J. D. B.

14348 Fort St George 21st October 1850.

To,
J. D. Bourdillon Esqre
Collector of North Arcot.

Sir,

Para 1 I have the honor to submit the usual annual Report of the Settlement of the Sub Division of this District for Fusly 1259 together with the necessary explanatory accounts as noted in the Margin-

I Comparison Revenues and Remissions between Fuslies 1258 & 1259 / 1848/49 1849/50.
II Do of the Inaliyalum of Hill Villages.
III Do of Poothpha.
IV Statement of lands cultivated with Sugar cane.

2 The short time which has elapsed since I assumed charge of my Office will I trust be considered sufficient to account for any deficiency which may appear in the drawing up of this Report. I assumed Charge of my Office on the 26th August previously to which time the whole of the Settlement had been completed by my predecessor Mr R. M. Bunning who commenced the Settlement in the Talook of Poloor on the 5th February and concluded it at Arcot on the 21st May. The total number of Puttahs distributed amounted to Rs 31,596 of

~~ of this number 116 were refused by certain Ryots for various trifling reasons they were therefore left for distribution with the different Tahsildars who were ordered to enquire into and report respecting the grievances alleged by the Ryots.

3 The Season of July 1879 as regards healthiness appears to have been an unfavorable one and decidedly more unfavorable than the preceding one. The number of deaths occasioned by Cholera was 545 which nearly doubled the number of deaths from the same cause in July 1878. The Taluks of Poolore and Jaghire of Arnee appear to have suffered most from the disease, the deaths in those divisions amounting to 304. The disease made its first appearance in the Month of March and prevailed in some parts of the Subdivision until the termination of the July. The annexed Statement exhibits the number of deaths reported as having been occasioned by Cholera during July 1879 -

Talooks.	Male.	Female.	Total.
Arcot	50	35	85
Tiruttoor	67	71	138
Ploor	79	76	155
Wandawash		11	18
Arnee Jaghire	82	62	144

4 The Season of July 1879 compared with the preceding July was very unfavorable there appears to have been a great deficiency of Rain throughout the whole of the Subdivision and it is considered that the quantity of Rain which fell during the July was less by more than a third than fell in the previous Season. In the Months of May and June in which Poonjah Cultivation usually commences and in the Months of July and August in which the Car Crop is sown the quantity of Rain which fell was nearly the same as in the corresponding Months of July 1878; but the Poonjah Cultivation was not carried on to the same extent in Consequence of the Rain having fallen at a too unseasonable time when the time for sowing was passed- the Rain appears also to have been very partial which was the cause of many Ryots leaving their lands uncultivated- The Rain which fell in September and the succeeding Months of November and December was considerably less than in the corresponding Months of the preceding July, the great deficiency of Rain at this period.

Fort St George 21st October 1850

period caused a considerable decrease in the Punjah Crops as well as in the Total Cultivation-

5th The following Statement exhibits the extent of lands left waste by the ryots out of the lands taken by them at the time of distum in July 1259 for cultivation and that brought to Summah out of those lands after examination during the Summahundy it also contains the Amount of Remission made on that account to the ryots-

The Accounts called for in the orders of the Board of Revenue under

Fort St George 21st October 1850

under date the 18th March last and transmitted to this Office in a Memorandum from the Collector dated the 5th April last which Required Statements to be furnished exhibiting the land cultivated by the ryots in the talooks of the Subdivision after deducting the lands left waste out of those taken at the time of distum and the means of irrigation, have been transmitted to the Collectors Office-

6th The Statements hitherto transmitted of the various species of Cultivation has not been prepared for July 1259 the Board of Revenue in Para 4 of the Extract from their proceedings under date the 16th August 1849 having ordered this Statement to be discontinued-

7th In the Cultivation of Poonjah in the talook of Arcot there appears an increase over last July of Cawnies 143 12/64 or Rupees 686 1-9. In the talook of Trivatoor there was also an increase of this Cultivation to the Extent of Cawnies 108 12/64 but owing to the portions of land Cultivated bearing an inferior rate

For St George 21st October 1850

of Assessment there arose a decrease of Teerwah to the amount of Rupees 78-13-4. In the remaining two Taloks, the Punjah Cultivation was diminished in consequence of the deficiency of Rain to the extent of Cawnies $2,598\frac{43}{64}$ or Rupees 7,661-10-7. The whole Punjah Cultivation in the four Taloks of the Sub division amounted to Cawnies $45,736\frac{10}{64}$ or Rupees 125,225-2-1 exhibiting a Net decrease under this head of Cawnies $2,054\frac{24}{64}$ or Rupees 7,054-6-2

5 The entire Punjah or wet Cultivation for Fasly 1259 was Cawnies $30,406\frac{7}{64}$ or Rupees 3,40764-8-8 exhibiting a decrease, compared with the preceding fasly of Cawnies $10,403\frac{43}{64}$ or Rupees 112,797-12-11. The decrease in the Punjah Cultivation, caused by the great deficiency of rain occurred in all the Taloks of the Subdivision but more particularly in the Talook of Wandawash in which there was a decrease of Rupees 44,120-6-10. The great decrease in this Talook compared with the Talook of Arcot in which the decrease amounted only to Rupees 10,364-0-3 is mainly attributable

to

For St George 21st October 1850

to the deficiency of rain but partly to a deficiency in the usual means of irrigation by water channels and Streams which do not exist in this Talook.

