Coimbatore, 11th July 1844.

EE Jr.

(Signed) J C Wroughton
Jr. Collector

Fort St George 9th December 1844.

No 29.

To

The Principal Collector of

Coimbatore.

Sir.

I have the honor to submit the annual Statements and accounts in English and Hindivee of the annual Settlement of Land Revenue in the four Talooks comprising this Division of Coimbatore for Fusly $\frac{1253}{1843\text{-}44}$ —

2. It again becomes my pleasing duty to report a season of pretty general prosperity throughout this portion of the Province, and the supply of rain, though not quite so seasonable as the farmers wished, was sufficient for an extended cultivation of the dry grain and garden lands —

During the earlier months

of

Fort St George 9th December 1845.

of the year that is from about the middle of March to the end of May, more than the usual quantity of rain was received by heavy showers in most of the Villages of the Division, enabling the ryot to raise the ordinary Cuar or early crop of the County —

The Months of June, July, August, and part of September were dry throughout, and much anxiety was felt for the young standing crops sown in the previous months, but providentially the rains set in the latter end of September, which with a good north east Monsoon, proved the salvation of the country, and enabled the ryot to extend his cultivation above the preceding year by 2756 $\frac{13}{16}$ Bullahs in Punjay and 242 $\frac{12}{16}$ Bullahs in garden land. and the crop is stated to have been on the whole an average one. —

The

1259

Fort St George 9th December 1844.

The freshes in the Cavery and Ambraevathy were generally steady, but not so heavy as in the previous season. The wet lands dependent on Channels taken off these rivers were extensively cultivated, but the rice Crop was not so good as usual. Some complaints were made of the failure of the second crop toward the end of the Fusly, but no shewie or loss of Crop from drought was admitted. The tank cultivation was not so extensive as last year. owing to a deficiency of water in the Velleyanay tank in Carroor talook causing a decrease of 79 3/16 Cawnies assessed at Rupees 810-9-5.—

3. I regret to report that the epidemic Cholera was very prevalent in many towns and Villages throughout the division during December and January, and the town of Carroor seems to have suffered most.

4. In the piece of grain there was a trifling rise: but still below that of Fusly 1251 1841-42 which the subjoined Memorandum shews.—

It is right to bring to notice here the recent arrangements made by Government for the improvement in the breed of Horses for Cavalry purposes, and the late distribution by Captain Hill the Superintendent of the Stud of twenty one brood Mares to wealthy ryots of Conjeveram and Dharampooram talooks. and I feel sure that in a few years the breeding of horses will prove a source of wealth to the ryots of that part of the District who are quite alive to the advantages held out to them, and appear to take great care of their horses.—

6. The following Abstract Statement exhibits the Settlement of every Class of Land Revenue including Lowries in Fusly under review, and when compared with Fusly 1252 1842/43 gives a net increase of Rupees 13,511-9-1.—

This result of the year is very satisfactory and gives a hurry in excess over that of Fusly 1245 1835-36.

To

C. C. Lovell Esqre

Acting Secretary to the

Board of Revenue

Fort St. George.

(70)

From the Collr of Malabar

Submitting a Statement shewing partially the number of Revenue Servants holding lands and the amount of Assessment paid by each in his District.

Sir,

I regret that so much delay has occurred in replying to the Board's letter of the 17th June last, which called for a Statement of the number of public Servants under me who hold land in their own District. A reluctance to disclose the amount of property of which a man is possessed is not unnatural any where and is in full force in Malabar. My repeated and at last serious orders have only brought in Statements from 180 out of the 314 Servants who are in revenue and police employ in Malabar. But these are the principal, and it seems unnecessary to delay further in order to send in a perfect account. It may suffice to say for the present that out of the 20 to whose accounts are still due, and will be forwarded so soon as they are received, about 82 have landed property to a smaller or greater extent, which if these are added to the 180 an Abstract of those accounts now accompanies, it will be seen that out of the whole body of servants (in number 314) not less than 232 are landed proprietors in their native Country. There is no doubt of the justness of the Board's remarks.

17289 Fort St. George 9th December 1816.

Board's letter to Govt. Dated 11th April last. Para 5.

That a strict adherence to the orders received from Home that no public Servant shall possess landed property in his own District will deprive Government throughout Malabar of the Services of all those who from their acquaintance with the peculiar language habits and customs of the District can for the most part be employed in them with advantage to the public interests."

Malabar, Collectors Office, Calicut 23d November 1816.

(Signed) H. V. Conolly

Collector.

81 82

Order thereon. Ordered to be lodged in the office

Resolved that the following letter be despatched.

To The Acting Chief Secretary to Government

83

To the Actg Chief Secretary to Government } Sir.

With reference to the resolution of Government underdate the 12th Septr 1843, I am directed by the Board of Revenue to submit for the special sanction of the Most Noble the Governor in Council the accompanying Bill of actual charges incurred in conveying Salt Rowanahs &c from this Office to different Collectors in the years 1843/44 amounting to Rupees 208. 15-.

2. The Board further request that the sum may be granted to their Secretary to enable him to make the requisite advances for the conveyance. The account particulars of the actual charges will be submitted at the end of the year.

Revenue Board Office
Fort St George
9th December 1844

(Signed) E. C. Lovell

17303 Fort St George 9th December 1844.

Resolved that the following letters be despatched.

To The Principal Collector of Salem.

84

To the Principal Collr of Salem } Sir. I am directed by the Board of Revenue to transmit to you the accompanying

Petition from Appoo Row late Monsiff of Cam. 9/12/1844

baya Nellore in the Tongra cottah Talook and to request that you will be good enough to report briefly on the subject to which it relates.

2 It appears from your Endorsement that you returned the Petition on the ground of it being written in English instead of the Vernacular language of the District, but there does not appear to be any objection to Petitions being written in English if the party prefers to address you in that language. The Board are of opinion that every facility should be given to the presentation of Petitions, and that it is sufficient for persons desiring to address the Collector to know that they are at liberty to employ the Vernacular language without being precluded from adopting another channel of communication.

Board of Revenue
Fort St. George

13

From the Sub Collr in charge of Rajahmundry submitting observations with

Sir, Para 1

With reference to the proceedings of the Board of Revenue of the 18th of November last

with respect to the financial results of the salt revenue and to the operation of the tax on the population generally.-

last conveying a copy of an Extract from the Minutes of Consultation and of a letter from the Honorable Court of Directors, and requesting the Collector to forward a statement containing the information regarding the salt revenue called for by the Honorable Court, and to submit any observations that might occur to him with respect to the financial results of this sources of revenue and to the operation of the tax on the population generally.

I have the honor to enclose the Statement prepared according to the form A transmitted with the Board's proceedings shewing the salt revenues from fusly 1251 to 56.-

2. The Board are aware that the charges on this branch of revenue depend chiefly on the quantity of salt Manufactured, and not on the quantity sold, which will account for the charges appearing high in proportion in some years when the revenue collected has been less owing to a diminution in the sales.-

3- The inland trade with the Hyderabad state is carred on almost entirely by Brinjaries, who bring down wheat and tamarinds, brass pots and various utensils, with the proceeds of the sale of which and with some proportion of ready Money which they bring with them they

purchase

purchase salt at the Government pans.-

4. The falling off in the sales to these Merchants in fusly 1254 and subsequently is owing Chiefly to their having more generally attended the salt works in Masulipatam, where the salt has been sold by measure while in this District it has been sold by weight. The great natural affinity between salt and water causing the latter to absorb the damp of the atmosphere and thus to increase considerably in weight has very naturally induced the Merchants to attend the sales at those pans, where they can always receive a certain definite quantity for their money uninfluenced by the state of the weather.-

5. Up to fusly 1252 salt was sold for home consumption at the rate of 14 annas per Bengal Maund: during fusly 1253 the price was raised to one and a half rupee the Bengal Maund, which price was reduced to one rupee during fusly 1254, and at that price it has remained to the present time- It will be seen that a decreased sale immediately followed the rise of price and that the revenue has risen again since the price was reduced, but before any arguments are deduced from these facts it should be ascertained whether a similar falling off in the sales occurred on

in

Fort St. George 20th January 1848.-

in Neighbouring Districts. it is very possible that local causes. independent of the rise in price, may have transferred the inland trade temporarily to other pans.-

6. The increase in the sales in fusly 1256 is attributed by the Collector in his report on the extra Sources of revenue. to there having been no spontaneous salt for sale as in fusly 1255. that salt being less appreciated by the Merchants and they in consequence having frequented the works of other districts.-

7. But as it will be seen that the sales of fusly 1256 not only exceed those of the previous year, but are higher by 30,000 Maunds than those of any season since fusly 1250. some other cause must also have been in operation.-

8. During the last two or three years population has slowly increased, the seasons have been favorable, the harvests good, and a profitable export trade has afforded to the people a ready market for their produce. the Government have also expended annually large sums on Maramat. constant employment has been found for the labouring population, the people have generally improved their condition, and the means of the Province have enlarged.- Under these favorable circumstances an increased

Consumption

Fort St. George 20th January 1848.-

consumption of all articles will have taken place, and salt will not have been excluded from the list. It is also probable that as poverty has decreased, the temptation to illicit traffic in salt will have decreased also, and the smuggler will have found fewer persons willing to incur the penalties of a breach of the law.-

9 It has of late years been very clearly seen that reduction of duty. which is tantamount to a reduction of price in salt, on those articles which the habits of a people may have made necessaries of life, has been immediately followed by such an increased consumption, as in point of revenue more than to compensate for the reduction of rate. and the resources of the State have been improved, at the same time, that the enjoyments of the people have been enlarged.-

10. But this system however sound in the main, is only very partially applicable to the Salt revenue, and it is not at all probable that any increase of revenue from enlarged consumption would result from a diminution of price.-

11. From enquiries which I have frequently made, I believe that in any of the coast Districts the

the expences of a family in the article of salt do not exceed 4 annas per annum for each person, a sum which cannot be supposed to press heavily even on the poorest and as salt is not an article of luxury of which the consumption by any one would increase as its price was lowered, a diminution of cost would fall severely on the public revenue without being felt as any particular boon by the people.-

12. With our present very imperfect means of transport, the cost of the article must fall more heavily on the inhabitants of Inland districts, but the evil can be in great measure remedied by the removal of the prohibition on the manufacture of earth salt as has I believe been lately done in Bellary and will almost entirely disappear with the formation of more rapid means of conveyance.-

13. There is no reason to believe that Smuggling in spontaneous or earth made salt is carried on to any extent in Rajahmundry. when cases are discovered the parties of course are punished, but it is difficult to persuade an ignorant people that they are committing a crime in availing themselves of the spontaneous gifts of nature.-

14. The species of fraud which I believe to

to be most general, is in clandestine sales of salt, either by the ryots from what they have made before its delivery to the Cirkar, or by the Government Servants, from the excess found in the Measurement of any heap above the regulated quantity, and as these sales cannot be covered by the usual rowannah without being detected, the salt is generally sold in the immediate neighbourhood to the retail dealer.- These frauds are prevented in Tanjore by a simple System which has not been introduced in Rajahmundry.-

15 The privilege of retailing salt within a certain limit round the Salt work is annually put up to auction in common with other rents, and is confirmed to the person who offers to take the largest quantity of salt in every Month.- It thus becomes the renters interest to prevent illicit Sales which would diminish his profit-he has means of detecting frauds which are not open to the Government, and his relations and dependants form a ready and active and inexpensive police.-

Rajahmundry District
12th January 1848 } (Signed) H. Forbes.
Sub Collector
in charge
Statement.

Fort St. George 20th January 1848.

To D. White Esqr.
Acting Secretary to the Board of Revenue
Fort St. George

Sir,

14

From the Coll.r of Chingleput } Para 1

14

With reference to the Extract from the Proceedings of the Board dated 18th ultimo I have the honor to forward the accompanying Statement of Salt Revenue for the last 6 years and beg to observe that the falling off in the sales of Fusly 1256 has arisen from the sale since January last, of salt at the Madrass Colaurs for Inland consumption.-

+ From Fusly 1251 to 1256.

2 The demand for exportation by Sea has also been much reduced since Fusly 1253 and there was none received from Bengal.-

3. The quantity sold for the supply of native States would appear from the Statement to be larger than that sold for consumption within the Honorable Company's Territories but it must be remembered that a large portion of the consignments of Salt for which Rowanahs are taken for places within the Mysore Country is not carried to its destination, but disposed of in the Markets on the road within the frontier.-

4.- The Rowanahs are often taken out for the Villages in Mysore, with the view of going there only in the event of the parties not being able to realize their prices at the intermediate stations.-

Chingleput District

To D. White Esqre
Acting Secretary to the
Board of Revenue
Fort St. George

15

From the Collr of North Arcot
Forwards Statement of Salt manufactured and sold Fasly 1251 to 1256 with Explanation.

Sir,

Para 1 I have the honor to forward a Statement shewing the balance of Salt at the beginning of the year, the quantity Manufactured and sold from Fasly 1251 to 1256 in the form received with the Board's Proceedings under date the 18th Ultimo.-

2. The falling off in the sales in Fasly 1256 arose from the Traders not having resorted to the Pans of this District from Cuddapah, Bellary and Mysore to the same extent as in the former years.-

3. Of the Salt which is taken for consumption in this District it would seem that the chief portion is consumed in the Calastree and Cavateemuggur Zemindaries and the Talook of Sutvaid, the supply for the more distant Talooks being drawn from the Salt pans at Madras and in the Chingleput and South Arcot Districts

The

Fort St. George 20th January 1848.

4. The consumption of each individual it is thought may amount on an average to about of ½ Madras measd of Salt per annum, the price of which at 120 Rupees per Garce will be 2 annas and 5 pice for each head and at that rate the Salt Revenue of the District estimating the population 890000 would amount to Rupees 135,500.- But the retail price of Salt at Wallajahpet which, as being the chief and most central Market town, may be taken as affording nearly a fair average for the District, is usually from Rupees 210 to 220 per Garce.- It would therefore appear that near 80 per cent is paid by the consumers for the carriage and profits &c. of the merchant and the cost to the community of the collection of the duty must therefore be very considerable not less probably than at least 60 percent on the amount realized.-

7. E. E.

Fort St. George 20th January 1848.

To

D. White Esqre

Secretary to the

Board of Revenue

Fort St. George

(16)

From the Collr of Salem

Sir,

With reference to Extract from the Board's Proceedings dated the 8th Ultimo, forwarding Extract from the Minutes of Consultation dated 23d October last, and the Honorable Court's letter which accompanied it, and requesting to submit any observations on the operation of the Salt Monopoly on the population of this District. I have the honor to state that the high price of Salt which is brought to this District from those of South Arcot and Chingleput bears heavy on the poorer class of the population the price as shewn in the price current of this District for October last was Rupees 233-4-- per Garce, being above 120 per Cent on prime cost.

Salem Zillah Cutcherry
Collector's Office

To

Fort St. George 20th January 1848.

To

D. White Esqre

Acting Secretary to the

Board of Revenue

Fort St. George

(17)

Sir

From the Collr of South Arcot

Forwarding a Statement shewing the quantity of Salt manufactured & sold in each year with all the information filled up as required regarding the Salt revenue from Fusly 1251 to 1256 & submitting few observations for the consideration of the Board.

Para 1. With reference to the Proceedings of the Board of Revenue, and to the Extract from the Minutes of Consultation as well as the orders of the Honorable Court of Directors which accompanied it, I have the honor to forward a Statement shewing the quantity of Salt manufactured and sold in each year with all other information filled up, as required by the Honorable Court regarding the Salt Revenue of this District from Fusly 1251 to 1256 inclusive agreeably to the form furnished by the Board.

2d With respect to the financial results of this source of Revenue and to the operation of the Monopoly tax on the population generally I beg to submit a few observations which appear to be worthy of the consideration of the Board.

