A after B. No. 100

From the Secy to Government

7th January 1854. Received the following Resolution

No. 44

Extract from the Minutes of Consultation under date 6th January 1854.

From Board 5th January 1854

The Right Honorable the Governor in Council accedes to the application contained in the above letter and he accordingly directs that Captain Priestly will proceed to Madras on duty for the purpose of communicating personally with the Board on the subject of survey which he is now carrying on in South Arcot with leave of absence from the District for the period of 17 days, Captain Priestly will draw travelling allowance at the rate of Eight (8) annas per mile for his journey to Madras and back.

/Signed/ J. Pycroft
Secy to Government

10 days at Madras
1 Week travelling

Read the following Extracts.

B. No. 3331
From the Secy to Government

No. 1268.

Extract from the Minutes of Consultation in the Revenue Department under date the 20th December 1853.

Read the following Extract from the Proceedings of the Board of Revenue.

(Here enter 21st November 1853 No. 5314)

1 The demand on account of the Extra Sources of Revenue in the District of North Arcot for Fusly 1262 amounted to Rupees 172,698 and was Rupees 26,753 below that of the preceding year.

2 There was a decrease of Rupees 20,990 in the revenue from Ab Karry, occasioned by the lease under

under which Mr Morison held the farm from Fusly 1259 to 1261 having been renewed by him for a further period of 5 years at a reduced Rent. The circumstances under which the lease had been extended on these terms to Mr Morison have been explained by the Board in the correspondence recorded in the Consultation noted in the Margin.

Dt to Cons 27th April 1852 No. 10 @ 14.

The fluctuations in the other branches are not of any importance and call for no remark.

3 Of the above demand Rupees 125,334 were collected within the Fusly and Rupees 25,053 up to 20th September 1853, leaving a balance of Rupees 2,310 Including arrears, the gross collections realized within the year amounted to Rs 1,88,458- from which charges Rupees 3,831 being deducted, the Net Revenue Rs 1,84,627 was Rs 10,788 below that of Fusly 1261. It is remarked that the Ab Karry balance outstanding at the end of the Fusly was heavy Rupees 19,616 and that no cause is assigned.

4 The Right Honorable the Governor in Council grants authority for the demand Rupees (64-"-7) Sixty four and Rice seven on account of a tax on certain Washermen of the Arnboor Division for Fusly 1261 being suspended pending the disposal of the Moturpha question

question. He also grants authority for writing off in the accounts of the North Arcot District the arrears of Motorpha Revenue for Fusly 1260 reported to be irrecoverable amounting to annas (9-8) Nine and Pice Eight.

To the President and Members of the Board of Revenue.

Bd. No. 38

From the Secy to Government

Communicating the observations of Government on a letter from the Collector of Nellore respecting a riot which had taken place in his District in consequence of the Merchants refusing to sell Grain

No. 780

Extract from the Minutes of Consultation in the Judicial Department under date the 27th December 1853.

Read the following letter from the Magistrate of Nellore.

No. 4.

To Sir H. C. Montgomery, Bart
Chief Secretary to Government
Fort St George.

Sir.

1. I have the honor to state for the information of the Right Honorable the Governor in Council that I have been compelled to call out troops this day for the preservation of the Peace in consequence

consequence of a grain riot.

2 On approaching the Cutcherry this morning I was impeded and my Carriage stopped by a tumultuous mob in the market place, having however reached the Office after a short time I had up some of the Chief of the Mob to parly with them, and understanding that it was in consequence of the Merchants not selling grain, I also sent for the chief of them, meanwhile however there was a rush from the Square opposite to the Cutcherry towards the Bazaar, and I was informed that it was being plundered, and the Cutwall came and stated that there were 1000 persons, and that he could not put it down without the aid of a few Soldiers I addressed a letter to the commanding Officer, Copy of which accompanies, and as the matter was pressing, taking with me a Sepoy, as per Margin accompanied by my assistants Mr. Minchin and Mr. Forbes who volunteered to accompany me together with my own Peons I proceeded to the Bazaar, there was no resistance but we arrested some of the plunderers with the grain upon them.

1 Jemadar
1 Naigue
11 Sepoys
1 Drummer

3 I have in communication with the commanding Officer who shortly ordered out troops and

and came himself to my Office, arranged to have Guards of Sepoys posted at several places to prevent any recurrence of plundering.

4 The disturbance appears to have been caused by the refusal of the Merchants to sell grain freely at their own price not from any real scarcity existing as yet.

5 One of the men who came up to speak to me appeared in a Starving State, and another a respectable looking man appeared weak with fasting.

6 The Merchants had previously assured me they would sell grain freely but could not import it from other Districts. Should they continue to withhold grain the consequences in this large place must be very serious and I request orders how I am to act in such a case.

Nellore Magistrates Office,
20th December 1853

/Signed/ F. B. Elton
Magistrate

To Captain J. Beaver
Commanding Nellore.

Sir,

I have the honor to inform you that the Bazar of this place being plundered in consequence of the people not being able to procure food and to request that you will order out sufficient Sepoys to put a stop to the disturbance.

Nellore Magistrates Office

The

1. The Right Honorable the Governor in Council regrets to learn the disturbance at Nellore reported in the above letter and trusts that the measures which have been taken by the Magistrate in concert with the Commanding Officer will be effectual in preventing a recurrence. The Grain Merchants must be protected and every attempt at violence resisted and put down promptly and at every risk and by the combined efforts of the civil and Military authorities. The Government cannot interfere in fixing the price of Grain or of any other commodity nor should any other person be permitted to do so. It is obvious to remark that the enhancement of prices in times of scarcity is the means by which consumption being checked the scanty supply of food available may be made equal to the emergency and that any interference with this natural process can serve only to aggravate the evil.

2. The Governor in Council cannot suppose that the Merchants will close their Shops or if shut in a momentary panic will continue to keep them closed when they have supplies on hand if amply assured of protection, and that their business will not be deranged

and came himself to my Office, arranged to have Guards of Sepoys posted at several places to prevent any recurrence of plundering.

4 The disturbance appears to have been caused by the refusal of the Merchants to sell grain freely at their own price not from any real Scarcity existing as yet.

5 One of the men who came up to speak to me appeared in a Starving State, and another as respectable looking man appeared weak with fasting.

6 The Merchants had previously assured me they would sell grain freely but could not import it from other Districts. Should they continue to withhold grain the consequences in this large place must be very serious and I request orders how I am to act in such a case.

The

1. The Right Honorable the Governor in Council regrets to learn the disturbance at Vellore reported in the above letter and trusts that the measures which have been taken by the Magistrate in concert with the Commanding Officer will be effectual in preventing a recurrence. The Grain Merchants must be protected and every attempt at violence resisted and put down promptly and at every risk and by the combined efforts of the Civil and Military authorities. The Government cannot interfere in fixing the price of Grain or of any other commodity nor should any other person be permitted to do so. It is obvious to remark that the enhancement of prices in times of Scarcity is the means by which consumption being checked the scanty supply of food available may be made equal to the emergency and that any interference with this natural process can serve only to aggravate the evil.

The Governor in Council cannot suppose that the Merchants will close their Shops or if shut in a momentary panic will continue to keep them closed when they have supplies on hand if amply assured of protection, and that their business will not be deranged.

2

deranged by any endeavour on the part of the authorities to fix or regulate prices. Should they shew any disposition to do so, the Magistrate should expostulate with them on the impolicy as well as unreasonableness of their Proceedings, and while he guarantees to them the utmost security and freedom in the exercise of their trade, should at the same time point out to them that if they persist in refusing to open their Shops, and to sell at such prices as the circumstances warrant them in demanding, the difficulty of protecting them from the pressure from without will be greatly increased, that it may not indeed prove possible to restrain the people and that the consequences that may ensue must rest upon themselves.

3 Mr Elton will afford the Merchants every reasonable facility and assistance in procuring supplies of grain and will furnish them with Peons or a Military Guard to protect the grain in transit, if necessary. He will also give them freely bills on the collectors of other Districts in furtherance of their trade.

B^{d} N^{o} 74

From the Sec^{y} to Government

Communicating a letter with its enclosure from the Government of Bengal requesting a supply of 15,000 Maunds of Kurkutch Salt for Exportation to Chittagong during 1854/55.

No 581

Extract from the Minutes of Consultation under date 3^{d} January 1854.

Read the following

To The Chief Secretary to Government Fort St George

Sir,

I am directed by the Deputy Governor of Bengal to transmit the accompanying Copy of a letter N^{o} 1171 from the Officiating Junior Secretary to the Board of Revenue dated the 14th Instant, and to request that with the permission of His Excellency the Governor of Madras, you will cause the necessary orders to be issued for providing a supply of 15,000 Maunds of Kurkutch Salt for exportation to Chittagong during the present Season 1854/55.

Dated Fort William the 19th December 1854

(Signed) W Gordon Young
Under Sec^{y} to the Govt of Bengal

Encl^{e} 1.
N^{o} 1171

To The Secretary to the Government of Bengal

Sir,

I have the honor by direction of the Board of Revenue to solicit that a communication be made to the Government of Fort St George, with a view to 15,000 Maunds of

of Kurkutch Salt being provided for exportation to Chittagong during the present season 1854/55.

2 The deliveries from the Chittagong Golahs have been heavier this year than was expected, and the quantity of Chittagong and Arracan Salt remaining in Store in the Golahs of that agency on the 1st instant was only Maunds 488153.

+ 272722
* 215431
488153

3 Of the above quantity there had up to that date been assigned on Indents for retail sales 90431 Maunds of arracan Punjab but about an equal quantity of the Dacca Salt is now on its way from arracan which will be available to meet these indents. The Stock will however even with this addition be a very short one and it is moreover doubtful whether the Agent will be able this year to make arrangements for the whole of the allotted Saudad of 6,50,000 Maunds. Under these circumstances it seems to the Board, advisable to get a supply of Kurkutch if possible for the retail sales of Chittagong, and the requirement will probably amount to from 100000 to 150000 Maunds, according as the Agent may be able to obtain contracts for its transports.

Fort William, the 14th December 1853

No. 125

To W. H. Bayley Esqre
Secretary to the
Board of Revenue
Fort St George.

Sir.

With reference to the Extract from the Board's Proceedings of the 9th October 1851 forwarding Copy of a letter from the Under Secretary to the Government of Bengal requesting that the necessary measures might be adopted for providing a supply of 100,000 Maunds of Kurkutch Salt for exportation to Chittagong, on account of the Season of 1851/52 of which only 5,200 Maunds remains on hand, I have the honor to request you will let me know whether any Salt is likely to be indented for in the ensuing Season 1853/54 in order that I may take the necessary steps to get the required quantity manufactured. I have at present only 104750 Maunds of white Salt on hand, which may not be much more than sufficient to meet the Demand for Calcutta the exports to

to which is very fluctuating.

No 137.

To W. H. Bayley Esq.re

Secretary to the Board of Revenue

12

B.R. No 109

From the Coll.r of Vizagapatam

Submits replies to the queries contained in your Circular of the 12th Instant so far as he is enabled to do from the information already received.

Fort St. George

Sir,

I have the honor to acknowledge the receipt this day of your letter under date the 22d Instant and to submit replies to the queries contained in your Circular of the 12th Instant so far as I am enabled to do from the information already received. It is necessary however to observe that on several of the leading points of enquiry my answers must be very general and made upon a rude estimate - as the Board is aware only two of the Talooks and three of the smaller Zemindaries of the Vizagapatam District are under the direct management of the Government Officers, I have therefore not that particular acquaintance with the produce of the larger part of the province which would enable me to estimate it with any great degree of accuracy -

Query 1. 2 In those parts of the District

District alone where water supplies could be obtained from Rivers Channels and tanks has Cultivation been Carried on to its full extent, so general has been the deficiency of the usual rains- The failure in the earlier dry Crops was to the extent of from a third to a quarter, but in many places the wet Crops failed altogether, whilst in others the loss has been Considerable- It is estimated that the deficiency on the whole of the Crops throughout the District is equal to nearly a half of the produce of the last few years, which were particularly favorable for Crops of almost every kind- But supposing that the decrease of produce is one half, the food of the people will not be decreased to that extent as much grain has of late been exported by Sea from the Ports of Vizagapatam as well as from Cealingapatam in Ganjam to which grain was taken from the North western portion of this District-

Query 2. 3 I cannot without great chance of error attempt to calculate the quantity of grain stored from former years- The Merchants who made purchases from the growers had generally a ready Market by

by sale for exportation especially during last years, when the home Market did not hold out sufficient inducement for sales to Consumers in the District-

4 The principal Kinds of grain used as food by the labouring Classes in this District are Coarse Rice, Ratchery and Cumboo with its varieties or grain somewhat resembling it- The present prices and those which have obtained during the last four years are entered in the Margin- They cannot also be taken as a test of the prices of grain in the Zemindary, the Settlement of which I am now engaged in making, and in comparison the settlement of which I shall make in the Course of next Months-

Varieties

	Grain	1850 Per Garce	1850 Per Rupee	1851 Per Garce	1851 Per Rupee	1852 Per Garce	1852 Per Rupee	1853 Per Garce	1853 Per Rupee
1	Rice Coarse	114	5	118	5	102	4 3/4	240	10
2	Ratchery	54	2 1/2	54	2 1/2	46	2 1/4	102	4 1/4
3	Cumbalos	51	2 1/4	54	2 1/2	44	2 1/4	100	4 1/4
4	Codalos	30	1 1/4	45	1 1/2	28	1 1/4	60	2 1/2
5	Chamalos	42	1 3/4	50	2 1/4	40	1 3/4	82	3 1/2
6	Corralos	42	1 3/4	50	2 1/4	40	1 3/4	82	3 1/2
7	Sonnalos	83	3 1/2	71	3	60	2 3/4	125	5 1/4
8	Allos	30	1 1/4	45	1 1/2	28	1 1/4	60	2 1/2

I shall refer to the statements which I am preparing, when I report on the Settlement, for the information required by the 5th Query-

For

" 4 5 For what is deficient in our supplies of grain we must look chiefly to imports by sea, from vessels have arrived at Vizagapatam from Calcutta with grain since the price of grain became high, this arrival has tendered to keep prices down for the present below what they had a tendency to rise to. From the Nagpore Country Brinjaries coming for salt have generally imported grain and wheat, but I am not aware whether the harvests in that State have been such as to lead the Brinjaries to bring other produce to Vizagapatam. The Reports which will be furnished by the Collector of Ganjam and Rajahmundry will enable the Board to judge whether their Districts can send supplies to Vizagapatam, the former it is believed may be able to do so to some degree.

6 The Reply just given to the 4th query renders an answer to the 5th unnecessary, I accepting it be to state that all traffic with Nagpore is carried on by means of pack bullocks.

7 The means of transit for such

such quantities of food as traders might desire to bring by land would probably be forthcoming.

" 7 8 I have reason to believe that private traders would import sufficient food to make up the existing deficiency if work were provided and paid for in Money.

8 & 9 and part of 10 9 It is probable that there would be a deficiency of employment for about fifty thousand persons unless it were provided for them by Government, but on this point I speak with much uncertainty, and I would beg not to be understood as implying that the number I have mentioned would altogether want the means of subsistence if not employed by Government, with regard to most there would not be so much an absolute want of means as a deficiency which might become diminished in the event of continued scarcity.

" 11. 10 The pasture lands on this District are generally tracts partially covered with Jungle, they are likely to

Fort St. George 9th January 1854

to be much affected by the present drought.

11 Even at present Bandy Bullocks cannot at some places get the water which they require, and forage is not plentiful. By the end of February Cattle would be ill supplied with water, and forage for them must often be carried from one place to another as they proceed on their marches.

12 12 There has been no Rain in the District since the beginning of October. In the Zemindary from which I write tanks which in three former years I found full at this season are empty and in some of the Villages even the Wells are dry, Compelling the inhabitants to bring water from neighbouring places.

13 13 Any general statement of the fall of Rain in inches in this District would be of little use. Accounts of the falls of Rain have not been kept long enough to enable me to afford the information which the Board call for on this point, and even were there tables extant they would but be of partial use, especially in a year such as that now occurring. Owing to the nature of

Fort St. George 9th January 1854

of the Country the falls of Rain are at all times unequal in places not far, even at no great distance. The Statements of the falls of Rain in Vizagapatam exhibit the falls in the Towns or Villages where gauges are kept, but it may be said only there for it has been well ascertained that frequently the falls of Rain are very different between Waltair and the Town of Vizagapatam and the Collectors Cutcherry near the Town so that the gauge at one of these places forms no position Check upon the other, it is the same elsewhere.

Bd No. 106.

From the Collr of Masulipatam

Furnishing replies to certain queries sent by the Board on the apprehended Scarcity.-

Fort St. George,

Sir,

Para 1. In my letter under date the 28th Ultimo I supplied to the Board a few hasty observations bearing upon the Queries contained in their Circular of the 12th ultimo in reference to the apprehended scarcity of food, and I now beg to submit such detailed replies as they appear to call for-

2. In doing this I am well aware that on many points our information is very limited, that opinions must be rather conjectural than founded on complete data- Even in the Government Estates the accounts of this District are most imperfect- Upon the correctness of the assumed area of cultivable and cultivated land in Kuttles I do not place any reliance, and the Kuttle itself varies in different Talooks- There are still two very large Zemindaries, and many smaller ones in the heads of their Proprietors, and as the object of every Zemindar

Fort St. George 9th January 1854.

Zemindar, especially of late so embarrassed as are those of this District, is to put off the payment of their Kists as long as possible any call made upon them for the state of cultivation in their Talooks would, in the event of the out turn being tolerably favorable, as I believe it to be this year in the large Zemindaries of Davercottah and Weyoor, probably bring an answer as far from the truth as possible.-

Reply to 1st Query.

3. A definite answer to the first query is very difficult- Throughout the District except in the 2 Talooks watered from the Godawery Channels, the wet Crops have either failed altogether, or are with few exceptions very poor- In many parts the great inundation from the Kistna destroyed the Nurseries, and breached the Tanks to such an extent that immediate repair was impossible, and there has not been a drop of water in them since. In some Talooks the Dry Crops have also suffered, but generally they are in a very favorable state. In my desire to obtain the most accurate information I have caused several accounts to be framed in regard to the cultivation

Ralunghy Baharzully Purgunah of the Kykaloor Talook.-

and

and the probable out-turn. I will not trouble the Board with any details of these, for I cannot regard them as very trustworthy. My Sheristadar has calculated that the deficiency of harvest on the whole District might be estimated at about a third of an ordinary good season; but on carrying out the figures upon which to a certain degree this calculation had been framed as far I thought they ought to be carried, I found that the assumed deficit would be only 1/8 This I fear is below the reality, but I trust that the deficiency does not on the whole exceed 1/5 of 1/4:-

4. We have no account of the quantity of food annually imported into ports of this District from the adjacent Rajahmundry Talooks- some again from the Talooks on the border of the Kistna goes to Guntoor. The population of this District being by the latest Returns about 525,000, it is assumed that to give full food to all for one year, 2,80,000 Pootties of Grain would be required. The Returns looked for from the land supposed to have been brought under cultivation in this District in the Zemindaries as well as in the

the Government Estates, and from the Collair cultivation now commencing is about 2,00000 Pootties, so that the assumed deficiency of food obtainable from the District itself below the expected demand, is nearly 1/3 but I hope that this calculation of the produce will prove to be materially below the outturn.-

Reply to 2d Query.

5 It does not appear that there is a large quantity of grain in store from former years- it probably is not much above 10,000 Pootties.-

Reply to 3d Query.

6. In the 8 Talooks of Padanah, Kykaloor, Ellore, Pentapand, Kalungky, Goodewadah Divvy and Bunder, Dry and Wet paddy of the Coarsest kind form the chief article of food among the labouring classes, Jonna and other Grain being consumed in smaller quantities- In Bezoorah, Nundegamah, Juggiapettah, Tirwoor Sullapully, Noonnastalum, Gollapully and other Talooks Jonna forms the staple food, Paddy and other Grains being eaten in smaller quantities The Current retail price is very materially above the average usual price and may be stated thus.-

Reply to 4th Query

7. The crops of the Woondy and other Talooks of the Subdivison of Rajahmundry watered from the Godavary are said to be in a very flourishing state Large quantities of produce from these Talooks annually enter the Masulipatam District, and I have no reason to doubt that a supply will be forthcoming this year. Until the last 2 years considerable quantities of Rice were imported into Masulipatam from arracan, but owing principally to the low market prices recently prevalent the quantity imported has been very small. I have not at present with my Butchery the Returns of the Grain imported Seawards. I have no intelligence of the state of the Crops in arracan, but if they have been favorable, it is probable.

Note
A memorandum has been found from which it appears that the largest quantity imported was in 1844, when 3148 Garces = 115780 Parties of Grains of all kinds were imported by Sea.

probable that Grain will come to Masulipatam from those Districts, unless the Market rate elsewhere should be so much higher as to cause the supplies to be taken elsewhere, but as I mentioned in my letter of the 28th Ultimo, I understood that some Merchants of Masulipatam have already sent considerable sums of money to obtain supplies of rice from the arracan Coast. From the reports which have reached me I do not anticipate that any other Districts in the Northern Circars have any surplus food for supplying the wants of this District.

Reply to 5th query.

8. All supplies from Arracan of coarse arrive from Seaward at present all Grain from the Talooks of the Rajahmundry Subdivison comes by land to any point on this side of Aukeed, 36 miles distant by the road from Masulipatam. To Aukeed there exists water communication from almost all parts of the Sub Collectorate. On the present occasion I would most strongly urge the desirableness of the immediate excavation of a Channel in continuation of the existing water communication from Aukeed, or any other more suitable point either on the channels

or

or on the Ospootair, to Masulipatam. Such a channel would of course also have communication with the Collair, and if achieved there would be the immence advantage in this season of scarcity of sending the produce from the Collair Islands, from the Rykaloor Talook on the borders of the Collair and from the rich Talooks of the Rajahmundry Subdivision into Masulipatam by water. Until the line may have been marked out, it would be impossible to judge whether it could be completed within a few months but I think it probable that if the excavation of some Channels of less immediate importance in the Godawery Division were for the time postponed, there is every probability that it might be completed. It would at all events be ready for the next season, and every yard of its progress, provided it be entirely a fresh water line, and be carried independently of all the Salt swamps near the Coast, would tend to ensure the successful cultivation during the next season of much land in the Endindy and Coroocollor Purgunnahs of the Rakaloor

Note. It might perhaps lead directly from the Collair but probably not

Rykaloor, and in the Padanah and Masulipatam Talooks in which the Crops have in many places been destroyed by drought should we be affected with another year of drought. It is not necessary for me to offer one word in respect to the immence difference in the Cost of land and water Carriage, I believe that apart from the priceless value of the irrigation derived from the noble work of the Godawery Anicut of which the present year affords such an illustration, the value of the navigation has been fully acknowledged by the Government. I need only point out that while Inland water communication from Rajahmundry Cocanada, Samulcottah and numerous important Villages in the Godawery Delta open at all times of the year, extends to within 30 Miles of the large Town and Port of Masulipatam in a direct line the sole communication therewith from the point where water communication ceases, must be carried on by a circuitous route on Carts or bullocks, which have to traverse a Country where no road has ever yet been attempted, and where loads.

Distances of land route by the only practicable routes for wheeled Carriages and those of the worst description.

	Miles
Rajahmundry to Masulipatam	103
Cocanada to Masulipatam	142
Samulcottah to Masulipatam	133

loads must be very light, because the soil is either heavy sand, or black soil flooded, burnt and cracked into ridges, lumps, and fissures, so to prove how very important it is that with as little delay as possible a navigation Channel as well as an irrigation channel should carry the Godawery waters to Masulipatam, and I would earnestly solicit the support of the Board for the immediate prosecution, if possible, of this project. In one or two years at the utmost I trust that the waters of the Kistna will at all seasons of the year reach the Town of Masulipatam but we cannot too soon have those of the Godawery, and complete the water communication which has already been carried so far with such advantage and success and is so much appreciated by the people of the Country. During the 3 days for which I was encamped at Ankeed no less than 9 large Boats arrived there to carry Grain to Rajahmundry:-

Reply to 6th Query

9. The 6th Query is sufficiently replied to in the above Bullocks and Bandies to go to the point where water communication ends and if sufficient Grain be forthcoming from the

the Talooks of the subdivison sufficient of this slow extensive carriage will I believe be forthcoming, but of course it will increase the price far beyond what it would be were there water Carriage.-

Reply to 7th Query

10. I do not anticipate slackness on the part of the private traders in endeavouring to import sufficient food.-

Reply to 8th query and 9th Query

11. I am not of opinion that it will be necessary for Government to project any other special work for the employment of the people than those connected with the Kistna and Godavery anicut works. The amount of Ordinary Maramt to be executed in the Goodewadah and other Talooks in which the Tanks were breached or destroyed by the inundation in July, is very large, and this District has not only a smaller population in proportion to the area, but defacto a considerably smaller population than any other Dol: electorate in the Madras Presidency. In writing this I would beg to include the work alluded to above as a regular part of the Godavery Channel Irrigation and Navigation project such a Channel is a necessity sooner or later, and if sufficient labor be procurable, no time could be better than the

the present year, for as I have already observed every Gallon of water lrd on wards ensures as against scarcity and failure of Crops next year in those Talooks which the water can reach.—

12. The above remarks afford a sufficient reply to the 9th query.

Reply to 10th query.

