds for the discontent which they have manifested—

7. The first point which seems to the Board to be open to objection is the adoption of a single rate of aſseſsment for each Village. It is not to be supposed that the Coast Villages are exempt from the usual conditions giving rise to inequalities in the relative value of land, and in

the

the principle that the taxes should not bear more heavily on one man than another: such variations should be met by a scale adapted to the different circumstances of each Village. The grounds of the differences under the old system were Arbitrary & unreasonable. The Board would have preferred, a plan which reformed them on a reasonable basis to seeing them abolished altogether. On this subject they desire to refer the Collector to Extract Minutes Consultation dated 24th March 1849 on the Aſseſsment of the Wet lands in Palnad, explaining the principles on which the Government consider that such measures should be conducted

In Consn 28th May 1849-

8. Another point in which the Board do not feel perfectly satisfied is whether the abolition of the privileges of particular claſses has not been pushed too far. The indulgence of Teazgaree or Vandrai as it is called in Guntoor is recognized universally. In Guntoor it had been groſsly abused and it became neceſsary to restrain it within proper limits, but this did not mean that it was to be absolutely forbidden. In the reaſseſsment of the Villages under

review it appears to have been withheld entirely from those Classes whose claim founded on long prescriptive enjoyment is recognized in all districts. Among those enumerated by the Collectors are Curnums and Peons. In Guntoor it is well known that the Village Officers are very inadequately provided for sometimes not at all, The Board trust that the Collector was satisfied that such privileges were not permitted in lieu wholly or partly of Official remuneration, in which case before withdrawing them some other provision should have been made for them. In the 5th para of his letter the Collector has stated that large sums in addition to the usual rates were collected for Curnums fees and Village expenses. It does not appear how far these have been taken into calculation in framing the new rates or whether any of the former have been retained as authorized allowances. If not the amount added to the decrease already noticed would show a much more considerable sacrifice of revenue.

9. A main recommendation of the revision was the riddance of the system which taxed the produce instead of the land.

Note. Regarding this Village it was observed in the Settlement Report that the Shist had been raised upon the Curnums and wealthier ryots who had been long in the exercise of very undue influence as renters an alteration appears to have been rather nominal than real.-

Mr. Stokes observes that it was found impossible to carry out the principle in the Jareeb lands.

Former rate ——— 35 — 10 — 7
Revised Do. ——— 40 — 4 — 8 = 12 per Cent.
Land affected ——— 8 acres.-

This is particularly the case in Nyriapilly Mootapilly the rate in which are exhibited in the following Statement. As.

7911

Fort St. George 28th May 1849.

								Net Decrease	1,883 „ „

From

7912

Fort St. George 28th May 1849-

From this it is seen that the first claſs land pays 40 Rupees on Chayroot & the 2nd 24 a difference of 40 per Cent without any intermediate grade. The 3rd rate in land watered by Peeotahs is raised from 14-11-7 to 20- Yet for dry Grain there is but one rate when irrigated and one when raised without water altho' under the fluctuating system of cultivation both the soil producing the best and the inferior Chayroot are liable to be taken up for inferior produce. In the other case in which more than one rate is found that of Ventapollem, Garlic produce is aſseſsed at 32 Rupees and Chayroot at 16 and 8, this being the only instance in which that herb is considered to require a special rate. An explanation of these Anomalies appears to be afforded by Mr. Newill's remark* that the rates have "been "fixed partly with reference to the relative "productiveneſs of the soil and aſsimilated "to the present average Shist." This mode of proceeding must neceſsarily tend to preserve the old inequalities - The same Officer (by whom the settlement appears to have been chiefly conducted) farther observes that "fixed

*Para 36.

Para 34

Muctah

"Mucktah rates are inapplicable to these "lands as they are frequently changed and "seldom cropped in consecutive years." Under such circumstances the preferable course would have been to have suspended the attempted introduction of a mode of Assessment so ill adopted to the present circumstances of the land until the Survey had ascertained the entire extent & affixed a value to every part of it. Had the Board been aware of all the difficulties in time they would have preferred the retention for the present of the practice of renting these Villages, but since Mr. Stokes has proceeded so far they will not direct the abandonment of what has been done. They desire however that he will again carefully revise his arrangements with reference to the preceding observations and particularly to those contained in Extract Minutes Consultation 24th March last, and that he will endeavour so to adapt the demand to the varying circumstances of Soil, distance and other natural conditions, as may tend to amend or remove the present apparent inequalities

---

43.