3d In Fusly 1219 the Monopoly price

price was raised from 70 to 105 Rupees per Garce. I have therefore omitted this broken period and commence my calculation from Fusly 1220 to 1252. During these 33 years the Monopoly price of Salt, was altered on three several occasions the average sales of these periods for home and inland consumption

† The average sale of salt for home & inland consumption

	Garce	Rupees
From Fusly 1220 to 1229 at 105 Rupees per Garce —	1772	186216
Average Do. from 1238 to 1252 at 105 Rupees per Do. —	1819	195786
Total	3591	382002
Average	1795½	191001
Average Do. from 1230 to 1237 at 70 Rupees per Garce	2723	190646
Increase in Sale and decrease in Revenue	927½	355

exclusive of Export by Sea, as well as the supply to the French Government to which the Monopoly price has no reference, are shewn in the Margin from which it will be seen that during the 1st and 3d periods of 25 years when the Monopoly price was highest, Viz 105 Rupees per Garce no beneficial results arose as to the finances of government proportionate to the increase in the price. Whilst on the other hand the consumption of Salt, clearly appears to have been seriously affected. From Fusly 1230 to 1237 when the price of Salt was 70 Rupees per Garce the Government obtained an equal amount of Revenue and the sale of the article was

was considerable greater than when the Monopoly price was high (105 Rs.) by 927½ Garce or 50 per cent per annum.

4. In Southern India the Natives generally feel the Monopoly price to be severe such never having existed under their former Native Governments. Salt to all classes of Natives may be considered as a primary want, it being absolutely required by them for the mere necessaries of life, the Government in regard to the justice due to them, ought not to maintain the high price under any consideration much less as the present System is shown not to return an adequate proportionate increase of Revenue.

5. The consumption of Salt has greatly diminished, and the people led to seek other substitutes for it of this I am fully convinced from experience in my District. Natives residing in the interior and far from any Salt pans on the coast cannot purchase Salt on account of the high price it fetches after the Monopoly price, the profit and transport charge of the trades be taken into consideration. In proof

of

of this I beg to refer the Board to the retail prices of Salt per Garce - in the several + Stations enumerated in the margin taken from the return published in the Fort St. George Gazette page 947 dated 19th of October 1847. -

+ Vellore	206
Bangalore	253
Bellary	300
Trichinapoly	225
Secundrabad	248
Jaulnah	248
Nagpoor	456

6. It appears that there are 18,794,605 people (exclusive of those in the Hyderabad and Nagpore territories) dependant for salt on the pans in the Madras Presidency - The quantity which each person would require taking the lowest reduced scale of average would be 12 Madras Measures or 25 lbs weight per annum at this rate the quantity of Salt which would be sold at a moderate price for their own consumption would not be less than 46986 Garces. It will be in the power of the Board to ascertain the total average sold under the Heads of Home and Inland consumption - It is however certain that the high price imposed upon Salt materially checks the consumption and deprives a number of poor people of the use

Almanac for 1839 -

In Company's territories including Madras	15,074,851
In Mysore, Travancore and Coorg	3,719,754
	18,794,605

use of that most essential article -

7. Taking the price of Salt 120 Rupees per Garce - If a man wished to use Maritime Salt, he must pay at 9½ per year to Government for one Mercal to which the profit and transport charge of the trader must be added if he cannot pay the exorbitant charge demanded, he is driven either to procure it illicitly, or to learn to do without it, or substitute common earth Salt, which is made by the poorer class of people for their own consumption. -

8. For the reasons above stated I am of opinion that a reduction in the price of Salt might be made without incurring any loss of Revenue to Government and at the same time it would be conferring a boon on the people, to which they are fairly entitled. -

9. As directed in the Board's proceedings a similar Statement to that now forwarded, shall be prepared and annually sent with the report on the extra branches of Revenue for the future. -

From the Collr. of Canara

Sir,

1 - With reference to the Board's Proceedings dated 18th November last I have the honor to enclose a Statement shewing the State of the Salt Revenue in Canara for the 6 past years or from Fusly 1251 (1841/42) to Fusly 1256 (1846/47) prepared in the form transmitted by the Board -

2 - No general observations occur to me as requisite to be made on the present occasion respecting the financial results of this source of Revenue or on the operation of the Tax on the Population generally but in the annual report for Fusly 1257 (1847/48) now ordered by the Board to be made any circumstances connected with this subject which appear of sufficient importance will be brought under the notice of the Board - Explanation respecting the particulars of increase and decrease under the different heads and at particular places for the past Fusly have recently been given in my Report on the Extra sources of Revenue for Fusly 1256 (1846/47)

20

From the Coll.r of Masulipatam } Para 1

Submitting report relative to the Collection of Durbary charges in Coracoolloo Mootah and recommending the discontinuance of the same.

20

To B.d 6th March 1846.
Board's Rec.d 26th Do.
To B.d 11th May.
Board's Rec.d 25th June.

In regard to the items of Durbary Charges V.ca in the Coracoolloo Mootah, which has lately been purchased by Government in Public Auction for arrears of Peishkush as adverted to in the correspondence noted in the Margin, & the re-assessment which was made of the Charges in question on the ryots during the Management of the Zemindar as noticed in Para 100 of my report on the Zuftly Estates for Fusly 1255 / 1845/46 I beg leave to submit the following detail for the Board's information.

Dated 9th Dec.r 1846.

2. The Coracoolloo Mootah is composed of 25 Villages, inclusive of the Sarg Mokassah and aggraharum Villages, and formed a portion of the Bezwara Estate with which it was attached for arrears of Peishkush under date 30th December 1845, and afterwards purchased by Government in Public Auction under date the 2.d May 1846.

3. The Circuit Committee accounts lodged in the Record, exhibit an item termed "Cutcherry Charges V.ca" usually called Durbary

"Durbary charges" which appear to have been included in the sist and collected from &c the Ryots formerly when this Mootah was held under the administration of the Court of Wards during the Minority of the late zemindar Rajah Calavacolanoo Venkatrama Gopaula Jaganadharow, the then Collector Mr. G.E. Russell perceiving that the collection of these charges pressed heavily on the Ryots ordered their discontinuance in Fusly 1230 A.D. 1820/21 at which time &c she discontinued the Collection of similar charge in Vinnacottah Goodewadah &c Yeds Pergunahs & his order continued in force during the time the Estate was under the Circar Management that is to say upto Fusly 1247 A.D. 1837/38

4. From Fusly 1247 A.D. 1837/38 when the &c management of this Mootah has been placed in the hands of Rajah Lutchmeenursummah widow of the late Zemindar, these items &c have been reimposed on the Ryots and collected by her to some extent.

5. The Ryots of the Villages of this Mootah have on several occasions &c presented Petitions complaining that the present

present Zemindar had (notwithstanding the Collection of these items had been discontinued by the former Collector) again caused the Durbary Charges Yeds to be entered against them in the accounts in the following &c manner Viz.

	Pds.	a.	p.
For a Candy of dry Amara produce	"	8	"
For Seeraut lands per Coontah	"	1	"
For the produce yielded in the Mokasah Villages except Tamara Coolloo Village per Candy	"	4	"
For Seeraut lands in Dº per Coontah	"	1	"
For the produce yielded in the Cuttoobady and Chatoorbhagum Aggraharums per Candy	"	3	"

and had also caused demands to be made under the heads of "Dasariah Nazur" "Nazurhatoyee" "Lutchmeedavy Putta" Yeds on all the Villages at a certain Bilmuktah rate, which demands was entered against &c their will through the Curnums and &c collected from some poor and Parcy Ryots

Ryots by force, and that a portion of these ex charges was in some instances deducted from the ryots' sists and credited under these heads, and that by these unreasonable exactions they are suffering much loss, and praying therefore that these charges should be ordered to be discontinued in future.

6. These items having been thus protested against by the ryots have been reserved for final adjustment, to be made agreeably to the orders of the Board of Revenue, but they have ever since the Estate has been classed as Government property, continued to be inverted under the demand in the accounts of Fuslies 1255 a.D. 1845/46 and 1256 1846/47 according to the practice observed in the previous Fuslies.

7. The annexed Marginal Statement contains a concise abstract of the aggregate Demand Collection and balance on account of these items from Fusly 1247 a.D. 1837-38 upto 1256 1846-47

Fuslies	Demand			Collection			Balance		
	C^rs.	a.	p.	C^rs.	a.	p.	C^rs.	a.	p.
1247	936	12	1	182	15	11	753	12	2
1248	538	2	"	95	13	6	442	4	6
1249	471	6	2	317	8	6	853	13	8
1250	431	5	9	91	12	9	339	9	"
1251	1056	8	7	439	14	2	616	10	5
1252	590	14	"	99	8	9	491	5	3
1253	828	10	2	62	5	7	766	4	7
1254	680	4	6	12	8	7	667	11	11
1255	938	10	6	"	"	"	938	10	6
1256	823	2	10	14	"	"	809	2	10
Total	7995	17	7	1316	7	9	6679	4	10

8. The renewal of the demand on account of these extra items against the Ryots being in my opinion not only a

great grievance to them, but also likely to discourage them from exerting themselves for the improvement of the cultivation and amelioration of the Country and the charge on account of the similar items in Padaipaud Mootah made by the Proprietor after they were once struck off by the late Collector Mr. Russell having been brought to the notice of the Board, after the said Mootah had become the property of Government, under date 12th December 1846, and discontinued under the sanctions of Govt. dated 3rd June 1847, I beg strongly to recommend that the same indulgence may be extended to this Mootah, and that the balances outstanding, as exhibited in Para 7 amounting to Rupees 6679-4-10, may be ordered to be written off.

9. With reference to the Sillidars Suffric and other demands of an objectionable nature adverted to in Para 14 of the Board's Proceedings dated 22nd April last, I have the honor to observe that, from a long period of time, it had been the practice for the Sillidars to receive in addition to the salaries fixed by the Circar, a certain sum

sum of Money per Month by an allotment against the Ryots in the Villages under the denomination of "Batta Charges" and for shroffs serving in the Circar Sanahs to receive an emolument denominated a "Poossoom" at a given rate per Cent; on the amount of sist collected from the Villages. The late Collector Mr. Wroughton, considering that this practice might lead the circar servants to Combine with the Ryots and to connive at any mal practices committed by them, with the view to defraud the Government of its just dues made an alteration in the system by increasing the salaries to the Silladars and allotting Monthly wages to the shroffs in some estates, and ordered the Silladars Suffrie and shroffs' Poossoms usually paid by Suffrie on the Ryots to be separately collected and entered in the circar accounts. Pursuant to the said arrangement the Silladars Suffrie, Viz. at 8 Rupees per Month for the two Silladars of this Mootah, amounting to 96 Rs. per annum, as well as the shroffs' Poossoom at a half Rupee per Cent on the amount of the Circar sist Collected from the Estate, have been continued to be included in the

Demand

Demand and Collected accordingly. There does not appear to me to be any reason why the Ryots should be taxed for the payment of the Silladar and Shroff any more than for the payment of other servants who have heretofore drawn their salaries direct from the state, and as the demand appears to be considered to be objectionable both by the Board and the Government, I have no hesitation in recommending its discontinuance.

I think it right however to apprize the Board that the Collection of these items prevails in nearly all the Estates now under management - Six Deary, six Islands, Nagalapooram, Bhoojabapatam, Padapandoo, Ramasingavarum and Sreeramavarum, the first mentioned imposed (Silladars Suffrie), is known under the various denominations of "Silladars Condra," "Pootterrmanuckaloo," and "Coospa Cuttaloo" and the total sum realized under these several heads was in fusly 1255, Rupees 1,894-7-3 - and in fusly 1256 Rs. 1979-9-5. The Collections on account of

	Fusly 1255	Fusly 1256
Collections in Estates in which shroffs receive wages in lieu of Poossoms resumed	101-11-8	102-4-8
Do. in those in which the Poossoom is carried to account, the duties of the shroff being conducted by others on the Establishment	37-1-11	37-7-3
Total	138-13-7	480-7-4

Shroffs Poossoms amounted in fusly 1255 to Rupees

Fort St. George 20th January 1848.

Rupees 138—13—7½ and to Rupees 480—7—4 in fusly 1256.—

To The Board dated 30th Septr. 1847
From Bd. dated 25th Octr. 1847.

11. With reference to the correspondence noted in the Margin, I beg to state that the balance on account of the Durbary charges &c. of the kind now under notice assessed on the Villages of Seetanapully & Bilmuktla Aggraharums Village belonging to this Estate amounted to Rupees 151—12—9½ of which Rupees 125—11—3. are on account of "Dasrah Nazur," "Nazurkatayee" "Lukhmeedary Putta" &c. items now recommended to be remitted. The remainder Rupees 26—1—6 consists of the following items Viz. Tax on Palmira Trees which was included in the sist or demand of Fuslies $\frac{1240}{1830-31}$ - $\frac{41}{31}$ - $\frac{42}{32}$ & $\frac{43}{33}$ and again struck off for the accounts agreeably to the Decree passed by the Court amounting to Rupees 21—3—2. on account of Fuslies $\frac{1242}{1832-33}$ & $\frac{1243}{1833-34}$ ab Rupees 10—9—7 per annum, a sum of Rupees 2—2—. on account of Sarcottar's Saffeln and Shroffs' Rosscoms, and Rupees 2—12—4 on account of fines, forfeitures &c. For a final disposal of these items, I solicit orders of the Board.—

Fort St. George 20th January 1848.

To D. White Esqre.
Acting Secretary to the
Board of Revenue.

Sir,

(22)

From the Coll.r of Masulipatam } Para 1. I have the honor to forward the accompanying Copy and translation of an arzee addressed to me by Gazanully Venkoo Boyamah now in the receipt of an allowance of Rupees 57—8—. per annum from my treasury, soliciting that her allowance may be made payable through the Collector of Rajahmundry in which District she is now residing.

27

This allowance the Board will observe was granted to the Petitioner as the widow of late Gazanully Shaikoo Puntooloo under the sanction of Government dated 19th April 1833. I see no objection to a compliance with the Petitioner's request, and beg accordingly to recommend that authority may be granted for the payment of the allowance thro' the Collector of Rajahmundry from the 1st Instant.—

No. 1.

Translation of an Urzee addressed to R. T. Porter Esqre Collector in the zillah of Masulipatam by Venkoboyemmah widow of late Gazavelly Sashachellum Pantooloo inhabitant of Ellore, now residing at Ungarah in the Rajahmundry District:-

Dated 30th November 1847.

I beg leave to state that Semanthalo Kristnamah whom I have constituted as my Vakeel by executing to him a Vakaltnamah has received from your Treasury the Monthly allowance of Rupees 4-0-0 due up to the end of last Month, which the Honorable Government was pleased to provide me for my maintenance and caused it to be sent to me. As it is indispensably necessary for me from infirmity and old age to be always under the protection of my near relations at this place, delay and cost were resulting in receiving the money by the said Kristnamah at that place and transmitting it to me here. As the place of my present constant residence is situated near to Cocanadah &c the

the principal station of the Collector of Rajahmundry District, and as my near relations who can be obliged to receive there the said Money and cause it &c to be sent to me without subjecting me to any cost are now at that place, I very respectfully pray your honor will have the Kindness to submit a favorable recommendation to Government in order that they may be pleased to issue instructions to the Collector of Rajahmundry District to continue to pay me the amount of my allowance from the Month of January 1848. I shall receive the amount of my allowance due for the months of November and December 1847 from your Treasury.

Mark of Venkoboyemmah

To
Daniel White Esqre
Acting Secretary to the
Board of Revenue
Fort St. George.

(26) Sir,

From the Coll.r of
Guntoor ___ } Para 1. In para 40. of my last Ja-
-mabundy Report I observed that the large out-
-standing balances in the purchased Zemindary
Villages required a separate notice. Full details of
these balances are given in the Statement of the
Demand Collection and Balance for the several
Estates prepared to accompany the report shewing for
each the annual arrears outstanding under
the several heads of Village rents, Mucta,
Share, Quit rent, Shrotriem, grazing taxes
and Fruit trees.-

2. The following is an Abstract
of the sums outstanding under each head,
at the end of Fusly 1256 on account
of the Demand up to 1253.-

Submitting with reference to the last Para-mabundy report detailed statements of the balances outstanding at the end of Fusly 1256 on account of the demand to 1253 inclusive against the purchased Zemindaries and recommending to remit at once Rs. 1,87,603-3-1p being the whole balances outstanding to 1253 with the exception of the Shrotriem or aggraharums Quit Rent and permanently rented Villages or to remit for the present Rs. 14,719 62-10-5½ of Mucta balances &c. with the exception of Village rents & Quit rent on Enams &c. reserved for further report.