13. I do not understand the connexion between the commencement and concluding portion of the 10th question The 11th query appearing rather to be the sequence of the commencement of the 10th, but I fear that the pasture lands of this District are not in a favorable condition. The Board are well aware how anxious I have been that arrangements should be made for obtaining additional labor from other Districts in addition to that which can be supplied in this for pushing on the great work of the Kistna annicut with the utmost possible despatch. It is I believe assumed that such labor would materially increase the Cost of the Annicut, but I feel confident that even if it added one Lac to the Cost of this stupendous work, and at the same time ensured its completion one year sooner the advantage would far outweigh the

disadvantage

disadvantage to the state of the additional outlay. Every effort has been made to meet the demand for forced labor since Captain Orr called on me in September to supply Talook Coolies to the number of 3,000 in addition to the Razee Coolies. The heavy fines and stoppages of pay inflicted on the Tahsildars both in the early part of this year, and since the operations recommended in September last, with threats of dismissal in the event of their failing to make up the quota demanded from them must have shown them that we are in earnest. Mr. Tweedie at Bezoarah spares no exertion to meet the requirements of the Engineer Department. Had we Returns of the number of Razee Coolies at work at Bezoarah, I might be more able to ascertain whether as the work advances, many are coming from neighbouring States, and to judge of the probability of their increase now that the work is not a novelty but as Captain Orr has recently refused to furnish Mr. Tweedie with any memorandum of the number of Razee Coolies on the work, I am at present unable to offer any opinion on this point. There is I fear abundant reason to believe that the

Talooks.

Talooks in the Nizams territories on our frontier are in a very bad state and that armed Gangs of plunderers are forming. I beg to suggest for the consideration of the Government whether it might not be desirable that endeavours should be made through the Resident to obtain supplies of labor from the frontier Talooks to convert ill fed or starving men prepared for plunder into hardworking operations. So far as the Returns of last year went there was nothing to show that any people were coming as common laborers from the Nizam's Villages I imagine that the Razee Collies and Tank diggers are about 4,000 or 5,000, but whether they are all from this District or from others I have now no means of knowing.

* I do not believe that this would be readily effected unless the Nizams Government took the matter up.

Reply to 11th query.

11th. Should we have no rains in the month of March and April, I should fear that after that period forage will be very scarce on all the lines of transit.

Reply to 12th Query.

15. Most of the Tanks are empty and the Wells and reservoirs for watering Cattle and for household purposes have a far more limited supply than is usual at this period of the year in this District, as the dry Season advances, the water in

in many of the Wells which still retain a fair supply in quantity becomes brackish and unfit for use, and this is especially the case in Masulipatam and in its vicinity. In my own compound in Masulipatam where there are several small reservoirs the water is unquestionably less in quantity and more offensive than when I returned to Masulipatam in June, but tolerably good water in limited quantity has been found in digging a few feet deep in other places I fear that as the dry season advances unless we should have early and abundant showers, much inconvenience will be experienced in parts of the District from the want of good water. The speedy completion of the project to which I have above referred, were its sole object to bring good water to the Town of Masulipatam, irrespective of all considerations connected with cultivation and navigation, would be a boon of the highest value to the inhabitants of this large Town. a blessing which none but those who have seen the filthiness of the only water which can at certain seasons be procured for household purposes can appreciate. I hold that even if an irrigation and navigation channel from

from the nearest point towards Masulipatam to which the Godawery waters reach, into this large Town, with its Fort, Arsenal, Garrison Stores of all kinds, were to become unnecessary after a Channel from the Kistna reaches the Town, which is however entirely the reverse of the fact there is every reason to belive that it would have done its work, conferred both upon the people and upon the Government benefits far more than commensurate with the outlay, unless the outlay be very much in excess of what I assume it will be. This line would also pass through or in the vicinity of the worst portions of the District, so far as the present scarcity extends, which I have yet seen, and might be commenced and carried on at many points of the line at once. There are many advantages in working people on a line and not in too large masses at one place, and numbers will willingly work in the vicinity of their Villages in their own Talooks, and at the same time prepare their lands

lands for the following years cultivation who regard with horror being sent to a distance against their will. Were this done I trust that in a very short period water sufficient for irrigation along its whole course and for an abundant supply of pure water to the numerous Villages by which it passed and lastly to the Town of Masulipatam would flow along it. Having seen the wretched state of the lands and Tanks in the Cadanah, Goodewadah, Masulipatam Talooks and those portions of the Kykaloor Talook which the Godawery waters do not reach, the dried up Crops and the scanty and fetid water, and the striking constrast on this side of ankeed, where pure water in abundant quantities and rich Crops exist every where, I am in a position to be sensible of the immense advantages which would arise from an extension of the benefits to the Town of Masulipatam and to the Talooks lying between it and the Godawery, and I am sure I have not written too urgently on the subject. As yet I have had no communication with the Civil Engineer on

on the subject, but I trust I am not too sanguine of the feasibility of the project and propose at once addressing him to request that he will endeavour to ascertain what would be the outlay of a Channel whether for irrigation or navigation.

Reply to 13th query.

16. I have not with my Cutcherry the regular Cutcherry Rain Register, but I find in my Note Book, extracted from the Register Kept by Mr. Alexander the late Master Attendant, who has kept a Register very carefully for many years, that in the year 1852 up to 19th November 1852 there had been inches 49-080 in Masulipatam and in 1853 up to the same date inches 19-54 since that date rain has been unknown. The annual average is I believe about 45 Inches

Bd. No. 103
From the Collector of Nellore

Sir,

With reference to the concluding part of my letter of 27th December 1853 in reply to the Board's queries regarding the state of the Crops &c. this year, I have the honor to state that having since received the Extract from the Minutes of Consultation under date the 3d January 1854, Copy of which is herewith forwarded, containing the answer of Government to my proposition for supplying the Nellore Market and stating that the proposal is utterly inadmissible; I beg to withdraw both the specific propositions for mitigating the distress and difficulty, which there is too much reason to fear will be the result of the withholding of grain by the Merchants and Ryots. I think it right however to state that I am

In reference to the concluding Para of letter of 27th December 1853 forwards Copy of Extract Minutes Consultation and withdraws the proposition therein contained relevant to supplying the Nellore Market with grain with Government Money.

I am informed that the proposition now disapproved of by Government, though not undertaken under orders from the higher authority, was the means by which in connection with a large gratuitous distribution of rice to the poor sanctioned by Government, and a considerable sum spent on Public Works, famine was averted by the then Principal Collector in 1833. The proposition to be allowed to take such portion of the Rists, as I might deem proper, was meant to ensure a supply of grain to being forthcoming when it was urgently required. The first proposition being however disallowed, the second is not likely to be sanctioned as it involves Government interference in supplying the local Markets.

Amount paid to Rupees 62874. Rs. 4 a. 2 p.

2 In conclusion I think it my duty however to state that the Ryots still show the most extraordinary and marked tendency to withhold grain even at this early period, when there is no real scarcity, and that it is difficult to say how the peace of this District can be preserved or even the public servants kept at their posts if nothing is done. I shall be ready to forward the

the different reports on which my opinion is founded if called on to do so for the information of the Board.

Nellore District,
Collectors' Office,
Podalacoor,
5th January 1854.

(Signed) F. B. Elton
Collector

Enclosure No 1
No. 3.

Extract from the Minutes of Consultation in the Revenue Department, under date the 3d January 1854.

Read the following letter from the Magistrate of Nellore.

(Here enter 24th December 1853)

With the above letter the Magistrate of Nellore forwards copy of a correspondence with the Officer Commanding the Station relative to the supply of rice to the Sepoys, and in reference thereto and to the state of the grain market, requests that he may be allowed to get in grain from the District for the consumption of the Sepoys in communication with the Acting Deputy Commissary at Masulipatam.

In

2 In view further to defeat the assumed combination among the grain dealers, who according to Mr Elton's opinion, contemplate disposing of their present stock, and refraining for a while from procuring more, so that when an artificial scarcity has thus been occasioned, they may enhance the price on the supplies eventually brought in, the Magistrate solicits authority to make advances to the extent of ten thousand Rupees to get in grain, such grain being disposed of by him at prices which will cause no loss to Government.

3 With respect to the first of the above propositions it is remarked that since the 21st ultimo there had been no difficulty in supplying the Sepoys. Should any such difficulty be likely to recur the Right Honorable the Governor in Council under the circumstances will not object to arrangements being made by the Commissariat authorities for provisioning the Troops at Nellore provided the supplies be furnished from Madras, so as to cause no disturbance in the local Markets. The Commanding Officer will, if necessary, place himself in

Letter P 1

in communication with the Commissary General on the subject.

4 Mr Elton's second proposal is utterly inadmissible. Such an interference with the Markets of the District, as his scheme contemplates, would serve only to deter the local dealer, who could not enter into competition with the Government, and by paralyzing private enterprize would greatly enhance the evil it was intended to abate. The Magistrate has already, Extract Minutes of Consultation 27th Ultimo, been warned that he is on no account to attempt to fix or regulate prices, and that whether directly by means of express orders or indirectly by bringing Government into the market to compete with the grain Merchants.

Bd No. 104
From the Collector of North Arcot
Replies to 3 P.

Sir,

I have the honor to submit the

to the Board's letter of the 12th Ultimo having reference to the Scarcity in the Season

the following replies to the questions circulated by order of the Board of Revenue per your letter of the 12th ultimo.

Reply to the first question

2 In answering the First question I will first compare the extent of cultivation in last Fusly and in the present. The Nunjah cultivation in the present year up to the end of November was 83,389 Cawnies, that of Fusly 1262 up to the same period was 97,229 Cawnies, so that there is a deficiency this year of 13,809 Cawnies. The cultivation last year after the end of November both of first crop and of second crop, as respects those Talooks in which accounts of the second crop are kept was 19,782 Cawnies but that was a year of abundant rain & and all the tanks were well supplied In the present year most of the tanks are without water; and though the high prices hold out a powerful inducement to cultivation under River Channels, Springs and Wells, still I do not think that more than half the extent cultivated last year can be expected. This 9,891 Cawnies, added to the cultivation up to November will make a total of 93,250 Cawnies

Cawnies, against 117,011 Cawnies in Fusly 1262.

3. The whole Poonjah cultivation in Fusly 1262 up to the end of November was 172,617 Cawnies, this year it is 129,328 being a deficit of 43,289 Cawnies. There is little or no cultivation after November in Poonjah except Indigo, I therefore leave that out of the present calculation. Thus it appears probable that the extent of land under crop will be 23,761 Cawnies less in Nunjah, and 43,289 Cawnies less in Poonjah than last year.

4 As respects the quantity of the produce. The Staple Poonjah grains in this District are Cumboo and Raggy of which the latter is most general in the Talooks of Chittoor, Chendraghery, Satghur, Palmanair, and Vencutghery Cottah, and the former in the remaining Talooks in the South and East, being about two thirds of the District. In the present year the Cumboo has been almost a total failure, I suppose on an average not more than one third of an Ordinary Crop. The failure in the Raggy has been less decided, but even in that the agreable produce does not

not exceed one half of an ordinary Crop. The like must be said of the other Poonjah crops, Varagoo, Saumay, Oolundoo, Toverah &c.

5 In the Nunjah lands the early crop, the Car, so far as cultivated has yielded well, the Sumba Crop sown in September and October and reaped in February or March, is likely to fail in some places but not very generally, the late Crop Navirah, will not be grown except where there is a tolerably certain supply of water - On the whole therefore it cannot be said that in Nunjah the yield to the acre of cultivation is likely to be much below the average.

6 In order to bring the whole Production under one common term, one crop on a Cawny of Nunjah may be taken as equal to the crop of three Cawnies of Poonjah - Thus the whole cultivation of Fusly 1262 will be equal to 523,650 Cawnies of Poonjah, and that of Fusly 1263 to 409,078 Cawnies. But 129,000 Cawnies in the latter year having yielded not more than half an average Crop 64,500 Cawnies

Cawnies must be deducted from the total of that year, which will thus be reduced to 344,578 Cawnies - In a general way, and with allowance for land devoted to products other than food, it may be taken that a Cawny of Poonjah yields 10 Cullums of grain, and on this basis it appears that the total production in Fusly 1262 was 5236,500 Cullums and that in the present year it will be only 3445,780 Cullums being a deficit of 34 per Cent -

7 But Fusly 1262 with which the foregoing comparison is made was a year of unusual abundance and cheapness; I will therefore add a comparison with Fusly 1255 which was a decidedly bad year - The Nunjah cultivation in that year up to the end of November was 71,587 Cawnies, being 11,772 Cawnies less than this year; but after that period the cultivation was extensive, and the total of the year was 88,982 Cawnies, and including 2d Crop 105,763 Cawnies, or 12,513 Cawnies in excess of the total probable Nunjah cultivation of the present year - In Poonjah the cultivation to the end of November was 134,330 Cawnies being 5,000 Cawnies more than in the present year

year.-

8 As respects the produce. Nunjah shany was proved to the extent of 48,779 Rupees and it is fair to suppose that the total that really occurred was not less than 75,000 Rupees, this would represent about 7,500 Cawnies. In Poonjah, shany to the amount of 3,718 was admitted to have been proved, and the whole yield of the Poonjah crops was known to be very light, probably not above three fourths of a full crop. Assuming then as before that one crop on a Cawny of Nunjah is equal to three Cawnies of Poon=jah, and that the average yield of a Cawny of the latter is 10 Cullums, the total production of Fusly 1255 would be 39,55,410 Cullums of grain, while I have com=puted the probable total yield of the pre=sent year to be 34,45,780 Cullums, being a deficit in the latter of about 12 1/8 per cent.

On the whole it seems proba=ble that the total yield of grain in this District in the present year, will be about 25 per Cent less than in an average year.-

9 It is almost superfluous to

to explain that the foregoing computation cannot pretend to exactness, because I have no accurate materials on which to base it. It is only offered as an approximation, but as such it may have its use in forming a judgment as to the state of the District. I must explain also that the calculation extends to the Government lands only, it does not include either the Zemindaries and Polliems or the Enams in the Govern=ment Talooks; as respects the second crop also it includes only eight out of the thirteen Government Talooks, there being no accounts of the second crop in the other five, as the Board are aware. But though the com=parison does not take in the whole District, yet it is a fair one, because the same things are included in all the three terms used in it.-

Reply to the second question

10 There are a number of persons in this District who are in the habit of storing grain, and at the head of them is the Calastry Zemindar who re=ceives great part of his Revenues in kind, and keeps large quantities on hand while prices are low. The last few years having been years of

large

Fort St George 9th January 1854

large produce can be raised, the quantity of grain in store is much larger at the different time than usual. My Head Serish: can say he raised a certificate for his sum long and intimate acquaintance with the revenues of the District, and after carefully = ation with Peddan comple tent to said them, from which it seems probable that from twelve to fifteen thousand Garce of Paddy in now in store in the District, out of the produce of former years.

(Reply to the third question)

11 On the 4th Query

Query five the Chiefs. But in most parts of the district, the chief food of the native employed in agricultural labour - and other labour in the Villages, is either Cumbu or Ragghee, and it is these latter two classes that principally understand the question & reply. The following statement will show in what proportion the quantities of each are consumed:

Fusly	November				December			
	Cumbu	Ragghee	Cur paddy	Sumba paddy	Cumbu	Ragghee	Cur paddy	Sumba paddy
	Madras measure	In Dr	In Dr	In Dr	In Dr	In Dr	In Dr	In Dr
1260	43 1/4	44 9/16	50 5/8	44 7/16	44 1/8	43 4/16	48 3/10	44 5/8
1261	48 1/2	49 13/16	63 7/8	52 3/8	45 3/4	49 11/16	63 1/4	52 7/8

Average	47 7/8	49 1/16	60 1/2	52 1/4	47 7/8	48 7/16	59 15/16	52 5/16
1263	33 1/2	35 3/4	49 1/16	44	24 3/4	25 1/2	36 1/4	33

The

Fort St. George 9th. January 1854

12 The prices for the Months of December in the present year, are given in the foregoing table for seven Talooks only the price lists of the Remaining Talooks not having been yet received, I appended a table showing the prices and the average of those Talooks in November and December of the past and the present year, that the Board may see what Relation they bear to the prices of the whole District. It will be seen that a Considerable rise took place last month, no doubt because all prospect of rain to retrieve the season has now elapsed away.

Fusly	Cumbu		Raggee		Cars Paddy		Sumbu Paddy	
	November	December	November	December	November	December	November	December
	Madras Measures							
Fusly 1262	49 5/8	50 3/4	50 1/4	50 3/4	68 1/4	68 1/2	60 1/2	60
Fusly 1263	30 3/4	21 3/4	32 1/2	21 7/8	46	36	41 1/4	33

The

Fort St. George 9th. January 1854

13 The Districts adjoining North arcot are Chinglepat, South Arcot, Mysore, Cuddapah, and Nellore, No supplies of food can be expected from South arcot, Cuddapah, or Nellore; partly because the parts of those Districts Contiguous to this are at least as badly off as this District and partly by reason of their distance from the Chief Markets in this District and the bad state of the Roads As respects Chinglepat it seems unlikely that much grain can be expected thence; as the harvest there too is understood to be deficient; and unless Sea-borne grain is largely imported into Madras, all the Surplus of Chinglepat will be required for that City, It is even likely that this District may supply Conjeveram. The only Remaining District is Mysore. In former times of Scarcity here, that Country has furnished supplies and though prices are now said to be high there also, in Consequence Chiefly of demands from Bellary still it is probable that to some extent, the deficiency of Raggee in the adjoining Talooks of this District may be made up from Mysore, and perhaps a little Paddy may be received also.

The

Fifth question

14 The only means of transit between this District and those named is by land.

Sixth question

15 I have no reason to doubt that sufficient means of transit for the quantities of grain requiring to be moved will be obtainable at moderate rates.

Seventh question

16 I have no doubt at all that the efforts of private traders if they be protected from plunder and not interfered with by Government Competition, will be fully sufficient both to bring in what grain may be available from without, to distribute to the various parts of the District where most required, the quantity produced & stored within it and to convey grain from this District, if necessary, to still more necessitous parts of the Country; in other words to distribute the available quantity of food in the best possible manner for the general advantage. I say that so far as the existing condition of the roads will permit, the private merchants will perform this important duty far better than it could be performed by any other agency. I would earnestly deprecate any interference with them; it would paralyze their exertions and

and could not supply their place.

17 The scarcity in this District is not likely to be very severe. Prices will be considerably higher than usual and there will be a measure of distress; but I see no reason to anticipate any thing like a general dearth or general destitution. The principal feature in the case is that the food of the poor has failed in a much larger degree than the food of the rich; and as many Ryots in the dry parts of the District have lost a large part of the grain on which they usually rely for their own subsistence, some unusual indulgence will be needed at the settlement. I do not expect, and the facts as stated above do not warrant me to expect that any very considerable number of those not usually working for hire will be driven to that employment this year. The Ryots for the most part will stick to their usual employments, doing their best to eke out in every available way the scantiness of the year's crop. Of the class of day labourers and of the poorest class of Ryots a somewhat larger number than

Fort St George 9th January 1854

than usual will be ready to undertake Government work. I find it difficult to give an opinion categorically as to the precise number likely to resort to employment provided by Government; but perhaps it may be about three or four hundred in each Taluk, or about 1,000 in all, in addition to the number so employed in ordinary years. I do not apprehend that people of this casual class will be found willing to go very far from their houses, nor would it be expedient to congregate them in large numbers; it is desirable therefore that the works should be as much as possible distributed over the district.

18 Should the early rains of the approaching season, which may be expected in May and June be favorable, Government work would immediately be abandoned. But should they unfortunately fail, the distress will of course be not only prolonged, but much aggravated in degree.

Tenth question

19 There are no lands in this District specially reserved for pasture; the

Fort St George 9th January 1854

the cattle graze on the waste lands and in the jungles. All such lands are much more dry at present, and fodder much more scarce, than is usual at this time of year; and there is no doubt that as the dry season comes on, this scarcity of pasture and the want of straw will have a serious effect on the cattle, and a considerable mortality among them is to be expected.

I hardly know whether the latter clause of this question refers to the Pastures of the District or to the Government works; but in either case my reply is that they are not likely to be resorted to by the people of other Districts.

Eleventh question

20 Forage will be dear as above said; but I do not at all anticipate that it will be so to such an extent as to stop transit.

Twelfth

21 At present no distress for water is experienced, either for household purposes or for cattle, nor is any to be expected for the next two or three months. After that time inconvenience will be felt in some quarters, and unusual

Fort St. George 9th January 1854

unusual escpedients will be resorted to for obtaining it in a few places, prin:-cipally in the Palmanair, Chendrigapherry and Sholinghur Talooks, the encrease:-ment may probably amount to positive duty

Thirteenth 23- Prior to July 1852 the Talook Rain Reports were not to be depended on being prepared by guess only- Since that time they have been based on observations of the Raingauges supplied by the Board- Comparing the last five months of 1852 with the Corresponding months of 1853, it is found that the total fall in the former was 37/100 inches, and in the latter 11 4/10 inches- The year 1852 however was, as already said and as the Board must be well aware, a year of very abundant rain, I will not vouch for the Correctness of the Reports, but they are the best source of information at my Command on this point- I applied to the Zillah Surgeon, hoping to be able to obtain from him the Records of his observations for several years- But he informs me that though Registers of the Thermometer

Fort St. George 9th January 1854

Thermometer have been kept in his Department for the last four or five years, there has been none of the fall of Rain, and that he has not been furnish:-ed with a Rain gauge-

B.D. No. 105

From the Collr. of Canara - Forwarding replies to certain queries having reference to the anticipated scarcity in his District.

Sir,

1 I have the honor to furnish the following replies to such of the questions contained in your Circular letter of the 12th Instant, as are applicable to the state of this District-

2 The harvest of this district has been on the whole a favorable one although very variable- There is a Considerable surplus available for foreign exportation-

3 Now the trading season opened

Fort St. George 9th January 1854

opened at the close of the monsoon & there was so great a demand for the Rice then in store that prices rose rapidly and the whole of the stocks in hand was immediately exported to Malabar and Travancore. This was happily replaced by rice brought down from Mysore, or the labouring classes would have suffered severely. The value of the new passes opened into Mysore has been thoroughly tested. By their means the spread of Cultivation in Mysore has been greatly encouraged, and thus it has happened that when a demand arose there was a supply to meet it, and the means of easy transport. The quantity of rice brought down by the traders was so large as to prevent any exorbitant rise in price* and large numbers of the labouring population ascended the Ghats to bring down rice for their families. The exports of rice and paddy have been enormous. The new harvest can hardly be considered to have affected them before the 15th of December, and upto that time the exports from our principal ports as compared with the preceding year were as follows.

Ports

		Rice	Paddy	Total
1262	Monsoon	52,600	218,30	
1263	"	108281	310211	
1262	"	6,635	42,107	
1263	"	33069	101,993	

*N.B. The exports of rice entered as rice imported from Mysore consist of the most part of the quantity shown in the next two columns as foreign rice & as follows.

	Rice	Paddy	Total
1262 Monsoon	16,130	52,600	218,30
1263 "	201,830	108281	310211
1262 "	35472	6,635	42,107
1263 "	68,924	33069	101,993

5 The prices of the several Kinds of Rice usually exported as Compared with last season are shewn in the annexed Table. Rice is the food most used by the Labouring Classes in this District.

	Price on the 15th December 1262 1852			Price on the 15th December 1263 1853		
	Rs.	a	p	Rs.	a	p
Seera Rice per Corge	76	10	5	83	8	0
Beltighe Rice per ditto	66	2	5	67	5	7
Muscat Rice per ditto	63	0	0	66	14	5
Rajoy Rice per ditto	53	8	10	62	2	5
Wadkul Rice per ditto	58	4	9	52	12	9
Paddy per ditto	31	8	0	33	15	9

6 The harvest along the western frontier of Mysore has been I am informed very good. Some late Rains have been very favorable to the Sooglee or second Crop of this district, and also to the pasturage on the Ghats. The trade down the passes Continued with the greatest activity. There is therefore every Reason to hope that from the ports of Canara a large quantity of grain will be sent

Fort St George 9th January 1854

sent to supply the wants of other markets, and the high prices which are likely to prevail are very advantageous to the Landlords of the District.

7 But if these Continue throughout the season they will cause Considerable suffering to the labouring population, and the temptation of high prices is likely to lead to the export of nearly the whole of the present harvest. The time when this is most felt by the lower classes is the close of the trading season, and the latter portion of the monsoon, when field labour is at an end and the harvest unharvested. At those periods I anticipate a serious rise in prices, and it is of the greatest importance to afford employment to the labourers.