From the Collector of Guntoor

Requesting with reference to the endorsements on the accompanying petitions from certain Enamdars to know whether the instructions conveyed in their letter of the 13th January 1848 as well as of Government in para 41. of Minutes of Consultation dated 6th December 1847 were intended by those of the 27th July 1848 and soliciting consideration of his letters of 24th March and 20th April 1848. -

To

T. Pycroft Esqre

Secretary to the

Board of Revenue,

Fort St. George. -

Sir,

With reference to the Boards' endorsement on the accompanying Petitions Nos. 1512, 1798 and 1852 of 1848 from certain Brahmins of the Repully Talook, I have the honor to bring the notice of the Board that doubts have been raised as to whether the instructions conveyed in their letter of the 13th January 1848, as well as those of Government in Para 41 of the Minutes of Consultation dated 6th December 1847, were intended to be superceded or qualified by the instructions circulated with the Boards letter of the 27th July 1848, so far as to extend to Enams granted by the Zemindars or otherwise originated since the permanent settlement, the benefit of the principle that long possession should of itself be considered to constitute a title, and that they ought not to be resumed without previous reference to the Board. My own conviction is that the orders of Government now cited do not apply to the lands in this District held as Enam either fraudulently or under Grants from the Zemindars subsequent to the permanent settlement. I have accordingly directed the resumption of such Enams to be proceeded with, but from the many obstructi thrown in the way little progress has been made. I am therefore induced to request that the Board will be pleased to inform me whether my view of their intention is correct. At the same time I would venture earnestly to solicit the favorable consideration of the Board and Government, to the proposition contained in my letters of the 24th March and 20th April 1848.

2. The thorough investigation and final settlement of the validity of the several classes of Enams in this District is a work of pressing importance and from it's magnitude and difficulty quite incompatible, as it appears to me, with the efficient discharge of our current duties, either by myself or Head Assistant. The longer it is

deferred

deferred the more troublesome it is likely to be found and in the mean time references are continually received from the Civil Courts to know whether Enams can be sold to which no definite reply can be given.-

3. If the Board approve of the course I have taken I propose to pass the subjoined endorsement on the Petition.-

"The only Enams resumed are those which have been illegally granted or otherwise originated since the permanent Settlement."

Guntoor,
Collector's Office,
Dindy, 27th March,
1849.

Ordered -

(43-44)

To the Collector of Guntoor

Conveying instructions to the Collector of Guntoor on certain points connected with the disposal of Enams in his District

In Con. 28th May 1849 - 842.

121st May 1849/-

Order thereon; Ordered that the following letter be sent in reply.-

To,
The Collector of
Guntoor -

Sir;

1. I am directed by the Board of Revenue to acknowledge the receipt of your letter of the 27th March last requesting instructions upon certain points connected with the disposal of Enams in your District.-

2. In reply I have to inform you that the Board have lately submitted to Government your application for the appointment of a Special Assistant for the investigation of the free tenures of your District, and in the event of the arrangement being sanctioned, the principles upon which the inquiry is to be conducted will be definitely laid down - Meanwhile the Board think it would be preferable that you should confine your operations in respect to the resumption of Enams to such as may have originated at a recent date,

leaving

1919 - Fort St. George 28th May 1849 -

leaving all others of earlier origin tho' granted subsequent to the permanent Settlement to be dealt with hereafter by the Special Assistant, under the rules to be prescribed for his guidance.-

3. The Board would not wish the general Endorsement given at the conclusion of your letter to be passed upon Petitions 1512. 1798 and 1852 of 1848 and others of a similar purport. It appears better that in these and all such cases the Petition should be endorsed that the Enam to which it refers has been resumed on account of the invalidity of its tenure. the grounds of such invalidity being concisely stated.-