The

549

Fort St. George 20th. January 1848.

3-

The Board are aware that an Examination into these arrears was made by the Commissioner which comprehended with the exception of a few Villages all the Estates except Mulrauze. The amount pronounced by him recoverable was Rupees 206553 — " — " — even this Amount he considered for various reasons should not be rigidly enforced especially as regarded Ryotwary balances.

4-

The following shews the Classification made by the Commissioner and the Proportion subsequently recovered.

Arrears

550.

5. The high prices of 1255 would have admitted of the Collection of a still larger amount which would probably have been recovered had not the Principal Sudder Ameen of Guntoor made a ref= erence to the Sudder Udalut and as reported in

+ To Board 17th May 1846
From Do. 3d. Instt.
To Do. 30th. Octr. "
From Do. 25th. Febry. 1847

the correspondence noted in the Margin + obtained on from them a Copy of their Proceedings dated 9th. Ins= March 1847 which he construed as pronouncing the recovery by distraint of Arrears of more than one years standing illegal. This interpretation so quickly became generally known and with the consequence was that many defaulters, who were making arrange= =ments to liquidate the recoverable portion of there ba= balances, refused to pay, and altho the impression was partly removed after the receipt of the Minutes of Consultation dated 16th. February 1847 - yet the opportunity was lost, and in Fusly 1256 altho prices continued good, the scanty returns from the sta= staple Crop of the District, Jonna, deterred me from more decisive attempts to recover the ba= Amounts -

6. It seems unnecessary to go into a Minute investigation of these balances - as

They

They have been partly caused by the famine partly by failure of Crops and the low prices from 1251 to 1253 - but chiefly by the Zemindary System of Management of which they seem to form an essential part, it being the policy of the Zemindars to secure, as they supposed, their Ryots on their own Villages by keeping them in debt. Finally, as ascertained by the Commissioners' enquiries, large sums have been clandestinely co= collected for purposes of corruption - Even where the balances cannot be accounted for in any of these ways, to enforce the Collection now would in the end probably involve a loss of Public revenue -

7 - There is no doubt that on investigation a considerable sum would be pronounced recoverable, but= this investigation must for the most part depend on the Statement of the Ryots, and the very order for it would be the signal for their renewed exactions -

8 - On the whole therefore I am of opinion= that not only the interest of the Ryots but also of= Government would be better consulted by a liberal and indiscriminate remission at once of all arrears now out= =standing to 1253 inclusive with the exception of the= Shotrium or Aggraharums and Quit rents on Enams= and permanently rented Villages which will be left to be dealt with as directed in Para 2 of the Minutes of Con= =sultation dated 19th October and Boards Proceedings 2d. December.

Fort St. George 20th January 1848.-

This would include Rupees 1887403-3 1/2-

9- Should the Board not be prepared to recommend so sweeping a remission, I would then limit my proposal in the first instance to the following sums.

Arrears now outstanding of every kind -->
Saving Shrotriem, Quit rent and permanent
Inzarahs to 1246 inclusive ——— 10987-10-11

Muota balances from 1245 to 1253 inclusive ——— 36465-7

Sheroy Summah ——— 8430-11-11 1/2

Total recommended for immediate remission ——— 47962-10-5 1/2

Reserved for further Report.

From Fusly 1245 to 1253-

Village rents ——— 34782-8-9 1/2

Fort St. George 20th January 1848.

for the purpose, and in order to enable them to decide to which of the two preference should be given, they proposed to send one of each description to two Districts where the sales of Salt are the largest, and to obtain the opinion of the Collectors on the point. It was also suggested that the four standard measures required for the purpose might be made up at the Mint, which proposition was accordingly acceded to. From the annexed correspondence, however, with the Acting Mint Master, it will be seen that in addition to the ½ and ¼ Maund measures, he prepared one of ⅛ Maund also. Of these the ½ and ¼ seemed to the Board on further consideration the most likely to be of practical use, and in order to have them tested in the Provinces, they caused 12 of these measures to be prepared of the description and dimensions indicated in the Margin. One long and one short of each of these two descriptions were forwarded to the Collectors of

Fort St. George 20th January 1848.

their Districts with the view of ascertaining which of each sort is best calculated for general introduction throughout the Presidency. The replies of these Officers have been received and I am directed to forward them herewith for submission to the Most Noble the Governor in Council.

From Madras 6th ins. Cons. 23d Aug. 47.
From Chingleput 8th Sept. in Cons. 11th Oct. 47.
From Nellore 2d Oct. in Cons. 11th Oct. 47.

2. The results of the experiments made by the Collectors are exhibited in No. 1 of Statement A. Each Collector has deprecated the use of the ½ Maund measures on account of their weight and inconvenient size; and the ¼ Maund measure which approaches nearly to the Mercal now in use, is considered the best calculated for general adoption. Of the two forms again of this measure, long and short, furnished by the Acting Mint Master, the long was preferred in as much as the contents of the short, in consequence of its larger diameter could be increased at pleasure by a little dexterity a defect to which the other is much less liable. With this measure therefore, the Board have caused a series of experiments to be conducted in their own Office with Salt in different stages of dryness and brought from different heaps of different years,

To Mds. 800 Tolas
1 Mercal 960 Tolas

years and the result is embodied in No. 2 of the Statement referred to. It will be seen that no two measurements, even when the same Salt has been used have given a similar result. The differences between the quantity measured and weighed are so fluctuating that it is difficult to arrive at any definite standard. According to No. 2 of the Statement, dry Salt poured in very lightly, gives the purchaser 5 3/16 per Cent less than he is entitled to receive. This however would never happen in ordinary practice, as the Salt with which the experiment was made had been purposely dried for the occasion and poured in, in a manner which is not followed at the Cotaurs. The same Salt when thrown in and the measure slightly shaken about gives a percentage of 1 8/16 more to the buyer. Every little variation therefore in the manner of filling the measure, altho other circumstances remain the same, produces a palpable effect on the contents. The same is the case no doubt to a certain

certain extent, with the present Mercal, but in the absence of any superior advantages in favor of the new measure the Board are disposed to give a decided preference to the former which has been found to answer every necessary purpose and than which they feel satisfied, no new measure of capacity will conduce to greater exactness under all the circumstances under which Salt is measured at the Cotaurs. By the Salt rules of the 31st May 19 a less quantity than 40 Mercals is not allowed to be sold to retail purchasers in the Provinces and this quantity, it will be seen, is exactly equivalent to 12 Maunds. At Madras the Minimum quantity is 1 Mercal.

Under the circumstances stated above, the Board beg to be favored with the instructions of Government.

Para 20-
8 Tolas = 1 Seer
12 Seers = 1 Mercal
400 Mercals
or 38,400 Tolas = 1 Gauce
3200 Tolas = 1 Maund
384,000 Tolas = 120 Lbs or 1 Gauce.

8th Ramaimareddy alias Polireddy inhabitants
of Chennapully Pauleem a hamlet of Codoor
and 9th Amalooor Ramaimreddy an Inhabi-
-tant of Codoor in Nellore Talook &c—

The following is my Complaint
against the Defendants—

Fort St. George 20th January 1848

About 3 or 4 generations ago, my ancestor
came to Codoor in Nellore Talook to reside there and
through the assistance of the then Village authorities
procured a piece of land 3/4 Gorjoo in extent
bounded on the east by the Cumareddypary
garden on the South by the Goodoorpary
garden on the west by the wall of the Centre
lane and on the North by the Pedlumareddy-
pary garden— on about 1/16 Gorjoo of this land
they built houses and Connected the other
portion 5/16 Gorjoo into a backyard in which
they dug a well & planted fruit Trees
and Vegetables &c. for the use of the
family and enjoyed the Land as Surid
Enam— My grand father and father enjoyed
the land in the same manner after them the
land came to my possession but Canaleddy
Eshwareddy &c. Individuals by the as-
-sistance of some others having taken
possession of a part of the Compound and
built houses on a part of it and formed
a garden on a part praying sent for the same,
I brought a Suit No. 10 of 1828 against them
before this Zillah Court but as the decision
was against me I appealed against it in
appeal case No. 166 of the same year— The

Register

Register enquired into the case and reserving the original decision passed a decision in my favor which decision was carried into effect the land which the Defendants had taken possession of having been made over to me. The said Compound was always enjoyed by us as Sircar Enam - The land was never either during the Government of the late Wallajah nor under the management of Messrs. Travers, Fraser, Smalley, Thompson, Wilks and under Govr. Stanhope's premises to July 1249 after the Country had come under the Government of the Charitable Company assessed with sist and the amount Collected, neither is there any such account from the Commencement with the Circar nor was it ever entered in the Jamah account nor was any Patta or Dittum prepared for the same - we Cultivated the land and enjoyed it without paying sist - While so I Cultivated the land in July 1250 with Vegetables and the Village Curnum the 3d and 5th Defendants and the father of the 4th Defendant who were not in good terms with me assessed the land with sist which was long under our enjoyment as Police Peons - I represented the matter to the

Sheristadar

Sheristadar during the settlement and he desired me to present the decision which was passed in the case of the 6th Defendant Pigeon Bringal plants on 1/4 Garden of the land in July 1252 the 3rd and 5th Defendants and the father of the 4th Defendant measured the land and brought it to account on which I presented an arzee to Govr. Stanhope and the 4th April 1843 enclosing therein a Copy of the decree alluded to above but that Gentleman without enquiring into the Grievance endorsed the arzee to the effect that the sist will not be remitted and returned the same. In July 1252 that garden was assessed as I cultivated a part of it - Excluding the portion that I had cultivated of the lands that were in my occupation the 3d 4th and 5th Defendants got the 8th Defendant to apply for the 1/4 garden of land in July 1256 and the 2d Defendant who is the Deputy Tahsildar of the Nellore Talook without enquiring at the time of preparing the Dittums into the Grievance which existed from a very long period, entered the 1/4 Garden which I have a right to in the Dittum of the 8th Defendant as this the 6th 7th 8th and 9th Defendants cultivated the land and enjoyed the produce, not only

Fort St. George 20th January 1848

only was a suit Contrary to Maamool as fee'd on the Compound Land which was in our possession from a very long period and the amount Collected but I have also been deprived of it and the land given to the 8th Defendant and I therefore bring this suit against these 3d 4th and 5th Defendants who are the cause of this act and against the 2d Defendant who entered the land in the Dittum of the 8th Defendant without enquiring into the Maamool and against the 1st Defendant in order to regain possession of the backyard garden which was possessed as a Sherangee and to have the suit that was fixed against Maamool to be taken off; as also to recover the produce of the previous years and the suit which was Collected against Maamool together with the land. The Defendants are answerable for the following sums Viz:-

Suit for fasly	1250	Collected from me	Rs.	7 3
Do.	Do.	1252	Do.	Do. 7 3
Do.	Do.	1255	Do.	Do. 1 7 7
Do.	Do.	1256	Do.	Do. 1 7 7

Amount for which the 1st Defdt is answerable Rs. 3-13-8

The other Defendants are answerable for Rs 10- the value of the produce derived from the ½ garden of land which was entered in the Dittum of the 6th Defendant and I therefore beg that the Court will pass a decision giving me these sums and the possession of the Sherangee Compound Land of 5/16 garden which is in the

Fort St. George 20th January 1848

within the boundaries above specified and disallowing the 1st Defendant from collecting the Suit against Maamool

(Signed) B. Venkatrau

(Signed) Gu A. Smith
Collector

No 3

To The Civil Court
in the Zillah of Nellore.

Answer of the 1st Defendant

Gu A. Smith Esqre Collector of the Zillah of Nellore in Cause No 4 of 1847 on the files of the Civil Court

The Complainant in his complaint urged against the 1st Defendant the Collector and some others states that in the village of Coston in Nellore Talook he has 3/16 Garden of Sherangee lands, that on 1/16 Garden of the said land he built houses, that on the other 5/16 Garden he planted fruit Trees and grew Vegetables and enjoyed them, that the land was from fasly 1250 included with the Circar lands, that the Suit on the lands should be discontinued and the lands granted to him as Sherangee, that the Suit of the land for fasleis 1250, 1252, 1255 and 1256 amounting to Rupees 3-13-8 that has been collected by the Circar Suits

he

be caused to be returned to him and that 3/8 Garton of the said Land having been entered in the Settlem of the 8th Defendant in fasly 1286 the value Rupees 10 of the produce of the land should be caused to be returned to him by the other Defendants.

2 In reply the Collecton begs to represent that there is no entry in the Cirkar accounts shewing that 3/8 Garton of land in the village of Colombo was granted as Lakharaujee either to the Ancestors of the Complainant or to the Complainant himself, neither has the Complainant presented any Document to prove what he has asserted Consequently the Complainant has no right to the Lands claimed by him.

3 The Complainant further states that the Land claimed by him is the backyard of his house The Land in question is an appendage of the Cacoo Lands and is not attached to Complainants House Complainants House stands on 1/2 Coontahs of Land and there are attached to it on the north side 2 1/2 Coontahs of Land for a backyard for Cattle &c and on the South side 2 1/2 Coontahs and on the East one Coontah for growing Vegetables for which he is not assessed being five Coontahs in excess of what he is entitled to by the Custom of the District as will be seen from and order issued by Mr. Smalley when Principal Collector on 3d January 1829.

4 On reference to the Plan Submitted it will be seen that the lands on the South and East

East of the land pay claim is also the land to the North with the exception of the Road and there is no ground for exempting Complainant and indeed it could not be done without altering the system of the District.

5 In regard to the circumstance which the Complainant states that there was a suit between him and another individual on account of the land and that the Decision was in his favour, the Collecton begs to remark that the Cirkar was no party concerned in the matter, Consequently the Decision passed in it can in no wise affect the right of the Cirkar to the Lands.

6 The Statement also of the Complainant that the land in dispute has been from a very long period in his possession is fully empowered by Section VIII Regn XXXI of 1802 to assume all Cirkar Lands which may be in the possession of any individual even so long or under any Circumstances whatever.

7 The Complainant presented a Petition to the Board of Revenue which was referred to the Collecton and he (Complainant) on the same subject presented a Petition to Mr. Bishop under date the 12th December 1842 upon which the following Endorsement was made on the 14th January 1843 "An enquiry being instituted on the subject of the Petition three the Inhabitants of Nellore et al pears that so long as it was not brought to the notice of the Cirkar no Assessment was imposed on the Cultivation carried on the backyards in their respective Villages but it was measured"

Fort St. George 20th January 1848.

"measured in 12th and one Chain Coontah being taken
"as is usual deducted for each family the usual Shist
"was charged on the rest, that the Cultivation of the
"Complainant in his backyard was also measured at
"the same time and taxed in like manner. The Cultiva-
"tor is therefore informed that no injustice was done to him
"Contrary to Mamool." His decision was never
appealed to the Board of Revenue.

---

8 It appears desirable to notice the following point with the view of Eliciting whether this Point has been rightly made in the bringing of this charge, it has been brought before the Civil Judge & not the Principal Sudr Ameen though Regulation XII of 1817 Section VIII has been repealed by sect VIII of 1843 Section V Collectors made amenable to the Sudr Ameins Courts by the same act in common with other Parties.

Anick

9 Since Mr. Bishop gave his orders to include the

by Plaintiff was recovered from him. The Plaintiff in his
Plaint averred that Rupees 1-7-7 were Collected from him
as Shist on his Cultivation in 1256 whilst in fact Rupees
1-14-2 were collected from him. He also urged to Non Payment

No. 4.

To, Chabook Anundarow
Tahsildar of
Cottah.