8 The works which have already been sanctioned by Government happily offer employment to large numbers and they are so distributed over the district as to distribute the advantages of employment very favorably. On the Singareree line an expenditure of about 10,000 Rupees has been sanctioned. On the Dairamunnay line Rs 20,324-4-4 On the Nellcoond 5,000. On Bridges on the Arnee line and at Siddapore 4,1877-7-2 On

Fort St. George 9th January 1854

on the Jail at Honore 2900 Rs In the South of the dis-
trict two lines have been sanctioned in Continuation
of the Munjeralad Ghat at an outlay of 17981 Rs—
9 I have only to request some further assistance
from the Government in superintendence for these
works to be in full activity. The appointment of an
Officer to continue the Munjeralad Roads and of
one to superintend the Honore Jail is alone
necessary for these works to be carried on with
activity, thereby bringing them to an early comple-
tion and affording employment at the season when
it will be most valuable—
10 It is my intention to request Lieuts Thornton
and Babington to provide a supply of tools to enable
them to employ larger numbers if necessary and
should an Officer Competent to carry on the roads
to Buntwal be appointed to the Munjeralad line
the benefit will be much felt in the South of the distric
11 It does not appear necessary that I should answ
the latter questions more minutely as the bounty of
Providence has rendered them inapplicable to this
district. I will only add that it appears to me that
the publication by every available means of authen
-tic information of the state of the different provinces
will tend to avert much evil, as it will warn the
people of the probability of scarcity, and future
high prices and check careless Consumption
or excessive exportation—
12 The result of the rain tables of last
season will be sent hereafter—

Read the following letter

To

W. H. Bayley Esqre
Secretary to the
Board of Revenue

(19)

B. No. 92

Sir

From the Sub Collector of Rajahmundry

With reference to my letter to the Board forwarding sixe Survey plans of Villages in the Sub Division of Rajahmundry which, as I understand, have been transferred to the Revenue Department from the Department of Public Works, I have now to solicit that the Board will be pleased to obtain the sanction of Government to supply me for the use of the survey class in the Sub Division with the several instruments and drawing materials mentioned in the annexed List.

Requesting a supply of the instruments and drawing materials required for the use of the Survey Class in the Sub. Division

1 Lett Mangnais scales (Rose wood)
1 Set Rose wood Plotting scales
One Plane Table complete
One Circumferentor on stand
One optical square
One 66 feet chain
a Color box complete
2 Small cases containing pair of ... compasses and Protractor
a supply of paper suitable for Plan drawing . . . . . .

My present request will not I trust be considered premature although as yet I have received no reply to the application for the assistance of Government solicited in my letter above referred to - Hitherto with our compass and chain, and with the addition of such instruments as I possess of my own little inconvenience has been felt in the class - but the Board will readily conceive that as the numbers augment and the class improves in skill more instruments are required both for taking angles and bearings, and for measuring distances.

The

The Assistant Civil Engineer who has kindly undertaken the supervision of a portion of the class during my temporary absence informs me by letter, that the want of instruments begins to be felt, for that many of the Goomastahs and others being fully competent to make surveys of channels and tracts of land, are at the present moment so employed - It is very desirable, as it seems to me, that our efforts to train an efficient staff of Native Surveyors should not be crippled at starting for want of means, and as the number of instruments now applied for will only admit of two, or at most three, parties working at the same time, I trust that the Board will consider that I have confined my requisitions within moderate limits.

I believe that all the instruments enumerated, with the exception of the Plane Table, are now in the Board's Office - and if they would be supplied to me at once, I might very conveniently carry them up with me at the expiration of my leave and bring them into immediate use on my arrival in the District.

My object in applying for a Plane Table and Circumferentor is, that I may have an opportunity of observing the results obtained by those instruments as compared with the Prismatic compass, and of ascertaining which of the three is best suited to

Native

Fort St George 9th January 1854

Native Surveyors as being easier and quicker of use, as well as more exact.—

It is my intention, as soon as possible, after returning to the District to forward to the Commissioner of the Northern Circars, duplicates of the plans already submitted to the Board, with any others that may be there completed, detailing every particulars connected with the Village Survey, and showing the method pursued throughout.— Having received my first supply of instruments through their Secretary in the Department of Public Works, I have thought it right to report to the Board all that has been done up to the present moment, and I trust that this application will meet with the same consideration which was extended to my former one.

Sir,

21

Bd No. 2175

From the Collector of Masulipatam

Submitting the information required by the Board in regard to the Talooks assigned to the Head Assistant Collector for the Immalumdy Settlement.

Para 1 In reply to your Circular letter of the 14th April, I have the honor to inform you that there being no Sub Collector in this District and no separate Establishment for the Head Assistant Collector, there does not appear up to Fasly 1261 to have ever been any regular Set of Talooks assigned to the Head Assistant Collector. During the course of the Immahlundy, the late Collector assigned to him the Settlement of such few Talooks usually one or two, as appeared most convenient, and they appear to have varied in different years.

2 When Mr Tweedie was appointed my Head Assistant in January 1852, I assigned to him the 3 Talooks of Bezwanah, Nundigamah, and Guggah pettah, I had at that time myself made the Settlement of Bezwanah. This year at the time of Settlement, I placed the Nair Shanistadars at the disposal of the Head

Head Assistant Collector and the 3 Talooks were settled by Mr Tweedie. When I am once entirely freed from the Review of the investigations conducted by the Special Assistant Collector under Regulation IX of 1822 and Regulations VII of 1828, I shall hope myself to visit these Frontier Talooks, and possibly I shall settle some of them in the fusly now commenced.

No. 90

To W. H. Bayley Esqre
Secretary to the Board of Revenue
Fort St George

Sir,

25

Bd No. 3242

From the Collr of Cuddapah. } I have the honor to acknowledge the receipt of the Extract from the Proceedings of the Board of Revenue under dates the 21st April and

Stating with reference to the Extract from the

The Boards Proceedings dated the 21st of April and 6th of June 1853 that the accounts exhibiting the Extent of Enams below two Cawnies held by each individual cannot be satisfactorily made out on account of the exact extent of Enam which Exists in the Ceded Districts, and suggesting that an intelligent assistant with a third Shenistadar and a smaller Establishment may be deputed for the sole purpose of scrutinizing and preparing the accounts called for.

and 6th of June 1853 respectively, wherein they request that the Collectors will be pleased to forward an early report, whether all Enams entered in the public accounts at an extent below two Cawnies might not henceforth be wholly exempted from the interference on the part of Government, either in respect to their present enjoyment or future disposal. They to state that the account thus called for is one which cannot be satisfactorily made out on account of the exact extent of the Enam which exists in the Ceded Districts. In the Enamty accounts prepared in July 1260, the names of the holders of the Enam in each Village were therein entered. but there is no account which will exhibit at one view the whole extent of Enam held by any particulars individual, unless that Enam be contained within the limits of a single Village. Many of the holders of the rent free lands hold small portions in different talooks and different Villages, and since the preparation of the accounts of July 1220 the lands have been divided and subdivided between different members of the family. It is therefore most difficult to ascertain the respective portions held by each individual respectively, as no accounts are forthcoming to show when the division took

place

place or the quantity of land awarded to each Member.

2 When the death of an Enamdar takes place, it is difficult to obtain a report on the subject from the Cummums of the Village, as they had not from July $\frac{1220}{1810/11}$ to $\frac{1255}{1845/46}$ reported the death of any of the Enamdars and thro' friendship for the families even now it is believed withhold the information in certain cases, and it is only when an examination commences that the parties claiming shares come forward and prefer their claims. In the public accounts the name of the head of the family is alone entered as the holders of the Enams, but upon enquiry it is found to be subdivided into numerous shares, each Enam would require to be taken up separately and enquired into, to ascertain the exact amount, whether under or above two Cawnies enjoyed by each of the Enamdars without a thorough investigation into each respective Enam it is impossible to ascertain the extent of Enams in possession of the different holders. The accounts called for by the Board will be tedious and voluminous more than can be undertaken by the present Establishment.

3 The establishment allowed for this District is small, in respect to the number of Cantoons and Peshkans. it is much smaller than those adjacent — Guntoor, Nellore and Bellary, and from the scarcity of

of hands, these accounts cannot be speedily prepared, there being merely sufficient to carry on the current business of the District - I consider it would be better in the preparation of these accounts that an intelligent Assistant with a third Sheristadar and a smaller establishment be deputed for the sole purpose of scrutinizing and preparing the accounts called for - as it will be necessary for him to revise the whole of the Enamily accounts of the District and enter in detail the names of the different shareholders with the extent of land enjoyed by each.

Cuddapah District,
Collector's Office aforesaid,
Eleventh Collegoollah,
6th December 1853.

Signed M. Munnay
Collector

B. No. 78
Proceedings thereon

25-26

The Board observe that the details particularized by the Collector in paras 1 and 2 of the foregoing letter were not called for by their Circular of the 21st April 1853, but merely a report on the propriety of exempting certain small Enams from interference on the part of Government and a Statement exhibiting the proportion of the whole of the registered Enams below two Cawnies to the whole Enam Ayant of the District

2 Mr. Munnay is requested to place himself in communication with the Collector of Bellary by whom the required report has been already prepared and submitted. The delay that has occurred in Cuddapah in regard to this matter is far from satisfactory.

B. No. 3244.

From the Collectory of Cuddapah Reporting upon the Petition No. 1925 of 1853 affording the information called for in a letter from the Board of Revenue dated 14th November 1853 in respect to the Cutting of Sandalwood in his district.

Petition No. 1925 of 1853.

Sir,

I have the honor to acknowledge the receipt of your letter under date the 14th Ultimo, together with its enclosure, from G. Wobamah and T. Venkiah residing at Dannellore in the Sattiaveed taloke, Zillah of Nellore stating the causes which materially affect their business as Sandalwood merchants, and praying that under the circumstances brought to notice the Sandalwood Contract may be granted to them on lease for five years on the Condition therein specified and the Board desired to be informed under what rules or restrictions if any the cutting of sandalwood is carried on, the extent of the trade in this article and the localities in which it is found.-

2. I beg to state in reply that there is no perfumed Sandalwood grown

grown in this district with the exception of one or two trees which may be found in private gardens, but there is a wood commonly known by the name of sandal, or Chundum which is a hard red wood used for dyeing and also for beams, rafters &c. in the Construction of native houses, this wood is found to a great extent in the forests on the Nullamalla range of Hills in the Chitwail Talook and also along the same range as far as the Kistnah..

3. Mr. Ross on the 8th of May 1815 issued an order that no Sandal or Chundum wood should be cut in the Government forests without the previous permission of the Tahsildar, who was ordered to collect the sum of Rupees 5 per Cart load before the permission to Cut the timber was granted, this order continues in force from that date to the present. The extent of trade in this article cannot be ascertained, but there is no doubt that from the vast extent of forest near Banlopully in the Chitwail talook bordering on North Arcot, large quantities of this wood are cut and Carried away clandestinely into the

the neighbouring districts without any duty having been paid..

4. I am of opinion it would be highly inexpedient to rent out the cutting of these trees to any particular parties and thereby cause a Monopoly from which great inconvenience will be experienced by the people of the district in which the wood is grown, as the renters would have it in their power to raise the price to any exorbitant Amount they might please, and this would in all probability Cause Considerable strife and breaches of the peace, should the inhabitants of Cuddapah Cut this wood in the forests rented out to others..

5. It is now proposed to construct a railway between Madras, Cuddapah and Bellary. An Engineer is now engaged on the survey, and should it be undertaken large quantities of different descriptions of wood, amongst others sandal will be required for Sleepers, it would no doubt be most profitable for the parties to have the Monopoly of this wood and raise the prices according to their own convenience.

It

6. It appears to me that the delay Complained of in the petition is caused very much by the parties themselves, as two Months are sufficient to fell 20 to 50 handy loads of wood.-

Cuddapah Collector's Office on Circuit at Koulcountah 6th December 1853.

(Signed) M. Murray Collector.

B. of R. No. 59.

Proceedings thereon.

(27.28)

With reference to the appa:=rent apprehension of the Collector that large quantities of Chundum or a Redwood are clandestinely cut and carried away, he is requested to use his best endeavours to prevent or di:=minish this alleged practice.-

Ordered that the following En:=dorsement be passed on petition No. 1925 of 1853.-

"The Board learn from the Collector that it is not expedient that the privilege of Cutting the wood in question should be rented."

29

To, W. H. Bayley Esqre. No. 92.
Secretary to the Board of Revenue,
Fort St. George.

B. of R. No. 3245 From the Collector of Cuddapah 3 1

Sir,

I have the honor to inform You.

you that a mistake has been discovered in the Statement shewing the Amount of allowance paid to the parties on account of Hindoo and Mahomedan Ceremonies, transmitted to the Board with my letter dated the 14th May 1853, recommending the Continuance of a portion of the allowance to the parties therein referred to, which recom:=mendation was approved of and sanc:=tioned in the Extract from the Minutes of Consultation under date the 24th June 1853.

2. On making known to the different parties the intention of Govern:=ment to Continue to them the Several allowances for life it was discovered that Viasapooja Hoty Ramacharry No. 1 of the parties who possessed no other means of subsistence, had died on the 19th of December 1838, leaving three sons named Streenevasacharloo, Ramachen:=dracharloo and Sheyshacharloo, of whom the eldest drew the Amount after his father's death and passed his receipt for the same. They to recommend that the name of this person† be substituted for that of his father, and that he be allowed.

† Streenevasa:=charloo.-

Fort St. George 9th January 1854.

allowed to enjoy the sum sanctioned in the name of his late father, after his demise it will revert to Government.

Cuddapah Collector's Office on Circuit at Koilcountlah 6th December 1853. B. No. 58.

(Signed) M. Murray. Collector.

Proceedings thereon.

(29.30)

As the orders of Government dated 24th June 1853 expressly direct that the allowances referred to are to cease only "on the demise of the parties to whom they are payable" and as Ramacharry is reported to have died on the 19th December 1838 the Board see no objection to the name of Streenavasa Charlu being substituted for that of his deceased father as proposed by the Collector.

B. No. 55.

Proceedings. Reporting on the Extra Sources of Revenue of the South Arcot district for Fusly 1262.

No. 12.

Read letter from the Collector of South Arcot dated 18th October 1853. reporting on the Extra Sources of Revenue of his District for Fusly 1262.

(Here enter)

The annexed abstract Statement exhibits the settlement of the year, resulting in a Net decrease of Rupees 50,533-12-3 as compared with the preceding Fusly.

Fusly

Fort St. George 9th January 1854.

Fusly 1262 — Increase Decrease

Salt	19,889	11	8	"	"	"	7,124	5	3
Sayer	1,774	13	6	14,228	4	5	"	"	"
Sea Customs	2,042	13	9	2,014	5	"	28	8	1
Abkarry	85,000	"	"	1,000	"	"	"	"	"
Sundry Farms and Licenses	12,238	8	11	538	3	11	"	"	"
Stamps	25,262	8	6	645	8	"	"	"	"
Motarpha	4,296	7	13	3,106	8	"	"	"	"
Total	3,40,630	6	3	29,293	5	4	7,982	7	1
Deduct Increase				29,293	5	4			
Total Decrease							50,533	12	3

Sea

2. The Collections on account of Salt Amounted to Rupees 1,98,895-11-8. or Rupees 7,1245-2-3. below that of Fusly 1261-

3. The falling off occurred both in the Inland and Home sales and is attributed to the Stock of the previous year having fallen short & to the destruction of a large quantity of Salt in process of manufacture by the Storm of March last.-

4. At the principal pans at Mercanum large quantities of Salt are usually made but owing to the length of time required to produce the article and the period which elapsed before the pans which were inundated by fresh water during the Storm could be drained & prepared for recommencing the Manufacture, No Salt was obtainable from them before the end of the Fusly the Inland Sales were closed from February, so as to reserve the small Stock then on hand for Home use & for the supply of the French Government, and the loss which resulted from the want of new Salt in consequence of the Storm as compared

compared with the period when the Salt was ready for use in the previous year is shewn to be Rupees 28,962.-

5. The Chief places to which Salt was exported during the Fusly were Salem, Mysore, & Trichinopoly.-

6. In the Sales for Home use, the loss in which was Rupees 33118 the Collector deemed it advisable, owing to the limited Stock on hand, to restrict the Sales to small parcels, so as to protect the interests of the Community, and prevent the entire Stock falling into the hands of a few large purchasers. A Supply of 50 Garces was procured from Tanjore, but owing to the inferior quality of the Salt a ready Sale was not effected.-

7. It is satisfactory to observe that owing to these proceedings no distress for want of Salt was felt in the District.-

8. The total quantity of Salt Manufactured during the Fusly including the Supply from Tanjore, was Garces 2,632, from which deducting the Sales, there remained at the close a Net Stock of Garces 511- since this period Garces 2971 were Manufactured up to the 14th September 1853- and the Collector has in view, if the next season is favorable, to manufacture

Such

such a quantity as will enable him to keep on hand a supply equal to two years Consumption.-

9. The Exports by Sea & the Sale of Salt to the French Government in both of which there was an increase, call for no remark.-

Frontier Customs

10. In Frontier Customs there was an increase of Rupees 14,228-4-5- which arose principally from the quantity of Indigo, which passed across the frontier to Pondicherry.-

Sea Customs

11. In Sea Customs there was a decrease of Rupees 8,581-15-4- caused chiefly by the want of tonnage for Indigo, which was consequently passed by land to Pondicherry & Madras for shipment.-

Abkarry

12 The increase of Rupees 7,000 in abkarry arose from greater competition in the rent for the farms.-

13. In the Exports of Sugar there was an increase of Candies 593, while in those for Rum there was a decrease of 11,565 Gallons, the cause of the falling off in the latter being attributed to the large quantities purchased by the abkarry renters and in the refinement of sugar.-

Small Farms Moturpha Stamps-

14. Under these several branches of Revenue, there was an increase of

of Rupees 538-3-11 Rupees 1,068-5- & Rupees 6,458-8-4- respectively, and require no remark.-

15. Of the total demand Rupees 4,33,522-11-6. were collected within the fusly & Rupees 25,316-6-8- subsequently leaving a balance of Rupees 426-6-5- which it is stated is in proces of recovery.

16. The arrear outstanding at the close of the fusly was Rupees 9-7-10 of which Rupees 2-8-2- have been since recovered and the remainder Rupees 6-15-8- stated to be irrecoverable, the Board recommend that sanction be granted for writing off in the accounts.-

17. The Charges for the year were Rupees 19,088-8-6 above the previous one, which however is stated to be chiefly nominal. The amount due to the French Government for the suppression of salt is Rupees 14,000 per Annum, of which only a Moiety was drawn in Fusly 1261.- while in the year under report the full sum due & the balance of the previous one was paid this causing a difference of Rupees 14,000 in this one item alone.-

18. The gross collections including current, Extra & arrears, within the fusly, Amounted to Rupees 4,64,033-7-2- from which the Charges, Rupees 71,670-7-5- being deducted, there remained a Net revenue of Rupees 3,92,362-15-9 or Rupees 48,869-11-6 below that of Fusly 1261.-

19. The wastage of salt exhibited in Statement E. will be Submitted for the sanction of Government when similar returns from other Districts are received.-

Ordered that a Copy of the foregoing Extract with the Annexed Comparative Statement of the Collections, Charges and Net revenue be submitted to Government and transcript of the same be forwarded to the Collector of South Arcot.-

Fort St. George 9th January 1854.

Read the following letter—

No. 87.

To,

B. Cunliffe Esqre.

Acting Secretary to the

Board of Revenue,

Fort St. George.

Sir,

(32)

B. No. 2663.

From the Coll. of Tanjore

Reporting about the tarwar books of the 447 Villages which are now proposed to be copied—

I have the honor to reply to the Board's proceedings of the 11th of last July—

In the 447 Villages of Trivady Puttoocottah, and Shrally, the tarwar books of which it is now proposed to copy, there are 208848 numbers, and allowing an average of 8½ numbers to each side of paper 24768 sides will be occupied, or 258 quires of paper—The performance of this work at the rate of 78 Sides a day or 540 in a Month, would occupy a man forty Six Months, and his pay at ten Rupees a Month, would, in the aggregate, amount to Rupees 480.—To ensure accuracy it would be necessary that the fresh copies should be compared with the originals, and allowing that the work performed by four copyists could be examined by two examiners, twenty three of the latter should be added to the forty six copyists and their pay at the same rate would in the aggregate amount

Trivady — 9¾
Puttoocottah 5.
Shrally — 5.
Average 8½.

amount to 230 Rupees.

For Saderward it will be necessary to provide 310 quires of paper, 258 for the actual copying with an allowance of ten per Cent or 26 quires for blank leaves, and a similar quantity for correspondence and reports which at

Ink and Inkstands	8	"	"
Pens	1	8	"
Cloth of duffer roomals	4	8	"
Mats	1	"	"
Thread	2	"	"
Red Cotton for making red ink	3	"	"
Oil	20	"	"
Sundries	5	"	"
	43	"	"
Paper	46	8	"
	89	8	"

the rate of one and a half Rupee for every ten quires, would cost Rupees 46 8 " Minor articles, as noted in the margin, would raise the total cost to Rupees 89 8 "

In the 1080 Villages in the talooks of Trivady Pattoocottah, Keevalore, Nunnillum Mayaveram Cottalum and Parallum, from the Chittahs of the tarrumdars of which it is proposed to prepare tarwar accounts, there are 3,18,487 numbers, and allowing about eight numbers to each side of paper, 39,811 sides or 415 quires would be wanted. As this work requires calculation it would not proceed so quickly as the mere copying, and nine sides a day, or 270 in a Month is probably as much as one person

person could perform; at this rate 148. Months would be occupied, and at a Monthly salary of ten Rupees, the aggregate cost would be Rupees 14,80. The first rough calculation would however have many errors erasures, and corrections as is very much the case with the present turrum books, and as it is most desirable that these accounts, on the correctness of which so much depends should be fairly written and free from all suspicion of subsequent irregular alteration, I would propose that a fair copy be made of the first rough calculation, which proceeding at a double rate would cost only half the sum, or Rupees 740 " " and again halving this for the cost of the examiners on the same calculation as was made for copying the tarwar accounts we shall have Rupees 370 to add, and raise the total cost for calculating, copying and comparing to Rupees 2,590.

As this work should proceed in the vicinity of the Collector's Cutcherry, so that references may be always made on any difficulties occurring, the same Superintendent whom it has been proposed to place over

the

the copyists at Tanjore, cannot be made available, and I therefore propose to entertain another superintendent over this work, whose pay at Rupees 35, and whose Goomastahs pay at Rupees a month, would in two years within which however the work will probably be completed amount to Rupees 1080, thus raising the expence to Rupees 3,670

For Saderward 1,010 quires Viz 415 for the calculation, as many for the final copying and twenty per Cent added to each for blank leaves, correspondence and reports would at the rate of ten quires for one Rupee and a half cost Rupees 151 — 8 — " and the items noted in the Margin being as before added, the cost under this head would be raised to Rupees 310 — 8 — "

Ink and Inkstands	24	"	"
Pens	8	8	"
Cloths for drafter roomalai	15	"	"
Mats	3	"	"
Thread	8	"	"
Red Cotton for red ink	7	"	"
Oil	87	8	"
Sundries	10	"	"
	159	"	"
Paper	151	8	"
	310	8	"

I would further add to the estimate the expences of entertaining a Moochee and a Mufsaljee the Mahrattah accounts require much ruling, which the Goomastahs do but clumsily and

and both time and space would be saved by having the work performed by a duly qualified person, at 7 Rupees a Month for the former, and 5 Rupees for the latter, their pay for two years would amount to 288 Rupees.

When all the copying and calculation is over for the preservation of the tarwar books, it is essential that they should be roughly bound, and calculating that four quires may be put into each book, there would be 185 books made from the 740 quires it is expected that the accounts will occupy and on a estimate of nine annas for each book, Rupees 104 would be the cost.

The total expence therefore for recopying the tarwar accounts would be Rupees 819 — 8 — ", and for preparing accounts from the tarwar Chittahs Rupees 4,044 — 8 — " making with the pay of proposed Moochee and Mufsaljee, an aggregate of Rupees 5152 which added to the late Collector's estimate already submitted for sanction would raise the total sum required to Rupees 43,879 — 8 — " whereas the Village and Rent Curnams' funds

the copyists at Tanjore, cannot be made available, and I therefore propose to entertain another superintendent over this work, whose pay at Rupees 35, and whose Goomastahs pay at Rupees a month, would in two years within which however the work will probably be completed amount to Rupees 1080, thus raising the expence to Rupees 3,630.