9 In Totakaul or garden Cultivation there is a decrease in the Taloks of Arcot, Trivettoor and Wandawash to the extent of Cawnies $67\frac{42}{64}$ or Rupees 1,314-4-11 and an increase in the Talook of Poloor over the preceding fasly to the extent of Cawnies $6\frac{28}{64}$ or Rupees 246-5-5. The Accounts of the Totakaul Cultivation in the four Taloks present a decrease of Cawnies $61\frac{14}{64}$ and of Teerwah to the amount of Rupees 1067-15-6

10 The following Statement exhibits the Cultivation of lands of

every

every description in Fusly 1259 (excluding the quantity of land assessed as Trausul Gauty and Chicker postdie) and shews a net decrease of Cawnies 125-19 18/64 or Rupees 120920 2-7 below that of the preceding Fusly. It will be observed that the principal decrease occurs in the Punjah Cultivation which shows a decrease compared with the preceding Fusly of Rupees 12797-12-11 which is owing to the deficiency of rain and to the excess of Punjah lands in the Sub division over Poonjah lands

11. Statement exhibiting the quantity of land Cultivated with Sugar

Sugar Cane in the four Talaahs of the Subdivision accompanies this report from which it will be seen that Cawnies 555 11/64 or Rupees 7770-12-11 were cultivated with the cane. The quantity of Sugar transmitted to Madras during the Fusly as per Certificates granted amounted to 43375 Maunds which is 3375 Maunds in excess of the quantity sent to the same place last year—

From the Aj. Pe. Coll. of Coimbatore } Sir.

Adverting to the Board's Circular of the 13th June last, I have the honor to forward two Estimates of the Sadeerwared charges in the Revenue and Magisterial Departments for Fusly 1260, framed with reference to the Average expences of the last three years -

2 - The probable charges in both Departments Amount to Rupees 4898-1-" or 40 Rupees 7 Pice, less than the Average Annual disbursements -

3 - In Calculating this Estimate, strict attention was paid to economy, but considering the number of Accounts, returns, and various periodical reports which have to be prepared, it does not appear practicable to effect any more material reduction -

4 - The Standard Amount originally sanctioned by Government on

on the 6th February 1835 was Rupees 4630-2-" or 267-15-" minus the present Estimate, but the increased number of Accounts and returns since introduced, as well as the retransfer of Ootacamund to this District, will satisfactorily account for this increase -

From the Asg. Pl. Coll. of Coimbatore — Sir,

I do the introduction of the subjoined Trees would be valuable, and may be practicable in parts of this District, I would beg the favor of Government procuring, if practicable, fresh seeds in any quarter deemed advisable. The Secretary to the Horticultural Society could perhaps furnish some from Madras or from Bengal such have I am aware, at times been tried in some localities but not, so far as I can learn, in Coimbatore.

From the Coll.r of Canara — Submits the Detailed lists of the Huzoor and District Establishments as they stood on the 30th April 1850 and recommends for the sanction of Government the continuation of the higher rate of salary authorized in the case of the late Head English Accountant to the present Incumbent

Sir,

1. I have the honor to submit the detailed list of the Huzoor and District establishments for the past year.

2. In doing so it is necessary for me to observe that in consequence of the demise of Mr. F. M. Pacheco the Head English Accountant, Mr. John [illegible] Fernandes has been appointed to that Office. The salary of the Office has hitherto been Rupees 120 per Month as sanctioned by Government under date the 28th April 1835. but it would appear from the letter of the Secretary of the Board of Revenue under date the 20th April 1835 that the salary of the late Mr. Pacheco was as a special case raised from 100 to 120 Rupees and that on his vacating the post the salary should revert to the original rate of 100 Rupees.