Reporting the suspension of Cundee Sashagerry Row Tahsildar of Goollem from office for misconduct in Police duties and requesting the orders of the Board respecting the punishment that should be inflicted upon him -

Sir,

I regret that I am obliged to have to report the suspension of Cundee Sashagery Row Tahsildar of Goollem which I felt myself compelled to do for the following reasons -

2. I had been obliged on two or three occasions to notice the unsatisfactory manner in which he had performed some of his Police duties when the following case occurred -

ORIGINAL DESTROYED

3. On the 22nd February last the body of a young boy was found lying dead on the steps of a well in the lands of the Village of Iorapoor, an inquest was held upon it by the Zillahdar and there appearing no reason to suppose that death had ensued from drowning but on the contrary that the boy had met with death either by foul means or accidentally and had been conveyed and laid down on

the steps of the well by some party not known –
The Zillahdar immediately informed the Tahsildar reporting at the same time that a witness had deposed before him that the boy was riding on a Cart and fell off between the Cart and the wheel, and so met with death but that the owner of the Cart with others, in order to conceal the matter, had secretly carried the body and laid it on the well steps.

4. The Tahsildar very properly ordered the case before him, which after some delay as appears from the Records, came before him on the 27th February but he took no depositions from the parties, or any measures whatever in the case until the 15th March stating for his not doing so, that a boy he required as a witness had not come, that the witness before alluded to had retracted his evidence given before the Zillahdar, and that he had other Revenue duties to perform in examining some crops upon which Remission of Revenue was to be given –

The

3 These reasons were exceedingly unsatisfactory and inadmissible and I punished the Tahsildar for this gross neglect in his Police duties by a fine of 10 Rupees and ordered the case to the Hoozoor for investigation to endeavour, if possible, to elicit the true cause of the death of the lad – In this I failed, all parties capable of giving evidence refusing to tell what they knew of the matter – I dismissed the parties under the full impression however that the boy had met with his death as stated by the witness before the Zillahdar, by a fall from the bandy – but I had no direct or satisfactory proof of it –

6 I attributed the loss of evidence in the case to the carelessness of the Tahsildar, but I did not for a moment imagine he had not told me the whole that happened. Information was however secretly imparted to me that more had happened in the Talook than had been brought to my notice, and that certain evidence had been suppressed and wilfully so, and that

it was forthcoming still in the Dufter of the Moonshee - I immediately despatched two Peons with secret instructions to take possession of the Dufters and seal, and bring them to me - On examining them I found a deposition taken from the Reddy of the village on the 15th March in which a question is put to him asking him what the witnesses had said to the Tahsildar when they came first before him on the 27th February - In reply he states among other things that the Chuckler Hanamoodoo / the witness who deposed before the Zilladar that the boy met with death by a fall from the Cart and was conveyed and laid upon the steps of the well by certain parties / did on first coming before the Amildar state the same facts as he had deposed before the Zilladar -

7th I also found the original Draft of the Tahsildar's Urzee, in which this point was alluded to but afterwards taken out, and in the Urzee sent

sent no notice of this important point is taken -

8 - I conclude that the Tahsildar feared a reprimand for not having taken, as he undoubtedly ought to have done, this evidence at the time, instead of keeping the case for 16 or 17 days without taking a single deposition - and fearing this he chose rather to withhold the Readdie's statement and send a partial and false Report of the matter - neither did he think proper to correct this concealment even when I ordered the case up before myself for examination - and had the facts not been privately brought to my notice the Tahsildar's most culpable conduct in endeavouring to deceive me in a case of so much importance would have passed undetected -

9 - The Tahsildars only explanation is that the deposition was of no importance, so he did not send it - An explanation worse than an open confession of his fault -

If

10. If I were to pass over a case of this kind without punishment I should be encouraging Tahsildars in endeavouring to practice deception upon me when at all faulty in their Police duties- The Police duties of Tahsildars are very heavy and much allowance may be and is allowed, but when they endeavour to suppress evidence and wilfully fail to bring before the notice of the Magistrate all the information they have it in their power to produce- such Conduct cannot in my opinion be passed over without their being made to feel the severe displeasure of the Magistrate-

11. I am sorry that I cannot speak highly in behalf of this Tahsildar as an active, diligent or zealous servant of Government, either in the discharge of his Revenue or Police duties which might induce me to pass a more lenient sentence upon him in the present case. He was discharged from the Office of Tahsildar of Tadputry by order of the Board for being engaged in purchasing lands in the year 1842 but was again with the approval of the Board restored and appointed to the Goollem Talook in 1844-

See Board's Pro:
:ceedings dated
15th September 1842.