For Saderward 1,010 quires viz 415 for the calculation, as many for the final copying and twenty per Cent added to each for blank leaves, correspondence and reports would at the rate of ten quires for one Rupee and a half cost Rupees 151—8—" and the items noted in the Margin being as before added, the cost under this head would be raised to Rupees 310—8—"—

Ink and Inkstands	24	"	"
Pens	6	8	"
Cloths for dufter roomalai	15	"	"
Mats	3	"	"
Thread	6	"	"
Red Cotton for red ink	7	"	"
Oil	87	8	"
Sundries	10	"	"
	159	"	"
Paper	151	8	"
	310	8	"

I would further add to the estimate the expences of entertaining a Moochee and a Mufsaljee the Mahrattah accounts require much ruling, which the Goomastahs do but clumsily and

and both time and space would be saved by having the work performed by a duly qualified person, at 7 Rupees a Month for the former, and 5 Rupees for the latter, their pay for two years would amount to 288 Rupees.

When all the copying and calculation is over for the preservation of the tarwar books, it is essential that they should be roughly bound, and calculating that four quires may be put into each book, there would be 185 books made from the 740 quires it is expected that the accounts will occupy and on a estimate of nine annas for each book, Rupees 104 would be the cost.

The total expence therefore for recopying the tarwar accounts would be Rupees 819—8—", and for preparing accounts from the tarwar Chittahs Rupees 4044—8—" making with the pay of proposed Moochee and Mufsaljee, an aggregate of Rupees 5,152. which added to the late Collector's estimate already submitted for sanction would raise the total sum required to Rupees 43,879—8—" whereas the Village and Inam Cummis

funds

Fort St. George 9th January 1854.

fund from which the money is to be taken, amounts to Rupees 43,910.

I need only further explain that the rate of the Copyists and Goomastahs pay has been slightly increased on Mr. Bishop's estimate, in consequence of the work at present in question being all in Mahrattah and requiring a different class of servant for its performance than does the copying of the Pymash accounts, which are all written in tamil.

Should it be considered expedient to sanction this work, I propose to employ two persons for making the Tarwar calculations, eight for copying the Tarwar accounts, and four for examining both, and with these I anticipate that with every allowance for unavoidable delays the work will not extend beyond two years.

Tanjore 4th October 1853. } (Signed) A. Forbes
Collector

Fort St. George 9th January 1854.

Ordered that the foregoing letter and the previous correspondence on the subject be submitted with the following address.—

No. 15

(32.33)

To the Chief Secretary to Government.—

Sir,

With reference to paras of Extract Minutes of Consultation dated 18th October 1851 and to the papers noted in the margin I am directed by the Board of Revenue to submit for the orders of the Right Honorable the Governor in Council, the accompanying correspondence with the Collector of Tanjore, respecting the Copying of certain Pymash and Tarwar accounts.—

P. No. 63

From Do. 4th October 1853
in Con. 9th January 1854.

2 In the above Minutes of Consultation the Government at the recommendation of the Board directed that the Cannum recently authorized be employed in the Copying of the Survey accounts.—

3 In his letter of 7th January 1853 the Collector requesting sanction for increasing the number

Number of copyists, and adding to their present rate of payment, stated as his opinion that the Completion of these accounts Could not be expected for many years owing to only 23 Cummums out of the 180 recently nominated being employed in the work, the remainder being engaged in various Talooks at the Boozoot Cutcheery, and in the preparation of the Summabundy accounts for Fasly 1262.—

4 As no account was furnished shewing the additional hands that would be required and the increase of the Salary the Board requested the Collector to submit a Statement which he has accordingly done, and from his letter dated 12th February 1853 it will be observed that he advocates the Employment of Copying Establishments entirely Separate from those at present available, whose Services are much required for the general duties of the District.—

5 The total Number of Survey accounts are stated to be 271697, of which 144163 have been Copied leaving 257744 to be still finished besides these there are the accounts of Fasly 1214—15 & 26.—

6 Mr Bishop calculates that the Copying of the above accounts for Fasly 1236 & 1238 with 36 Copyists will occupy a period of 5 years and those

those of Fasly 1214 15 and 26. with the same Number of hands 14 Months the whole at a Cost of Rupees 38727 8 0 as particularized in the Statement.—

7 As similar work to the above was performed in Bellary at 11 8 p% for Pymish and 7 annas per% for Jarwar, the Collector was requested to state whether the quantity of work required of each individual in Tanjore might not be increased, so as to reduce the expense to an average rate of 9 4 p% but it will be seen from Mr Forbes letter that as the Survey accounts to be Copied are of a very detailed nature the lands being valuable and the holders of them Numerous a single Number being frequently held by more than one person, and each holding so irregular in its shape as to occasion more than ordinary detail in the Entry of its boundaries and measurements no reduction can be made in the Estimate framed by Mr Bishop Mr Forbes is also apprehensive that the actual cost both of the Salaries of Copyists and of Stationary will exceed Mr Bishops Estimate but the Board trust that as more experience is gained in the work the Cost of Copying these accounts will fall within the Estimate.—

To Tanjore 4th March 1853

From Collr 20th April & Cor 15th May 1853.

8 The above Charge having reference only

To Tanjore 16th May 53

From Sr. Collector 25th June in Cons 11th July 1853.

only to the Survey accounts the Board called upon the Collector for information respecting the State of the Tarwar accounts and from Mr. Forbes letter it will be observed that these also require to be respected There are in all 1818 fields assessed Villages in the District of which only the accounts of 457 Villages were ever fully prepared For 1080 Villages the Tarum Chittah shewing the different rates of assessment per Vaily in grain only fixed for each Villages were prepared and for the remaining 291 Villages neither Tarwar accounts nor Tarum Chittahs were prepared.—

From Collr. 4th Octr. 1853

9 The total number of accounts in the 457 Villages is 208848 and in the 1080 Villages 318487 which with ten persons to be employed for making the Tarwar Calculations Eight for Copying the accounts and four examining both it is supposed a period of two years will be occupied in Completing the work.—

10 The Estimated Cost for the above including the pay of a Superintendent and his Gomastahs a Moochee and Tuffaljee, with Sadewarde is Rupees 3752 which added to the Cost for respraying the Survey accounts gives an aggregate sum of Rupees 43879 8.—

11 To meet the expenses of this work it is proposed that the persons to be employed be

paid from the available Surplus of Curnum and Nat Curnum wages amounting to Rupees 43910 and taking into consideration the Circumstances brought to notice the Board beg to recommend the Employment of the Several Establishments the disbursement as suggested being defrayed from the Surplus in deposit appertaining to the Curnums and Nat Curnums.—

12 On the completion of the whole the Collector will be directed to submit a Statement of actual Charges for the Special Sanction of Government.—

B. No. 3129

From the Collector of Madura — Requesting permission to degrade Jaggana-da Row at present Tahsildar of the Tenkurry Taluk.

Sir,

I regret to feel it my duty to request the permission of the Board to degrade Jagganada Row at present Tahsildar of the Shenkurray Taluk to a situation requiring less energy and ability —

2 In the Office of Moozoomdar of the Shenkurray Taluk which he held when I came into the District he acquitted himself so respectably that when the Sub Collector requested me to point out some Officer of the Principal Division who might be supposed fit for promotion to a Tahsildary I recommended this person he has however proved wholly unequal to the responsibilities involved in the higher appointment, and gave the Sub Collector such frequent cause of disapprobation, in the Tahsildary of Syempully that he transfered him to Shenkurray since made to the Principal Division Here he has not at all improved his character for honesty is not impeached, and his general behaviour very respectable but he is so inert and exhibits so little forethought and activity that the interests of Government in

Fort St. George 9th January 1854.

in a most important Taluk will be entirely sacrificed if he remains in charge of it. —

3 The most recent instance of his incapacity is the very dilatory Execution of a Calingala in the Alagaparay Anay or channel at a spot called the Malaya-pillay Mooroovoo The Order for the construction of this work which is included in the Ordinary Estimates for 1853 went from the Collectors Cutcherry on the 22d January 1853 The money for the purpose was called for by the Tahsildar from the General Treasury on the 14th February 1853 The Rule is that such works should be finished by the 15th May so that they may harden before the freshes which usually come down in June. But the Chunam was not ready till the 16 May, and not till after this was the excavation for the foundation even commenced From the enclosed Extract from a letter by the Civil Engineer it appears that in July they were still only in progress The work was completed on the 8th October and next day it was destroyed by a Fresh This narative requires no comment and exhibits very faithfully the Character of the Tahsildars proceedings in every other Departments. —

Madura
Meyloor.

Collector

Extract

Extract from a letter from the Civil Engineer 8th Dn. dated the 22d November 1853.

The Estimate for the Calingula was sanctioned on the 30th November 1852. & I conclude therefore that advances for & materials were made to the Natamgars as early as January or February of this year and yet it was not till July that the work was actually commenced. I was at Peraeclum on the 6th July and made particular enquiries of the Tahsildar and Talook Servants respecting this work and was informed that the excavations for the foundations were only then in progress. I warned the Tahsildar that if any accident should happen to the work thro' delay in its & completion he would be held responsible. I repeated this warning in the Margin of Assistant Surveyor Mason's Diary / List of Examinations / of the 18th August 1853 and still notwithstanding the Calingala was not completed till the 8th October one day before the freshe which caused the damage occurred.—

From the Collector of Madura.

Sir, I have the honor to enquire whether the Court deem themselves competent to receive applications for Pensions to Servants rendered unfit for duty by long Service the pensions being of course chargeable to the Zemindaries. My reason for asking the question is that the interests of the Shevagunga Zemindary suffer much at present by the & Head Gomastah and one of the Ameens & being throughly superannuated. It requires no & argument to shew that this fact must be prejudicial to the Immoveable property, and at the same time it will be admitted that all the reasons that exist for granting pensions to old Servants on the Government & Establishments apply to large Zemindaries & like Shevagunga.—

From the Collector of Madura

Sir,

I have the honor to submit translate of a Plaint preferred by Alagatchee Cone and another of the Village of Kondy-cuil Putty in the Maylore Talook against Mr. Clarke Acting Collector as Defendant in O. S. No. 88 of 1853 on the file of the Subordinate Court at this place with the Draft of a proposed answer and to request Sanction for the defence being conducted at the public expense.

Madura 29th December 1853.

I Signed R. D. Parker
Collector.

No. 1.

Translate of a Plaint dated 28th September 1853 in O. S. No. 88 of 1853 on the file of the Sub Court of Madura instituted by

Plaintiffs — Versus — Defendents

1. Alagatchee Cone Son of Eroopana
1. T. Clarke Esqre. Acting

Jaffna Ss. George 9th January 1854.

Carroopana Cone residing at Nondicanil Putty in Meyloor a Cultivator and aged 40 years.

Y

2 Veerana Cone Son of Walagandy Cone aged 15 years through Vakeel Govaroosawmy Sastry.

Acting Collector of Madura

Y

2 Sremmasawmy Panikken Son of Veerana Panikken of Cusbah Meyloor.

This suit has been instituted for recovery from Defendants of 3 Caunies of Mulgoozary Nunjah land yielding annually Rupees 31-14-4 and paying a revenue of 18 Rupees to Government together with a Tank called Cumdatanem Yendal Vn. valued at 30 Rs belonging to it.

1. The Plaint sets forth that Cumdatanem yendal hamlet of Nondycanil Putty in the said Talook had been ancestral to one Moongootee Sundan about 70 years before. It therefore heard also the name of Moongootie yendal The said Kundan sold the same prior to 70 years to Allagatchee Cone

Plaintiffs

Jaffna Ss. George 9th January 1854.

Plaintiffs Grandfather for 19 Cully Pons and has executed a Bill of Sale for the same in virtue of which the purchaser and after him the Plaintiffs father and their Uncle Veeranen enjoyed the same with their names entered in the Village accounts aswell as in those of the Fyarb of Fusly 1212.

2- In consequence of a question started by Moongoontee Son of the above named Moongoontie Sundan in the year Vicrorthee 1830 regarding the Yendal in dispute consequent to the missing of the Bill of Sale referred to, it was heard and determined by certain arbitrators convened at Meyloor for the purpose in pursuance of which decision Carroopana Cane father of the 1st Plaintiff paid 10 Cully fanams to the above named Moongoottee and obtained a fresh Bill of Sale under date the 3d Chitterai of Vicrorthee or 30th April 1830 shewing the former sale and also stipulating that the Yendal in question shall be held and enjoyed by the purchaser Carroopana Cane and his Coparceners and their posterities.

Afterwards

3. Afterwards in consequence of a dispute between the said Caroo Iyana Coree and his Coparceners the the syendal in question had been left waste for some years, but as it is common to the said Caroo Iyana Coree and his nephews the 2d Plaintiff and one Paria Caroo Iyen he the said Caroo Iyana Coree sold his Share for Rupees 10-13-4 including Poromboke or fee of the Writer of the Deed to the fathers of the 1st & 2d Plaintiff and passed a title deed on a plain Cadjan of double leaf under date the 13th Tye of Thoonmoo Ree or 27th January 1837.

4. As the Plaintiffs were unable to protect the land in question from being absorbed by the Water Spread of the Tank at the expence of some money it was in consequence left waste

waste as unfit for cultivation. This afforded the Plaintiffs the convenience of having cattle graze upon it and of bailing water in the Tank to certain of their paddy fields situated close to it and also of selling the surplus portion of it to Conda Iyen and others. The father of the 1st Plaintiff having died the latter became his heir and as the present circumstances of all the Plaintiffs are bettered, they are prepared with the means to make the necessary repairs to the land in question and accordingly endeavoured to carry out their wishes.

6. Such being the case the 2d Defendant

Fort St. George 9th January 1854.

Carroopana Cone residing at Kondicanilputty in Meyloor a Cultivator and aged 40 years.

V

2 Veerana Cone Son of Walagandy Cone aged 15 years through Vakeel Govaroosawmy Sastry.

Belong Collector of Madura

V

2 Shunmasawmy Panikken Son of Veerana Panikken of Cushaka Meyloor.

This Suit has been instituted for recovery from Defendants of 3 Cawnies of Mulgoozary Kanjah land yielding annually Rupees 31-14-4 and paying a revenue of 18 Rupees to Government together with a Tank called Cumdatanem Yendal Vpa valued at 30 Rs belonging to it.

1. The Plaint sets forth that Cumdatanem yendal hamlet of Kondycanilputty in the said Talook had been ancestral to one Moongoto Sundan about 70 years before. It therefore heard also the name of Moongootte yendal The said Sundan sold the same prior to 70 years to Villagatchee Cone

Plaintiffs

Fort St. George 9th January 1854.

Plaintiffs Grandfather for 19 Cutty Pons and has executed a Bill of Sale for the same in virtue of which the purchaser and after him the Plaintiffs father and their Uncle Veeranen enjoyed the same with their names entered in the Village accounts aswell as in those of the Fysul of Fusly 1212

2. In consequence of a question started by Moongoontee Son of the above named Moongoontte Sundan in the year Vicrootree 1830. regarding the Yendal in dispute consequent to the missing the Bill of Sale referred to, it was heard and determined by certain arbitrators convened at Meyloor for the purpose in pursuance of which decision Carroopana Cane father of the 1st Plaintiff paid 10 Cutty famam to the above named Moongoottee and obtained a fresh Bill of Sale under date the 3d Chittersy of Vekroorthee or 30th April 1830 shewing the former sale and also stipulating that the Yendal in question shall be held and enjoyed by the purchaser Carroopana Cane and his Coparceners and their posterities.

After wards

3. Afterwards in consequence of a dispute between the said Caroo Iyana Coree and his Coparceners the the Pyendal in question had been left waste for some years, but as it is common to the said Caroo Iyana Coree and his new phews the 2d. Plaintiff and one Paria Caroo Iyen he the said Caroo Iyana Coree sold his Share for Rupees 10-13-4 including Hono: Sirkar Thirum or fee of the Writer of the Deed to the fathers of the 1st & 2d. Plaintiff and professed a title deed on a plain Cadjan of double leaf under date the 13th Tye of Shoonmoo Kee of 27th January 1837.

4. As the Plaintiffs were unable to protect the land in question from being absorbed by the Water Spread of the Tank at the expence of some money it was in consequence left waste

waste as unfit for culturation. This afforded the Plaintiffs the convenience of having cattle graze upon it and of bailing water in the Tank to certain of their paddy fields situated close to it and also of selling the surplus portion of it to Conda Tauen and others. The father of the 1st Plaintiff having died the latter became his heir and as the present circumstances of all the Plaintiffs are bettered, they are prepared with means to make the necessary repairs to the land in question and accordingly endeavoured to carry out their wishes.

5. Such being the case the 2d Defendant

Fort St. George 9th January 1854.

Defendant who has nothing to do with the Yendal in question and who holds no land in the mother Village of Kondicoil Putty through spite against the Plaintiffs gained over the Tahsildar of Meylore and obtained the same in Coule in the absence of any formal notification being sent and endeavoured to cultivate the lands under it On the Plaintiffs complaining of it to the Head Assistant Collector he gave an Endorsement under date the 8th April last to the effect that the Tahsildar did send

Fort St. George 9th January 1854.

send the usual notification to the Village and that in giving the Coule in question he has acted rightly. The Plaintiffs appealed to the 1st Defendant but without better success he having also passed an Endorsement under date the 2d May following without considering the Documents aforesaid confirming the order of the Head Assistant Collector.

6. As the Yendal in question which belongs to the Plaintiffs having been given in Coule to the 2d Defendant by a Government Servant by dint of his authority the necessity to obtain its concealment obliged the Plaintiff to include the Collector of the District as a Defendant the nature of the suit being such as requires it to being brought chiefly against public Officers.

7. The Plaintiffs therefore pray that a Decree may be passed adjudging them the enjoyment of the 3 Cawnies of Nunjah land appertaining to Conda Tavem Yendal in the Villages of Nondy coil Putty and bounded on the east by the Poonjah land of Moolipayel South by the jungle of Poolechanevlum west by the Nunjah land of Chockalingum and Caroopen

and

and moreover the Poonjah lands of Oothem Coopran monday Pattah yielding annually Rupees 31-12-- together with the Yendel in question valued at Rupees 30 as per following particulars

Value of 30 Cullums of Paddy being the annual produce of 3 Cawnies at 10 Cullums each and at one Rupee per Cullum Rupees ——— 30-0-0

Value of 30 Bundles of Straw ——— at 10 per Cawney and at one Anna each Bundle Rupees 1-12-0

31-12-0

True translate.

Signed R. D. Parker Collector

No. 2

Proposed answer to Plaint in O.S. No. 88 of 1853 on the file of the Subordinate Court of Madura.

1— This suit is altogether destitute of foundation.

2— The land for which it is brought has been waste from the commencement of the

the Company's Rule and the Government during that period has not received the Teerwa from it to which they are entitled. Such being the case according to the Custom of the Country it belonged absolutely to the Government to do what they would with it. It is prescribed and laid down in the Hoo Rummanah that a Ryot leaving land waste may regain it within 3 years but not beyond. This period had been exceeded many fold in the present case. The land in question would have been forfeited by non-payment of Teerwa for so many years, but the Plaintiffs have not even the colour of right which might have been alleged, had it been a Meerasee or Karay Village. neither the Hamlet of Kondicoui Puttu nor its parent Village Mayloor is Meerasee.

4— Moreover, though not essentially necessary as regards such very old waste in a non-Meerasee Village a Proclamation was made in the Village calling upon any persons who objected to the land being given to the 2nd Defendant

Fort St. George 9th January 1854.

Defendant on Cowle to come forwards and state their claims to the Boorgoo and no one having appeared before the 28th ulto February an order was passed to grant the Cowle.

5. Under the above circumstances the 1st Defendant trust that the Court will dismiss the Suit with costs.

(Signed) R. D. Parker
Collector.

(42.43)
B. & N. 62

Proceedings thereon. Resolved that the letter above recorded together with its Enclosures be submitted for the consideration and orders of the Right Honorable the Governor in Council.

Submitting a letter from the Collector of Madura forwarding translation of a plaint filed against the late Acting Collector and another party in the Sub Court in O.S.N. 88 of 1853 together with draft of a proposed answer and requesting sanction to defend the Suit at the public expence and recommending that the Collector's request be complied with.

Fort St. George 9th January 1854.

2. The Plaintiffs in this Suit are a Lagayat the One and Veerma One who allege that a piece of Malgoozary Nunjah land measuring 3 Cawnies and belonging to them had been unjustly given on Cowle to one Chennasamy Panikem, the 2d Defendant by the Tahsildar of Meylore and that on their complaining of this to the Head Assistant Collector and Subsequently to the late Acting Collector the decision of the Tahsildar was confirmed by both Officers. The Suit is therefore for the recovery of the above piece of land as well as a tank &c situated therein and valued at 30 Rupees.

3. The draft answer pleads that the land in question has been waste from the commencement of the Company's Rule and that according to the Custom of the country it belonged absolutely to Government that according to the Rules of the Poolroonnamah, the Plaintiffs had forfeited all rights thereto, as they had permitted it to lie waste, for more than 3 years and had never paid any Peishkush on account of it. It is further alleged that previous to the land being made over to the 2d Defendant a proclamation had been issued calling upon any person who had objections to the transfer to appear before the Collector and state the same but that no one appeared till the 28th February 1853, when the order of transfer was issued.

4. Under the circumstances above explained the Board are of opinion that the Suit is wholly groundless and accordingly

Fort St. George 9th January 1854.

accordingly beg to recommend that the Collector may be authorized to file the draft answer, and conduct the defence at the public cost as requested by him.

(44)

B. R. 3314.

From the Collector of Tennanelly — furnishing explanation regarding the dismissal of the Petitioner in No. 1327 of 1853 and requesting that his dismission may be confirmed.

Sir,

With reference to your letter of 4th August last enclosing Petition No. 1327 of 1853 from Ammiah Moodly dismissed Curnum of Coilpatam in the Punjahmal Taloor I have the honor to explain that a pernicious practice exists here of public servants in applying for leave of absence to ask for a much shorter extent than they really intend to have in order that some Substitute of their own naming may be admitted to carry on their duties. Several cases have occurred while I have been in the District in which public Servants have gone on leave of absence for short periods and asked for and obtained repeated extension leaving

Fort St. George 9th January 1854.

leaving irresponsible persons in their places, and in some of these it has turned out that the incumbent never meant to return here but made use of the expedient under notice to draw Salary, or a portion of it for some months after ceasing to perform Service.

2. The present Petitioner is not a Native of Tinnevelly District nor of course a hereditary Curnum of any Village in the District. He is seeking 6 Months leave therefore to go to his Native place leaving his own substitute in his place, and then making an application for an extension of 12 Months at so short a period before the expiration of the first leave granted as to render it impossible for him to be at his post in time should the extension be refused, gave just ground to believe that he was attempting to put in practice the Stratagem above described. For this reason and because the Petitioners Character as a public Servant was bad I thought his case a very proper one to make an example of

Petitioners first Employment

3. in

Fort St. George 9th January 1854.

in this District was in 1826 in lieu of a Curnum of Tenneurrey in Streavelly pro- tor Talook dismissed for fraud, who however was afterwards reinstated, but in 1832 Petitioner was appointed as Curnum in the same Village on a Va- cancy caused by the resignation of a Second Curnum. In 1834 Petitioner was convicted of a fraud fined 30 Rupees and moved to be Curnum of Wallrayer exoopoo in the same Talook, from which situation he was dismissed in 1837 for fomenting disputes between the Mahajanums and other Ryots. In 1838 Petitioner was made Curnum of Coduvoochy of Tenvansey Talook - where in July 1249 he was fined 10 Rupees forgiving false information regarding a land dispute. He was also subsequently fined twice in smaller sums for miscon- duct of less serious kinds and in July 1849 he was suspended for a year for omitting to bring to account cultivation liable to Teeruah amounting to Rupees 12-6-11 and after the expiration of the suspension he

Fort St. George 9th January 1854.

he was at the request of the Ten- cauvey Tahsildar removed from that Talook and appointed Curnum in the Village from which he was dismissed on 29th October 1852.

4. Under these circumstances I trust the Board will be pleased to confirm the dis- mission of the Petitioner.

Tinnevelly 13th December 1853. } Signed C. J. Bird Collector.

Board of Revenue.

(46)

B. N. 3722.
From the Collector of Coimbatore.

Forwards the Statements of the Extra Revenue Settlement for Fusly 1262 showing an increase of Rupees 5,201-1-2 above the past year. Shows the increase and decrease under different heads and the Demand Collection and Balance.

Sir,

Para 1. I have the honor to forward the usual Statements of the Extra Revenue Settlement of this District for fusly 1262 unconnected with the Land Revenue.

2. The aggregate demand for fusly 1262 amounts to Rupees 2,41,480-8-3, which is more than the demand of the previous year, by Rupees 5,201-1-2 as shown in the following Statement.