It is come to my knowledge that in many of the Villages in the said Talook the Ryots and Inamdars and the inhabitants occupy extensive Topes backyards and grow on them without paying any Shist to the Circar, Tobacco, Turmerick &c. Crops of a high Value. You are therefore directed to ascertain all those compounds in the different Villages the extent of which is above one Coontah on which Tobacco, Turmeric and Chilly Crops are grown, prepare the accounts thereof, fix the regulated Shist on those several Crops with reference to the Mamool of the Village and prepare a Villagewarry account for the same, further you will not only forward this account to me but collect the Shist arising therefrom from the different individuals and bring it to account under the head of excesses of Dowl. If the above said description of Crops are grown on lands that are less than one Coontah in extent or if Brinjals &c. Crops are grown on Lands, the extent of which is a little more or less than one Coontah, no Shist thereon should be collected 3d January 1829. Bootchereddy pollem.

Signed / G. A. Smeth
Collector

Fort St. George 20th January 1818

Ordered that the foregoing letter be submitted with the following address.

To The Offg Chief Secy to Government

(30-31)

To the Offg Chief Secy to Government

Submitting a letter from the Coll.r of Nellore reporting the institution of a Suit in the Civil Court against himself and others and recommending that the Collector be authorized to file it and conduct the suit at the public expence.- 21st Dec.r 1817 to 3rd Jan.y 1818

Sir,

1. I am directed by the Board of Revenue to request you will submit for the orders of the Most Noble the Governor in Council the accompanying letter from the Collector of Nellore reporting the institution of a Suit in the Civil Court at that station against himself and others by one Audemoorty and forwarding translated copy of the Plaint and draft of the Answer which he proposes to file in the case.-

2. The Plaint sets forth that a portion of Plaintiffs ancestral property being Lakherage lands was included in Coroo and made liable to Assessment and Rupees 3.13.8. levied thereon for the refund of which Amount the Plaintiff brings the present action and to establish his right to the land in dispute exempt from the future payment of sist he also further sues that the value of the produce of 1/4 Goonta of the said land which was included in the Dittam of the 8th Defendant in July 1956 may be caused to be returned to him by the other Defendants.

Fort St. George 20th January 1818.

3. The Collector in his proposed Answer states that there appears no entry in the accounts shewing that the land referred to in the Plaint was granted as Lakherage either to Plaintiff or to his ancestors. neither has the Plaintiff any documents to prove his assertion - Mr. Smith observes that there are no grounds for exempting Plaintiff from the payment of assessment, and that situated as he is he could not do so consistently with the existing rules and practice of the District - In regard to his alleged right to the land in virtue of a Decree of the Court the Collector observes that the Government was not concerned therein, and that the decision does not affect its interests in the matter - It is further stated that since the land was entered as liable to tax - /Coroo/ the sist due on that portion cultivated by Plaintiff has been recovered.

4. The Board have thought it proper to omit para 8 of the draft, and with this amendment they consider the proposed answer to constitute a sufficient

sufficient Defence. They therefore beg to re-
commend that the Collector be authorized
to file it and conduct the Suit at the public
expense.

Read the following letters.

To D. White Esqre
Acting Secretary to the
Board of Revenue.
Fort St. George.

Sir,

32

From the Agent Vice } 1. I have the honor to reply
at Kurnool } to the orders of your Board dated the 14th
Submitting the further particulars regarding a Cotton Cultivation called for in the Board's Proceedings dated 14th October 1847.
October last, requiring further particulars
of information respecting the cultivation of
Cotton in Kurnool.—

2. In my communication of the 4th October
last, I reported that the average quantity of Cotton which
it had been calculated was annually produced
on one Acre in this District, was 28 lbs. Adverting
to the Board's observations, I beg to mention
that

that the quantity in question had reference to
cleaned Cotton. The Average is exhibited at this
low figure owing to a considerable extent of soil of
very unproductive powers in 4 of the 8 Talooks of
the Agency, being planted with Cotton, the pro-
duce of which has materially affected what
would otherwise have been the average obtainable;
for, on further reference to the Statements which I
received from the several Amildars, I find
that the average outturn for a year of the clean-
ed Cotton Crops of the better descriptions of
grounds, varies very slightly from that which
according to the reports submitted to your
Board, appears to be realised from an Acre in
the Bellary and Cuddapah Districts.

Bellary — 62½
Cuddapah. 61½
Kurnool — 57

3. Adverting also to the quan-
tity of Cotton stated to be yielded by one
Acre of ground in the Madura Collectorate,
Viz. 223 lbs. I find on reference to the reports
before me that the average produce of uncleaned
Cotton would in this District be 228 lbs
on the best kind of soil. The several other
Statements made in my address were
based on the results of communications to
the local Amildars, who, I believe, exerted
themselves to ascertain from the Cotton
Cultivators

Cultivators of their respective Talooks, such a facts as seemed best calculated to supply the information respecting a 5 years average, for which the Board had called.—

4. I beg to add that from subsequent enquiry, I have ascertained that the average annual quantity of the best description of Cotton produced on an Acre of the best Soil, is Maunds 9 lbs 3; of Medium soil, Maunds 6 lbs 19¼;— of inferior soil Maunds 4 lbs 8½.—

5. It is acknowledged that there is a difference between the quality of the Cotton realised from the first, second and third pickings, but ultimately the three sorts are mixed up together, a preference being given by the Ryots to the Cotton of the 1st. picking when selecting what it may be necessary to retain for household purposes.— Occasionally in this District fourth and fifth pickings take place, which are disposed of without any reference to the more or less value of the Cotton thus obtained, the same price being secured for the later as for the earlier pickings.—

6. The residue left after the clearing of the three first mentioned pickings is considered to be one fourth, that of the occasional 4th.

4th. and 5th. pickings is less in quantity being only one sixth of the original Crop.—

As respects the facts regarding 7. cost and charges actually incurred on a quantity of Cotton in different localities, from which to deduce a calculation per lb;— I regret that in spite of my anxious desire to meet the Board's wishes on this point, I can satisfactorily depend. When asked to declare what are in truth and reality the several items of expenditure involved in bringing any given crop of Cotton to maturity from the time of first breaking ground, I find the Ryots questioned are either unable or unwilling to furnish credible particulars. The ground has been ploughed at intervals, not entirely with their own cattle; they have now and then had the assistance of their neighbour's bullocks; at other times they have received the aid of Ryots possessing Cattle available for hire, the payment of which is made, not in money, but by a share of the Gross produce, a part only of any one field is sown

sown with Cotton, a part is cultivated so with a different Crop, or if Cotton has been sown on the whole of any one field, something else has been grown there too; thus rendering it impossible to calculate with precision and certainty what has been the actual cost of preparing particular fields for the Cotton sowing. The same difficulties have attended my enquiries respecting the definite value of a Crop when arrived at maturity, and its eventual disposal to the Cotton buyer. For these reasons I have been compelled to abandon as a hopeless undertaking, the attempt to procure a Statement of facts on which to found the information for which your Board has called. My best attention has, however, been given to the matter and I beg to submit that from the most careful enquiries which it has been in my power to make, I consider it may safely be assumed that the cost and charges incurred in raising a ℔ of Cotton of the first sort, are one Anna; of those on Cotton of the second sort, two pice; and that inclusive of the Government demand, these charges will be respectively increased to Anna 1 pice 3/4 and Anna 1 pice 1/4.

8- The nearest port or place of export by sea

Cost per ℔
1st Sort 1 a. 3/4
2d Sort 1 a. 1/4

for Cotton grown in Kurnool would be Ramiapatam or there about in the Nellore District and the actual cost of transit by a bandy carrying 40 ℔ a bullock 8 Maunds of Cotton conveyed direct to that Coast, would be 2 1/2 pice per ℔.

Charge of transport to Coast by Bandy 2 1/4 —
Do. do. Bullock 2 3/4 —

9- It however, the conveyance of Cotton from this province by the most direct road to the Coast would involve the necessity of transporting it along a difficult 20 Miles of Ghaut in the range of Hills which divides the North Eastern portion of Kurnool from part of Cuddapah, I do not consider it probable that that line of transport will be generally adopted unless the Ghaut be made passable for Bullock bandies, and until so important an improvement is effected the present system of transmitting Kurnool Cotton produce to Cuddapah, whence it finds its way to Madras, will doubtless be continued.

10- The central part of this District is about 287 Miles distant from Madras to which the cost of transit per ℔ would be 1 pice.

11- In the absence of a distinct and recognized classification of soils under a regular Survey and assessment I regret my inability to state the amount of Government demand leviable on the different descriptions of Cotton ground and the probable extent of land of each description under cultivation; but for your Board's information I beg to annex a Statement shewing for Fasly 1256, the quantity of land on which Cotton was grown in this collectorate during that period, the sum total of the assessment realised thereon and certain deductions from those data which your Board may perhaps desire to have under view in a concise form.

33

From the Collr. of Tanjore

Reporting further particulars on the cultivation &ca. of Cotton.

Sir,

I have the honor to acknowledge the receipt of Extract from the Proceedings of the Board under date the 14th. October, calling for further particulars regarding the cultivation &ca. of Cotton in this district.—

The entries in the Statement forwarded with my Letter of the 2d. September, refer throughout to "cleaned Cotton," which as bears to the uncleaned, the proportion of 1 to 4 in value. The growth of Cotton in Tanjore, as I have before remarked, is for home consumption only, the produce being expended in the threads of sorts, lamp wicks, &ca. and as that superiority of quality, which alone would make articles saleable in a foreign market, is not aimed at by the growers for home consumption, but little pains are taken in the growth or cleaning of the Cotton. To obtain the information required by the Board all the chief growers of Cotton were

called

Fort St. George 20th. January 1818.

called on from 12 different Talooks and the result was that entered in my former Statement; tho' from the little importance the cultivators attach to the cultivation in general, it was difficult to obtain satisfactory replies to the questions asked. As regards the mixture of the pickings, little or no attention appears to have been made to keep them separate, tho' the first picking is described as the main one, a second being very inferior, and a third not worth attention. In many instances Cotton and other dry grains are sown together, when the former is only half attended to, and when mixed with other Cotton, renders the whole of less value. The marginal Statement gives the extent of the different sorts of land under cultivation, their produce, and the assessment on the same,

Cotton land	Extent in acres	Produce per acre in Pounds		Assessment per acre in Rupees.
		Cleaned	Uncleaned	
Best land	327	60	240	3
Medium	3225	50	200	2
Inferior	2142	30	120	1
Total	5694	"	"	"

while the Statement formerly submitted, shews the particulars of prices, Cost of Carriage, &ca. obtained from the Cultivators themselves, the correctness of which a subsequent enquiry has

has confirmed. I have therefore not for=
=warded a separate Statement on these
points.-

(34)

Sir,

From the Collr of Tinnevelly, Para 1.
34 Submitting as called for in the Boards Proceedings of 14th Octr last a fresh return shewing the result of subsequent enquiries made regarding the cost of production and other particulars of information concerning cotton.-

With reference to the observations contained in the Extract from the Proceedings of the Board of Revenue under date the 14th October last, I have the honor to forward a fresh Return showing in immediate connection with that exhibited in the former, the result of my subsequent enquiries regarding the cost of production, and other particulars of information concerning cotton.-

2- I beg leave also to send the accompanying letter from Mr. P. J. Finnce American Cotton Planter in this District, shewing forcibly the difficulties that are met with in

obtaining accurate information of this kind from the Natives of this country. My own impression is that every time an enquiry were made a different result would be obtained, and that if not checked by some previous knowledge it might lead to the most erroneous results.-

The data on which the present return is founded is enquiries made at the Moozzur from certain selected cotton growing Ryots of several different Talooks where the article is produced, rejecting information which was manifestly wrong. The chief value I put upon it is the approximation to the truth, which appears from concurrent testimony to have been obtained, in this point

of

Fort St. George 20th January 1848.

To

F. B. Elton Esqre

Acting Collector

Tinnevelly.

Sir,

I have the honor to acknowledge the receipt of your letter No 1096 enclosing an Extract from the Proceedings of the Board of Revenue, requesting me to afford you such information as I can "on accurate data". The little I can give you from my own knowledge of the subject I will vouch for.—

2. I have been in the habit of trying to collect the precise "facts" which would afford the desired information and I can bear testimony to one "fact" which is that but little reliance is to be placed in any facts relating to land established by these people. The impossibility of arriving at any accurate data as to the actual produce and actual cost of cultivating any given quantity of land is an established fact in my mind after the most patient investigation. I have had Statements of the cost of culture and value of product put down accurately according to the details.

Fort St. George 20th January 1848.

details afforded by intelligent ryots and when the Dr & Cr side was compared, the ryot was found to be a loser by a few Rupees. On the absurdity would Statement being pointed out they would acknowledge that they made a profit of 8 right Annas or 11 one Rupee or to give pleasure to the enquiring pow: ly they often acknowledge whatever they think we wish confirmed.

3. In estimating the cost of the cultivation of any thing in this country it must be borne in mind that the poor ryot and his family do the work themselves and it costs them nothing and they sell at a profit the grass they gather while working the crop. The richer ryot who does not work himself has numerous dependents who he merely feeds a little and all grass that is gathered from the field during the cultivation goes to the bazar or is consumed by his own cattle, the labour costs him but little but in estimating it to us he puts down each man at what we would have to give him, which leads to an erroneous estimate of the cost to the Ryot and a ruinous one to any European who undertakes to cultivate the land. I hope you will be more fortunate in your enquiries than I have ever been during seven years investigation.

To

Fort St. George 20th January 1848.

4.

To enable me "to compare the a
produce of the best with the medium and
inferior Soils." I have no data and could
not rely on any we can procure from what
-ever source. "The quantity that remains
after cleaning" I have got data from ma
-ny different places and people and a
the people could not deceive me much in
that respect it may be relied on as pret
accurate. The Churka gives 25 per cen
of Cotton. The Gin 22 per cent. The
latter consequently 3 per cent the clea
-est. "Whether there is any difference
between the first, Second and third
pickings, and whether they are kept
distinct or mixed together." The very
first gathering consists of the few
first pods that open and is usually
worm eaten, and consequently inferior
all subsequent gatherings are naturally
good, until the gleanings are gathered
when that too is inferior in quality from
having been produced without rain.
Ryots are particular in classifying
Cotton, still the best has a good
deal of dirt in it, and the Bro

J. C. Livingston

Fort St. George 20th January 1848.

buy at a price varying according to quality
but they buy up all qualities, and absolutely
separate the rotton locks and much of the trash
from the Seed Cotton, and then separate the Seed
from the really good article, and after beating
the bad rotton stuff with a stone to loosen it on
the seed the Seed and the fibre of that are also
separated, and if they would only stop here and
let us have both separate we might have a large
quantity of really good Cotton, but that does not
suit the Broker, who has been screwed to the
lowest notch by the Chitty, and the consequence
is he must go to the trouble of mixing the bad and
the good articles together, and give it all sorts
of "Devils Dust" to realize his profit. The
Chitty knowing the European agents must
take whatever he chooses to give them, of course
winks at the Brokers' transaction and still
there is a cry of a want of good Cotton from
India. Now if the people in England are
disposed to pay a price for Indian Cotton in
proportion to the quality when compared with
the american, they can get plenty of it, but
to expect an improved quality at a reduced
rate merely because it is produced by free
Ryots so completely changes the mercantile
system as to make it an anomaly. The remedy
is in the hands of the Merchants.

5.

The cost of a Candy 500 lbs
of

of Cotton varies in all parts of the Country from Rupees 40 to 60 according to quality and the demand for the article, (the carriage on a common article cost just as much as on the first quality) a Bandy will carry (1 3/4) one and three fourth Candies, and Costs Annas (8) eight for (10) ten Miles which would give an average of annas 4-6-86 for the conveyance of one Candy the distance of (10) ten Miles.-

6- I believe I have remarked on each subject embraced by the Board's letter that comes within my province - I have given such information as I have to offer, I hope it may be useful -

Camp, Courtallum
30th October 1847.-

Cotton Planter.

To D. White Esqre
Acting Secretary to the
Board of Revenue.