3. According to these instructions therefore the salary should from the date of Mr. Pacheco's death have been paid at the rate of Rupees 100 per Mensem.

but

Fort St. George 21st October 1850

but I trust that in consideration of the very responsible and onerous duties devolving upon the Head English Accountant in such a District as Canara, the Board will recommend for the sanction of Government the continuation of the higher rate of salary—

4. I need hardly dwell upon the extensive duties which devolve upon this Officer which must be well known to the Board or upon the extensive knowledge of Accounts which is necessary for their efficient discharge, or the application and industry necessary to secure regularity in the management of the Money and bill transactions carried on with two distinct Governments, and in the preparation and submission of the periodical reports—

5. I would observe that in Malabar while the Head Accountant receives Rupees 122 8 as per Menam, the second in the Office receives 100, and also that even Rupees 120 was considered as

Fort St. George 21st October 1850.

as so small a remuneration that the Stamps were given by a previous Collector to the late Mr. Pacheco which made an important addition to his income—

6. With the present Head Accountant I have every reason to be satisfied He has exerted himself to expedite the accounts which had fallen considerably into arrear and has succeeded in greatly advancing the Work of the Office—

7. For these reasons I trust that the Board will request the sanction of Government for the continuation of the higher rate of salary—

Ordered, that the following letter be submitted with the following address.

11123. Fort St. George 21.st October 1850.

To the Chief Secretary to Government.

Sir,

I am directed by the Board of Revenue to submit for the orders of the Right Honorable the Governor in Council the accompanying Letter from the Collector of Canara dated 18.th September 1850, and the subject of the salary of the Head Conductor, Engineer Establishment of this Office, stated therein.

2. Mr. Maltby appears that on consequence of the death of the late Mr. A.E. Cracroft, Head English Accountant M.C.S. Trunsto was appointed to that Office, and solicits that the salary enjoyed by the former individual, Rupees 120 Rupees per Month, may be continued to the Collector in consideration of his merits, and the very responsible and onerous duties devolving upon him.

3. The Government will observe from the Letter of the Collector noted in the margin that the Sub Conservator Soopah Gowda is absent on sick certificate at Mangalore, and that the Sub Conservator Ancola Gowda is also absent on sick certificate at Coondapoor.

4. District for Duty 12 1/2, the Board of Revenue recommends that the increase of 20 Rupees per Mensem to the Head Accountant, may be sanctioned, if the Collector should be of opinion that a Superintendent should be appointed at a Salary of 100 Rupees per Mensem.

Fort St. George 21st October 1850

and that on a vacancy occurring the original rate should be reverted to. In sanctioning the Moyen Zabitah however the Government did not treat the salary of the accountant as a special case or pass any orders on the recommendation of the Board, but merely sanctioned the Establishment as it stood in the list then submitted.

4. This was 15 years ago, and in the interval such a change has taken place and so large an increase in the labour of the Collector's Office, that the Board consider their former recommendation to be no longer applicable to the present state of the case, and desire strongly to support the recommendation of the Collector, that the rate of salary attached to that very important Office for the last 15 years should not now be reduced. No increase in the amount of the sanctioned Establishment is required, but simply that it should remain as at present fixed. Under the circumstances above noted the Board have had some doubt whether it was necessary to refer the question to Government, but on consideration has resolved to solicit their orders on the subject.

5. The previous recommendation of the Board for the prospective reduction of the

Fort St. George 21st October 1850

salary of this Office was in the anticipation that the business would remain much the same. The new and more detailed accounts however which have been subsequently introduced, have greatly multiplied the labour and responsibility of the Office. The accounts and Statements now furnished to the Board itself, to the Accountant General, and Civil Auditor have, increased since July 1238. more than two fold, and the increase in the detailed accounts in the Public Works Department has been still more considerable. The Board would also point out that there is a distinct and heavy item of account in Canara connected with a branch of Revenue (Tobacco monopoly) which does not exist in any other district except Malabar. The circumstances of those two districts (Malabar and Canara) are in most respects similar, as relates to the accounts, and the Board notice that even at the present rate of pay to the Accountant, the expenditure on this branch of the Establishment would still be lower than it is in Malabar.

From the Collector of Masulipatam ... } Sir,

Furnishing further information relative to certain items retrenched by the Civil auditor on the accounts of this Collectorate for fasly 1254 & 55 1844-45

With reference to an Extract from the Board's Proceedings dated 22.d February 1849. calling for further information relative to certain items retrenched by the Civil auditor for fasly 1254 1844-45 I have the honor to state that it will be observed on reference to Statement No.s 3 which accompanied Mr. Lane's Letter of the 12.th August 1822, as well as the sanction of Government dated 29.th November of that year that the amount of remission ultimately allowed to the ancient Zemindars in this District is that entered in Column No.s 3 and not that shown in Column No.s 4 as the Board would seem to suppose, consequently in the case of the Zemindars of

Mundegamala

Fort St. George 24th. October 1850

Kundegamah and Mylaveram the sums of 43 and 111 Star Pagodas entered in that Column converted in the present currency would give the sums of Rupees 150–8–– and 388–8–– respectively. In the latter case in consequence of a division of the property between the Zemindar and his Brother, only a moiety thereof Viz.t Rupees 194–4–– is allowed to the Zemindar of the separated portion of Mylaveram Mootah.

2. With the foregoing explanation, the accounts Particular No. 1 and 2. received with the Proceedings are herewith retransmitted together with a similar account for fusly 1255, the information called for in Para 3 being entered in the Column of remarks as directed.