Items.	Demand for fusly 1261			Demand for fusly 1262.			Comparison. Increase			Decrease		
Abkarry	80,560	"	"	91,800	"	"	11,240	"	"	"	"	"
Sundry Small Farms and Licenses	2,670	3	9	2,483	12	3	"	"	"	186	7	6
Sales of Sandalwood &c.	3,282	3	4	18,132	6	3	14,850	2	11	"	"	"
Stamps Revenue	22,847	4	"	23,140	4	"	293	"	"	"	"	"
Motorpha	78,220	1	6	77,596	14	11	"	"	"	623	2	7
Profits on Tobacco	48,699	10	6	28,327	2	10	"	"	"	20,372	7	8
Total	2,36,279	7	1	2,41,480	8	3	26,383	2	11	21,182	1	9
							Deduct Decrease			21,182	1	9
							Net Increase			5,201	1	2

3. The advance in the Abkarry Revenue Rupees 11,240-"-", has been occasioned by increased Offers. Rupees 9,271 were recovered within the Fasly,

the

the residue of 529 having since been adjusted

4 In Sundry small Farms and Licenses there is a decrease of Rupees 186–7–6. from reduced Offers for the Ferry Farm in Andoor Talook necessarily caused by the construction of the Cawvery Bridge. Rupees 2,417–9–6 were realized within the 11.th of July 1853, and 56–2–9 subsequently adjusted the balance of 10 Rupees is in the Coroor Talook which is in course of liquidation.—

5. In the revenue derived from the sales of Sandalwood &.c.a, there is an increase of 14,850–2–11 arising chiefly from the sales, in 1262 of Sandalwood &.c.a which were in store in the District, as well as from the amount of Commission chargable for 1261 and 1262 on the Minor Polipats under the managment of the Court of Wards, having been brought to the Credit of Government— the Memorandum below will exhibit the increase and decrease in each item.—

Items	Fusly 1261			Fusly 1262			Comparison Increase			Decrease		
Sales of Sandalwood	2,670	"	10	17,083	3	4	14,413	2	6	"	"	"
Sales of Teakwood	214	6	3	193	12	"	"	"	"	20	10	3
Sales of Ivory	43	10	11	168	5	"	124	10	1	"	"	"
Batta or gain by Exchange	"	"	6	"	"	2	"	"	"	"	"	4

Interest account	58	8	2	68	9	10	10	1	8	"	"	"
Commission on Private Estates under Management	162	8	8	320	9	10	158	1	2	"	"	"
Total	3,282	3	4	18,132	6	3	14,870	13	6	20	10	7
				Deduct Decrease			20	10	7			
				Net Increase			14,850	2	11			

Quantity felled
1261 — 300
1262 — 50
250

6. The Charges under this head, fall short of those of the previous year in the sum of 999–4–3. caused by diminished quantity of Sandalwood cut this year in the Neilgherry Forests.—

7. The Amount derived from the sale of Stamp Papers and Cadjans exceeds that of Fasly 1261 in the sum of Rupees 293– caused by increased sales this year, and the refunds under Act N.o XVII of 1848. also exceed those in the previous fusly, by 686–6–2.—

8. The demand of Motorpha Revenue as settled for the fusly under review is below the demand of the last the deficiency being 623–2–7 Collections to the 31.st Ultimo were 77,589–8–9 leaving a balance of only 7–6–2 in Congiem for the adjustment of which, the Tahsildar has received the requisite instructions.—

Items.	Fusly 1261			Fusly 1262.			Increase			Decrease		
House tax	14,206	8	2	13,148	"	"	"	"	"	1,058	8	2
Loom tax	27,347	6	5	27,744	12	3	397	5	10	"	"	"
Bazar tax	11,620	13	8	11,509	15	7	"	"	"	110	14	1
Professional tax	25,045	5	3	25,194	3	1	148	13	10	"	"	"
Total	78,220	1	6	77,596	14	11	546	3	8	1,169	6	3
				Deduct Increase						546	3	8
				Net Decrease						623	2	7

9. The increase in the amount of Looms and

and professional taxes, has been produced by an augmented number of Looms and Petty traders. and the decrease in House tax has occurred from death and desertion, as well as from the contributors to Moturpha having become landholders. Whilst that in the Bazar tax was caused by a reduction of demand on such as aswere found incapable of bearing it.

10. The deficiency in the profits on Tobacco, Rupees 20,372 — 7 — 8, has been owing to the abolition of the Monopoly from the 1st January last, under the Orders of Government dated the 2d and 9th November 1852. Under the head of charge, an excess of 953 — 15 — " will be observable which arises from the fact that with reference to the Government orders of the 17th December 1852, a portion of the price paid by Travancore for Tobacco purchased from this District, was refunded with a view to assimilate the payment made by that State to the average price realized by the sale of the article.

13. The following Abstract shows the Demand, Collection and Balance of Extra Revenue for the year under report.—

	Demand for Fusly 1262.	Collections. Within the year	Collections. To the 31st Oct. 1853.	Total.	Balance.
Abkarry	9,800 " "	9,271 " "	529 " "	9,800 " "	" " "
Sundry small Farms and Licenses	2,483 12 3	2,417 9 6	56 2 9	2,473 12 3	10 " -
Sales of Sandalwood &c.	18132 6 3	18,132 6 3	" " "	18,132 6 3	" " "
Stamp Revenue	23,140 4 "	23,140 4 "	" " "	23,140 4 "	" " "
Moturpha	77,596 14 11	76,277 9 3	1311 15 6	77,589 8 9	7 6 2
Profits on Tobacco	2,832 7 2 10	2,832 7 2 10	" " "	2,832 7 2 10	" " -
Total	2,41,480 8 3	2,39,565 15 10	1897 2 3	2,41,463 2 1	17 6 2.

14. The Cultivation of Mauritius Sugar cane has been less in this Fusly.- the whole produce was appropriated to the manufacture of Jaggery for inland consumption. The Establishment of a Sugar Manufactory is a great desideratum in this District.—

1261—47—5
1262—54—13½
" —17—5½

15. The population of Coimbatore as ascertained in the year under review was 1,15,362 Souls. the quantity of Salt required amounts to

7,000 Rupees worth per head per annum upon the average.

to as much as 2,59,620 Maunds of 3,200 Rupees weight. The Supplies from the eastern and Southern Pans are estimated at 233,362 Maunds less by 26,258 Maunds than the required quantity. the early Establishment of Salt Depots in the District as proposed in my reply to the Board's Circular of the 20th January last, will be a real blessing to the Native community in general.—

16. The Indian Maund has been substituted for the Ghurce, with reference to the Boards Orders of the 20th January 1853.—

Coimbatore
23d November
1853

/Signed/ E. B. Thomas

No. 168 / 1853

48

B. No. 1

To

W. H. Bayley Esqre
Secretary to the Board of Revenue
Fort St. George

Sir,

From the Collector of Malabar } I have the honor to forward translate of a Plaint filed in the Principal Sudr Ameen's Court of Tellicherry against the Head Assistant Collector of Malabar by one Koypally Choundoo and to request with reference to the grounds advanced in the accompanying Draft of the proposed answer, you will be good enough to procure the required authority of the Board to defend the Suit at the public expense.

Calicut ..... } / Signed / W. V. Conolly
20th December 1853 } Collector

To

The Principal Sudr Ameen's Court
of Tellicherry

The Plaint of Koypully
Choundoo of Mayyalung at Unnahom
and Deshom in the Chernaket
Jalook.

In Kanny 1025 when Tien Kambil
Raniew

Ramen of the aforesaid Deshom was improving my waste Jenmom Paramba called Tayeh Mayipilangat Kayda Koody, situated in the aforesaid Deshom, I went and objected to it, but as he did not take notice of it, I presented a petition to the Tookidy and proved by title deed as well as by competent persons of this District and also by the Reponds of the aforesaid Umshom Adigaree and Menon, that the Paramba in question is my Jenmom property, but the Tookidy without relying on the above proofs and without any documents, passed a decision making over the management of the paramba to the aforesaid Ramen, on the grounds that the paramba is Government property and connected with the Agreement executed to one Kombil Kammen I therefore bring this action against the Defendant the Joint Magistrate Mr. Chatfield & Kombil Ramen for the restoration of the aforesaid paramba of the Jenmom value of 16 Rupees as bounded hereunder

In Dhanoo 874 my Kannanen Vallapil Kannashiamban claims the aforesaid paramba on Allipen Jenmom from

from one Payavallapil Poodiddavel Kannen thus I got posession of the same, to which neither the Sirkar nor any one else possesses any right. Moreover certain Jenmom property situated at Moyipilangat Deshom belonging to my Pagoda called Moyipilangat is held by the Sirkar on Kooyeekanom, as set forth in the 2nd para beyond which it is not the Jenmom property of the Sirkar.

2 Subsequent to the year 964 when the Portuguese came here they had obtained certain waste parambas situated in the aforementioned Deshom from the abovementioned Pagoda, thro' my Kannanen on Kooyeekanom for the purpose of planting Cocoanut trees Vizt but they having afterwards no means to do so, they borrowed Money from Government improved the said parambas, and planted Cocoanut trees therein and when they left the Country they made over their Kooyeekanom claim to the Sirkar, who agreeably to the said claim assigned the said Parambas in 979 to the 2nd Defendants deceased grandfather, Jew Kombil Kannen, tho' Mr. Brown and

and the said Kannen accordingly planted Cocoanut trees in all the paramba's connected with the aforesaid contract and reclaimed the elevated spots and converted them into lands, which property is still being managed by the 2nd Defendant. The paramba in dispute is not connected with those formerly let by the Pagoda to the Portuguese on Kooyeekanon, now with the contract executed by the Sirkar to the abovementioned Kannen.-

3. Since the year 964 until 975 there being no Males but only females in my family they were precluded from planting Cocoanut trees in the aforesaid Kuydakoony paramba until now, but subsequently myself and other relatives having become competent, I improved my other Jennom waste paramba's and planted Cocoanut trees therein- If one has either forwant of people or means neglected himself to convert his Jennom lands into paddy fields, it cannot tend to deprive him of his claim thereon- The aforesaid paramba is my Jennom property on which no one else holds any claim, which the Court will be

be convinced of, on referring to my oral and documentary evidence- I therefore pray that Defendants may be summoned and examined before the Court, 2nd Defendants pretensions of right to the aforesaid paramba set aside, my Jennom claim thereon confirmed and the paramba put in my possession- The aforesaid paramba measures 30 Kolls from east to west and 230 Kolls from North to South, and it is bounded on the East by the land called Kooyeecha Chala. On the South by the land called Challa on the west by the land called Kallalla and on the North by the land called Meppoonow- Dated 14th Meddom 1026.

To
The Principal Sudr Ameen's Court of
Tellicherry

The Answer of Amboo Podoo-
wal styled Mootha Podoowal Govern-
ment Vakeel on behalf of J D Robinson
Esqre Head Assistant to the Collector
of Malabar, supplemental 1st Defend
ant in the Original Suit No 69 of 1851

1 Beg to state that the paramba set
forth

forth in the Plaint is not the Jenmom property of Plaintiff, nor is the name given to it in the Plaint correct, whereas the said paramba and the spots connected therewith are called Arnom, as setforth in the 2d Defendants answer, and the Court will be convinced that this Suit, which is unnecessarily brought by concealing the Original name of the paramba and giving a fictitious one of Kayda Koony to it cannot be admitted.

2 Plaintiff on the 25th May 1024 presented a petition to the Joint Magistrate that when he went to improve his paramba he saw 2nd Defendant do it, and on Plaintiff asking him the cause for his doing so he (2nd Defendant) replied that the paramba is Government property and that he would not permit Plaintiff doing it. The said Petition was referred to the Chemikel Tahsildar on the 9th October 1848 who together with the Sub Collector's Shenistadar Venkittaramanien, proceeded to the spot in dispute and examined those in the vicinity thereof as well as Plaintiff and 2nd Defendant and also made some other enquiries into the matter, in which it was found that the paramba in question is included in the Pattayom granted formerly by the Sirkars to one Kambil Kannen and Plaintiffs dispute urged and the Shenistadar accordingly made his report to the above effect on the 26th November 1848 and forwarded the proceedings held in the matter together with a

a sketch of the ground in question to the Joint Magistrate Mr Chatfield who after referring to the same, passed a decision on the 6th December 1848 making over the management of the paramba to 2d Defendant as per Pattayom granted to Kambil Kan=nen on the ground that the Plaintiffs' contentions were not correct, and the paramba in dispute is Sirkars' Jenmom property—

Plaintiff grounds his Jenmom

3. right on a deed executed in 874 but the name of the property alluded to therein and that of this paramba vary. If the Plaintiffs family held the Jenmom from that time, would not Plaintiffs Karnavers or himself, who is a neighbour, have done some improvements and enjoyed the same from that time to the year 1023 (or within such a lengthened time) in which it is alleged now that 2d Defendant has planted some trees — which was not done. Moreover it appears the 2d Defendant sowed Elloo or Gingely seed certain years. and Kanan also did so before. the paramba was sur=veyed as Sirkar Jenmom property. Further it appears also by the Survey accounts made in 998 & 1017. that the paramba is Sirkar Jenmen.

Jennmon property, and there would be un=doubtedly old records to substantiate this= Notwithstanding which the lands situated on the east, South and North of this paramba are also the Jennmon property of the Sirkar and in the management of the 2d. Defen=dant, a circumstance which is admitted by the Plaintiff himself.—

4.

Moreover on referring to a Jennmon deed of the land called Kollallom situated by the west of this paramba executed between tenants it appears that as far as the western mud wall of the Sirkar Jennmon paramba called Arrom is shewn as the Eastern boundary of the aforesaid land. On referring to these facts, I am led to conclude that the land alluded to in the aforesaid deed is also Sirkar's Jennmen property. I make no further comments on the subject but merely bring the above circumstance to the notice of the Court as it is notorious to every one. On a reference to similar documents as well as to the aforesaid proceedings and reports, the Court will be convinced that the Plaintiff's contentions are groundless and the

the suit should undoubtedly be dismissed Under these circumstances I pray that the matter may be investigated and dismis=sed, and 1st. Defendant's Costs awarded to that Officer.—

/Signed/ H. Conolly.
Collector.

No. 3.

To,

The Principal Sudr Ameen's Court of Tellicherry—

The answer of Kambil Ramen 2d. Defendant in O. S. No. 69 of 1851.

I beg to state that the paramba sued for is not called by the name of Kaydakoony but that of Arratil. It is Sirkar's Jennmon property and not of Plaintiffs' Tarwad. It is connected with the Agreement executed by the Sirkar to my deceased grand-father Kambil Kannen, assigning certain other property situated at Moyapilan=gat Deshom and the aforesaid Kannen and my deceased father Kannaren ma=naged it for a long time and when it came to my possession I defrayed a large sum of money in 1020 and improved it and in 1023 I planted about 230 Cocoanut trees which

which dont appear to have been shewn in the plaint. The fact of my having planted Cocoanut trees and defrayed an expense will be proved on deputing an Ameen to inspect the same as well as on examing my Witnesses. The title deed alluded to in the plaint is a fabricated one and the paramba the Jenmom property of the Sirkar and not of Plaintiff a Cir= =cumstance which has been proved in the Police matter alluded to in the Plaint in which a decision was passed by the Joint Magistrate, making over the ma= =nagement of the paramba to me as set forth in the plaint. Such Documents and the evidence of Witnesses will tend to convince the Court that the paramba in question further than being the Jenmom property of the Sirkar it is not Plaintiffs and there is no reason for me to restore it, nor for the Court to causen its restoration. On inspecting the eastern and Southern lands and parambas appertaining to the paramba in question, the boundaries set forth in the Plaintiffs deed and the position of the land in dispute, it will be proved that the paramba in question appertains to the lands shewn

shewn as eastern and southern boundaries and the Plaintiffs deed is false. This suit is in opposition to clause fourth, Section XVIII Regulation II of 1802 and it should therefore be dismissed, because Plaintiff admits that neither he nor his family ever enjoyed any benefit from the paramba in dispute so as to have the Jenm right protected. Plaintiff who is aged about 50 years has not improved the paramba nor planted any trees in any of his Tarwad parambas, as set forth in the Plaint, consequently his allegations that his having done so has precluded him from planting Cocoanut trees in the paramba in question and so forth, are devoid of truth. This paramba is situated as near as within the hearing of the report of a gun. Prior to my planting the trees in this paramba, my father, grandfather and myself were enjoying the produce thereof and Plaintiff tho aware of this, never put any obstacle to it, and if Plaintiff, who conducts several suits in different Courts actually possessed the Jenm right, certainly there would have been every reason for him to put a stop to it and bring an action on this paramba before

The

The lands which were assigned to my grand father by the Sirkar as per agreement are also the Jenmom property of the Sirkar, and not of Mayipilangat Pagoda which belongs to Cherrakel Tamboran who conducts certain suits against Plaintiff before the Tellicherry Moonsiffs Court - a circumstance which goes to discredit the Plaintiffs' allegation that the Pagoda belongs to him. Kanashambal alluded to in the plaint is not Plaintiffs' near Karnaven and the said Nambals near heirs are Anunden Kooyeekar and others of Koonanyala Mattathil, and on their being included as Defendants in the matter, it will be evident that the Plaintiff was not justified in bringing an action against the paramba in question which is alleged to have been held on Jenmom by the aforementioned Nambal. I see no reason to observe anything in this matter as regards the Jenmom right to the lands assigned to my grandfather by the Sirkar as admitted by the Plaintiff - I therefore pray that the aforesaid circumstances may be taken into consideration and this suit dismissed. —

/Signed/ H. Conolly Collector

Resolved.

B.D. No. 48.

Proceedings thereon. —

Submitting a letter from the Collector of Malabar, forwarding translation of a Plaint filed against his Head Assistant in the principal Sudr Ameen's Court together with the draft of the proposed answers, and recommending that the Collector be authorized to conduct the defence at the public expence.

48.49

J. D. Robinson Esq. Collector & Magte. Hamilt. Rambler Esq. Head Assistant. Defendant.

No.

Resolved that the letter above recorded be submitted for the consideration and orders of the Right Honorable the Governor in Council. —

2. This suit has been instituted against the Defendants noted in the margin, by one Koyputty Chandoo of the Cherrakel Talook, for the recovery of a piece of waste land of the Jenom value of 16 Rupees, which he alleges, was improperly taken possession of by the 2d Defendant, and confirmed to him on appeal, by the decision of the 1st Defendant, the late Joint Magistrate Mr. Chatfield. —

3. In the answer proposed to be filed on behalf of Mr. Robinson, it is shown that when the Plaintiff complained against the 2d Defendant for wrongful possession of the land, due enquiry had been made regarding its proprietorship and that it was found that so far from the waste being his property it was Cheear land, and had been included in the Pattayam formerly granted to one Kambil Kannen the deceased grandfather of the 2d Defendant - that the deed upon which the Plaintiff grounds his title, does not relate to the property in dispute - that at the time of

of the Survey, the land was registered as Sirkar - and that it is surrounded on three sides by confessedly Circar land now in the Management of the 2d Defendant -

4. The answer proposed to be given in by the 2d Defendant is nearly to the same purport - He states, in addition, that the Paramba in question had been enjoyed by his grandfather and father besides himself, and that some years ago, he planted it with Cocoanut trees - He also pleads the statute of limitations in bar to the plaintiffs claim -

5. As the Board consider the arguments addduced sufficient, they beg to recommend that the Collector may be authorized to conduct the defence at the public expence -

No. 200

To W. H. Bayley Esqre
Secretary to the
Board of Revenue

50

B. No. 3089

From the Acting Collector of Madras } Sir

Submitting observations on the subject of the reduction in the fees in the issue of Grants and Certificates and suggesting certain alteration in the proportion of the Establishment with the view of meeting the deficit arising from the reduction

I have the honor to acknowledge the receipt of the Extract from the Board's Proceedings dated 17th Instant communicating for further information the correspondence with Government upon the question of reducing the Fees in the Registers' Department of this Office -

2. The Board have recommended to Government that there should be an addition to the scale proposed by me of half a Rupee on the issue of Grants or Certificates, and One Rupee on the registry of Transfers, The Board Calculate that the application of this scale to the transactions of the Office in Fusly 1262 would have caused a deficit in the receipts below the Cost of Establishment of 753 Rs. and the Government desire to know whether the Establishment cannot be reduced by a like sum -

3. I find that Statement No. 1 has

has misled the Board. The pay of the Maistries in Column 10 though separately shown is included in Column 9. The total Cost of the Establishment in Fusly 1262 was thus Rupees 2955 and not Rupees 3581, as supposed, The deficit to be met would therefore be only Rs 207.—

4. But it is proper to point out that under the existing scale of fees the authorized Charge besides the Maistry's fee, on the registry of Title Deeds, conveyances and mortgages of lands under One Cawney is only one Rupee. It is true that it has been the practice of the Office to levy One Pagoda in addition, but this practice has already been stopped and I would recommend that one Rupee be still retained, as the fee for registry of Certificates.

5. What the deficit will thus be, if any, cannot very well be known. But I would propose to provide against it as follows. The Register's pay is now Rs 50 per month, I would reduce it to 40 and allow him as a share of the fees not to exceed Rs 120 per annum.

6. The pay of the Maistries and their

Per annum. their receipts from fees in Fusly 1269 is shown in the margin. I would propose a Monthly addition of 7 as to each man's pay, and give them a share of the fees, provided that their total receipts shall not exceed respectively 40 35 and 30 respectively.

	Pay	Receipts			Total		
		Rs	a	P	Rs	a	P
1 Nagupah	252	311	14	11	563	14	11
2 Maavoo	168	311	14	11	479	14	11
3 Mooroogacum	126	311	14	11	437	14	11

Madras 24th November 1853.

(Signed) H. Stokes
Acting Collector

Bd. No. 53.
Proceedings thereon
(50.51)

The Board observe, that the proposition of the Collector now submitted will involve an increase to the permanent salaries of certain of his Office servants whereas the Government wished to ascertain whether any reduction could not be effected. they will however submit Mr. Stokes letter for the consideration of Government. In the meantime they desire to be informed whether the Collector is unable to propose any other arrangement by which an annual saving might be effected of about 207 Rupees, the amount now shewn to be the probable

probable excess of expenditure over receipts, in the event of Government sanctioning the revised scale of fees suggested by the Board.—

2. The fees of the Maistries appear to be high in proportion to their salaries. The Collector will consider whether by allowing other Members of the Registry Establishment to participate in the fees, some reduction might not be made in their permanent salaries, so as to effect the required saving.—

Resolved that the following letter be despatched.—

Resolved that the following Circular and letter be despatched—

53

Circular.

B. No. 54.

Sir,

Circular to the Collectors in the Nos. Circars Nellore Bellary Cuddapah North Arcot South Arcot Chingleput Tanjore & Tinnevelly

1. I am directed by the Board of Revenue to request that you will until further instructions send in to this Office Weekly Returns of the Wholesale Prices of the grains in the Margin as selling in the larger Seaport Towns, as well as the Cusbah and nearest large Town in your District.

1. Coarse Paddy
2. 1st Sort Paddy
3. Cholum, Jonna, Jawary
4. Bajra, Cambo, Suggalo, Gunjalo
5. Natchany, Raggy, Kevver, Chodalo
6. Codroo, Kurgoo, Arcalo
7. Cungoony, Tenney, Corralo.
8. Horse Gram Coolled.

These returns are to be forwarded without delay as they will probably be published for the information of the mercantile community. You will be good enough to give the price in the local Measure and Coin of the District, as well as in Rupees Fr. Madras Garce, Stating in a note if the local measure is supposed to be heaped.—

2. I am also requested to inform you that the Board will be prepared to grant Tuccavi, repayable at such easy terms as you may think fit, to persons desirous to clear out old wells, or ponds for watering Cattle. Works of

of larger magnitude for the purpose of inducing or economizing a supply of water can be carried on by persons employed by you under previous sanction, on the ground of their being destitute of the means of subsistence.—

Revenue Board Office,
Fort St. George,

B. No. 151.

From the Collector of Ganjam

Sir,

I have the honor to acknowledge the receipt of your letter of the 12th and 22d December 1853 / the former on the 25th the latter late on the 31st Ultimo / relative to the apprehended scarcity of food and to transmit the following replies to the several queries.—

Transmitting replies to the several queries relative to the scarcity of food in the District.

The harvest in the District of Ganjam is computed to have failed to the extent of 3/8. This deficiency being deducted the remaining produce will be amply sufficient for the food of the population provided large quantities are not exported and the high prices to which grain has attained seems likely to check exportation to a considerable extent though not sufficient to prevent it. The French Market particularly seems so much in need of supplies that Exports to France will still continue.

2 The demand for the Export trade renders it improbable that any great quantity of grain the produce of former years is stored.