From the Acting
Secretary to the
Board of Revenue
24th October 1844.

12. I request therefore the Board will be so good as to instruct me as to the amount of punishment that should be awarded to Cundee Sashagerry Row. It may be deemed sufficient to suspend him from Office for a few Months and then transfer him to a Talook of lower emolument- He was suspended on the 7th of the present Month- I have ordered Soobarow a Tahsildar who was removed from Office in 1844 but who has suffered sufficient punishment for his Offences to act in Goollem until further orders- The Board permitted the restoration of Sooba Row to Office at the discretion of the Collector and as Sooba Row is well Know to myself I am willing to employ him again when an opportunity occurs-

See Endorsement
on Petition No. 2246
of 1847 dated 18th
December 1847-

Bellary District,
Collr's office on Circuit,
14th May, 1849.-

(Signed) C. Pelly
Acting Collector

Order thereon- Ordered that the following letter be sent in reply-

To, The Acting Collector of
Bellary-

51-52

To the Acting Collector
of Bellary

Sir,

I am directed by the Board of Revenue to acknowledge the receipt of your letter of the 14th Instant reporting the circumstances which have induced you to suspend from his Office Candee Sashagherry Row Tahsildar of the Goollew Talook, and requesting instructions as to the amount of punishment which should be awarded to him.

2. In reply the Board desire me to inform you that they have attentively considered the facts detailed in your letter respecting the proceedings of Sashagherry Row but they are not led to attribute his conduct in withholding the Reddie's deposition, to any deliberate intention to deceive or to any worse motive than indecision or error in judgment. A contrary supposition seems to them incompatible with the circumstance of the Tahsildar having allowed the deposition and the original Draft of his own Urzee to remain in the Dufter of the Moonshee. His delaying for so many days to investigate the case in question was certainly reprehensible but on the whole the Board thinks it will be sufficient to visit the Tahsildar's neglect of duty with one Month's suspension, to be calculated from the 7th Instant, and that he may then be restored to his Talook. You will however be careful to explain to Sashagherry Row the considerations which have induced the Board to deal with him so leniently upon the present occasion, and impress upon him the necessity of greater circumspection and attention to his duties for the future.

Read

Received the following letter

To,

T. Pycroft Esqre.
Secretary to the
Board of Revenue,
Fort St. George.

53.

From the Collector of Cuddapah

Reporting upon the subject of the accompanying Petition No. 8 of 1849 presented by one Raghabendra Row and endorsed by the Board of Revenue under date the 17th February last.

+ No. 8 of 1849

Chinna Moockapully	Rs 1471
Boggoolatepully	466
Condah Vellore	903
	3840

Sir,

Para 1. I have the honor to report on the subject of the accompanying Petition+ as required by the Board's Endorsement dated 17th February 1849.

2. The Petition has reference to a disputed claim to participate in the enjoyment of the Jaghire Village of Boggoolatepully in the Talooks of Chennoor and Chitwail assessed at Rs 466 " – " one of the three Villages+ which were bestowed in Jaghire by a Sunnud dated 29th November 1808 and granted by the late Governor the Honorable Sir George Barlow to Rama Row the late Head Accountant to the late Resident with Doulut Row Sindia.