Vide Statement No. 1.

3. With reference to Para 5 I have to explain that the cause of the increase of Rupees 1,375 disbursed in Fusly 1254 / 1844/45 A.D. in excess of the annual sum

Fort St. George 24th. October 1850

sum sanctioned to be paid to the exZemindar of Goodewadah and family is owing to the arrears of allowance due for the previous period, having been debited in that year, agreeably to the sanction of Government dated 21st January 1845, so that no surcharge was incurred above the sanctioned amount.–

The Board resolve to return the foregoing statements, and to request that the Collector will prepare fresh ones with reference to the following remarks and retransmit them to this Office.—

2 In the Statement for the Revenue Sadeerwared there are several errors which are marked in pencil, it is requested that these may be corrected.—

3. It is observed that the average of the past 3 Fuslies is not calculated upon the total actual disbursements for the 3 years, the Board consider that to enable them to fix a Standard, the aggregate total of the whole period should be taken together and an average framed upon it. thus the total disbursements of the 3 years are shown to be Rupees 17239—4—10, this

Sum

14446 . . Fort St. George 24th October 1850

Sum divided by 3 will give Rupees 4079—12—3 as the proper average.—

4 From the two statements it would appear that the proposed disbursement for Fusly 1260 is Rupees 4431—1—8 which is much greater than the average above shewn. the Board therefore without some further explanation cannot submit the Estimate for the sanction of Government.—

5. The memorandum at the foot of the Statement should only contain an abstract shewing the proportionate amount for each department in the form noted in the Margin.—

From the Aj. Pl. Coll. of Coimbatore — Sir

Requests that the indulgence solicited by certain Ryots of the Andyoor Talook for the clearance and Cultivation of Jungle land may be sanctioned to the full extent-

Para 1. I have the honor to acknowledge the receipt of the Board's orders and Copy of correspondence noted in the Margin relative to the application of certain Ryots in the Andyoor Talook, for an extension of the terms of the existing Coulemamah for Forest lands proposed to be cleared and Cultivated-

2 The proposition of the Ryots was to the effect, that they should be permitted to occupy the land in question, five years rent free, and then upon the progressive Coule by (usual for ordinary Jungle) the full survey Assessment being payable in the 9th year, instead of the 7th as prescribed by the Hoobroonamah, which they represented as quite unequal to their Case- the orders now conveyed by the Board, do not allow this concession, half of the fixed demands being declared leviable in the 6th and the full rate in the 7th year- this is in fact merely an extension of the period of payment, and not of the terms of the usual Coulemamah, and in localities with circumstances like

like those under reference, is not a sufficient encouragement to the Ryot to risk his labour and Capital in the undertaking, and which I regret to say - I have been unable to persuade them to attempt - I therefore request that the indulgence solicited may be sanctioned to the full extent, as asked by the Ryots -

3 - I would beg to assure the Board - that in allowing Ryots to take advantage of such indulgence, here or elsewhere, due caution will be exercised to prevent the abandonment of their present holdings, and no lands will be granted except such as really of the description alluded to, - which is a ready and dangerous Tiger + Jungle, where 23 lives as reported formerly to the Board, have already been lost within the last two years and which Government must some day clear, at a considerable Cost, if the Ryots are not now encouraged to do it themselves unpaid -

4 - I deferred this reference to the Board, till I had the present opportunity of conferring with the people, near the spot, and ascertaining that they altogether decline attempting the undertaking, on any terms short of what they before asked - and which even them leave it an arduous experiment

as

+ Vide letter to Board dated 26th February 1850 No 18

as only the 2 years before asked, required to be added, I conclude the Board will be able to sanction so desirable and necessary an undertaking without need of further reference to Government -

Proceedings thereon.

Submitting a letter from the Acting Principal Collector of Coimbatore requesting that the indulgence for clearing certain Jungle lands before solicited may be granted to the full extent and supporting the Collectors recommendation for allowing the lands rent free for two years longer than in ordinary cases -

Ex. Government 23rd July 1850 No 21

(22-23)

Resolved that the letter above recorded be submitted for the consideration and orders of the Right Honorable the Governor in Council with reference to the papers noted in the Margin -

The Acting Principal Collector reports that the Ryots decline to undertake the clearance and cultivation of the Jungly Tracts in the Devidoor Taluk upon the terms recommended by the Board and sanctioned by Government namely - free of assessment for the 1st five years - half assessment for the Sixth and half assessment for the Seventh and following years - and that they will not attempt the undertaking on other terms than those before solicited by

ly them - which, if granted to the full extent, would even then leave it an arduous and hazardous experiment -