Fort St. George 12th January 1854

3 The grain most used for food by the laboring classes in Ganjam is Matcheny and course Rice. The prices are noted in the margin.—

Rates per Rupee	Madras Garce Paddy	Garce Matcheny
1861	47511	50611
1862	308	50117
1863	83144	115125

4 My information is not very good but it is supposed that the price of grain in some of the nearest Districts of the Bengal province will admit of it's being exported.—

5 There are means of transit by Sea also by land.—

6 I see no reason to apprehend any difficulty on this score, but I hope the necessity for importation will not be great.—

7 I think that a sufficiency of food will be forthcoming from the resources of the District itself.—

8 and 9 I am of opinion that the works projected will be sufficient to employ all those who will stand in need of assistance in the District and I do not think there is reason to apprehend a great influx from other Districts.—

10 The pasture lands in the District of Ganjam are perhaps comparatively

Fort St George 12th January 1854.

comparatively in a favorable condition consisting as they do of large tracts of Jungle. I do not expect that people would resort hither from neighbouring States to avail themselves of the opportunity of public works

11 I see no reason for apprehension on this point.—

12 Generally speaking there is no reason to apprehend a great deficiency of water for watering Cattle and household purposes.—

13 The Comparative fall of

Fasles	Measures	Inches

separate

and certain other particulars on the same subject-

Take one Statement showing certain particulars respecting the Village I have the honor to state that Mr. Smalley's motive for passing the Assessment appear to him been founded on general principles, and not on any particular grounds affecting Seriapoorum only.

To Board 7th June 1827.

They are given at length in his letter to the Board noted in the Margin, and are quoted in Extract from the Proceedings of the Board under date the 12th of November 1827 on reviewing the Settlement made by him, Mr. Smalley for Fasly 1236. His orders giving the grounds of the Settlement as affecting Seriapooram individually are to be found.—

2 Mr. Smalley after explaining more at length the mode in which the Settlement was conducted adds "The "average shist upon the produce for the "last 18 years corresponded in some Villages "with Mr. Travers Jumma Assessment but in "others there was an increase of from 10 to 70 Pr. "Cent and a decrease of from 5 or 6 to 70 per cent. "In those Villages where there was no "difference or not any considerable difference "I adopted Mr. Travers Assessment "for the current years Settlement In the "Villages where the average was considerably "more or less I made alteration and the Ryots agreed "to the shist and preferred their puttahs" Seriapooram would appear to have been one of those Villages therein alluded to where

the average shist for the last 18 years showed a large increase on Mr. Travers Jumma Assessment but that the produce accounts were not to be depended on is fully shown in Paras 11 and 12 of the Boards Proceedings above referred to in the latter of which the following remark occurs. "The "Board allude particularly to the very doubtful "nature of the accounts of former produce, upon "which the accuracy of his calculations seems "in a great measure to have depended and "the obvious consideration that the average "Assessment realized during the last 18 years, "even if capable of being satisfactorily ascer- "tained could not in many cases be a "correct standard for assessing the lands now "cultivated by each Ryot Hence the great "difference between the Amount resulting from "the average rates and those of Mr. Travers."—

x This part of the quotation is not strictly applicable to the case in question

3 The case was however different as regards the Dry lands of the Village for which Mr. Travers Jumma were allowed to remain.—

4 The accompanying Statement exhibits the Ayacut extent of the Village under the head of Dry Wet &c. their classification and Assessment as fixed by Mr. Travers and Mr. Smalley respectively, together with a detail of the cultivation, number of cultivating Ryots and the Demand Collection and Balance of each year since Fasly 1231 as required by the Board.—

No. 3.

To W. A. Bayley Esqre
Secretary to the
Board of Revenue.
Fort St. George.

(21)

B. No. 147.

From the Collector of Cuddapah

Affording the information required regarding the rules promulgated on the subject of New wells &c.

Sir,

I have the honor to acknowledge the receipt of your letter under date the 25th of August 1853, forwarding copy of an Extract from the Minutes of Consultation under date the 5th May 1853, calling for information regarding the rules promulgated on the subject of wells, their vicinity to tanks, irrigating channels, Rivers, streams &c and observing that should there be no specific rule or observance on the subject, the Collectors will give the Board their opinion as to the extent to which restriction should be made when it is proposed to dig a new well.-

2. In reply I beg to state that the subject of new wells has been on many previous occasions brought under the notice and consideration of the Board of Revenue and rules have been drawn up for the guidance of the Collector of Cuddapah, with

regard

regard to the imposition of Teerwajasty upon such Wells, situated under tanks, where the land is on such a level that the water from the tank will flood that, which can be irrigated by means of the water from the wells.

3. In a letter from the late Acting Principal Collector of Cuddapah under date 14th of October 1843, I find four rules on the subject of new wells proposed for the consideration of the Board of Revenue the first of which is. "no ryot "shall be entitled to exemption from teerwajasty "unless he hold and pay for the whole of the land "entered in his puttah for the previous year. "the sale or transfer of a portion of the puttah "land will be considered equivalent to an aban- "donment of it." This rule however as it was un- equal in its operations and unfair towards the ryotts, the Board of Revenue modified it in the following manner that no "Ryott shall be entitled "to exemption from teerwajasty unless he hold and "pay for the whole of the lands forming his Ry- "yut or ordinary standard of cultivation, or land "bearing an equivalent amount of assessment "but this rule shall not be understood to com- "pel a Ryott to pay for wet land if proved to "have been left waste in consequence of a deficiency

"of water."

4. Rule II declares that "Lands cultivated by means of a well situated within the bed of the tank and which is under water when the tank is full, shall be charged with teerwajasty." this rule however was extended by the late Principal Collector Mr. Ashton in his Sagoovaly Soo Rumnamah for Fusly 1254 to all wells situated within 10 chains or 330 feet of the highest water mark but being objected to the late Acting Collector in his letter to the Board dated the 6th January 1846, in which he brought the subject to their notice, and requested instructions for his information and guidance during the annual Settlement. The Board in their reply dated the 12th February 1846, objected to the innovation introduced by Mr. Ashton and ordered it to be cancelled, and laid down as a rule, that wells in the beds of tanks around which embankments have been raised, and all Wells which receive their supplies of water in their proximity to tanks and other sources of irrigation clearly fall within the principle of the rule quoted, and should not be allowed exemption.

5. Rule III lays down "that all lands converted

"converted from dry to wet by means of wells
"constructed within 10 chains distance from tanks
"or channels shall be charged with teervajasty,
"if the lands are on such a level that the water
"of the tank or channel will flow to them." this
rule was modified by the late Principal Collector
Mr. Ashton and extended to cases in which lands
were irrigated from wells situated within 10 chains
from under the bunds of tanks shall be liable to
teervajasty, whether the lands thus cultivated from
the wells could be irrigated from the water contained
in the tank or not - this suggestion was approved
of and supported by the late Collector Mr. Cochrane
who urged that there can be no doubt that wells
under the bunds of tanks were greatly benefited
by their proximity and received their supplies
from it - particularly when the surrounding lands were
sufficiently irrigated by the tank water and that
wells may be situated below the surface of the tank
and yet irrigate lands higher than the Tank
water would reach - this modification was however
over ruled by the Board who desired that the
original form in which this rule was drawn out
should be carried out, as it is not considered
desirable to include lands under wells constructed

within

within 10 chains distance, whether from their
level, the water of the tank will flow to them
or not - I find however that this rule has
fallen into disuse or rather that on the receipt
of the disapproval of the Board to the suggestion
of the late Collector Mr. Cochrane, no notice has
been issued for the non-collection of teervajasty
on such new wells, or the cancelling of the order
issued by the late Principal Collector Mr. Ashton,
which has been carried into effect up to the present
time - There is no rule for the levying of teervajasty
upon wells situated in the neighbourhood of Jungle
streams, provided that the water from such stream
is not made use of for the purpose of irrigation."-

6. Rule IV. "Lands under new
"wells shall hereafter be always charged with
"teerwajasty whatever may be their position, if
"it be satisfactorily established that they have
"on any occasion been irrigated by water from
"the tank or channel" the wording of this rule
was objected to by the Board of Revenue on the
grounds that it subjected lands irrigated with
Circar water, which might be irrigated once from
the tank or channel, to a constant Assessment
of teerwajasty and therefore altered the rule

as

Fort St. George 12th January 1854.-

as follows.- "The lands under new wells what-
ever may be their position, shall hereafter be always
charged with teervajasty for any fusly it may
be satisfactorily established that they have been
irrigated by the water of a tank or channel
during each Fusly." These rules are now followed
out and adopted in respect to the assessment
chargeable on new wells.-

7. When a ryot having old
well cultivation wishes to excavate a new one,
there is no rule to prohibit him from
digging it; he may dig a well at any distance
from the old one, which may best suit his own
convenience.- Should it be in such a position
that the new well would, to a considerable
extent, drain the supply from an old well
held by another party, a dispute would im-
mediately arise amongst the Ryots themselves
when he whose well is drained will either
put a stop to the further excavation, or apply
to the Collector for his interference to prevent
any loss he is likely to sustain from the
want of water, and put a stop to the new
wells being dug.-

8. The Board in the 2d para

Fort St. George 12th January 1854.-

of their letter define the Garesa havadi to
be mere holes scraped in sand or loose soil to ob-
tain surface water and involving little or no out-
lay, and not at all of a permanent nature. Of this
species of well there are few throughout the district,
but there are numerous other wells known
under this title, which would require a different
definition.-

9. The banks of the rivers and
streams which empty themselves into the larger
rivers are in general very low and level. Along
the banks are extensive plains of a loose sandy
soil easily excavated, through which at a con-
siderable distance from the river, wells with a
diameter of about 8 or 10 feet, and the same
in depth are excavated until they reach a level
lower than the beds of the rivers or streams; when
an abundant supply of water is speedily obtained.
the sides of these wells would soon become
destroyed were they not in some way protected,
and for this purpose a lining of wicker work
is made use of which answers the purpose
satisfactorily, but is of a perishable nature
and must be annually renewed at an expence

of

of from 1 to 3 Rupees - the wells thus constructed will cost from 10 Rupees downwards at first, and may be used for the purpose of irrigation for many years - these wells Known in this District under the name of Garesabavadies, upon which teervajasty has usually been levied upto Fusly 1260 when it was permitted by the Board of Revenue these wells are very common in the Camalapoor taloork and all along the plains situated on the banks of the Paupagnirnie and its tributaries they are also found in almost every Taloork of the district, and are annually becoming more numerous.

10. These wells are at first lined with wicker work, but afterwards on account of the great profit derived by the Ryots from the cultivation of garden produce, upon what coarse dry grain was formerly produced are in the course of three or four years lined with substantial stone instead of wicker work, and thus a permanent improvement is established As these wells differ in description from those alluded to by the Board in the 2d para of their letter, it would be as well to have distinctly defined what is to be understood by a Garesabavadi - I would beg to propose that all wells

wells excavated thro' loose sandy soil and lined with wicker work, the expense of which does not exceed Rupees twenty be considered as Garesabavadies liable to teervajasty - Should these wells be afterwards lined with stone, doubts will arise whether, by the orders of the Court of Directors, the meaning will be conveyed that these wells should then be considered under the denomination of permanent improvement and consequently not liable to an extra assessment, as they are at present while considered as Garesabavadies.

11. No restriction at present exists with regard to the distance these wells may be sunk from the banks of the rivers, nor do I consider it necessary that, any should be imposed, as the water is found at the same level throughout the plain - If the well is constructed on the bank of the River into which the river can flow, the denomination is then Doravoo-bavadi, and as the river water is made use of for the purpose of cultivation, an additional assess-ment, is imposed, even although the expense of constructing this well may not be greater than that of one in the neighbourhood lined with stone.

12 Should the Board consider it

Fort St. George 12th January 1854.

it expedient to allow teervajasty to be collected on what are understood to be Garesabavadies, and afterwards remit this extra assessment upon the permanent improvement of a stone facing being substituted for wicker work, it will be at variance with the practice hitherto pursued and very detrimental to the cultivation carried on under old wells. The profit which accrues to the Ryott from the construction of such wells is very great as instead of having one crop of coarser Kind of grain, they are enabled to have two crops of a finer quality, and more easily disposed of Viz. Raghee and Indigo leaf, the latter being in great demand and purchasers readily obtained. the imposition of a light teervajasty not only upon Garesabavadies as understood in this district, but also upon those wells which have subsequently been faced with stone, would be no hardship upon the proprietors of such wells. I would beg to propose that dry land assessed at from 1 to 5 fanams should be charged with extra assessment at 1 Pagoda per acre, including the assessment, and from 5 to 10 the extra assessment should be doubled; this I believe would

Fort St. George 12th January 1854.

would be willingly paid by the cultivators, would be an increase to the Revenue and no hardship would be experienced by those on whom it is levied.

Read the following letter.—

23

To W. K. Bayley Esqre
Secretary to the
Board of Revenue.

B. No. 524.

From the Collector of Chingleput.

Proposing to levy Fussel Jasty on service Enams under restrictions within noticed, suggesting the expediency of allowing certain Village Officers the privilege of irrigating their Enam Yeo. lands from Tanks and, soliciting early instructions on

Sir.

I have the honor to reply to your letter of the 18th October last, communicating the sentiments of the Board regarding the levy of Fussel Jasty upon Service Enams, and directing me to investigate these Enams in conformity with their views therein expressed and to report whether the Extra cess might not in future be abandoned or collected as it it equalled or exceeded a fair remuneration for services required, the proper rate of such remuneration having been fixed upon.—

Presuming that the views above

2.

recorded

on Mr. Freese's report of the 19th April 1844.

recorded have reference solely to Enam lands held by Village Servants I purpose with the Board's permission to carry out during the Summabundy about to commence the measure of levying Fusul Jasty only in instances in which the Seerva foregone on the 1st crop is considered sufficiently remunerative to the Enamdars for their Services pendered according to the Marginal rates which I propose to adopt as proper and fair with reference to those provided for in my Predecessor's report on the subject.

† Names of Village Officers.	Rate of remuneration.
Puttamanagar	2½ per Cent of the bariz of the Village.
Curnum	5 ... Do
Notagar	1 ... Do
Taliar or Tooffery	4 ... Do
Vettyan	2½ ... Do

3. I beg however to observe that the concessions thus granted, desirable as they are, will but to a limited extent meet the object in view of rendering the Service Enams a suitable remuneration to the parties concerned.

4. These Enams granted by former Governments on the original Measurement of the lands have undergone various changes

changes in point of extent and locality during the administration which ensued, and as they have never been regulated on fixed principles under the British rule, they at present form a very unequal scale of remuneration in proportion to the Services performed. The great inequalities in the relative proportion of these emoluments to the beriz of the several Villages are fully exhibited in the Statements which accompanied Mr. Freese's report.

5. Exemption from Fusul Jasty under the restrictions proposed cannot be considered an adequate measure for regulating and equalizing the emoluments of Village Offices, as the concessions so granted will in many instances prove nugatory, when a Second crop cannot be raised on single crop lands owing to insufficiency of water, or owing to their distance from the Source of irrigation, while in other cases the Profits realized even by the Second crop will not render the Emoluments suitably remunerative.

6. I would further beg to suggest

suggest that Village Officers holding Enam lands which are entirely or mostly Poonjah and which in reference to their assessment are in point of Emoluments inadequate, should be allowed the privilege of irrigating such lands from Tanks, when feasible, to such extent as would on a fair calculation bring their emoluments to the required standard.

I take this opportunity of soliciting early instructions on Mr. Freese's report above referred to. The subject is all important under the very inefficient footing in which the Emoluments of Village Officers in this District are placed.

Sir,

B/3 No. 3286.

From the Collector of Chingleput

Reporting the demise of Soobadar Major Aboroodeen Khan Bahadoor Shojat Jung Jaghiredar of Tundlum and requesting instructions as to the parties in whose names the Estate should be registered.

I have the honor to report the demise on the 31st July 1853 of Soobadar Major Aboroodeen Khan Bahadar Shojat Jung, to whom and his two neact heirs in succession the Village of Thundalum was Granted in Jaghire, under a Purwanah of Government dated the 9th October 1840. The deceased has left—

2 Widows;
3 Sons;
3 Daughters
1 Grandson (female line.)
2 Grand Daughters Do. Do.

as exhibited in the accompanying Genealogical Tree.—

It has been decided* in similar cases in preference to the Shrotriem Villages of Oottoscandoo and Timanore that the term "two neact heirs in succession" is to be considered as applying to the two neact Generations, embracing all the sons of the Grantee for the first and all the Grandsons

* Minutes of Cons: dated 20th December 1851 forwarded with the Board's Proc: 5th January 1852.

924

Fort St. George 12th. January 1854

Grandsons for the second Generation - This interpre=
=tation might therefore be applicable to the present
case in which all the sons of the deceased are
equally Heirs to the property left by him, were
it not for a question that has arisen in conse=
=quence of the family being of the Mahomedan
persuasion. The daughters have all laid claims
to the share of the Jaghire urging that according
to the Mahomedan Law they are equally entitled
to participate - I beg therefore to solicit the
instructions of the Board as to whether the
daughters of the deceased (Married or unmarried)
are entitled to share in the Jaghire and in

Proceedings thereon.

Conveying instructions as to the disposal of the Estate belonging to the late Soubadar Major Nooroodeen Khan.

25.26

The Board think that the following quotation from Elberlings treatise on Inheritance &c. Page 42 Sec: 89 meets the questions propounded by the Collector in the foregoing letter.

"In the distribution of the Estate among the heirs the Mahomedan Law has several peculiarities. There is no distinction between real and personal, or between ancestral and acquired property; primogeniture confers no superior right, but all the sons whatever their number, inherit equally; females are not only not excluded from inheriting, but besides that, some the widow, Mother, daughter and sister are very near heirs, females ‡ always get half the share of their Brothers when inheriting with them, and take with the same full proprietary right as males; so that the property devolves after their death on their heirs. The same is the case with Widows, who take their share without any restriction in the disposal of it, and after their death, the property inherited from the husband, goes to their heirs not to the heirs of their

‡ Except half Brother and Sisters on the Mother's side, who share equally.

their husband." The Registry may be in the name of the eldest son. This will not affect the rights of the several members of the family entitled to maintenance.

2. In regard to the last question proposed by Mr. Cochrane, the Board observe that it has been ruled by the Cazee Ool Coozat of the Sudr Audalut in a similar case that if any of the descendants of the original Grantee, or their heirs whether male or female, die issueless, his or her share will revert to the Government and not to the surviving co-heirs, because the latter cannot be ranked as the offspring of the issueless deceased person, so as to be entitled to receive his or her share, for, as the Jaghire is not permanent, it does not confer on them the said share as their hereditary right.

B. No. 112.

From the Collector of Singleputt, Furnishing the information called for.

Para 1.

Sir,

In reply to your letter of the 8th Ultimo,

Called for in respect to the proposed transfer of the Velloor &ca Pans to the Madras Collectorate.

Ultimo, I have the honor to state that the manufacture of Salt at the Pans of Pooledemankum years discontinued on the report of Mr. Lane, Head Assistant Collector dated the 24th January 1845 (submitted to the Board of Revenue with a communication from this Office under date the 26th Idem) in which that Officer observed that the Pans were inconveniently situated "the roads leading to them being bad, and the soil not so productive as the other Pans." These objections no longer hold good, the Salt being now transported in Boats and the quality of the Pans admitting of improvement by being worked. The extent as estimated by the Board at 260 Cawnies not being in excess of the lands available for Salt Manufacture according to the information I have as yet been able to procure (a point on which a more precise Statement will be submitted as early as practicable) it will amply meet the demands of the Meerasidars of that Village as well as of the Manufacturers of Vichoor who would be thrown out of employ by the

the discontinuance of the Pans newly granted to them at the latter locality. The pans actually brought under Cultivation within the last season at Vichoor consist of 44½ Cawnies only which yielded 35½ Garces. The pans brought into a state fit for Cultivation are Cawnies 105 to which extent (the new Pans at Pooledemankum might reasonably be secured to them instead. The average quantity of Salt manufactured at Pooledemankum during the 5 years preceding the Enactment of Regulation I of 1805 amounts to 80 Garces and the greatest extent of Land converted into Salt pans by the Villagers to about 85 Cawnies to which extent the absolute right of the Meerasidars should be acknowledged, leaving the remaining portions Viz. 70 Cawnies to be distributed among these and other applicants in such proportions as may be decided on. I do not consider that the Vichoor Manufacturers are entitled to any further consideration, the necessity for now discontinuing their Pans having arisen solely in consequence of their inability to fulfil the terms of the engagements entered into by them.—

The

2- The transfer of the Vulloor and Vayaloor Pans to the Madras Collectorate which has frequently formed the subject of discussion, was opposed by the Collectors of this District on the grounds of its creating a division of authority, the difficulties attendant on their Superintendence by the Collector of Madras and the evil consequences attendant on the non-separation of the party Manufacturing from the party selling the Salt likewise forming grounds for objection which cannot now however be said to exist under the arrangement made for the appointment of an Officer of responsibility for the Superintendence of the Manufacture and the Sales-

3- The establishment attached to this Department for the Superintendence of the Vulloor, Vayaloor, and Vichoor Pans as well as for the Police management of about 40 Villages in that part of the District is exhibited in the Margin. Vichoor, Vulloor, Attepat, Ennore and Vayaloor which are inhabited by large bodies of Manufacturers as well as the several other populous

*

	Monthly Pay
Peishcar	28-
3 Nemsindahs	30-
1 Duffadar	7-
15 Peons	60

populous place in their Neighbourhood will require the Supervision of a separate Police Officer notwithstanding the transfer of the Pans to the Madras Collector whose Department has no Magisterial jurisdiction over the residents of the above Villages- The Peishcar and a single Nemsindah together with a Duffadar and 7 Peons employed as Tanah and Police Peons should therefore I think remain attached to this Collectorate, the remaining 2 Nemsindahs and 8 Peons being entertained on the strength of the Madras Establishment, should the Board decide on the transfer of the Pans to that Collectorate-

Adverting to Para 4 of your letter, I beg to state that the Establishment at Vulloor is alone debited to this Collectorate- The Collector of Madras gives credit to this Office for the Coodevarum of the Salt supplied to him in the same manner as if it was manufactured in his Collectorate whilst the profits are carried by him to the credit of Madras, the sales of Salt being effected in his Department a

From the acting Collector of North Arcot

Submits for the consideration & orders of Government the request of Atchoo: the relict that a Moiety of the service yeomiah which is now held by her grand Nephew & which was formerly held by her husband may be paid to her. -

Sir,

At the death in 1808 of Mohomed Ally, a Service Yeomialdar in receipt of a Yeomiah of Rupees 126 per Annum his brother Hoofsainally succeeded to the Yeomiah in consequence of a quarrel which then took place between the deceased's wife and Hoofsain Ally M. Rofs then Head Assistant Collector of South Arcot directed that a Moiety of this yeomiah should be withheld at the treasury, and paid to the deceased's wife Atchoobeebee for her subsistence during her lifetime. This was accordingly done during the life time of Hoofsainally and was continued after his son Mohomed Tippoo had succeeded to the Yeomiah - the allowance of Mahomed Tippoo was withheld in 1851 in consequence of his having certified to the existence of a certain female yeomialdar above

50

Fort St. George 12th January 1854.-

50 years of age who refused to attend at the Collector's Cutcherry for muster. The allowance payable to Utchoobeebee was also stopped at the same time, the whole Yeomiah having been registered in the name of Mahomed Tippoo. This Yeomiah having been Continued to Vully Mohomed the Son of the afore= =said Mohomed Tippoo, pursuant to the orders of Government contained in the Board's Proceedings dated 6th June 1853. Utchoobeebee, who is now 65 years of age, has requested that the Moiety of the Yeomiah which she formerly enjoyed may be paid to her thro' Vakeel, but as I am of opinion that no division of the Yeomiah should be made without Special Sanction, I submit the request of this female to the cons= =deration and order of the Board of Revenue.-

No. 118.

(35)

To, W. H. Bayley Esqre
Secretary to the Board of Revenue
Fort St. George.

Bd No. 3335.
From the Collector of North Arcot.

Affords the information required by the Board as to building for the Dispensary to be established at Vellore and as to whether 118 Rupees Monthly will be sufficient to maintain Such an institution at that place.-

Sir

1.- In their Proceedings of the 28th November the Board of Revenue repeat the Call former made for information as to a building for the Dispensary to be established at Vel= =lore; and also require to be informed whether 118 Rupees Monthly will be Sufficient to maintain Such an insti= =tution at that place.-

2. In reply I beg to state that Mr. Lewin, my Acting Head Assist= =ant, reports that there is no Building of any Kind Suitable to the purpose in the Town or Civil part of the Sation, and having Communicated with Brigadier Bruce, Commanding

Vellore,

Fort St. George 12th. January 1854.-

Vellore, he further states that there is no Public Building available in the Military limits. There is a private house near the Fort lately sold for 1,060 Rupees, which it is stated would be suitable, if the present owner would part with it, but an outlay of four or five hundred rupees would be necessary to fit it up. The Brigadier also states that while there is only one Corps at the station, the vacant Barracks and Hospital of a second regiment may be made use of. This arrangement however, if permitted at all, could only be sanctioned, I imagine as quite a temporary measure pend-
=ing the preparation of a suitable permanent building.-

3. Mr. Lewin, expresses the opinion that about five hundred rupees might probably be raised e towards the Construction or pur-
=chase of a building by the Europeans Connected with the station and District, but that little or nothing Could be expected from Native Contributors. As respects the

Fort St. George 12th. January 1854.-

the former he is probably right, but per-
=haps he underestimates the liberality of the native Community. It is pro-
=bable that the owner of the building above referred to would be very glad to let it on permanent lease at a moderate rent and the Contributions might be devoted to making the necessary alterations, fittings and furniture. I have requested Mr. Lewin to ascertain at what Rent the house Could be obtained on such terms, and I will report on this point there-
=after.-

4. In reply to the question whether 118 Rupees Monthly will Suffice to maintain a Dispensary e. Mr. Lewin transmits Copy of a letter from Assistant Surgeon Fitz Patrick of which I annex a Copy. Mr. Fitz Patrick's esti-
=mate of the Cost of the Dispensary Rs. Amounts to 93 Monthly exclusively of house rent, of the Cost of Medi-
=cines and dressing, of washing and e Extra attendance, and of the food of the in patients. It will be seen that he regards the balance 21 Rupees, as "very Small" for the washing and Extra

Fort St. George 12th January 1854.