3. The village in question was conferred by gift in 1819 by the said original grantee to his younger Brother Lutchmun Row without apparently the sanction of Government as the Records do not shew that such was

obtained and from the latter it was in likemanner without the knowledge of Government transmitted 16 years subsequently to his son Seyshagirrow the last holder whose demise having occurred two years ago disputes have arisen in respect to succession thereto between the widow and the sons of the said Seyshagirrow on the one part and his younger Brother Petitioner Raghavandara Row on the other, while Mudva Row the son of the original grantee at present in the enjoyment of the remaining two villages also lays claim to the same.—

4. On the demise of the late Incumbent Seyshagirrow his widow having preferred a complaint in which she setforth that her Brother-in-law had forcibly taken possession of the Jaghire Village lately enjoyed by her Husband it was directed to be made over to her elder son Runga Row as the representative and legal Heir of the deceased and his Uncle having been referred to the Provisions of Clause 2, Section II, Regulation IV of 1831 he has now advanced his claim for participation in ½ of the Jaghire village on the grounds of

his having lived undividedly with his late Brother up to the time of his decease, a point which has been satisfactorily proved though the Parties have since lived separately consequent on Family disagreements, no division of the Family Property however having been made.—

5. The past transmission having been made unauthorizedly and having occurred subsequently to the date of Regulation XXXI of 1802 and thro' the Brother of a Family who were divided at the time the question is whether under the circumstances above detailed this disputed Jaghire village is to be continued in the name of Runga Row the son of the late Incumbent be divided equally between him and his Uncle Ragavandur Row the present Petitioner, or is to revert to Mudvarow the son of the original Grantee.—

6. In respect to the claims advanced by Mudvarow I am not inclined to think that at this lapse of period / the transmission to the Father of the last holder having been made 30 years ago / they are

deserving of consideration in the presence of Heirs in the direct line to the late holder to succeed thereto, particularly as the Jaghire in question has already been transmitted from Father to son and been held by the latter (the late Incumbent) for 14 years.

7. If the prior transmission it is considered, may held good, and the Jaghire in question be now viewed as a separate grant I beg to state I am of opinion that the same should be continued in the name of Runga Row the Elder son of the deceased Seyshagirrow, as grants of this nature should I think on the occurrence of lapses be strictly transmitted in the direct male line and not be sub-divided collaterally. I therefore do not think that the claims of the Petitioner Raghavenderrow can be entertained.

Cuddapah District,
Collectors Office on Circuit,
Muddenpully,
9th May 1849

(Signed) J. H. Cochrane
Collector

Ordered

Order thereon. Ordered that the foregoing letter be submitted with the following address.

53 - 54.

To the Chief Secretary to Government
Submitting the result of the Boards enquiry into the claim preferred in Petition No. 149 of 1849 for the Village of Beggoolatepully in the Cuddapah District and conveying the Boards opinion that it should be continued to Runga Row son of the last holder.

+ On a Petition / Bd No. 8 of 1849

⊕ 9th May 1849 in Circ. / 28th May No 1249

To
The Chief Secretary to
Government.

Sir,

1. With reference to an order of Government under date 26th January last referring to the Board of Revenue for their enquiry and report Petition + No. 149 of 1849, I am directed to submit for the orders of the Right Honorable the Governor in Council the accompanying ⊕ letter from the Collector of Cuddapah to whom the Board have applied for information upon the subject.

2. The circumstances of the case are clearly explained in Mr. Cochrane's latter communication. On turning to the Sunnud under which the Village in question with two others was conferred upon the original Grantee Ramappah Braminy the Board find that those Villages were bestowed upon that "individual" and his heirs". The alienation by that person of one of the Villages to

his younger brother especially if as represented in Para 5 of the Collector's letter the family was divided at the time was therefore doubtless irregular. Considering however the length of time 30 years which has elapsed since the alienation was made the Board of Revenue are disposed to concur with the Collector that the claims of Madua Row son of Ramappah Braminy should not be admitted, and that the Village of Boggoolatepully should be continued to Runga Row son of the last holder but with the understanding that no more alienations should be allowed and that in the event of the failure of Runga Row's family the Village shall revert to the direct line of the original Grantee.—

Revenue Board Office,
Fort St George,

Chingleput District Collector's Circuit Catcherry Ooroor 26th May 1849. E. E. &c. (Signed) A. Freese
Collector.—

Order thereon

57-58

Ordered to be recorded.—

In Cons 17th May 1849—

Read again letter from the Collector of North Arcot dated 1st November 1848 reporting on the Settlement of that District for Fusly 1257 1847/48

(Here enter No 264)