3. Adverting to the terms on which the progressive Cowle assessment is levied in ordinary cases of clearance of Forest land immemorial Waste in the Coimbatore District, and to the importance of the object for which the present indulgence is sought, the Board of Revenue, in modification of their previous resolution, support the recommendation of the Acting Principal Collector for allowing the lands rent free for Two years longer than in ordinary cases in all rent free five years and on progressive Cowle of 1/4th assessment for the Sixth year 1/2 assessment for the seventh and 3/4 assessment for the eighth year the full assessment being charged for the ninth and following years -

Sir,

Para 1. Under instructions conveyed in Extracts from the Proceedings of the Board of Revenue dated 19th July 1847, and 22nd May 1848, the cutting and Collection of Sandalwood in this District was restricted - It now appears from the Report of the Tahsildars of Dharmapuram, Udumalpet, and the Neilgherries, that 335 Candies of Wood may be obtained at an Estimated Cost of Rupees 2,984, and if not collected it will be difficult, with the small Establishment kept up, to prevent it from loss, whether by fire or theft. Under these circumstances I have the honor to request that I may be favored with the orders of the Board on the subject.

2. A small quantity may be disposed of in the District, and the rest may either be forwarded to the Presidency

Presidency to be sold by auction, or secured in the Depôt to until offers are received for its purchase.

3. The transmission of the usual Estimate of Extra Charges, will be delayed pending your reply to this Communication.

Coimbatore 3d October 1850 } Signed E. B. Thomas Acting Pl Collector.

Resolution thereon. In his letter of the 16th November 1847 the Acting Principal Collector reported that in the absence of demand for Sandalwood he had directed the Tahsildars to refrain from cutting and collecting it. but in his present letter he has omitted to state whether the demand has now become more favorable. It is possible that the demand on the Western Coast may be greater than at Madras.

The Board request information on this point before issuing instructions.

2. They also request that Mr Thomas will forward a Memorandum of the charges incurred on account of Sibbendy and Extra Charges for the protection of the Sandal-wood since the period when its cutting was put a stop to.

From the Collr of Canara ... Submits with reference to Board's letter of the 11th July 1850 a report on the measures to be adopted for increasing the manufacture of Salt and maintaining a large stock in store.

Sir,

1. I have the honor to acknowledge your letter of the 11th July, requesting that I will submit a report on the measures to be adopted for increasing the manufacture of Salt in this district and for maintaining a large stock in store.

2. In reply to this call it has been necessary that I should refer to the correspondence which has previously passed on the subject, and examine the statistics of the Salt revenue of this district which I trust will afford sufficient reason for my not having sooner replied to your letter, and will also I trust prove an excuse if in now replying to it my views should appear to be erroneous.

3. I find from the purport of the previous correspondence between Mr Blane and the Board that the object now sought is so to regulate the production of Salt in this district as to obviate the serious inconvenience resulting from a succession of unfavorable

Seasons

reasons, as well as from dependence upon a foreign supply, but so to regulate it that we shall not ourselves be dependent upon foreign consumption for getting rid of an occasional surplus. Mr Connolly having I think clearly shown that we cannot depend upon Malabar for relieving ourselves of any such surplus.—

4. The difficulties which we have to meet are described in Mr Blane's letter to the Board of the 31st January 1849. They appear chiefly to result from the extreme uncertainty of the manufacture which in a favorable season is capable of yielding an abundant supply, while accidental causes may reduce the supply for below the required quantity. To adopt so fluctuating a produce to an average consumption requires the means of storing a surplus quantity of several successive abundant seasons and the store houses for this purpose must be constructed both at the place of manufacture and the place of sale. at the place of manufacture they must be adequate to receive the produce of one abundant season at the place of sale they must be adequate to receive a quantity considerably above

the

the average consumption of one year.

5. It must be observed that the surplus of one season cannot be gradually removed to the place of sale while the manufacture is in progress. for freight cannot be depended upon and the salt cannot be removed in a damp state. It must also be observed that it is desirable in justice to the manufacturers that the amount ordered yearly year should fluctuate as little as possible.—

6. These appear to me to be the principal considerations with which we have to deal, the most important is the expense to be incurred in building extra storehouses, and this will I think appear trifling when considered as the means of putting on a safe footing a concern yielding a return of 397,000 Rupees per annum on the average of 10 years of which Rupees 307,999 is profit.

7. The average production of Garce
the last 10 years is _____ 2,510.

The average consumption _____ 3445.

The production fluctuates between
3,651 & 911.

The consumption fluctuates between
1468 & 2904.

The

The total production of 10 years has been ——— 25099

The total consumption ——— 34451

Deficiency ——— 9352

But it appears that it will be necessary still to supply the Buntwal Tannah with about 1,000 Garce of Bombay Salt per annum, and if the system is continued the average supply may be considered about equal to the average consumption.

8. We have now as a stock in hand 5224 Garce and 700 have been ordered from Bombay, which together may be considered as about the Consumption of one and a half years.

9. But to meet the extreme fluctuations shown above it would appear desirable to increase the area on which the Salt is produced so as to raise the average of produce above that of consumption and to meet an increasing demand and I think to render us secure from dependence upon external aid there should always be a stock on hand equal to two years consumption.