Extra attendance only; and even supposing that the Medicine and dressings are supplied gratis by the Government the Cost of the inpatients' food and of the building will remain to be provided for. In my letter of the 9th August 1850 the former of those items was estimated at 60 Rupees on the Authority of Assistant Surgeon Chimmo, and I think there can be no doubt that a Dispensary situated at Vellore, in the heart of a dense population of 51,000 persons, if only it be so Conducted as to Secure public confidence, will bare at the very least an average of 30 inpatients at all times the number on which the Estimate of 60 Rupees is based at 2 Rupees a Month for each. It seems to me also that Mr. Fiftz Patrick's estimate of the Servants required would be insufficient to attend on so many inpatients, in addition to the number of outpatients that might be expected. The house rent might probably Amount to 25 Rupees Monthly and thus it seems likely that the

Fort St. George 12th January 1854.

the Sum proposed. Viz. 118 Rupees a Month would be about one hundred rupees too little.

5. It would in my opinion, be much to be regretted that an Establishment of the Nature in question should be constituted on an insufficient and niggardly scale. From some Conversation which I have had with Mr. Assistant Surgeon Harper, I fear that this error has been committed in the Dispensary at Chittoor. He speaks of the Establishment of Servants as being deficient, and he inclines to the belief that the Scanty Scale of diet for the inpatients is one Cause why the Dispensary has so small a number of that Class. It appears to me that the very opposite policy ought to be pursued. The object in view in establishing dispensaries is that of a large humanity to extend the blessings of enlightened Medical and Surgical Science and Skill to the reliefs of a whole population otherwise Cut off from such relief from suffering. It seems to me that.

Fort St. George 12th. January 1854.-

that liberality Could not be more use-
=fully exercised than in making these
institutions fully efficient; and ren-
dered acceptable to the Public; and that with
this view they should be amply provided
with accommodation, with attendance,
with hospital necessaries & Comforts,
and with subsistence for in patients
The information which I have obtained
convinces me that these Conditions
Could not at all be fulfilled at Vellore
at the cost stated; and I am therefore
of opinion that the best Course will be
to be Content with one such institu-
=tion at present, postponing the Esta-
=blishment of the second till the gra-
=dual diminution of the Lunger Charak
expenses shall leave the necessary funds
available..

B. No. 64.

To the Collector of North Arcot.

Requesting certain information respecting the Establishment of Dispensaries at Rancepet & Vellore

In. Dy. Cons. 12th January 1854.

Sir,

1. With reference to your letter of the 19th December 1853 I am directed by the Board of Revenue to observe that the balance of Rupees 118 alluded to in their Proceedings of 28th November 1853 is only the Surplus of the Amount Estimated in para 5 of Mr. Bretts letter of the 29th August 1853, for the Rancepet Dispensary alone.

In. Dy. Cons. 15 Sept. 1853.

In. Cons. 28 Nov. 1853.

2. Mr. Binning in his letter of 17th November 1853, in reporting on the Establishment of a Dispensary at the above place forwarded Copies of Correspondence with Dr. Lloyd the Cantonment Surgeon, in which that Officer, with reference to Mr. Bretts Estimate stated that Rupees 100 would be sufficient for the Dispensary at Rancepet.-

3. On looking at the actual Expenditure for 1852. it is perceived that there

Fort St. George 12th January 1854.

there was a balance of Rupees 4,521, as Compared with the Sum Sanctioned in Fasly 1228.-

4. As it appears from the concluding part of para 4 of your letter under reply that about Rupees 218 per Mensem would be sufficient for the Dispensary at Vellore, I am desired to request that you will be good enough to State, with reference to your Estimate and that proposed by Dr. Lloyd for Rancepet, whether a Dispensary might not be Established at both places with the balance shewn for 1852.-

5. The Cost for the two Dispensaries, according to the Scale furnished,

Dr. Lloyd's Estimate at 100 Rupees — 1200
Present letter @ 218 Rupees — 2616
3,816

Furnished, would be Rupees 3,816 which will still leave a balance of Rupees 705 should it be found necessary to increase the Estimate proposed by Dr. Lloyd.-

From the Sub Collr. in charge of Coimbatore

Forwarding Copy of correspondence regarding a water dispute between General Cleveland and Mr. Lascelles and submitting his opinion as to how the matter should be disposed of.

Sir

Mr. Thomas having reported to the Board on the water dispute between Mr. Lascelles and Major Minchin I must now refer for the Board's decision some further claims in which Mr. Lascelles refuses what appears only a fair concession to others and desires to monopolize all the water privileges he can secure. Mr. Thomas having tried in vain to effect an amicable and fair settlement of the several cases no alternative is left but to refer them to the Board.

1 Copy of letter from Colonel Cleveland dated 8th August 1853.
1 Do. to Mr. Lascelles dated do. do.
1 From Do. 22nd Do.
1 To Genl. Cleveland 29th December No. 170
1 From Do. Dated 1853
5

2. With regard to the stream at Conoor alluded to by General Cleveland, it is obvious to remark that few know better than Mr. Lascelles, the value of water on the Hills or are more tenacious of it. Mr. Wroughton's leave, first retracted, and subsequently given for Mr. Lascelles Conoor Stream, showed clearly the doubt Mr. Wroughton had of the propriety of the concession even then when water was less in request and public claims far less considered than now

than is now necessary on the Hills. Mr Lascelles with a large supply off. Mr. Norton's main stream at Ootacamund another for his land on the Coonoor Chaut / now under reference / a third under discussion with Major Minchin the fourth now alluded to at Coonoor / General Cleveland's / should be the last to grudge a small share to his neighbours, with whom he is at variance on this subject, in every instance refusing it to Major Minchin and Captain Reilly's Houses at Ootacamund and to General Cleveland at Coonoor.

3. In every instance also Mr. Lascelles diverts Government running water riding far out of his own limits with no spring in his own premises. In real truth, tho he would seem to wish to impress the Board with a contrary idea there is no Speculator Builder or Resident on the neighberries more favored or assisted both as to land and water than Mr. Lascelles. his right to the large share of water he monopolizes both

both at Coonoor and Ootacamund is very questionable. Mr. Thomas has only refrained from interfering with it from Mr. Lescelles' difficult character and under the hope that he would yield, from equity and fairness to what his neighbours required, rather than involve himself / Mr. Thomas / in a litigious and lengthy correspondence for which Mr. Lascelles has both more time and inclination than Mr. Thomas has.

4. As Mr. Lascelles has himself however now brought the water question fully under discussion, Mr. Thomas recommends as his definite opinion after long knowledge and enquiry on the spot, 1st that Mr. Lascelles should be directed to divide the water fairly with Major Minchin on that property, (the Mr. Thomas really considers Major Minchin to have the best right to the whole) 2d. that he be also directed to allow to General Cleveland at Coonoor all that he (Mr. Lascelles) cannot himself fairly use / no great concession / 3rdly that he make a similar arrangement

if

if practicable, with Captain Reilly's house. 4thly that he be directed to supply his own house at Ooty Burnfoot from the Hill behind him / as is quite practicable. and as Mr Thomas would undertake with the Civil Engineers aid, to do / without abstracting as Mr Lascelles now does a large stream / the first on the Channel / from the main flow, over Nortons cut, and lastly that the Board will be so good as to refer each and all of these points to the Civil Engineer for his report as to whether practicable and reasonable or not. If Mr Lascelles declines acceding to any of the above propositions after inspection and approval by the Civil Engineer, Mr Thomas would then recommend his not being allowed the free indulgence of the Government water for his new land on the Connor Ghaut.

5. Mr Thomas still includes the late Captain Reilly's case as the lamented death of that Officer renders the value of his House and land of still greater importance to his family.

Mr

6. Mr Thomas would beg to refer to para 6 in his letter of the 22d May 1849, in which he suggested the advisability of appointing a Committee, of Residents and others on the Hills, who might aid him in deciding on a fair distribution of the water now so fertile a subject of dispute, and he / Mr Thomas / would again request leave to carry out that proposition. It is an invidious and difficult single duty and it is impossible to satisfy all parties the Judgment of several would carry more weight. Mr Thomas would therefore suggest his being allowed in all disputed Cases to call on the Civil Engineer and the Commanding Officer together with two other old Hill residents of willing to act and / if the Board deem it proper / to decide as a Committee in all disputed or difficult Cases. Such as the present ones for instance. An appeal if necessary would of course still lie to the Board as at present.

× 3 being a quorum any two besides Mr Thomas.

No 1.

To E. B. Thomas Esqre
Collector of Coimbatore

Sir

I do myself the honor to bring
to

Fort St. George 12th January 1854

to your notice that a stream of water from Government Sources, runs through the land belonging to Mr. Lascelles at Coonor, down to the very end contiguous to my land over which it might easily flow, if the water was not cut off, and allowed to run to waste. some months ago, I wrote to Mr. Lascelles a private note, to allow the stream to flow as usual and give me a fair share of the water, his answer was to the effect that he wanted every drop of the water in point of fact an absolute negative to my request and why? I cannot possibly devine, for the stream is perpetual under water abundant.

There is a Circular Tank at the foot of Mr. Lascelles Premises partly on his ground partly on mine with a channel for the said water to fill it, the Tank and Channel still exist, but I observed the other day when passing through Coonor that this water had been turned off, and must now run to waste, I cannot understand that any proprietor of land can make a monopoly of water, taking its rise from

Fort St. George 12th January 1854.

Government Sources, or turn off any stream which has once existed, no more than any person can stop up a Road which has once been made a public thoroughfare, if I am right in my conjecture I trust you will do me the favor to compel Mr. Lascelles to give me a fair share of this water, & submit my case for the decision of Government, as I am now building a Bungalow on my ground at Coonor and I pay quite rent for the land.

No. 3.

To, The Collector of
Coimbatore.

Sir,

In reply to your letter of the 20th Instant, I have the honor to inform you that the stream of water alluded to, was first brought by me from its source on the Ootacamund road, in December 1847, by permission of the Principal Collector of Coimbatore given on the spot a few weeks previous and subsequently confirmed in the same manner by the same authority when on a representation from the Civil Engineer "that the water injured the road where it crossed it" he directed the Duffadar at Coonoor to turn the stream off into its natural Course, and on revisiting the spot and ascertaining that he had previously permission for it to be brought to my house, he withdrew his orders and gave me permission to take the stream across the road in a covered drain

2— It is scarcely requisite for me to bring to your notice that much of Colonel Clevelands letter is incorrect especially as regards the perpetuality of the stream, abundance of the water &c &c.

Fort St. George 12th January 1854.

My objections to giving any of the water are simply, that in consequence of the erection of the Village about a mile from Coonoor, on the banks of my channel the supply of water, never abundant, is now absolutely insufficient for my own house, and completely failed repeatedly during the last dry season and in the months of June and July though in consequence of the very heavy rain we have had lately it is now sufficient, again, I am anxious to build another* House in the vegetable garden between my present house and Colonel Clevelands if by incurring the expense of laying down tiles or bamboos I can secure a sufficient supply of water, and not only would the erection of such a house demand all the water that I could obtain, but its situation would at once block up the way by which water could be conveyed from my property to Colonel Clevelands.

* General Cleveland should be first supplied
E. T.
C

I beg to demur entirely to Colonel Clevelands Statements respecting the "water running "through my land down to the "very end contiguous to Colonel "Clevelands, over which it might

3.

* it should not be so placed
E. T.
C

Fort St. George 12th. January 1854.

"might easily flow if the water was
"not cut off and allowed to run to waste"
such is not the case the water just
reaches but very seldom even fills
a pit dug for its reception about two
yards from the edge of Colonel Cleve-
land's land over which it could never
flow as it is almost all much higher
than the channel by which water is
brought to my house of these circum-
stances you are probably aware

4- I also beg distinctly to con-
tradict the Statement made by
Colonel Cleveland that he asked
me "to allow the water to flow as
usual" His note was to the effect
that he would bring a much larger
supply of water and request-
ing me to permit part of it to
flow on through my grounds to
his which as I knew he could
not do I declined allowing giving
the reasons which I have men-
tioned to you, Viz. the reduced
supply and my intention of
building in the next dry season

J.

Fort St. George 12th. January 1854.

5- I would wish to correct Colonel
Cleveland's assumption that the
"Circular Tank" at the bottom of my
grounds was dug for water. It is
an excavation made to get mud
to build a wall. The "channel" he
names being a rain drain by the
side of the road in my vegetable
garden, and as also any of the tenants
of my house could inform you nei-
ther have ever been used for the
stream of water which is as I have
already said seldom sufficient to fill
the small hole 100 yards higher up.

by no means
E. T.
C

6- You are yourself aware
of most of what I have adduced, and
of the correspondence which has
frequently taken place respecting
the reduced supply and should fur-
ther reference be necessary I would
beg to refer to Captain Gerrard and
J. W. Musprratt Esqre. B. C. S. who have
tenanted my House, as to the inadequacy
of the supply for more than one house.

7- In conclusion I would briefly re-
mark that Colonel Cleveland was
informed by me before he took the land

that

Fort St. George 12th January 1854.

that there was no water except to large spring, about 100 yards from his house upon it, and that he has, since my refusal to allow any channels to be cut through my land expressed himself perfectly satisfied with the supply from the spring as he alluded to stopping up public thoroughfares I would wish to bring to your notice, that he has cut a deep ditch across the direct road from Coonoor to my coffee plantation and to Hoolikal and the Droog which has been in use many years and which proceeding compels a present "detour" of nearly a mile occasioning much inconvenience to many.

8. Perhaps I should mention that besides obtaining the permission of the Collector before turning the stream I paid the Burghers ten Rupees compensation for 3 feet of land along the whole length of my stream as almost all the land belongs to them and was at the time in a cultivated state. Trusting the above explanation may be satisfactory.

N. 6.

To E. B. Thomas Esqre.
Collector of Coimbatore

Sir,

As I understand that Government are about to sanction a survey with a view to a general distribution of water throughout the Cantonment of Ootacamund may I request you will do me the favor to lay before the Board of Revenue for submission to Government, my respectful application that my property although situated I believe without the limits of the Cantonment may

may be included within the proposed distribution.

I beg to observe that I am induced to make this application in consequence of my property "Carrig More" being most scantily supplied with water a small spring rising in my own grounds and which is, during the dry season almost if not quite dry being the only source of supply at present. During the Months alluded to above, I am compelled to resort to the expensive mode of conveying water for house-hold purposes even from the swamps below my property.

I would further observe that "Burnfoot" the property adjoining mine is most abundantly supplied with water during the dry season even a stream discharging at least 2½ Cubic feet per second flows through those grounds, and at least a third of that quantity, after the grass lands of Burnfoot have been abundantly irrigated runs to waste into the Nullah below and this waste would be more than sufficient for all my purposes while the respective levels of the properties admit of my house and grounds being

* At the head of the stream whence Mr. Lascelles channel takes its rise at the very least 5 Cubic Feet per second runs to waste and this more than abundant supply for many houses is unhoped-for by that Gentleman who claims a right to which he cannot use nor ½ of which his channel can not bring down but which might be made available for myself and others.

L. R.

being supplied from that Source.

Proceedings thereon (45.46)

The Board are unable from the correspondence submitted with the foregoing letter to pass any opinion on the water dispute between General Cleveland and Mr Lascelles. It is not shown by the former that he ever enjoyed the use of the water to which he lays claim, and the latter denies that any part of the stream flowing through his land runs to waste. It is obviously impossible to decide on claims of this nature without having their merits fully reported.

2. The Board think that the decision of such suits may with advantage be referred to arbitrators chosen by the litigants following as nearly as circumstances may permit the course prescribed by Regulation XII of 1816 extended by Regulation V of 1822 for the settlement of water disputes in irrigated lands and obtaining the professional advice of the Civil Engineer when necessary. In cases where the litigants may refuse to have the matter thus settled the Collector or one of his assistants should investigate the complaints and pass judgment on the merits leaving the party cast to appeal to the Board if he thinks proper to do so.

Read

E.B.T.

Read the following letters.

No 70

To
W H Bayley Esqre
Secretary to the
Board of Revenue
Fort St George.

(47)

B.d No 2149

From the Collector of Canara ...

Furnishing information called for in the Board's Proceedings of the 16th June 1853 regarding the proposed Survey Establishment.

Sir,

I have the honor to reply to an Extract from the Proceedings of the Board of Revenue, dated the 16th June 1853, requesting that I will furnish the Board with my opinion as to the scale of the Survey Establishment which would be required for surveying the Estates which come under the process of the Civil Courts and the Inam Survey Estates, for which the owners apply for Moolyuttahs or title deeds, and how soon it could be formed in the district and on the expediency of employing it in the manner and for the objects suggested preparatory to a more general Survey.

2. I observe that the Board have expressed their belief that the charge for such an Establishment would be fully repaid by the frauds and abuses that would be brought to light

In

3 In reply to these questions, I beg to state that I am decidedly of opinion that it is very desirable to substitute the system of accurate measurement, for that of Azmaish or estimate by sight, which has hitherto prevailed in this district, and this has been done as far as the limited means at the Collector's disposal will admit. For instance when any of the Government Servants apply for permission to purchase lands they are invariably measured. The same is done when application is made for new lands, and also when estates are divided. But although this is a step in advance of the "Azmaish" it is very desirable that the measurement should be made by parties capable of executing it on scientific principles and of putting the result of them measurement upon papers.

4. At present there are no such persons in Canara, but I feel sure that if the means of instructions were afforded, and employment in the Government service held out as a reward, numbers of young men would very quickly qualify themselves. Should

5 Should the result of the late discussions in the land Revenue of this district be the determination on the part of Government to institute a General Survey, I am confident that the execution of such a measure will be very greatly facilitated if it is carried out by natives of the district. The sudden appearance of a party of strangers as Surveyors, with orders to carry out such a work would give rise to much mistrust. Whether justly or not the impression would get abroad that they come to extort as much as they could during their stay in the district. They would be the object of jealousy equally to the land holders and the public Servants. On the other hand most of the public servants of this district are also land holders. If young men of their families are now induced to qualify themselves as Surveyors, they will be the materials ready for executing a more extensive Survey in the manner least likely to excite the suspicions of the people. The people will have to deal with persons speaking their own language, who are themselves interested

interested in the landed property of the district and to whom they are accustomed - Instead of the public servants of the district and the Survey Establishment being two distinct bodies the objects of mutual jealousy, the Survey will be carried out by the ordinary services of the district whose influence with the land-holders is very great.-

6. I therefore consider that any measures calculated gradually to raise up body of youths, of the class who are now competitors for public employment, duly instructed in Land Surveying, and to introduce the practice of Mapping in supercession of the prevalent Azmaish will be very advantageous in several points of view..

7. The first requisites for obtaining this end are, the means of instruction, and the prospects of employment in the public service.

8 I would beg to suggest the following plan for the consideration of the Board, as one by which I think the object may be obtained and at the same time a further end be secured Viz.t that of instructing a class of Maistries for the public works of the district.

That

9 That a person competent to instruct in the principles and practice of Civil Engineering be appointed to the district - That his duty be to give instruction at the principal Schools of Mangalore, by holding Classes in each, during stated periods, and that he be entrusted with the execution of certain Surveys and public works, so selected as to enable him to illustrate in practice the subject of his teaching.-

10 At the same time the sanction of Government should be given for attaching to each Talook a small Survey Establishment to be filled up only as persons duly qualified become available, taking the Talooks in the order in which there is the greatest need of their Services..

11. The Establishment which I would recommend would consist of one Survey Gomastah on 25 Rupees a Month with one Assistant on 10 Rupees to each Talook..

12. At the same time I would suggest that of such youths as qualify themselves in the Engineer department twelve be

be appointed paid pupils on 10 Rupees a Month to be employed under the Civil Engineers, or the Instructor himself, or with the Maistries, and from these when they have had sufficient experience the distinct Maistries will be selected.-

13 Besides the prospect thus held out, to a considerable number, of employment in the public Service, the measure proposed by the Civil Judge of preparing a Map of all land litigated in the Court would give employment to many private parties.

14 A body of Surveyors being thus provided, if all the estates litigated in Court, all the Sircar gueny estates for which title deeds are sought and all lands newly taken up, as well as those in which fraud has been specially alleged should be gradually mapped, a better System will be introduced, and preparations made for carrying out a more

980 Fort St George 12th January 1854

more extensive Survey Should such be resolved upon.

15 The expense will increase gradually in proportion to the efficiency of the Establishment It will begin with 150 Rupees a Month the Salary of the Instructor, part of which will be covered by the value of his Superintendence of the public works, Surveys &c. It will rise to the following.-

			Rs
	Instructor	150 x 12 =	1,800
12	Paid Pupils @ 10	120 x 12 =	1440
12	Survey Gomastahs at 25	300 x 12 =	3600
12	Assistant Ditto at 10	120 x 12 =	1,440
			8280

16 If this sum be distributed among the departments of Public Works, Public instruction, and Revenue, to each of which it belongs it will not appear large- I showed in a former letter that I considered that the sum received for Registering deeds in the Court might very fairly be considered as covering the greater portion of it, for I think it is a just appropriation of this surplus to a plan calculated to render landed property more secure, and to advance the very end sought by the Registry, namely the checking

checking fraud, and litigation.—

17 Mr. Anderson has pointed out the advantages of creating a liberal profession for the youths of the upper Classes who have educated themselves at our schools, and Lieutenant Walker has on several occasions noticed the absolute necessity of affording the means of instruction to those seeking employment in the department of Public Works instead of depending upon Tamul Maistries of whom only the worst will willingly come to this coast.

18 I believe that a good supply of books and instruments could be supplied at very cheap rates from the Government establishment at Roorkee, and these are essentials.—

19 I am at present reporting upon the subject of Public instruction and shall have occasion to shew that there is already one school at which class for Civil Engineering may be held with great advantage

20 With the Survey Gomastahs attached to the Talook Cutcheries my object would be to make them an integral part

980 Fort St George 12th January 1854

part of the Revenue Establishment, I should consider those only qualified who have a thorough Knowledge of Canarese, so that when there is no Survey in progress, as during the Monsoon Months, they should be employed in the ordinary revenue duties, and to promoted in common with others to the higher Revenue appointments, and thus in the course of time we should have as Tahsildars and Peishcars persons who have a scientific Knowledge of surveying, I should at the same time make it known that I considered a Knowledge of land surveying a desirable qualification for any Revenue appointment and one which would give the possessor a superior claim to a vacancy or to promotion over those who have not that Knowledge

21 By a plan such as I have detailed I should trust that if ever a general Survey is undertaken, the supervising Officers alone would be strangers to the district. In the mean while much information will be gained, much litigation prevented, proprietory rights strengthened, and education considerably advanced not only in the Survey department but in that of Civil Engineering generally.— I

22 I dwell upon this subject of education generally, because this district is so distant from others, that education can only be advanced by local efforts; and while we have few youths who would go to Madras for an education we have a large number eager to avail themselves of it here, and this has a direct bearing upon the subject under report.

23 It is necessary that I should now make a few remarks upon the subject viewed, as the Board seem to consider it, as a step made in the readjustment of the assessment of the district. They speak of the Survey as being with a view "to the equalization of the assessment whether it be too high or too low" and they speak of the charge of the Establishment being repaid by the frauds and abuses that would be brought to light.

24 I must here observe that this question is involved in such difficulties as have made it a subject of deliberation for 25 years and that I am not in possession of the views of the Board, which appear to have been revoked in their Proceedings of the 8th May 1851

In

980 Fort St George 12th January 1854

In my Jammabundy report of the 7th October 1850, I touched upon this subject, and I must here beg to report that before any readjustment of the assessment is attempted, it is necessary that the Officers who is entrusted with this duty should be distinctly informed as to the principles upon which it is to be effected - The Officers must be fully in possession of the views of Government on these two points, 1st What are to be considered frauds and abuses, and 2nd When such are brought to light upon what principle is he to readjust the assessment.-

25. If clear instructions are laid down under these two heads, every Survey made of any estate will be a step towards the Settlement of the district; if they are not laid down there will be only an addition made to those previous Settlements which the people hoped were permanent, and the local Officers intended to be so, but upon which doubt has now been thrown

26. If such instructions are given to the Collector as will enable him to prove to the people that the Thanao Settlement is considered to have been a permanent one, that

that the only question is whether the lands they now hold were within that Settlement or not, and when they plainly appear not to have been so if the assessment is fixed upon liberal principles, the measure proposed by the Board may be the means of quieting many suspicions, and preparing the way for a more extensive measure. If on the other hand they see a few estates reassessed, as if no previous Settlement had been made, and no guarantee of its permanency held out, very great alarm will naturally be caused, and this ought not to be risked unless the Government have deliberately resolved upon pursuing this course.