59

Proceedings thereon.— 1 The Settlement had been completed for the most part before Mr Bourdillon took charge of the District.— The subdivision was settled partly by Mr Binning Acting Sub Collector but completed by Mr Birch the Sub Collector by whom the Report on that part of the District has been draw up. The Settlement of 3 Talooks, Viz Trevallum Pennurry and Triputty was conducted by Mr Sullivan the Acting Head Assistant. The Puttahs in Number 115,934 were distributed by the several Gentlemen making the Settlement.—

Relative to the Settlement of Land Revenue in the District of North Arcot, in Fusly 1257 and calling for explanation as to the measurement on which the prices of Grain was calculated and for copy of the Collector's general instructions to Tahsildars respecting the preparation of the Dittum also requesting information regarding the increase in the dry lands.—

Para 3.

2 The early rains in Fusly 1257 1847/48 were less abundant than in the preceding year but the season was on the whole very favorable and with the exception of Fever in the Talooks above the Ghauts where this disease usually prevails more or less, the District was healthy— The

Paras 4 @ 6.—

Statement No 1—

3 The Statistical Returns are favorable but certain discrepancies appear in the Accounts which require the notice of the Collector. Thus in the Vellore Talook for instance there is an increase of 7619 Souls in the Population while the number of Houses is less by 6,158— again in the Trivatoor Talook the number of Cattle is 4216 below Fusly 1256 1846.47 or nearly 50 per Cent, a degree of mortality which is hardly reconcilable with the general character of the season.—

Fusly 1256— 9,854—
" — 1257— 5,638—
4,216

Para 7.

As per Collector's Report	Collectors Division Rs A P	Sub Collrs Division Rs A P
Fusly 1256 Per Garce —	104 13 7	102 10 5
" 1257 " —	78 14 1	77 4 5
Commutation rates —	84 5 2	87 8 "
As per Sub Collector's Report		
Fusly 1256—		128 5 "
" — 1257—		89 12 "
Commutation rates —		87 8 "

4. Prices underwent a decline below the former year, and are shown by the Collector to be 6½ per Cent below the commutation rate in his Division, at 11¾ below that standard in the Sub Division

These low prices the Collector observes affected the Collections, chiefly in the Subdivision. The Sub Collector on the other hand observes (Para 22) "as the Price is somewhat in excess of the commutation rate the Ryots cannot be considered to have experienced any loss

and the Community have benefitted - The Col=
=lections probably were not materially affect=
=ed by fluctuations in the Prices of Grain
but the discrepancy here noticed between
the statements of the Collector and the Sub
Collector should be explained.—

5. In a Note appended to Para
7. on the subject of Prices, the Collector observes
that in the Statement entered in the Jum=
=mabundy Report for Fusly 1256, the calculation
was made on a measure containing 150 Rupees
weight of Grain and that the present state=
=ment is prepared on the basis of a measure
containing 120 Rupees weight, that being
the standard of the Commutation rate - The
Board wish to be informed under what
circumstances a new standard has been thus
aſsumed and whether the change was
confined to Fusly 1256 alone, or whether
it will be neceſsary to rectify the Price
Lists of former years, so as to aſsimilate
them to the standard of Rupees 120 weight,
should this prove to be the correct basis
of calculation - The fullest information
should be afforded on this subject.—

6. The extent and fluctuations
in

---

in the different species of cultivation shewn
in Paras 5 and 6 should find a place in
future in the Accounts which accompany the Report.—

Para 2. 7. The resumption of the Avulcondah
Jaghire and the Maumandoor Pollium has led
to an augmentation in Fusly 1257 (1847/48) of 39 Villages
and 18 Hamlets in the number of Circar
Villages - These having been permanently
resumed, the Cultivation and Beriz may
be blended with those of the Circar Villages,
but the separate heading of "aſsumed Jaghire"
should be retained in the accounts as
heretofore.—

Para 8. 8. The land taken for Cultivation
comprises Cawnies 3,35,391. aſseſsed at Rupees
20,02,968. being Rupees 93408 above Fusly 1256 (1846/47) -
Upwards of 14,000 Cawnies were taken up
after the usual period for closing the Dit=
=tum, to be ascribed, the Collector thinks,
to the favorable character of the Season.