35

Sir,

From the Pl. Collr. of Coimbatore ---

Forwards 2 Statements, and affords detailed information regarding the growth of Cotton, Cost of its production and net profit, called for by the Board under date the 14th October 1847.

1. I have the honor to acknowledge the receipt of Extract from the Proceedings of the Board of Revenue dated the 14th October 1847 and also your subsequent communication of the 23d Ultimo requiring information relative to the Cost and profits of the Cotton Cultivation in this District.-

II Adverting to Para 2 I would remark that the entry of produce for an acre

acre of land in the Statement forwarded with my letter of the 21st September last No. 74 referred to clean Cotton and not seed Cotton as will be observed from the pending of the said Statement.-

III The Cost and profits exhibited previously were deduced from actual facts, and not calculated upon an estimate as the Board are led to believe, but these particulars affected merely the lands of

No. 1 Superior description - the Memorandum now transmitted shews also similar details with reference to lands of Medium and inferior quality.-

IV It will be observed that the profits of the Ryots on land of a Medium quality is less by nearly one third than derived from a superior description of soil, and that moreover the cultivation of Cotton on inferior lands renders the grower liable to the loss of 1/16 of a pie per lb but in order to make matters safe, the Ryots generally mix the Cotton seed with three or four other kinds of Grain, which unitedly make a very profitable return although the Cotton is prejudiced in colour and quantity thereby

The

V. The produce is gathered once in the year that is in the Months of February and March, but when the Season is favorable the plants yield a second produce. It is not usual to keep these pickings separately in fact the Houses and Store rooms of the Cultivator are far too limited to admit of such an arrangement. The proportion of clean Cotton to that with seed is calculated at 1 to 4¼ Viz^t. the seed amounting to 3¼ and the lint to 1 in the aggregate quantity.

VI The chief causes which affect the cleanliness of the Cotton, and thereby reduce its value, are 1st. the defective Native mode of ginning with the Ratnum, and the indifference regarding the mixture of unclean Cotton with the clean. the former has in a great measure, been remedied by the Establishment of the Gin Machinery at Coimbatoor and it is probable that in course of time, the latter slovenly mode of procedure will be improved.

VII With reference to the cost of transit, I have to observe that information on this point was obtained from Merchants. The Ryots sell their Cotton either in their Villages or at the weekly Markets. but Coimbatoor under

under existing circumstances appear the centre of attraction in consequence of the vast transactions that are carried on for Government in this staple on the part of the Superintendent of the Experimental Farms, and they are in consequence unable to give any satisfactory explanation in reference to this item. The nearest port of Shipment is Ponaney and all goods whether Cotton, Tobacco or other staple produce of the District are conveyed thither on Carts and not on Bullocks.

VIII It is not usual in this District to appropriate any particular description of soil to the growth of Cotton. It is cultivated by the Ryot on such land as suits his convenience, and under this circumstance, it is difficult to afford the information required in the concluding part of para 3 of the Board's Proceedings now under acknowledgment. the average assessment on a Bullah of Cotton land, however, amounts to Rupees 5-14-0

Rs. a-p 1-8-8 per acre

IX The Statement now submitted has been framed with reference to the accounts received from different Taloks which will be

Read again the following

7th Novr in Cons 13th Dec: 1847 — letter from the Collector of Chingleput reporting on the outturn of the Minor Estate of Vullacottah for Fusly 1256.—

Here enter No. 158.—

37

Proceedings Relative to the outturn of the Minor Estate of Vullacottah in the District of Chingleput under manage=ment of the Court of Wards in Fusly 1256.

thereon. + 34 / The early part of the season under review was not favorable, and during the heavy rains and Storms — which occurred in the Months of October and November 1847. the bunds of Tanks in three different Villages of this Estate were breached, and although temporary repairs were im=mediately made, the supply of water retained was insufficient for the cultivation of the whole extent of the lands dependent upon them - The Cultivation however amounted to 257. Cawnies of Nunjah and 344 Cawnies of Poonjah exceeding that of the preceding Fusly by Cawnies 54 in the former and 85 C in the latter, but differing from 1254 Fusly by a decrease of 145 Cawnies in Nunjah and an increase of 121 C in Poonjah - The average produce was also much higher than that of Fusly 1255: and nearly equalled that of Fusly 1254.

Fort St. George 20th January 1848.

1254. Notwithstanding the price of Grain was lower than in the preceding year the Collector states that had not the cultivation been impeded by the damage done to the Tanks the Revenue would probably have exceeded the Settlement of Fusly 1254 which is considered to have been the most favorable season as regards the Estate of Vullacottah since it has been placed under the Management of the Court of Wards.—

2 The Court observe with satisfaction the improvement that has taken place in the Revenue of this property during the past year amounting to Rupees 2,596-9-2, which sum exceeded the Gross receipts for the Fusly preceding by Rupees 1221-4-3-

3. The Statement B which accom=panies the Collectors' letter does not afford the requisite details of the Settlement - It is observed that the total Collections from the 11th November in Fusly 1256 to 31st October in Fusly 1257 amounted to Rupees 2,306-1-4- but it is not explained what amount was realized within the former Fusly and what subsequently - Of this sum Rupees 463-14- were expended on account of Sibbendy Charges, Maramut expenses, and maintenance of the Minor proprietor, leaving Rupees 1,842-3-4 to meet the fixed Government demand of Rupees 2,422-9-6.

1254.-

Fort St.e George 20th January 1848.-

1254. Notwithstanding the price of Grain was lower than in the preceding year the Collector states that had not the cultivation been impeded by the damage done to the Tanks the Revenue would probably have exceeded the settlement of Fusly 1254 which is considered to have been the most favorable season as regards the Estate of Vallacottah since it has been placed under the Management of the Court of Wards.-

2 The Court observe with satisfaction the improvement that has taken place in the Revenue of this property during the past year amounting to Rupees 2,596-9-2, which sum exceeded the Gross receipts for the Fusly preceding by Rupees 1221-4-3.-

3. The Statement B which accom=panies the Collectors' letter does not afford the requisite details of the Settlement.- It is observed that the total Collections from the 11th November in Fusly 1256 to 31st October in Fusly 1257 amounted to Rupees 2,306-1-4- but it is not explained what amount was realized within the former Fusly and what subsequently.- Of this sum Rupees 463-14-- were expended on account of Sibbendy Charges, Maramut expenses, and maintenance of the Minor proprietor, leaving Rupees 1,842-3-4 to meet the fixed Government demand of Rupees 2,422-9-6.-

From

Fort St. George 20th January 184

From the entry in Column 14 Statement B ther
appears to be a balance of Peishcush due on this Est
in each year from Fusby 1251 downwards with t
exception of Fusly 1254, amounting in the aggreg
to Rupees 3,331-2-10 The Court would be glad t
receive some further information on this poi
and request the Collector will state whether by
different system of management the charges n
present debited to the Estate may not be reduce

4. The Court request that the Colle
will be pleased to submit with his future repo
on the Settlement, three distinct Statements i
the prescribed form in lieu of Statements B, Viz.
1. Demand Collection and Balance of Revenue.
2. Ditto Ditto Ditto of Peishcush.
3. Account Current of Receipts Disbursement &
and for the sake of comparison it is desirable that
these Statements should commence and end with t
Fasly, broken periods being avoided.—

5. In Para 3 it is stated that the outstanding ba
Rupees 290-7-10 will be realized in a few days, this balance
appears in Col 15 of Statement B against the Ryots for Fasly
1256, but it is not stated whether it comprizes money ad
-ment or the value of Grain Stored. The same Remark is
applicable to the balances of Fasslies 1253. and 1254.—

Ordered that a copy of the foregoing Extract
from the Court's Proceedings be submitted to Government and a transc
of the same be forwarded to the Collector of Chingleput f
his information and guedance.—

Read the following letter.—

To, D. White Esqre
Acting Secretary to the
Board of Revenue
Fort St. George—

38

Sir,

From the Collr of North Arcot — Para 1. I have the honor to report
the decease of the Poligar of Congoondy and to
request the Board's orders regarding the disposal
of the Estate. The Poligar has left two Sons the
elder of whom Soobba Rajoo Naidoo is understood
to be about 20 years old and capable of under-
taking the Management of the Pollam.—

This Estate was ceded to the
British Government by the Sultan of Mysore
in 1792 and on being surveyed in Fusly 1205 the
total value was Estimated by Captain Graham
at Pagodas 46,684-28-22. of which the Lands
and other revenues then held by the Poligar
amounted to Pagodas 16,311-39-54 charged with
a Peishcash of Pagodas 6,780-40-1. the differ-
-ence being allotted for the support of a large
Establishment of Military Peons and other Enamdar
which it was proposed by the Board
should be reduced and a proportionate addition be made to the
Peishcush.—

It

From the Collr of North Arcot
Reports the decease of the Poligar of Congoondy and that his Elder Son Soobba Rajoo Naidoo is about 20 years old and capable of undertaking the Management of the Pollam and requests the Board's orders regarding the disposal of the Estate under the circumstances set forth.—

Board's Proceedings
16th November 1815
Para 6.
8th March 1819.

4th April 1800

*The copy of the report is not to be found in the Offices.
2d Sept. 1830 Para 3

3 It has been admitted since that in this Estimate the value of the Estate was considerably over-rated. It appears from Colonel Reids Report on the Original Settlement of the Baramall as quoted* in the Board's Proceedings that finding the proportion which the tribute should bear to the Revenue no where prescribed, he had "determined "it by a comparison of the Collections made by "Tippoo's Amildars by taking the average proportion of their former tributes to those Collections" which "was 64 per Cent but as the Districts had suffered "much from depredations he "reduced it to 60 "per Cent and having Established that as a pre-"cedent," he "afterwards determined the amount of "the Congoondy tribute upon the same rule" and "the rental amounting to Chackrums 13350" or "Pagodas 11125. The tribute was settled accordingly at the above sum of Pagodas 6,781-6-70 subsequently the Sayer duties valued at Pagodas 524-44-69 per annum were withdrawn and have been until their abolition in March 1845 collected on account of Government.

4 It has been proposed on several occasions that the Estate should be settled in

in perpetuity under a Sunnud i Milikeat Istemarar but such a form of Settlement has never been granted to the Poligars of this District and the measure has not hetherto been carried out.

Boards Proceedings 8th March 1819.

5 It does not appear whether any and what changes may have been made in regard to the Enams previous to the Survey in Fasly 1205 but it was observed in 1824 in making over the Estate to the late Poligar that since the Survey one third of the Enam Villages had been irregularly resumed by him while others had been conferred to not quite half the same amount making thus a net addition to his Revenue of Pagodas 6131-6-72 and raising it to Pagodas 19614-23-41.

Boards letter to the Chief Secretary 5th January 1824 Para 5-6.

6 It will be seen by the Statement now submitted that a further resumption has been since made by the late Poligar of Enam Villages yielding a Revenue of Rupees 2,†113-14-11 and in Enam lands

†Colr 1389 in the Statement.

to

* Colr 20 in the Statement

to the extent of * 148-4-- or as the Poligar's Accountant States the Villages were resigned by the Enamdars on account of the Sodee fixed thereon being equal to or in excess of the full value of the revenues. From the Statement now submitted it will be seen that the revenues of the Zemindary for the last ten years are stated to have averaged Rups

Colr 36 in the Statement

† 47878---4 including those allotted for the pay-ment of the Poligars Servants and Subsis-tence of certain Members of the family.-

7 When the Estate was ceded a promise would appear to have been made to the then Poligar that he should be per-mitted to hold it on the same terms as be-fore, but the former Poligar would appear from Colonel Reid's Report to have held the Estate merely at the pleasure of the Mysore Sultan. It does not appear that he held any Sunnad or that any stipulations had been entered into with him regarding the terms of his tenure and in any case he could

could have no right to the Enams or any other Revenues which were not included in the calculation upon which the Peishcush of his Estate was fixed by Colonel Reid in 1792.-

8. The abolition of the Sayer duties and the extension of the Sugar Cultivation in con-sequence in the Pollems has benefitted the reve-nue as much perhaps more, than if the duties had been restored to the Poligar. His Accountant states that the reason of greater improvement not being shewn in the Collections in consequence arises from the greater part of the Pollems being let by the late Poligar on a lease of ten years which will expire with the Current Fusly. The Statement it will be observed now submitted is taken from the Accounts furnish-ed by the Poligars Simpretty and it may be ques-tioned whether they shew accurately the full par-ticulars of the value of the Estate.-

9 It will be for the Boards consideration whether the Motorpha tax should be continued in the Poligars hands and if it be intended to extend the revisions lately ordered

ordered of the grants of Enam lands as lapses occur, to the Pollam it would be desirable that some arrangement should be entered into with the Poligar for the Collection of the Revenues of such as may be resumed. There would not be the same difficulty in making arrangements for the Collection of the revenue of Enam Villages but where a Jodee is payable to the Poligar it will be necessary on resuming any of them to allow him a proportionable abatement of his Peishcush. The late Poligar was very anxious to be permitted to make a further resumption of Enams

to which of course I could not consent any such Proceedings being strictly prohibited by the orders of Government.

To the Board 19th March 1824

North Arcot,
Collector's Cutcherry,
Chittoor 15th November 1847.

Signed E.C. Lovell
Acting Collector

Order thereon

38-39

Fort St George, 20th January 1848.

Ordered to be sent again in circulation -

Read the following letters -

To D White Esqre
Acting Secretary to the
Board of Revenue
Fort St George -

40

From the Collr of Salem - - -

Sir,

Para.

Referring to Extract from the proceedings of the Board dated 11th January 1847 I have now the honor to submit for their consideration a report from the Sub Collector relative to the proposed reduction of the assessment of the Nunjah lands from the Edumbuncolum tank in the Talook of Paramutty comprising his sentiments in reply to the comprehensive questions of the Board as to whether the as also comprising his sentiments in reply to the comprehensive questions of the Board as to whether the reversion of the assessment should not be extended -

Mr Mallby has reverted to the recorded opinions of the Officers who conducted the Original survey that it was never contemplated by them that the Minute details of the survey assessment should be adhered to but that on the contrary they considered the very standard of the assessment was higher than that under which any country could flourish, and undoubtedly it was the opinion of Colonel Reade, Captains Munro and Graham that the assessment of Captain MacLeods division was a great deal too high, at least 30 per Cent higher than the rest of the District. The strongest proof of which is the early

Submits for the consideration of the Board with reference to Extract from their proceedings dated 11th January 1847 a report from the Sub Collr relative to the proposed reduction of the assessment of the Nunjah lands from the Edumbuncolum tank in the Paramutty Talook -

Fort St George. 20th January 1848.

early lapse of the Mootahs in his Division, and the present contrast of the relative State of the Barahmahl and the Southern Talooks. The accounts now prepared shew forcibly the evil bad effects of the high assessment in that Division in driving cultivation from the better to inferior soils, and the great extent of land first taken into cultivation, naturally supposed to be the best, left waste. Tho' I doubt whether the result may not be assigned to the bad effects of the Cowle system which for some time prevailed and the over assessment of Cowles as recorded by the Board in their proceedings dated 23rd March 1843.† Still the fact of 30,212 acres held on Cowle and now reverted to full assessment being left waste is a strong proof that the assessment is Excessive. It is true that only the lands under cultivation at the time of the Peymash were assessed in Macleod's Division and the remaining lands left to be assessed at an average rate, hence the great inequalities of the assessment and undoubtedly other causes may have led to this result in the fluctuation of seasons, and value of agricultural produce, but all which would have affected the whole District in the same ratio. so that I think there can be no doubt the real cause may be traced to the salooks

† Boards Proceedings 17th April 1843

Annual Report for Fasly 1229. 3rd August 1820.