10. I mean that I think the Sale Tannahs should be capable of containing two

two years supply at the time when those at the pans are emptied to prepare for the next season, and that we should encourage increased production until we come up to this point or nearly to it.

11. I find that Mr. Blane has proposed to lay out Salt pans at Nagery Bylé capable of producing an extra quantity of 500 Garce per annum and it appears to me that this will secure a sufficient average production. For this measure I have therefore to request the sanction of the Board.

12. To store the Salt so manufactured five additional Cotays of 100 Garce each are required at the places of manufacture. Those which we now have are calculated to contain only 1100 Garce, and the produce of the Salt pans has on one occasion amounted to 1160 Garce. From this it will be seen that the additional buildings are actually required and for these I shall submit an Estimate in the course of a few days.

13. I have mentioned above that it will at the same time be necessary to increase the store houses at the place of sale for it is in these that the surplus must be stored.

The

14. The space now available is sufficient only for 3585 Garce excluding the Cotays at the place of manufacture while the quantity actually sold in last year was 3282 Garce.

15. I think that it is clear that this place is quite inadequate and that the store should be considerably increased.

16. The whole space in all the Cotays is equal to 1775 Garce, or nearly a supply for two years but the whole of this space is not available for a stock. For if a favorable season filled the Cotays at the place of manufacture at the end of April they would contain 1191 Garce, but the selling Cotays at that time would not contain a full supply. I therefore deem it essential that we should gradually increase the store houses and for some years to come gradually increase our stock in hand.

17. For this purpose it would be necessary only very gradually to add to the buildings now existing for during four or five months the selling Cotays can

can be replenished from those at the place of produce as the sales progress, and it will not be till more than one abundant season has occurred that any inconvenience will arise, but the Board will see by the accompanying table that the alterations in the demand at the places of sale have rendered some Cotays comparatively useless while they are emergently required in others.

N.1.

18. Without reference to the present question, it would have been necessary for me to recommend that new Cotays be built in several places to meet the increasing demand and there are some places in which there are at present no Cotays, but where I am satisfied that they will fully compensate the expense of the small establishment necessary.

19. If these are built, they will relieve the old Cotays and for some time to come the old Cotays will be sufficient to contain a gradually accumulating stock to enable us to encourage production during the prevalence of favorable seasons.

20 I have therefore no hesitation in recommending that a small outlay be

(3) at

at once incurred and I am convinced that the result will be satisfactory.

21. The measures therefore which I deem necessary for increasing the manufacture of salt in this district and for maintaining a large stock in store are

1st to add, to the salt pans an area capable of yielding 500 Garce per annum

2nd To build Cotays capable of receiving this quantity at the place of manufacture.

3rd To build additional Cotays at the place of sale.

22. The places at which I would recommend that the additional Cotays be built are as follows.

23 Commencing at the South of the district. At Cajsergode the Cotay is calculated to hold only 50 Garce while the sale of last year was 61. A new road connecting Cajsergode with Coorg through Adoor and Soolea is in progress and will be finished so as to be available during a portion of the present season It is desirable that a Cotay for 100 Garce should at

at once be built. Even if the trade should not rapidly increase it will enable me if the next season is an abundant one to lay up a surplus store for home consumption

24. The place of largest trade is Buntwal. The store room available is sufficient for 950 Garce only while the sale amounts to 1098. No inconvenience however is experienced at present, for the Bombay salt is received gradually and it would be practicable though at some additional expense to store the salt at Mungalore till required. But if we are to continue to supply Bombay salt at this Cotay and it appears to me to be most desirable to do so, I think that common prudence requires that we should render ourselves independent of any very great rise in the market by laying in a stock for two years in this case as I propose to do with reference to our own salt-

My letter to the Board of the 17th August 1850 will show that there is a difference of Rupees 5,403 in the purchase of 700 Garce

Garce of Salt in this and the past year, and that Bombay Salt which was down at 17 Rupees in 1256 rose to 27 in 1259. We ought to render ourselves independent of so great a fluctuation as this.—

25. Before however I examined the present subject it was my intention strongly to urge upon the Board the advantage of adding a Cotay to the Buntwal establishment placing it on the opposite side of the river at Pany Mangalore. Traders from Pootoor, Dooba and Coorg have now to cross a broad river and either to pay a toll or to run the risk of damaging the Salt at the Ford. A new road has been opened from Oopinangaddy by Pootoor but as the traders have to cross the river twice its advantages can hardly be considered to have a fair trial unless Salt is obtainable at Panny Mangalore. They have otherwise to cross the river and go a mile up the opposite bank to the Cotays. The returns show that the sale on the Southern bank of the river is fully

equal

equal to that on the northern as will appear in the accompanying statement.—

26. For all these reasons therefore I strongly recommend the construction of two Cotays at Pany Mangalore for 200 Garce with the small establishment noted in the margin, and that I may at once be permitted to invite offers for 500 Garce of Bombay Salt in addition to that for which, I have already requested † sanction.—