Bd. Pro: 15th Jany 1847 Para 3 — The practice of preparing the Dittum has
been only recently introduced in N. Arcot
and it does not appear as admitted by the
Collector in Para 26 of his Report, that the
Principles on which this account should
be framed are clearly understood - the
Dittum is intended to include all the Kypat or
Ordinary

ordinary Holdings of Ryots, and varies one year with another only as new land is taken up or old land is relinquished with reference to the means and wishes of the Ryots. The Cultivation of the usual Holding to it's full extent is of course contingent on season, and if any portion of it remains uncultivated on sufficient grounds, such as failure of rain, it should be deducted at the time of settlement and included under the Head of Dittum Bunjer or Caboolaty Bunjer as it is termed in the Ceded Districts- Following this rate it is probable that the greater part, if not the whole, of the land taken up in the year under review after closing the Dittum will be found to be ordinary Ryoput Land.—

9. Peculiarities of season may sometimes hold out inducements to take up new land after the usual period for preparing the Dittum has passed, but the extent generally thus occupied is not likely to be large- An after Dittum contingent on season is open to abuse as it affords the Ryots an opportunity, when the regular Dittum is prepared, to throw

up land indiscriminately to the injury of the Revenue- The Dittum is an index of the agricultural resources at the time, and all relinquishments and additions of land should be classed under appropriate heads as pointed out by the Board in Para 6 of their Proceedings on the Settlement for Fusly 1255 1845/46, quoted in the Margin above. The Board will be glad with reference to the Collector's remarks in Para's 27 and 28 of his Report under consideration to receive copy of his general instructions to Tahsildars for the preparation of the Dittum after his arrangements have been finally matured.—

Paras 9 & 11- 10. The actual Cultivation of the year was 3,11,010 Cawnies assessed at Rupees 19,53,407 which includes Bogajastee, or the additional tax imposed on all descriptions of land on which extra Crops are raised with Circar water. The Net increase above the preceding year is 8,955 Cawnies assessed at Rs. 11,177, composed of an increase in both Wet and Garden lands and a decrease in Dry land- The last mentioned item, or decrease in Dry land consist of 1816 Cawnies bearing an

Aſseſsment of Rupees 2,216, which as explained in Para 5 of the Report arises from a diminished cultivation of Pulse in July and August in consequence of a want of rain at that time, and from a large falling off in Indigo cultivation, attributed chiefly to the low Price of that article.—

Indigo—	Cawnies	Aſseſsment Rs
Fusly 1255	14,929	44,569
" 1256	11,885	35,863
" 1257-	6,529	18,968

11 In the figured details in Para 5 of the Report as shewn in the Margin an increase in the Dry lands is exhibited and not a decrease as noticed in the preceding Para this discrepancy should be explained.—

	Land	Aſseſst
Increase	14,073-	Rs. 41,000
Deduct Decrease		
Pulse—	8,271	20,037
Indigo—	5,356	16,895
	13,627 =	36,932
Increase-	446 -	4,068

Para 23 @ 25-

Dated 4th Septr. 1848.
Para 14-

12 The Board observe with regret the further decline in the Cultivation of Sugar Cane—In their Proceedings on the settlement for last year they remarked that the cultivation of this article was not so flourishing as heretofore—the present year exhibit a decrease of 214- Cawnies aſseſsed at Rs. 2464- below last year, and the export of the manufactured article has fallen off from 4,31,641- Mds. in Fusly 1255/1845/46 to 1,15,462- Maunds in the Fusly under review—Land cultivated with Sugar Cane, Mr. Bourdillon explains with reference to the remarks of the Board in their Proceedings on the settlement for last year, pays the full aſseſsment of the land, and if Dry land is taken up for this produce the Wet aſseſsment is imposed, further the aſseſsment of the Second Crop is not remitted where such Crop is not grown in order to allow time to plant Cane for the next fusly—The Board hence infer that no portion of the aſseſsment is lost to the Revenue on the plea of fallow and with reference to the remarks of the Acting Sub Collector in his Report on the Settlement of the subdivision for Fusly 1256/1846/47 they conclude that this produce is cut within the year, its