118. Fort St George. 20th January 1848.

value imparted to land in the superior Talooks from the easy assessment and contrasting the flourishing state of cultivation in the Nanneil and Paramutty Talooks in which the reductions were effected by Mr Hargrave, the beneficial effects of lowering the assessment are obvious. It may be true as recorded by the Board† that the details of Mr Hargrave's proceedings were objectionable and Mr Cockburn denied the necessity of them, but the mischief and magnitude of abuse in the Cowle system introduced by him into the District with the object of obviating the defects and inequalities of the survey assessment the Board have admitted: and I think the good effects of the reductions made by Mr Hargrave are now forcibly shewn in the abundant cultivation in the Villages to which it extended as particularly alluded to in Paras 40-41 & 42 of Mr Maltby's able report.

3. Mr Orr forcibly urged the necessity of a reduction of rates in the Macleod Division, and he and Mr Gleig were of the same opinion as to the inadequacy and mischief of the remedy of the Monaseil Cowles, while the indiscriminate relinquishment of land was unrestricted.

4. The relinquishment of land which did not prove remunerative has been the system of the District from the Commencement of our rule

Fort St George, 20th January 1848.

rule, and I suppose it was in consideration of this liberty that the proposed reduction of Colonel Reade and Captain Munro equivalent to 25 per Cent. on the Original Assessment was not made, but now as by the new Rookoom-namah, the restriction is peculiarly stringent the necessity of the reduction is more obvious.

5. Mr Maltby has cited numerous instances which have come under his special observation to illustrate the benefits that the Ryots and Government would derive from the reductions he proposes, and I think his argument is sound and convincing by which he arrives at the conclusion that the only effectual remedy for over Assessment is the reduction of it, and now that the Layer and inland transit duties have been abolished, and the Government Revenue mainly depends on the land tax, every measure should be adopted to remove all restrictions calculated to check the cultivation of the soil and dimish the value of its products and to adopt those likely to stimulate its expansion.

Paras 13 to 14.

6. From the Canvey river we have at command the means of increasing cultivation considerably, if the Channels are in proper repair and extended and I particularly refer the Board to Para 12 of the Sub Collectors Report

Fort St George, 20th January 1848.

to convince them that the Ryots are inclined to extend their cultivation if the Assessment is reduced.

7. The Board have hitherto adhered to an opposite opinion to that of the Local revenue Officers in their views of altering the rates of Assessment, but I hope they will now view the subject in another light, and calculating the loss of Revenue the Government has already sustained from the system which has obtained that they will sanction the revision proposed by the Sub Collector, from which in a few years if carried out extensively, a considerable number of broad acres of fine arable land hitherto comparatively waste will be brought into luxuriant cultivation and the Revenue proportionately enhanced.

8. I don't think there is reason to apprehend any immediate falling off in Revenue if Mr Maltby's proposition is sanctioned, there is no doubt a few of the community who have other occupations and are at present liable to Motorpha tax will be relieved from it on taking up small holdings, but the lands in the Northern Talooks are so easily assessed that offenders would only be received by Ryots of the Villages adjacent to the lands lying waste from its being unprofitable to cultivate them, and who now make their livelihood by cooly labour, as Ryotwarie to the Moottahdars, or other means.

9. Perhaps in the first instance it

it will be advisable to authorise the proposed reductions to be carried out under the Edumbencolum tanks only; and all offers submitted for the Board's approval before sanctioning an extension of the principle.

10. Did I differ in opinion from Mr Watts as to the policy of his proposition I should consider it my duty to enlarge on the subject and detail my reasons for doing so, but as it has my sincere concurrence, it would only be tedious to continue letter to a greater length. His replies to the seven questions put by the Board, and the accounts which accompany them afford the information they require as far as it is practicable to obtain; and his method by which he proposes to carry into effect his revision of assessment appears practical, and not likely to disturb the existing settlement generally. The Sub Collectors present establishment will be sufficient to undertake the revision of the lands under the Edumbencolum tanks: but if it is at the same time to be extended over the Macleod division it will perhaps be necessary to sanction a temporary increase to his Establishment: and also to relieve Mr Macleod from some portion of his other duties.

Paras 29 to 35.

Salem Zillah Cutcherry,
Collector's Cutcherry,
8th November 1847.

Signed / W. C. Lockhart
Coll. &c.

4

To

W. C. Lockhart Esqre.
Collector of
Salem.

Sir,

I have the honor to acknowledge your letter of the 29th ult. of one from the Secretary to the Board of Revenue, on the subject of the lands of the Village of Edumbencolum in the Talook of Paramutty, with reference to the reduction of assessment proposed in my letter of the 25th September 1846.—

2. I have the honor to annex the accounts required by the Board, as far as it is in my power to prepare them, and I shall proceed to afford, as far as my means will admit the further information which the Board require.—

3. But on the 5th and 9th Paras of their Proceedings the Board requires information which in fact implies a general review of

Fort

of the state of nearly the whole
of the Division under my charge.
In the 8th Para it is required
"whether the Survey rates of Teervah
"on the dry and Garden land no
"less than the Nunjah, appear
"to be excessive and if so what
"reduction should be effected and
"on what principles it should be
"based", and in the 9th Para the
enquiry is extended to the 61 Mootahs
comprised in Mr. Hargrave's report.
4- I shall endeavour to lay
clearly before you the opinion which I have
formed during the two settlements which I have
now conducted in the course of which the subject
has occupied much of my attention. I shall not
attempt to enter much into detail, for I consider
that the report which you lately furnished to
the Board on the state of the lapsed Mootahs,
of which you were so good as to
furnish me with a copy, super-
-sedes the necessity of my doing so,
I shall rather endeavour to state
the leading facts which have attracted
my attention and the principles which I think
ought

ought to guide us in our attempts to
improve the conditions of the people
and extend the cultivation of the
Country. If in doing so I have arrived
at conclusions differing from those
of the Board of Revenue, I shall not
hesitate to state that such is the case,
feeling sure that the Board will
wish for the candid opinion of every
local Officer.-

I shall first
endeavour to exhibit by the following
table the present state of cultiva-
-tion in the four Talloks which
form my division.-

Total

6- I think no person can look over these tables, and fail to receive the impression that causes of a most powerful nature must have been in operation to counteract the natural effects of more than half a century of peace and to depress the agriculture of the Country to its present low standard - Taking the Talook of Shenkerydroog as an example, of 98,387 acres which have at one time or other been under the plough, only 48,710 acres are now cultivated, 49,676 are waste something approaching to the same proportion prevails in the other Talooks.-

7- To assign this effect to any single cause would, I believe, be erroneous; but I believe that it must in a very great measure be attributed to the heavy pressure of our Revenue System. The object of the survey and our

H.R.S.

assessment

assessment was admirable. It was to determine the boundaries of each portion of land and by fixing the assessment upon it, to leave it in the gradual course of improvement and extension of cultivation, to become saleable property. The success of the measure depended entirely upon the fact that so low a Standard was taken as should ensure to the Ryot a remunerating return and it was the constantly repeated remark of one of the principal authors of the survey, that the Survey should not be considered complete until this fact was put beyond a doubt. It would be easy to multiply quotations to this effect. In a letter written in 1792. Captain Munro observed "I have no apprehension that leases will accumulate when the lands are not overrated where there is any suspicion of their being so a reduction should be made before the final settlement."

"The Ryots cannot become rich all on a sudden there is no remedy for their present poverty but time and persevering patiently in assessing them moderately for a long series of years."

"If the inhabitants are not allured

"allured by the prospect of getting waste on favour-
"able terms they can have no other motive for giving
"up their arable lands, unless that of their being
"overvalued, when this is the case they ought to be lowered

8 I quote these remarks in proof that the ablest of the authors of the Survey contemplated that in such a work many imperfections would be found that it was not anticipated that it would be adhered to in its minutest details, on the contrary that it was anticipated that occasional corrections would be found indispensable. I would add that farther than this Sir Thomas Munro seems to have been strongly of opinion that the very standard of assessment was higher than that under which any Country could flourish. "The rents "there as I believe in every other part of India "are too high. This circumstance joined to the "general poverty of the people is a great obsta-"cle to every kind of improvement and it has "prevented the Lease from being settled. Govern-"ment has desired it to be made so as to set light "on the inhabitants, but they were not aware that "in order to this effect they must relinquish twenty "or twenty five per Cent of the present revenue

This

"This reduction will be recommended to them "by every argument that can be thought of, "but I am not sure that they will have re-"solution enough to agree to it."

9. The same was the opinion of Lieu-
tenant Colonel Reade. In speaking of the proposed lease Colonel Reade observes. "It is found that the settlement in lease so far from being advantageous that generally they do not desire to hold them in lease the greatest proof that can be given of their lands being generally so high that any throwing up some or all of their fields and renders the lease burdensome in place of being beneficial to them. Nevertheless propos-ing to demand the ground rent until a general remission should be ordered. I resolved "by—

10. I believe that if the subsequent history of the district be considered with refer-ence to these remarks, it will be found that the survey assessment in its minute details has been adhered to with very destructive results. I think it will appear that the industry of the Cultiva-tors has been checked, that it has in many in-stances been driven from the better to the inferior lands, and that a check has been put upon that

improvement

Fort St. George 20th. January 1848.

improvement which must otherwise have followed 55 years of peace. many circumstances have concurred to depress the cultivator. I believe that the extension of cultivation throughout lower India has considerably reduced the value of agricultural produce. The withdrawal of our Garrisons has also contributed to this effect and diminished the currency of the Country and a constant drain of specie has been going on. During the whole of this time the high rate of assessment has prevented the only available remedy, the extension of cultivation. Through all these changes the assessment has been retained at its original high standard, that is, has been virtually raised.

11. It appears from the above extracts and other records that at one time it was proposed to reduce the assessment 25 per Cent. This measure was never carried out. On the formation of the Mootahs the permanent assessment was fixed at something below the Pymash assessment, but still the Mootahdars failed. This I am aware was owing to other causes than high assessment in many instances, but on the lapse of the Mootahs the Pymash assessment revived

Fort St. George 20th. January 1848.

revived. In 1818. in considering the state of the lapsed Mootahs Mr. Hargrave proposed a general reduction, but though the lapse of the Mootahs afforded some proof of over assessment and Mr. Hargraves' Accounts went to prove how disproportioned the rates were to the then value of agricultural produce, this measure was dropped. Mr. Cockburn subsequently amended the assessment on some fields by giving them on Pymash Cowle, but these have been ordered to be observed. The original assessment now remains unmodified except that the liberty of throwing up lands which the Ryot does not require (a privilege which Sir Thomas Munro considered equal to 10 per Cent) is now considerably curtailed.

12 I have said that the pressure of the assessment appears to have driven Cultivation from the better to the inferior Soil. This I think is clearly proved by the above accounts. They shew that 159456 acres were under cultivation during the progress of the assessment. that is, during the five first years of our Government. It is naturally to be supposed that the land first taken into Cultivation was the superior land. But

if

of this 62,742 Acres are now waste. I think therefore that it is clear that the heavy assessment placed upon these lands has been a great (and I believe a principal) cause of this fluctuation — It may be said that this may have arisen as much from the easy terms upon which the poorer lands were afterwards given as from over assessment of the better lands. This is still an admission that there is an error in the proportion between the two, and I appeal to the state of the District in proof that the error is not in under assessing the newer lands. At any rate we may now feel sure that in lowering the assessment upon the Pyemash waste we are not driving cultivation to the inferior soils but generally speaking are bringing it back to its natural and original sites.

13. It seems to me that the Board of Revenue have fully admitted the extreme weight of this original assessment, in their proceedings of the 10th of April 1843. But I must beg respectfully to state that the measures they propose for correcting the errors appear to be inadequate and inoperative. As almost the whole of my reasoning must depend upon

this point I would beg leave to offer some remark upon it.

14. The Board observe "But even under the proposed new rule (See Para 2 of the Board's Proceedings) it may be to the Ryots advantage to evade the conditions of his Cowle. Thus take for example, one who has a Putcut of 4 acres paying 10 Rupees he takes a Cowle for 2 Acres more of easy assessed and waste. the full teerwah of which would be two Rupees.

"In 1248 Fusly he holds it rent free

"In 1249 Fusly " 4 — 8 — "

"In 1250 — " — 1/2 — 1 — " — "

1 — 8 — "

"In 1251. he throws up his Putent and becomes "liable to the penalty which would be for —

" 1248 — 2 — " — "

" 1249 — 1 — 8 — "

" 1250. — 1 — " — "

4 — 8 — "

"so that by paying 4 1/2 Rupees he escapes from an "assessment of 10 Rupees retaining a cheap "and favorable field instead of his former average holding."

Now

15. Now I think that if this is a correct supposition, if the Ryots is tempted to abandon four acres of cultivated land to take two acres of inferior waste there must be something extremely faulty in the system which requires immediate correction. The only possible correction that can be operative is a diminution of the demand a reduction of assessment I believe that the Board have supposed an extreme case, but I am satisfied that it is only a somewhat exaggerated instance of the effects of over assessment

16. The Board continue "Thus the "primary object of cowle cultivations is defeated "Cowles are given to extend cultivation to "enable Substantial Ryots to reclaim waste on "terms favorable to themselves and to assist them "in paying for their higher taxed lands, and as "they are allowed the option of throwing it up as "after it becomes liable to full Teerwah when "it is left available for poorer Cultivators "who may be destitute of stock or Capital to "reclaim such lands themselves".

17. Here it is again admitted that the land is over assessed and the extensive Cultivation

Cultivation on cowle is proposed as a remedy for that assessment. But in such a way that to be effectual the very proposition supposes that the new land is as much under assessed as the other is over assessed. As far as this is the case the greatest irregularity must be introduced. There must be constant effort on the part of the Ryot to throw up the more heavily assessed land and no rules however stringent will prevent his doing so again if the Cowle land is remunerative at the full assessment why should the substantial Ryots wish to throw it up? if it is not remunerative, why should the poor Cultivator wish to take it? If the proposed rule implied that a portion of a ryots assessment was taken off the heavily taxed land and placed upon the waste on his bringing a certain quantity into Cultivation and this waste was made an integral portion of his land, this might be an advantageous though indirect means of lowering the assessment But this is not the case.

18. There is I believe but one remedy for over assessment, and that is the reduction of the assessment.

In

19. In a late review by the Board of the present state of the lapsed Mootahs a passage occurs which I think most forcibly proves that the present depressed state of the Southern Talooks is to be attributed to the pressure of the assessment.

After showing that in the Southern Talooks the Collections fall greatly short of the permanent Beriz (which was itself below the Pymash assessment) the Board add "The four Baramhal Talooks are lightly assess-"ed, posess a ready market for their produce "and a saleable property has been imparted to "the land. The Revenue from these Talooks is accordingly proportionately favorable. The average of the last 9 years exceeds the perma-nent assessment in 3 Talooks and in the remaining Talook (Tengarecottah) the decrease is only Rupees 1978 — or $2\frac{35}{64}$ per Cent partly ascribable to the remissions which it was found necessary to give to meet the unfavora-ble character of the seasons."

20. These talooks are thus placed in favorable contrast with the Southern portion of the District at the commencement of our rule exactly the reverse was the case.

In

21. In speaking of waste lands Sir Thomas Munro in 1796 draws the following distinction between these two portions of the District.—

"One general regulation for waste lands "will never suit the whole country — It must be "modified according to the state of every particular "District but in none will they ever pay the average "rent of arable lands as prescribed in your "fourth Para. In most of the districts above Too-poor they may pay 3/4 but below they will "hardly ever give more than 1/2 and in many "places not more than 1/3. They will give a "greater or smaller proportion according as the "Districts are poorly or highly cultivated. In "the northern districts where there is so much "waste and where the arable lands have received "so little improvement from industry waste is often taken at 3/4 of the average rent of the "Village, but in the Southern districts where agri-culture is better understood where most of "the fields are enclosed, and where in many "places there is no waste except such as is "utterly unfit for Cultivation, no man will "give so much in less than 3 years and very "seldom then your valuation of waste is

therefore

"therefore too low in the Northern districts t
"first and second years but on the third
"is too high every where".