† 17th August 1850

27. I was also about to request the Board to obtain sanction for establishing a Cotay at Goorpoor on the river north of Mangalore. A cart road is already opened through Moodbiddery to Karkul and will this year connect Goorpoor with the Agoomby Ghat. A Cotay at Goorpoor would stimulate the trade by this route as well as prove a very great convenience to our village population through the tract extending from Karkul to Bittangaddy and to the traders by the Malla and Undar Ghâts intervening between Agoomby and Kadadakul and I am satisfied that the expenses will be fully covered. I propose to construct a Tannah

for 100 Garce with the Establishment shown in the Margin.

28. At Bajah an extra Cotay for 100 Garce is required. The space at present is only equal to 120 Garce the sales of last year were 203.

29. At Ooppinpatam there is a space for only 220 Garce, the sales amount to 603. But as the supply can in some measure be gradually drawn from Nagarbyle I propose to erect two Cotays in this season for 200 Garce.

30. In addition therefore to the five Cotays at the place of manufacture I request sanction for building seven Cotays at an expense of about 2,800 Rupees and adding an establishment on an annual salary of Rupees 702 — — The estimates shall be prepared and if the Board consider my views to be correct, shall be submitted without delay.

Proceedings thereon. Para 1 The above communication in reply to the Board's requisition for a detail of the measures which the Collector would propose for increasing the manufacture of Salt in his district, and for maintaining a larger stock in store, Great inconvenience has for some seasons past been experienced from a failure of the usual quantity produced in the District, and additional expense incurred in purchasing foreign Salt to supply the deficiency. In their Minutes of Consultation under date 28th August 1849 the Government signified their approval of the plan which had been proposed by the Collector for increasing the Manufacture.

2 The Board were at the same time called upon to ascertain whether a supply could not be procured from Tinnevelly for the districts on the Western Coast, but it appears from the Collectors reply (25th October 1849) to the reference made to him on this subject, that although an additional quantity of about 500 Garees could be manufactured at the pans of that district the cost would far exceed that of even the Salt imported from Bombay. The Collector of Tinnevelly states that the cost of manufacture is about 15 Rupees per Garee, and that the freight to the ports of Cannara would range from 35 to 45 Rupees per

Submitting a letter from the Collector of Canara reporting in detail on the measures to be adopted for increasing the manufacture of Salt in his District and for maintaining a larger stock in store with the Board's views thereon.

per Garce. This would raise the price on delivery in Canara to from 50 to 60 Pagodas whereas Salt can be procured from Bombay for something less than half that amount. The cost of the Salt to be manufactured in Canara would be about the same as in Tinnevelly and the whole of the freight be saved, and independent of this it does not appear that any advantage would be gained by increasing the manufacture in Tinnevelly for the supply of Canara in place of manufacturing it on the spot.

3. Mr. Maltby, has in his letter now under consideration entered into a detail of the measures which he considers necessary for improving and regulating the supply of Salt. They are succinctly given in the 2d Para of his letter viz.

1st. To add to the Salt pans an area capable of yielding 500 Garce per Annum.

2d. To build Cotays, or Salt store houses capable of receiving this quantity at the place of manufacture, and.

3d. To build additional Cotays at the places of Sale.—

4. With respect to the first measure the Board think that it has been satisfactorily

Fort St. George 24th October 1838.

shown that this increase is required in the Tinnevelly manufacture of Salt. The place where it is proposed to lay out the additional Salt pans is Nagari Pylé, or Panchanadai on the Tuticorin. It is here where the greatest facilities for the manufacture exist and where Salt of the best description is produced. By making the addition to the Salt pans in one place the superintendence of it will be facilitated, and less expense incurred on account of Tubundy.—

5. The Board therefore recommend that the Collector be at once authorized to take the necessary measures for laying out the additional Salt pans, as this will be done by the manufacturers, no expenditure on that account will be incurred by Government.—

Para 12. 6. For storing this quantity of Salt (Garce 500) an additional number of 5 Cotays are required each containing 100 Garce and an estimate for their construction should be prepared and forwarded in the Department of Public Works.—

7. With respect to increasing the number of Salt Stores at the several Sale depôts, the Board agree with the Collector that it is not necessary to take any general measures for this purpose at once, but that it may

may be done gradually and they will be prepared to consider favorably such proposals as the Collector may think it advisable to make from time to time with reference to the circumstances and position of each depôt.

Paras 22 8. The places at which the Collector recommends that new Cotays should at once be erected are.