22. I do not think that a strong
instance can be given of the effects of an easy
afsefsment producing prosperity to the peopl
and an increase revenue to the Government
a too high afsefsment accompanied by depres
-ed cultivation and declining revenues. Th
is no doubt of the fact of the two divisions
having been very differently rated. Captain
Munro continues "In most of the Districts
"above Tooppoor the rent is so very moderat
"that it can hardly be much reduced with
"-out abandoning rent altogether. By com
-ing this year Penagur, admoncottah,
"Tengaracottah, I have had a better
"opportunity than ever I had before of co
"the situation of the inhabitants of the s
"and Northern districts and I imagine that
"making allowance for the superior fertili
"soil and all other advantages the afsefsme
"the Southern is on an average 12 or 15 per
"higher than that of the Northern provinces
"Southern pay about 24 and the Northern about 9 per

"every acre of dry land".

23. The Board of Revenue attribute these results to other causes. "Following the review contained "in the foregoing paras. the Board "they state" are inclined "to ascribe the difference between the present Revenue "and the permanent afsefsment to two distinct "causes. 1st. the nature of the seasons and depressed "state of the Market for all agricultural produce. "2d. to the System of Cowles and indiscriminate "relinquishment of lands which obtained for some time". But when it is remembered that in both divisions of the Districts the same system has prevailed — that both must be nearly equally affected by the depressions of the market that the indiscriminate relinquishment of lands which prove unremunerative has been from the beginning of our rule the settled — system in the whole district, surely other causes must be sought for such opposite results. It can only be that in one division lands are not relinquished because they are remunerative, in the other they are unremunerative and are therefore — relinquished. —

24. I have thus endeavoured to shew as concisely as I am able the leading facts from which I draw the conclusion that overafsefsment is the cause of the depressed state of the Southern Talooks under my charge - that the proper remedy is the reduction of the afsefsment. I have shewn that — the

Fort Saint George 20th January 1848

the originators of the assessment considered the
to be even then too high and were most anxious
see a general reduction - That the standard
however been gradually raised by the silent
of events affecting the agriculture of the coun
during the last 50 years - that the lapse of th
:tahs afforded some proof, that the standard w
high and that the fact was forcibly shewn by
Hargrave in 1818, that it seems to be admitted by the
of Revenue, and is strongly exhibited in the acc
between the two Divisions of the District - I have bro
this conclusion by no preconceived opinions, but solely
what I have seen in the state of the Country which
to examine the records of the District as far as my opp
:ties extended and my time has allowed -

25 - Even setting aside the past history of the Coun
this plain fact is before us - We have an immense amo
land which we are letting out at a high price - We have every
to believe that by lowering the price of the article we should
the demand and greatly increase our profits - Universal experi
proved this to be the case - The blessing to the people would
incalculable - The opposite experiment has been tried for
years and I believe the result to have been unfavorable -

26 - I conceive I need scarcely answer the obje
which may be urged that "I attribute part of the de
:on of agriculture to the depressed value of agricultu
produce and propose at the same time to remedy the
encouraging the production of more" The answer is obvi
No Government could entertain such a policy as to
res

Fort St. George 20th January 1848.

restrict the production of human food in order
to raise its price - Were the market to affected by
this District only, such a measure might be
practicable, but where the cultivator has to
contend against the prices of other districts, bar
:dened by the assessment of this, the result must
be his depression or ruin - Prices may fall much
below their present standard and still be re:
:munerative under a moderate assessment - The
production of human food has a tendency to create
its own market as well as a market for the
numerous other products of agriculture -

27 - I shall now proceed to the second
branch of the enquiry suggested by the Board -
"If the rates appear to be excessive what reduc:
:tion should be affected and on what principles
should it be based?" -

28 - In endeavouring to answer this question
to the best of my ability I shall take two points for
granted, that the means of Government do not
admit of any immediate sacrifice of Revenue
and that it is desirable to avoid unsettling the
minds of the people and disturbing existing ar:
:rangements except in the most gradual manner -

29 - The measure I would propose is
simply

Fort St. George 20th January 1848.

simply the gradual correction of those defects
the original survey which the experience of 5
years has brought to light.

30. I would propose that the Ryots be en
=couraged to make offers for the lands now ly
waste on a reduced assessment. That on their
=king an offer the lands if they have been waste
for a given period should be examined, and a
Moonasil Teerah be assessed upon them, at suc
a standard as is likely to ensure their permane
cultivation. I would propose that this should
gradually through the agency of the presen
establishment. I anticipate that in this manne
is probable that about 100 or 150 offers might
made and examined in each year in each
Talook, and I propose that these should
entered in a table and submitted for
sanction of the Board of Revenue.

31. The object should be to
fix the standard so low as to ensure
=neration to the Ryot, and if the Standa
taken at a moderate amount there
I think it will as a means of gra
modifying the assessment after
is probable that some of the

Fort St. George 20th January 1848.

assessed lands may be thrown up in favour
of these, in the course of time they will go
through the same process. I do not think it will
often happen that lands hitherto permanently
cultivated will be thrown up, if they are it will
only be where the assessment is extremely
high and ought to be
lowered.

32. I have shewn above that this
process will tend rather to bring back cultiv
=ation to its original site than to drive it to the in
=ferior lands.

33. In determining the rate of assess
=ment I would trust that no fixed proport
=ion between the produce and the assessment
should be attempted, surveys with this object
have, I believe always failed and for this reason
that the productive power of land even if this
could be ascertained is but one out of many
ingredients of its value. The proximity to a
market, river or road, healthiness or unhealth
=iness of site, even local superstitions, all
determine the real value of land and there is
but one criterion which embraces all these,
the demand, namely, in which the land is held.

I

34. I would therefore propose that the assessment offer made by the Ryot checked by a general examination of the land, the average rent of the village, and the collections made upon it hitherto should be a general guide in fixing the assessment. If local animosities should lead to a contention for the land. I would still fix the assessment and put the land with this assessment up to auction.

35. I have given a sketch merely of the plan which I propose. It resembles the Moonsiff Cowles of Mr. Lockhurn in some degree but would be brought into operation more carefully. I confidently anticipate that it would lead to a gradually increasing revenue and to a great improvement in the condition of the people. It is no new system but merely carrying out the designs of the original Commissioners by the aid of the experience which we have now gained of the real value of land.

36. I believe that if this reduction of the assessment were accompanied by the revival of the rules so strongly urged by Colonel Read and Captain Mac[illegible] benefit of these rules added to the great benefit derived from the abolition of the

+ Every man to be permitted to give up or take what ever land he pleases every year

* Additional pensioner to be demanded for improvements. The former rules

by digging a well or building a tank convert dry land into garden rice fields to pay no more than the original rent of the ground.

transit duties and those on betel and Tobacco would all cooperate to effect a most beneficial change in the condition of the Country.

37. The encouragement of garden cultivation would divert the cultivators attention from the production of grain to that of the more valuable products of agriculture and a check would be put upon the vexatious interference and constant frauds which accompany the present transfers of cultivation.

38. I cannot refrain from adding that it is only since writing the above views that I have become aware how completely they are borne out, by those of a Coll[r]. who know the district so well as Lt. Col. Mr. Whiting in a report on his district for 1845 he observed "The fact however is unquestionable "that the portion of the district assessed "by Captain Macleod is much higher in "than it ought to be, - and at least 30 p[r] Cent "higher than the rest of the district - This "over assessment, I think, is sufficiently proved

"proved by the circumstance of it's being in
"Macleods division that the Mootahs first ren
"to Government and from it's being in his divi
"only that lands of the first quality and bearing
"highest rate of assessment frequently encum
"ately under the tanks and consequently al
"sure of supply of water are left uncultivat
"on account of their extravagant assessment
"lands of an inferior description but pay
"a less assessment cultivated in preference
"That Captain Macleods assessment was
"too high was the opinion of Colonel
"himself, as I learn from a letter of his to Cap
"tain Macleod, in which he mentions that
"he considered his assessment much too hig
"and that it was upwards of 30 Pr. Cent above
"what he /Colonel Read/ would have
"made it from the same data. I regret
"I have not the letter by me to extract
"passage, but will revert to it when I re
"sume this subject."

Upon Mr. Ord's report
the Government recorded the follow
ing Minute.

Extract

Extract from Minutes of
Consultation dated 6th. June 1837.

"The Board of Revenue do not
"appear to have noticed that part of para
37 of the Principal Collectors report in which
he adverts to the over assessment of the lands
in part of his district - although in the co
Minutes of Consultation under date the 29th
of June 1836. the Government were disposed
to concur with the Board of Revenue in
considering the over assessment there alluded
to rather apparent than real, yet the
tone of confidence in which the Collector, whose
long experience in the district must have
furnished him with ample materials for
forming an accurate judgement on these
points, speaks of it as a fact, and his allu
sion to Colonel Reads letter to Captain Ma
Macleod by whom the assessment was made,
in corroboration of it, require that the sub
ject should be further and fully investi
gated, and a revision of the assessment if
found necessary, effected without delay.

It

Fort St. George 20th. January 1848.

It is unnecessary to enlarge upon the evils and impolicy of over assessment. These have often been pointed out and are indeed almost self-evident. It is sufficient here to observe that the appears to be the main circumstance which has given rise to the various restrictions in and interference with cultivation, so con-
-cive of the freedom of the Ryot, and that when it is removed, therefore, all ground or oc-
-sion for those restrictions and that inter-
-ference will be removed with it.

39. It was in accordance with the views that I brought to your notice the pres-
-ent state of the Village of Edumbancolum - I beg leave to add one or two other instances which appear to me to prove the point which it is my object to establish, Viz^t. that cultivation is checked by the heavy assessment which is placed upon many of the Poyal lands. I have already alluded to the contrast which the Board have observed in the effects of a heavy and a light assessment on two divisions of the district, the accounts I have now had occasion to examine present a similar contrast on a smaller scale but equally striking.

40. Observing that the modified assessment proposed by Mr. Hargrave in June 1828 was introduced in some instances be-

Fort St. George 20th. January 1848.

not in others - I was desirous to establish a com-
-parison between the result of adopting Mr. Hargraves reductions and of leaving the assessment at its original standards. The reduction pro-
-posed by Mr. Hargrave was only introduced permanently into the Moottahs watered by the Cauvery Channels - "When I personally inspected the Channel" Mr. Hargrave writes "I was forcibly "struck with the circumstance of seeing some of "the finest lands of the Zillah sure of an ade-
-quate supply of water laying totally waste and "naturally concluded such would not be the case if the Teerwahs were not so exorbetant "that it was utterly impracticable for any "people to cultivate them without incurring "certain ruin". The reductions made by Mr. Hargrave were liberal and the result has been the settled prosperity of the Villages affected by them.

41. I have had prepared the ac-
-count No. 1 to exhibit this result - you will observe that the permanent assessment of the Moottah of Vellore was Rupees 8,493-1-10 - but the collections of the two years previous to Mr. Hargraves settlement had fallen to Rupees 6,626 and Rupees 4,178 respectively; and in 1828 they were only Rupees 3,372 - The reduction of assessment

was

was made and the table will shew with what
effect. In Fusly 30 Mr. Cockburn endeavored
to revert to the former standard but was un-
able to collect the amount. With this exception
Mr. Hargrave standard has been adhered to,
revenue shortly rose to 7000 Rupees, and since
Fusly 1243, has remained above that standard
while the collections have been realized with
a regularity peculiarly striking.

42. In the same way I have placed
in comparison the average collections of the
two years previous to Mr. Hargraves reduction
in Runjayadiar Poyary, and the circar lands of
Terroomalanasamoodrum which constitutes the
Moottah of Runjayadiar. The result is even
more striking. From the depressed state into
which they had fallen these Villages are now the
most flourishing in my division. The whole
surface of available ground is a sheet of
Cultivation, and the Cultivators are every
year removing sand heaps to add to their
fields. I beg your particular attention to the
Village of Poyary, because I shall afterwards
shew that it was upon the standard of this
assessment that that of Edumbancollum was
formed.

43. Even this statement does not give a full view
of the benefits of a light assessment both to the Govern-
ment and the people. The Cultivation of Runjah lands
tells immediately upon the neighbouring Poonjah

Fields are required for dry Crops and for graz-
ing and the Village of Poonjayadar, although no
reduction of assessment was made, has shared in
the prosperity of the neighbouring Runjah Vil-
lage, the yearly Collections being in excess of the
Permanent Bariz.

In contrast with these I have already
44 submitted the accounts of Edumbancolum, but as
the supply of water from the tank is less certain
than that from the convery channels the comparison
is imperfect. At the same time however it shews
more strongly the necessity of lowering the assess-
ment in the villages less favourably situated.
There are however other [illegible]
which I think prove by contrast that Mr. Hargraves
reductions were most judicious and have been
the cause of the present prosperity of those villages

The Agraharum of Terromala-
45. namasamoodrum is situated in the Moottah
of Runjayadar. The Runjah lands are as-
sessed at the same rate as those of Vellore, or
Rupees 21—7—9 per acre, but being held in
Sodegy the enam to the Brahmins reduced
their payments to Government to about the
rate of Mr. Hargraves assessment. Lately however
from circumstances with which you are
acquainted

acquainted the Agraharum was attached and consequently the lands now bear the full Assessment. The result has been that the lands were entirely abandoned in 1255 and the whole revenue was lost to Government. In the present year the lands are again cultivated, but this is owing to the scarcity of prices which now prevail and to the reluctance of the proprietors to abandon their lands and allow them to pass into other hands while there is any hope of an eventual remission of Assessment, should the Assessment be maintained at its present standard there is no doubt but the lands will be thrown up as soon as prices fall to the average rate.

16. In the Talook of Namaeud I observed below the channel a piece of waste land surrounded by Cultivation. On enquiry I found that it consists of 15—6 9 Acres of Eray Nunjah bearing an Assessment of Rupees 698 12—8 This land has been waste ever since the time of Mr. Hargraves Settlement. Mr. Hargrave proposed an Assessment of 130 Rupees on the whole at the rate of about 3 Rupees instead of 15 Rupees pr. Acre. This was too low, but had it been adopted the Government would in the last 29 years have received 3370 Rupees: and several wealthy cultivators would

would have been established on the land, instead of which the Government has received no rent, the land lies waste and the water of the channel adequate to its Cultivation is provided in vain. I introduced this as a marked instance of the occasional errors of the Original Assessment which I consider it most desirable to correct. The land can never be cultivated at the original Assessment of 15 Rupees an Acre but would I doubt not be permanently cultivated at 5 Rupees pr. Acre.

17. The cultivation under the Paramutty channel is generally in a most satisfactory state. The supply of water is sufficient and there is so little waste land that my attention was called to a few waste fields in the village of Condulum. I find that in this instance acres 10—1 11 of wet land bearing an assessment of Rupees 131—11—6. are waste. This appears to be owing in part to the weight of the Assessment and in part to these Nunjah fields being amalgamated with unproductive Poonjah and Pagayet lands, Mr. Hargrave's remission did not extend to this Village.

18. All these facts lead me to believe that if a liberal reduction is now made

made upon the lands of Edumbon Colum, a vil-
: lage now almost waste will become as prosper-
: ous and flourishing as those already affected
by Mr. Hargrave's reduction. I have visited the
spot and I am persuaded that only this encour-
: ment is necessary to lead to immediate offers fo
a great portion of the land, I regret to find that
the tank is not in a very satisfactory state
owing to deep deposits of silt, and therefore
if I cannot confidently state that the whole
Anjacut will under a lower Assessment be
cultivated I can the more confidently state that
under the present heavy Assessment it never will

49. I now proceed to answer as far
as is in my power the questions of the Board of
Revenue and to furnish the information re-
: quired, but I regret to say that the imperfect
of our accounts renders this very difficult-

1st Question. The proper-
: tion of the produce
taken for the Circar
share in Fusly 1211,
and the price at which
it was commuted in fixing
the Survey Assessment.

50 At the time of
survey the land was
entered as Poorjah the
tank being out of re-
: pair. In Fusly 1210
the tank was repaired
and the accounts stated

that the land was assessed at the rate of 3/4 of the
Assessment of the village of Poyary which is the
neighbouring Village below the Paramutty
Channel. The accounts state the Assessment
to be per acre Rupees 13—8½ Sookavassy ac-
: cording to Custom 9—9—6 (I here beg to ex-
: plain that the term Sookavassy implies land
held by Brahmins. The term "2d Sort" in
Edumbon Colum has the same meaning.—These
lands are liable to the higher Assessment on
being cultivated by Sudras.

To ascertain the calculation on
51. which the original Assessment was founded
it was therefore necessary to refer to the survey
accounts of Poyary, but I regret to say
that these are not forthcoming, I am there-
: fore obliged to approximate as nearly
as I can by a comparison of the produce and
Assessment of other villages of which I have
obtained the records.

The Statement No. 2 is formed
52. upon these principles, In this, the 1st 2d & 3d
villages are entered from the records; that of
Poyary by Calculation as 20—8—11 the Assess-
: ment of Pellaar is to 11—15½ the Govern-
: ment share of the produce, so is Rupees 17—7—6

the

the known Assessment of Poyary to ℂ 9 ∀ 27 the produce required. The prices fixed at the survey were Rupees 1—14— and Rupees 1—10—8 for the 1st & 2d Crops respectively.

It thus appears that the produce and Assessment of Poyary are.

	ℂ	∀	Rs.	A	P
As fixed by Mr. Macleod	9	27	17	7	6
" " by Mr. Hargrave at Rs. 1—10—8 ℣ Candyum	5	35	9	12	8

Applying this rate to Edumbon Colum

	ℂ	∀	Rs.	A	P
Mr. Macleod's Survey	7	10	13	1	7
Mr. Hargrave's Estimate	5	23 5/16	11	2	8

2d Question. The Prices at which Mr. Hargrave's rates were framed?

53. Vide Subsequent Para

3d Question. What has been the average selling price of grain in the Paramutty Taloork for the last 7 Years?

54. The rates assumed by Mr. Hargrave and those which have lately prevailed in this portion of the Paramutty Taloork are placed in juxtaposition in No. 3. I have entered the years 1255 & 56 Separately for grain has been almost at famine prices.

I have

4th Question.

4th Question. Whether the gross produce as estimated in Fusly 1211 was overrated or the percentage taken for the Government on share excessive and in either Case to what Extent?

55. I have, as stated above been able to approximate only to the produce estimated in Fusly 1211 But I conceive there can be no doubt of its having been estimated greatly too high. I have shown that while the Survey estimate gives ℂ 7. ∀ 10 per Acre, Mr. Hargrave's careful investigation gives only 6. 5. 23 5/16 a copy of Mr. Hargraves estimate is annexed.

56. That the percentage taken for the Government share is also too high I think there can be no doubt. It would be out of place perhaps for me here to express the strong feelings I entertain how impossible it is that a Country should flourish when the Government demands three fifths of the gross produce (ie 1st Sort of wet land) or three fourths of the net. and this is the case even by Mr. Hargrave's Assessment, With reference to Captain Macleod's Assessment I think it is clearly shewn that the lands of

of Poyary were overassessed and these seem to be so in a still greater proportion.

57. I find that the Government share of the lands under the Channels is generally reckoned at 75 Pr. Cent, that under tanks at 50. But in fixing 3/4 of the Assessment of Poyary upon these lands of Edumbuncolum the Government share is raised to 56 1/4 if the produce is supposed to be the same.

58. Mr. Hargrave has assimilated the two lands in the estimate of produce and the Assessment; that is, 75 per Cent of the net produce is demanded upon the lands under the tank.-

5th. Question. What would be the Assessment to be imposed on the two classes of Nunjah lands in the Edumbun Columnil: lage were the Government share of the present actual produce to be taken at the proper Pr. Centage to be converted into Money at the average price of the last 7 Years?

59. Account No. 4 furnishs the Answer to this question. The Standard of produce is that Assumed by Mr. Hargrave Viz. S. 23 5/16 per Acre, as the Government share Column 7 shews the value of this produce at the various rates prevailing at the periods shewn in Column 3 The Assessment proposed by Mr. Hargrave does not accord exactly

exactly with either. In my previous application I did not think proper to proposed a lower standard than Mr. Hargrave's but considering the respective advantages of water I should think it far preferable to reduce the Assessment still to 3/4 of Poyary rather than run any risk of this fine land remaining uncultivated.

60. From the report of Mr. Hargrave it would seem that in forming the Survey Assessment the Circar share was taken at 50 Pr. Cent of the net produced and converted into money at the price of the period This proportion of the Crop does not seem in Mr. Hargrave's opinion to have been excorbitant but he represents

It here seems proper to observe that the report of Mr. Hargrave tends to give an impression different from an examination of the accounts. It is not really so much on a falling off in prices as on a diminution in the Estimate of produce that Mr. Hargraves remissions were made. The proportion

represents that in consequence of the declined of prices between Fuslies 1211 and 1228 the commutation fixed of the former date was no longer applicable."

Para 3. Head the cultivation of Nunjah lands since the restoration of the Tank been checked by the high rates of assessment, it may be presumed that this cause would have operated uniformly whereas it is remarked that the Cultivation since

fusly

proportion of the produce Mr. Hargrave did not think exorbitant, but the estimate he greatly reduced, at the same time that he lowered prices in some degree.

61. I regret that I am unable to furnish more than very general information on the subject called for by the Board. The cultivation has doubtless fluctuated according to the prospects of the season with reference to the fall of rain and the expected

fusly 1247 has fluctuated considerably ranging from 33 to 107 acres: This great variation would seem in part at least attributable to the seasons- That the Board may judge how far such has been the case, they wish to be informed what has been the quantity of water received into the Tank (i.e what extent it would irrigate) in each fusly since fusly 1247 whether in any one or more of those years any and what part of the water has been allowed to remain useless and not been turned to account whether the supply of water has in any one year been sufficient for the irrigation of the whole Nunjah Anjacut and whether under the System which is understood to prevail

expected prices of grain- This would naturally be the case unless the assessment was so exorbitant that no remuneration could be obtained from the best land in the best Season- No record has been kept of the quantity of water in the Tank, but I am informed that the cultivation has not been in proportion to the supply- In the same way I am unable to state what quantity of land has been cultivated with 2 Crops, no accounts are kept, and any Statements now called for would not deserve credit- All the lands are of course entitled to be supplied as far as the water will permit- but when so few

are

prevail in the Salem District, whereby no Fuzlgasty is charged on the 2d. Crop - the water of the Tank has been applied to any considerable extent to the cultivation of two Crops on the same land - In illustration of this last point an account should be submitted shewing what proportion of the Nunjah anjacut has since fusly 1247 been cultivated with two and what with one Crop.?

Para 4 - Again the fact of the Nunjah Cultivation since fusly 1247 not having been carried out to the fullest practicable extent will not of itself necessarily prove the assessment to be excessive - It has been above shewn that from fusly

are cultivated it is probable that most of these were cultivated with Second Crops and that the prospect of their being so, led to their being cultivated at all - The assessment in fact is formed on two Crops -

62 - I have prepared the account called for by the Board - But I beg to observe that the cultivation of these lands does not depend upon the number of Ryots and ploughs in the Village of Edumbuncolum. This are

fusly 1229 to fusly 1246 or for 18 years - No Nunjah has been cultivated - The resources of the ryots may reasonably be supposed to have been impaired during that period, so much so as to prevent their at once taking full advantage of the supply of water - even when provided to them - That it may be ascertained how far this has been the case, the Board would wish to be furnished with two Statements according to the annexed forms shewing 1st. the entire anjacut of the Village, and 2dly from fusly 1221 to fusly 1255, the extent and assessment of each description of land Nunjah, Poonjah, and Garden annually under Cultivation the total Settlement, Collection and balance

are many in the neighbouring Cusbah of Paramutty and Villages prepared to take up land if they can do so on advantageous terms - I have received petitions from the Ryots and from the Tahsildar of Paramutty praying that the Government will lead a branch of the Rajah Voykal to Paramutty and engaging to Cultivate land to the extent of 20,000 Rs. assessment and they are equally prepared to cultivate this land and indeed a good deal has been cleared this year, partly inconsequence of the exorbitant price of grain and partly I believe inconsequence of the rumour of a reduction of assessment -

J

balance of each year the number of Ryots &c. ploughs &c.a.-

5th Para- The reduction proposed by Mr. Hargrave extended to the assessment on dry and Garden no less than to Nunjah land. It should be explained whether the Survey rates of Teermah on these descriptions of land are considered excessive and if so, what reduction should be effected and on what principle it should be based.?-

63- I have endeavoured to give a general view of my impression on this subject in the earlier part of this report.

64- In applying these observations to the Village in question. I beg to point out that the dry cultivation has rather decreased since Mr. Hargraves' time, and that of 628 acres 420 are waste and only 208 cultivated. In 1202 fifty three years ago the cultivation was grater than it is at present. You will observe that the assessment of the uncultivated esceeds that of the cultivated lands in the proportion of 1-15- to 1-13-8.-

65- Mr. Hargrave proposed to reduce the assessment one half and had this been done I believe the

the greatest benefit would have resulted - If two thirds of the anjacut were cultivated at this assessment the Government would receive as much revenue as they do now- But when I observe that in the year 1235 36- and 37. nearly Sixe hundred acres were cultivated I believe that such a reduction would have ensured the settled prosperity of the Village and that by this time nearly the whole land would have been permanently retained-

66- The dry garden cultivation has fluctuated in an extraordinary manner - at present of 87 acres only 34 are cultivated - Thirty eight years ago 79 acres were cultivated - This is the kind of cultivation which I am particularly desirous to relieve from these fluctuations by relieving the land from the heavy assessment which it bears - It is most desirable that the Ryot should be encouraged to keep the bowdies in repair and render the garden land a permanent saleable property - With this view I think it might be desirable in examining the waste lands where the bowdies are found to be out of repair to put a poonjah assessment on the land, putting the land and bowdies up to sale to be held by the Ryots on the same terms as if they had dug the Bowdies themselves.-

Para 6- From Statement No. 1. accompanying the Sub Collectors' letter, it appears that

67- I have placed in one view in No. 5 the rates at which the

that from fusly 1221 - the year in which the Mootah reverted to Government to fusly 1228 or that in which the assessment was reduced by Mr. Hargrave, the Settlement (Column 8) fell very greatly below the assess=ment (Column 3) of the Nunjah lands - It should be explained how this reduc=tion of the demand took place, and on what principle the Settlement was formed in those years -

Para 7th - Of the 255-39-15 - acres which Compose the total Nunjah anyacut of the Village 66-31-9 - are classed as 2d Sort or Sookavashee. This latter term is frequently applied to land held by Bramins on favourable rates; The Board, wish to be informed whether this be the Case in the present instance, or whether the assessment, as the Collections were made previously to 1228 - The reductions seem to have been made on lands cultivated as Poonjah and Bagayet but borne on the accounts as Nunjah -

I beg your particular attention to Col: 6 as proving how far the Government has been from deriving any advantage from the high rate of assessment -

68 - The meaning of the term Sookavassy has been explained above -

as imposed at the time of the Survey, was fixed in refer=ence to the intrinsic quality of the soil, as also whether the extent of Sookavassee land is Stationary or is liable to fluctuate -

Para 8th - It should be stated from what sources the Tank is supplied, whether de=pendent on the rains only or fed by channels, anniculs &c as also whether there are any other means of irriga=tion for the Nunjah land besides the tank -

Para 9th - It is observed that Mr. Hargrave's reduced rates of Teerwah were intended to be introduced into 61 Moottahs besides Edumbon-cullum and the Board would wish for information

69 - The Tank is sup=plied by the river which flows from Salem to the Cauvery river - This river is a valuable source of supply to several tanks above and the only drawback is that it comes to this tank loaded with alluvial de=posits which have accu=mulated to a great depth in the bed of the Tank -

70 - The report you have already transmitted to the Board on the state of the lapsed Moottahs I trust renders it unnecessary for me to enter more into detail than I have already done

information as to the condition of these Villages, and whether, if the rates of assessment in Edumboncolum be revised the revision should not be extended to the rates prevailing in all the other Moottahs-

done on this subject.

71- In conclusion I earnestly hope that I shall have satisfied you and the Board of the propriety of making the remissions which I recommend, An assessment of 13 Rupees per acre on land under a tank [illegible] removed from any considerable market and without a road leading to it has rendered a fine tract of land comparatively barren of advantage to Government and the people; and 8000 Rupees have been laid out upon the tank almost to no purpose- I am fully aware of the danger of disturbing so complex a System as the Settlement of a Country, but the measure I propose does not do so, I have shown that the change has already been made with the greatest advantage- A Government cannot attempt to take the part of a landlord. and adjust the rents so

as to realize the full profits- Its duty is only to see that they are no where too high, and to trust to the extension of cultivation for an increasing revenue- When the revenue of Government approaches to the full rent of the land the Cultivator has all the responsibilities of a tenant without any of the advantages which arise from the presence of a considerable land lord- With the small holdings of this district the profits of one season form no balance against the losses of another and every unfavorable season reduces a Ryot to dependence- He has nothing to spare but the labour of future years- But if a saleable value is imparted to his land he has in this a fund to meet the fluctuations of the seasons and may remain an independent Cultivator-

72- The moderate assessment of Munro has had this effect in the Baramahl and in the Southern Talooks we have the means of extending the comforts of the people, raising their condition, and encreasing the revenues of Government by attracting to our own waste soil the labour of those who are now emigrating to seek employment elsewhere-

73- It appears from Mr. Hargraves report

report that the Revenue Board had then come to the conclusion that extensive reductions were necessary and a considerable expense was incurred in preparing the accounts which accompanied Mr. Hargraves's Report - The necessity of reduction of assessment is- I am informed, proved by the practice of every Moottahdar in the district, and I have shown that from the time of Colonel Reade to the pre= =sent day it has been constantly advocated - If the inferences I have drawn above are correct I trust that I may be authorized at once to carry out the measure on this small scale, and to bring to your notice other instances in which I believe the land to be over assessed.

Salem
Sub Collr's Office,
6th October, 1847.

(Signed) F. S. Malby.
Sub Collector.

P. S.

I think it right to add a passage from a letter of Captain Munro's which I have lately observed, and which appears to contradict the opinion expressed in the quotations I have given above - I think however that if the whole of the letter is taken into consideration it does not materially weigh against the views I have stated.

Captain

Captain Munro after proposing as one of the rules "that all lands included in the Lease should remain invariably at the rent then fixed" continues "Were rents not fixed no Estimate could be formed of the probable amount of Revenue for any future year, a rise in them would discourage agriculture and destroy all confidence on the part of the Cultiva=tors, a reduction of them would tempt the Ryots to plead poverty continually and even to throw up a part of their lands in hopes of obtaining a further abatement and in either case not only the inhabitants but also the Collector would be more dependent on the Cutcherry than they would be if rents were perma= =nent - Many fields have no doubt been over rated in the Survey but it is better that they should stand so than that reductions should be made which when once begun cannot easily be limited - It is no hardship on the Ryots for they can throw them up for the present and occupy them again at any period hereafter when they find themselves better able to pay the assessment"

From Captain Munro to Colonel Reade 18th July 1797.

Captain Munro had on a previous

previous occasion proposed a general reduction of 20 Pr. Cent on the rents- But as the liberty was conceded to the Ryots of throwing up land and concentrating their stock, Captain Munro expected that they would often avail themselves of this permission to relieve themselves of 10 or 15 Pr. Cent of their payments- Where they did so he proposed that only the difference should be remitted- He proposed that all waste lands should be given at the average of the Village to which they belong, but in order to prevent the Ryots from abandoning their old lands the rule I have stated was proposed-

The survey had then only just been made- To allow of alterations there would

would have been to abandon the survey and leave the system as vague as before- But now when longer experience has shown where the pressure of assessment impedes cultivation that objection no longer applies- It will still be advisable to limit the proposed review to lands which have been waste for a series of years so as not to encourage ryots to throw up their holdings in the hope of a permanent remission-

11th October 1847- (Signed) F. N. Maltby.
Sub Collector.