1st. At Cajoorgode in the Bekal taloot. He states that at present there is only one Cotay calculated to hold 50 Garce and proposes to build another to contain 100 Garce of Salt. The new road which is at present under construction down to that part of the Coast will there can be little doubt bring an increased demand for Salt for export to Coorg and Mysore. Some additional room therefore is required. The Board however are inclined to think that except at the places of manufacture, or where the sales are very large and rapid as at Buntwal, a store containing 100 Garce is somewhat too large. It appears desirable, for the purpose of checking abuse as well as for effecting occasional repairs that each Cotay should occasionally be fully emptied. and they would prefer

prefer both at this and other of the smaller depôts two stores each to contain 50 Garce in place of one of 100 Garce. Perhaps one addition at More for 50 Garce may be sufficient for the present at Cajoorgode until the state of the sales is clearly ascertained, and if the Collector concurs in this view he will prepare his Estimate accordingly.

9. The next place at which the Collector proposes to erect new Cotays is Pauny, Mangalore on the Southern banks of the Buntwal river. There is at present a large one at Buntwal immediately opposite to this place, but on the Northern bank. The inconvenience to traders coming from the Southern side is as pointed out by the Collector considerable, but upon the whole the Board are inclined to defer entertaining this proposal for some time longer. The erection of depôts on the Southern bank would involve the necessity of additional establishments, and with respect to this point the Board would here observe that they do not altogether approve of the arrangement proposed by the Collector as exhibited in the Statement No. 3 inclosed in his letter for making up the Establishments at Pauny, Mangalore by a reduction in the pay

pay and numbers of the servants at Puntwal. It is believed that the increase in the sales of Salt at Puntwal has been so great that the Establishment is barely adequate and it does not appear to the Board that the present pay of the Salt servants at that place is more than adequate to the very laborious and responsible nature of their duties.—

10 It is not however on this ground that the Board desire to defer this part of the Collector's project for the present. They are informed that a large part of the sales at Puntwal is to Merchants who formerly resorted to Cannanore for salt, but who were induced to abandon that place and purchase at Puntwal in preference after the opening of the Cunnajee Ghaut. But as there is at present a fine road under construction by the Peria Paiambaddy Pass directly down to Cannanore the Board see reason to doubt whether the present large sales at Puntwal will continue after its completion and they further notice that the road from Soolian to Caserogode referred to in the 23d Para of the Collector's letter may possibly divert some of the traders from Puntwal. It will be preferable therefore they think to wait and observe what effect the opening of these new roads will have upon the sale of Salt at

at Puntwal, before applying for an addition to the present Establishment. Should the Board's anticipation in this respect not be realized, the Collector can renew his proposition at some future opportunity.—

Para 27 11. The Board are not satisfied without further information of the necessity of establishing a new depôt at Gersoppa. It might be of some convenience for home sales to the people nearest to it, but the Board observe with respect to the new road from the Agoomby Ghaut passing through Karkul and Mulki and Bajee Moodbidry, that there are other depôts at points on the East nearer to those places as well as to the Malla and Andar Ghauts, and without a distinct necessity shown the Board would desire to avoid forwarding an application for additional Establishment.—

Para 28 12 If additional room be required at Bajee as would appear to be the case from the Collector's letter, he should prepare and forward an Estimate for an additional Cotay in the usual manner.—

13 The only remaining place at which the Collector proposes to increase the number of Cotays is Copenputtum on the river running into the Sudder backwater. The Board however have great doubts of the propriety of keeping up the depôt at this place at all. It is observed that the new line of road by the Devanmunie Ghaut from Sircy to Coompta crosses the same river at a point a few miles lower down and the removal of the depôt at Copenputtum to this spot has been already suggested by the Civil Engineer. The advantage of having the Salt depôt

Diary for Jany 1829

upon

upon the main road where Cart carriage would be available for its transport inland as appears obvious, and the only advantage as a set off against this in retaining the depot at Openputtanum would be that it is somewhat further in land, and perhaps more convenient for the supply of the immediate neighbourhood of the present Cotays, but if the depot be retained at Openputtanum it will be necessary to make and keep in repair the branch road to that place and the traders will have to go off the high road for some miles to gain access to it. The Board therefore request the Collector to take this subject again into consideration, being of opinion that it will be preferable to erect the new Cotays he requires at Dewagah or in the immediate neighbourhood of the present ferry, where they are informed that a spot well adapted for the purpose is to be found. When these depots are fully ready for the reception of the Salt the supply to be received hereafter might be stored in them and the Establishment then be finally removed from Openputtanum.

11. With regard to the application of the Collector to be allowed to purchase 300 Garce of Bombay Salt for Store at Buntwal and Panni Mangalore, in addition to the quantity of 700 Garce for which he applied in his letter under date 17th August 1830, the Board observe that if the erection of new depots at the latter place be deferred as proposed by them there would probably be great difficulty in finding room for storing so large a quantity, unless therefore this Salt or a portion of it be required for the regular supply of the Buntwal depot independent of the proposal of the Collector for laying in a supply for two years, the Board think that it had better be deferred.