27. I think that I cannot state the difficulties which attend this question more plainly than by laying before the Board two examples of the kind of questions which every survey of an estate gives rise to. I consider however that it will be more convenient that I should do so in separate letters.

28. My recommendation in this is

is that measures be at once taken in connexion with the Board of Public Instruction and of Public Works for introducing a Knowledge of Land

Land Surveying and

for adopting it univers-

:ally in the Revenue

and Judicial adminis-

tration of the Province.

No. 1

To,

W. H. Bayley Esquire

Secretary to the Board of Revenue.

Fort St. George.

Sir,

I have the honor to request you will lay this letter with its enclosures before the Board. although it was most certainly not my intention to trouble the Board with further correspondance on the subject of Mr. Lascelles letter of the 6th September to Mr. Mallby. yet as he has addressed another letter to Mr. Mallby under date the 15th November in which he professes to explain certain statements made by him in his communication two months previously it calls for some remark.

2. I will merely request permission to draw the attention.

attention of the Board to the circumstance that — Mr. Lascelles's first letter of the 6th. September in which he refers both directly and by inference to the Sub Collector Mr. Hall is dated from "Sircy" Mr. Halls residence It is evident that Mr. Lascelles put forward asertions, coupled with Mr. Halls name, — without that Gentleman knowing any thing of the matter as will be clearly seen by reading the enclosed copy of an Esctract from a Demi official letter I have received from Mr. Hall dated the 1st. Instant and also an Esctract from another Demi Official letter from the same Gentleman which I forwarded to the Board on the 5th. October. Mr. Hall now writes, that not only has he not slightest recollection, of having had any conversation with Mr. Lascelles regarding spars for his boat, or any other purpose, but that he does not so much as recollect Mr. Lascelles' ever telling him, that he was building a Boat, at all.—

3. I will now briefly remark on Mr. Lascelles's asertion that the Tahsildar made me acquainted with all particulars regarding the Poon spar before I wrote to him. While looking at the roughly squared spar as it lay on the Beach, the Tahsildar told me — verbally in reply to my question, as to whether he had heard any thing as to where it came from that it — was rumoured in Honore, that Mr. Smith had —

brought

brought it in for Mr. Lascelles and as the latter had been sending people in the direction of the Neleoond Ghat, the spar might possibly be one of the two Poon Trees attached a month before, but the Tahsildar could only speak on supposition and as I have before stated there was no Official information before me on the subject.—

Add.t. Sub. Collector.

Esctract from a Demi Official letter from Mr. Hall dated Neleoond 1st. December 1853.—

I have just received your note of the 27th. Ultimo with Mr. Lascelles letter to Mr. Mallby dated 15th. idem, and Esctract from his former one dated 6th. September.—

As I before mentioned to you I have not the slightest recollection, of having had any conversation with Mr. Lascelles regarding spars for his boat or for any other purpose. It is possible that I may have told him that there would be no objection to Mr. Smith having the land he was about to apply for in the Bilgy Talook for a coffee plantation, as the Poon trees growing on it which were at first thought to be valuable and therefore worth preserving for Government had been pronounced unserviceable by Mr. Poulton. I do not so much as recollect

Mr.

Mr. Lascelles even telling me, that he was bulding a boat; I knew that he was, but I dont think the information came from himself. When Mr. Smith applied to me for the two Poon trees he was agent for the export of Government Cotton, and said he wanted them for masts for a Pattimar he had chartered for the season. If by the "Proper authority" Mr. Lascelles means it to be inferred that I notified to you, that you had overstepped the bounds of your authority, in doing what you did, regarding the two Poon spars felled and being removed by Mr. Smith from the Reserved, that, he is altogether mistaken for I had no reason whatever, to make any remonstrance in the matter - He has put a wrong construction on what passed between us, which was simply a reference from you, and a reply from me in Canarese and a note in English from me, to you upon receipt of a letter from Mr. Smith, requesting me to inform you, that he had cut the trees with my permission. I believe my note to you contained little or nothing beyond this piece of information.

B. No. 3097.

From the acting Collector of Madras.

Reporting on the observations of the Collector of Chingleput in regard to the intervention of Brokers in the salt trade at Madras.

No. 201

To,

W. H. Bayley Esqr.

Secretary to the Board of Revenue.

Sir:

I have the honor to acknowledge the receipt of the Extract from the Board's Proceedings dated 17th. Instant communicating for my explanation Para 3 and 4 of a letter to the Board from the Collector of Chingleput on the investigation of Brokers in the salt trade at Madras.

2. My own impression, coincided with Mr. Cochranes in so far that I supposed Brokers could not keep the Salt Trade in their hands to the extent complained of without some undue favor on the part of the Salt Servants and I therefore requested the Superintendent of Salt to guard against this and in giving instructions for wholesale by heaps. I excpressly directed that they should be given to bonafide purchasers from up Country and that all applications for heaps should be registered and attended to in their order.

3. The Superintendant has now been

been called on for the information desired by the Board and has sent an elaborate report to the effect that the employment of Brokers is entirely voluntary and as necessary in the salt trade as in all the other whole sale transactions carried on at Madras. Mr. Campbells description of the trade as extracted from his report is subjoined —

Paras 8 to 12 & 14.

4. Unless therefore through actual bad faith and disobedience of orders on the part of the salt establishment, including the Superintendent which I cannot suspect the system of Brokerage as now carried on seems a voluntary compromise and all that can be done is to prevent its abuse by ensuring every facility for direct purchasers whether of greater or less quantities of salt.-

Madras 25th November 1853. } /Signed/ H. Stokes
Acting Collector.

Extract from the report of the Superintendent of Salt dated 24th November 1853.

Para 8. Every Mundy or store in Madras patronizes one or two Salt Merchants or Brokers in the same manner as Houses of Agency which have their authorized Dubashes or Brokers.-

9. When goods are brought from up country to the Mundies the Headman of the Mundy

Mundy should properly give each Bandy man or send the owner the amount due for goods brought Instead of this the Headman gives the Bandyman a Cudjan document or Promissary Note addressed to a Salt Merchant or Broker, in which he is requested to despatch the Bandyman with a specific quantity of Salt for which payment will be made at the Mundy 10 or 15 days after. The Salt Merchant if willing to take the risk advances the Money and sends his own Goomastah or attends himself to see the salt delivered to the Bandyman when the Bandyman and Salt Merchant or Goomastah appear before the Headman at the Mundy the one to acknowledge the receipt of the salt and the other to be assured of payment and the Bandyman proceeds on his journey forthwith with the Pavannah delivered to him by the Salt Merchant or Broker or his Goomastah. The salt Merchant and the Headman at the Mundy then settle their accounts independant of the Bandyman who is never held responsible after he receives Salt.-

x Copy sent herewith

10. When the salt Merchant or Brokers is acquainted with the Bandyman or owner of goods requiring salt the latter at once receives an advance from the salt Merchant in the shape of a specific quantity of salt brought at our store with the Money of the salt Merchant and gives instead a Hundee.

Hoondee due within 30 days or more which the salt Merchant sends to his Agent for recovery of the advance with interest thereon or any further consideration which the Hoody may specify sometimes the further Consideration is a share of profits, the Merchant or Broker not however to bear a share of risk..

11 When a single Bandyman brings his own goods into Town and effects an immediate sale and payment, he either comes to the Broker or the latter offers his services to get him Salt on Consideration of a rate varying from two Annas to one Rupee per Cart. At present the rate is Two Annas, but the rate rises when there is a restriction on the Sales. When the Bandyman has a companion he generally declines the offer, but when he is alone he accepts it and holds the Broker responsible for due measurement and for cooly hire for Carting the Salt which the Broker pays out of his Brokerage..

12. Estiarnamahs have repeatedly been issued and proclaimed by Beat of Tomtom from time to time both in the past and Current year discountenancing Brokers imprefsing on Curtmen the loss they must sustain by allowing Brokers to deal for them in Salt instead of personally dealing

dealing with the Circar and ensuring themselves the full delivery without fee or other pecuniary loss but they have been disregarded. In the case of single Cartmen this is not surprizing for if they attend to their Cart and Cattle, no one in their interest is on the spot to receive the salt on measure from the Circar or to convey it to the Cart, which very often is as far away from the place of sale nearly, as Sir Thomas Munro's statute from Government Bridge the intervening space being filled with salt heaps by other Carts to the Number of 150 or 200 and an equal number of Coolies running to and fro Carting Salt for other Merchants and by departures or new arrivals of Carts. Amidst the dim and confusion going on it is not to be wondered that a single Cartman would prefer giving the fee of from Two Annas to one Rupee for Cooly hire for Carting his Salt for securing his full purchase from the Circar (part of which would otherwise find its way may be design or accident into the Cart of another Owner) and look to the Broker for all loss and to secure him from delay in the receipt of Rawannahs which may arise from a similarity of name and destination..

x 50 Mercals 15 Rs. worth or 15 Baskets load..

14. Some of the Brokers declare that they came from Chingleput and go there when the Inland sales are

are closed or restricted here and all agree in the assurance that the system of having Brokers in the Salt Trade both here and elsewhere exists as well as in the Trade of all other Commodities no man being able to secure a sale or advance for his Grain Pulse, or other Commodity without the intervention of the Broker in the same manner as the larger owner of Indigo and Cotton or other Commodity would effect such thro' means of the Dubash at any European House of agency.

From the Acting Collector of Madras.....

From Collector of Chingleput 2nd. Septr. 1853.
To—Do. 14th. Octr.—
From Do. 28th. Do.—

Sir,

I have the honor to submit for the decision of the Board the point discussed in the accompanying Correspondence with the Collector of Chingleput.

2. The Collector for the supply of salt objected to pay the Manufactures at Covelong the Charge for conveying the Salt from the Pans to the beach representing that this charge had usually been borne by them. The Collector however states that they are not to be held liable and I therefore conclude that the Contractor should pay although there is reason to think he may not have expected to do so when he made his agreement, wherein he engages to pay at the rate of 95 Rupees a Garce for the quantity delivered to him at the Chingleput Pans all the charges for lading freight wastage and landing being borne by him.

No. 1

To.

H. Stokes Esquire

Acting Collector of

Madras.

Sir,

I have the honor to acquaint you that Veneat Reddy the Contractor for the supply of Salt from Covelong to Madras has objected to the payment of Cooly hire for the conveyance of the article from the place of manufacture to the sea shore for Shipment.- This charge has always been borne by Government when exports were formerly made at Covelong, the Manufacturers being only required to carry the Salt from the Pans to the Depot which is contiguous there to. I have accordingly included it in the amount of cost for conveying the article from the Covelong Depot on board ship which in my letter of the 20th April last I stated to be Pt. 5-6-5. and Pt. 4-15-5 per Garce the details there of are exhibited in the accompanying Memo: I am inclined to believe that this Cost of Carriage was sufficiently allowed for in the Contract entered into with Vencat Reddy at Pt. 95 the Garce If otherwise there seems no alternative but to incur it on account of Government.

Ennore.....
2nd September 1853.

/Signed/ H. Cochrane

Collector.

To

To,

The Collector of Chingleput

Sir,

I have the honor to acknowledge the receipt of your letters of the 2nd and 29th September relative to the Cooly hire for the conveyance of the Salt purchased by Vencata Reddy from the place of Manufacture to the seashore.

2. In reply I beg to state that Vencata Reddy is responsible by the terms of his Contract to bear all the charges for lading & freight, and I do not therefore think that Government ought to pay the charge to which he objects. At the same time he states that he took the Salt on the understanding that it would be delivered to him at the depot by the Manufacturers, and that in the first instance no demand was made upon him on this account. It seems to be between the Contractor and the Manufacturers and it rests with you to decide who is to pay the item in question.

Madras
14th October 1853. } / Signed / H. Stokes

Acting Collector.

To,

The Acting Collector of

Madras.

Sir,

I have the honor to acknowledge the receipt of your letter of the 14th Instant, and in reply thereto to state that I am of opinion that the matter as regards payment of hire for the conveyance of the salt from the place of manufacture

manufacture to the seashore rests between the Government and the Contractor Vencata Reddy in reference to the terms of the Contract entered into with him at your Office.

2. You will observe that I have already stated in my communication of the 2d and 29th Ultimo that the items of charge of this nature had always been disbursed by Government and I therefore included the amount of hire due to the Manufacturers in the cost of the shipment of salt at Covelong Viz. Rs. 5 per Garce and was consequently under the impression that the Contract had been regulated accordingly on the understanding that either the Government or Vencata Reddy was liable to the charge in reference to the tenor of the Contract as it would however appear that it was not your intention that this item of charge should be defrayed by Government tho' as I gather from your letter, this point has not been specifically provided for in the Contract I have to request you will recover from Vencata Reddy the amount and remit the same to this Office for payment to the manufacturers.

3. The manufacturers having undertaken the removal of the Salt on the part of Government it appears unreasonable that they should be directed to look to Venkata Reddy for the payment of their hire & as no transactions with Vencata Reddy have transpired in this Office further than to cause the Salt to be delivered to him on the seashore, there appears no alternative but to request that the amount may either be collected thro' your Office from Vencata Reddy or paid by Government.

4. Subjoined is a Memo: exhibiting the hire in question Viz.

Vizt. Rs. 300-10-9 as well as the Coodewarum Rs. of the salt supplied to Vencata Reddy from Covelong amounting to Rs. 1987-14-2 for which latter sum I request you will give me credit in your account.-

	Garces.	Rs.	A.	P.

J. P. B.

Read the following letter

No. 209

To W. H. Bayley Esqre.
Secretary to the
Board of Revenue.

55

B. No. 3289

From the acting Collector of Madras }

Reporting on the Ecstra Sources of Revenue in this District for Fusly 1262.

Sir.

I have the honor to submit the prescribed printed Statements in triplicate of the Collection, charges and net revenue from each of the Ecstra Sources in this Collectorate for Fusly 1262 / 1852-3 with the Appendix A to I. The forms prescribed by the Board's Circular Order 22d December 1850 and marked H & I are substituted for C and D heretofore in use.-

Salt

2 In the management of the Salt during the past Fusly the points principally requiring notice are the results of the measures previously sanctioned for the extension of the manufacture, with the consequent increase of Establishment the appointment of an Uncovenanted Superintendent and the means adopted in communication with the Board for supplying the deficiency in our Stock by importation from other Districts. Arrangements were made

made in Fusly 1261 for carrying on the manufacture in 603½ new Pans at attiput and Ennore, and for re-opening 86½ waste Pans at Cuttiwak. The Superintendent entered on his duties on the 17th January 1853, and the enlarged Establishment took effect from the 6th Inst 1853, involving an additional monthly charge of 158-8-+ The quantity made was however by no means commensurate with the anticipations entertained. The preparations for manufacture were greatly retarded by the heavy rains in January, and again when the Pans were just ready for scraping, they were laid under water in the bad weather in the end of March. Thus the actual collection of Salt did not begin till the middle of April, and then on a very limited scale till the end of that month. It was then continued with tolerable success, although it does not appear that the new Pans were productive some of them indeed yielded nothing.

+ This includes 17-8-- pay of Menasse Gurumsett attiput and Ennore.

	Manufactured in Fusly	Subsequently
Madras 600 }	2496	1817 96
Chingleput 300 }	472	895 205
	2969	2712 301

3 The quantity sanctioned by the Board to be made was 9300 Garce - Of this there was stored within the Fusly 2969 Garce - 367 mar, and Subsequently till the 30th November 2,712 Garce - 301 mar.

1 The Stock on hand at the commencement of Fusly 1262 was 2266 Garce - 11.9 mar and as this had been reduced by the 29th March to 107 Garce, I considered it imperative to look elsewhere for a supply and also to stop the inland sales, till the supply of new Salt might admit of their being resumed which was done on the 27th April 1853.

5 Being much impressed with the importance of Keeping up the Stock of Salt at the Presidency for the supply of return loads for the Carts which carry on the traffic with the Interior, I applied for the Boards Sanction to procure Salt from the Chingleput and Nellore Districts. Under the arrangements authorized accordingly as explained in the correspondence noted in the margin + 200 Garce - were obtained from the Poongalam Pans in the Chingleput District and 11.22 Garce - 325 mar were contracted for, to be imported by Sea from the Pans of Nellore and Covelong in Chingleput. The contractor was to pay as noted in the margin for each grace, and to sell at the monopoly price. Of the Salt so procured 200 Garce - from Poongalam and

Covelong
432 - 325 - 95 - D.

and 65 from Esakapully were sold within the Fusly and are included in the Inland and Home Sales.

6 Heavy wastage occurred on all the Salt brought from Poongelam, and on most that was brought from the Ennore Platform. It seems desirable that in future, such trans-shipments of Salt should be avoided as far as possible.

7 A small quantity of Salt was supplied from Ennore for Exportation by Sea in the Months of July, but such sales ceased under the Board's Orders dated 9th August 1852. I am of opinion that we should never export Salt by Sea from Ennore, unless our production should Exceed the demand for the Inland trade a contingency not likely to occur.

8 It appears that until the Month of May 1853, there was always

some restriction on the sale. This was regulated from time to time by orders from the Huzoor, the last limit fixed was 200 Garce a Month which continued from 5th January 1853 till the beginning of May when it was removed altogether. Such restrictions perhaps cannot at times be avoided, but in themselves they are always objectionable, and place a dangerous power in the hands of the Servants. Indeed it does not appear that there has ever been a sufficient Stock of Salt at Madras to show what the demand would reach if fully met, and the revenue has fluctuated according to the quantity available.

Fusly	Collection			Shroff Ennore			Total

11 The decrease in the Home Sales is accounted for partly by the markets of Sydapet, Saint Thomas Mount and Poonamallee having been transferred from this head to that of inland, and partly by the inland Sales having been stopped for a long period during 1261 and during the stoppage Salt having been sold nominally for Madras but in reality for the Interior.

12 The following Statement shews the destination of the Salt brought for the Inland markets.

as

as shown by the Rawannahs, or publics however are not a very safe guide. It will be observed that Salt from Madras finds its way in small quantities to many markets which could be supplied from a much less distance and even to maritime Districts where Salt is made. The reason is obvious. Produce is brought from those places to the Presidency and Salt is taken as a return load. By far the greatest Escport however is to the Mysore territory.

13

The increase in the charges of the Fusly under report, as shown in the following Comparative abstract amounted to 5,902 Rs but the per centages is only about 5 as more than in the preceding year. It was caused by the addition to the Establishment especially by the appointment of Superintendent of Salt, and in the Extra charges by the reshipment to the Madras yard of the Salt Stored in the first instance at Ennore for export by Sea. The Boat hire &c charges for carrying the Salt from Poongalum amounted to ——— 14,69- 4- 10-
and from Ennore to ——— 1543 - 13- 2-

The decrease under the head of Rooms sum is chiefly owing to the transfer to the fixed Establishment of the Rafsoons Sibbendy to the amount of 17- 8- - per Month, under the orders of Government 15th April 1853.

A.R. Kavy

16 There has been an increase under every branch of the ab Kary Revenue except the Sheep Tax annually amounting in the aggregate to Rs 29,386, as shown in the following figures A great drawback to the satisfaction with which the progressive increase of this branch can be regarded is the conclusive proof it affords of the fearful prevalence of intemperance among the native population of Madras.

Exceeded that of the preceding year by Rs 24,636-2-6 as shown in the margin and the per centage of the Charges has slightly advanced from 46/64 to 57/64.

Sundry Small Farms & Licenses. 19 There has been a decrease, as shown in the margin under this head which consists of a sort of Motur fee realised in the shape of fees on Stamping weights and measures. It is accounted for by an alleged Slack Rush in the grain trade, causing the Collections on Marcals to decline. The working of this Department has been investigated and a new scale of fees introduced, as reported in the correspondence noted in the margin from the 1st September 1853.

Fusly	Collections Rs	a	d	Sheriff Summons Rs	a	d	Total Rs	a	d

Increase in 1853 as compared with 1852

Improvement in the trade occasions the increase in each item.

Vide remark No. 3

Vide remark No. 54.

A small quantity of Chillies and Salt Fish having been imported in Fusly 1262 causes the decrease.

Favorable sales produce this increase.

Vide remarks on Nos. 12 and 53.

Do. Do. No. 54.

A large quantity of Chillies and Salt fish having been imported causes the increase.

Madras.
12th July 1853.

Abstract

1023

Fort St. George

No. 5

Abstract Shewing the Quantity of Articles and Toll from 12th July 1851 to 11th July 1853. Fuslies 1261 and 1262, with

Articles	From 12th July 1851 to 11th July 1852 Fusly 1261 — No. of Boats	Quantity	Amount of Toll — Rs. A P	From 12th July 1852 to 11th July 1853 Fusly 1262 — No. of Boats
Firewood	589	960755 Billets	5331 3 6	435
Faggots	1249	1078791/2 Bundles	12998 10 5	1438
Shells	961	55782 Parahs	4610 9 1	1315
Grains	134	222 Gs 752 1/2 Pls	635 6 0	83
Sundries	3948		2549 11 5	3828
Salt	1246	30997 Gs 783 Pls	8318 11 5	1507 1/2
Total	8127		34444 7 10	8606 1/2

Madras 12th July 1853. E. E. P.

12th January 1854.

Levied on Imports and Exports by Cochrane's Canal explanation of the cause of Increase and Decrease on each item-

July 1852 to 11th July 1853 Fusly 1262. Quantity	Amount of Toll — Rs. a P.	Remarks.
795785 Billets	4232 13 5	The sales having been unfavorable to Merchants causes the Decrease-
197143 1/4 Bundles	1557 6 5	Improvement in the trade caused a greater demand for these articles-
74278 3/4 Parahs	6182 11 9	
134 Gs 142 1/4 Pls	380 3 3	The importation of grain to this Market having been disadvantageous to the Merchants, is the occasion of this decrease-
	2841 6 10	The sale of Salt-Fish, Chillies and Tobacco at this Market having proved profitable produces this increase-
2549 Gs 718 Pls	10270 8 1	A larger quantity of Salt having passed through the Toll Office produces a corresponding increase, but this is a mere adjustment and is discontinued in the Accounts for the Accountant General-

Diary

14th January 54. Sent the following letter.-

To,
The Collector of
Nellore.-

1

B. No. 86.

To The Collector of Nellore. . . . . } Sir,

In Cons. 5th January 1854.

In Cons. 9th January 1854.

With reference to the last para of your letter of 27th December 1853 Clauses 3d and 4th para 2 of your letter of 5th January 1854 wherein you first state that you "have reason to fear that the Public servants in some places will hardly be able to remain at their posts," and again that "it is difficult "to say how the Public servants can keep at their "posts." I am directed by the Board to ascertain from you under what circumstances the Public Servants should contemplate such a step. They are bound to remain at their posts in times of difficulty but should any of them shew any desires to quit their posts the Board request you will immediately allow them so to do, and appoint others permanently in their places.-

Revenue Board Office,
Fort St. George,
14th January 1854. } (Signed) W. H. Bayley
Secretary

No. 3.

Extract from the Minutes of Consultation in the Revenue Department under date the 3d January 1854.

Read the following letter from the Magistrate of Nellore.

No. 5.

To, Sir H. C. Montgomery Bart.
Chief Secretary to Govt.
Fort St. George

Sir,

With reference to the accompanying Copy of a correspondence with the Officer Commanding Nellore with whom I have since been in communication personally, I have the honor to request that I may be allowed to get in grain from the District to supply the Sepoys under his Command in communication with the Acting Deputy Commissary at Masulipatam, There has been no difficulty in supplying the men since the date of my letter of 21st instant to the Commanding Officer, but the Grain Market at Nellore is not in a state to be depended on. It seems the object of the Merchants to sell off what is in their shops as fast as possible, and

Fort St. George 16th January 1854.

and get no more in with a view to make it appear that they have done what lay in their power, and when an artificial scarcity is thus produced, to enhance the price, which they have fixed themselves, rather low considering the time and circumstances.

24 Rs. a Candy for Peshawar.

2. Had I authority under such an emergency to make advances to get in grain I doubt not I could amply supply the place without entailing any loss on Government in doing so / as I should not attempt to dispose of it at a loss / and thus defeat all combinations of the kind, and I would urgently request that if possible, permission may be given me to do so, under the emergency to the extent of ten thousand Rupees. I am informed that no more than ¼ of the Rice harvest is likely to be saved. The residents of the place have come forward to support the starving and destitute of this Town / which with its suburbs has a population of about 20,000 persons / and have subscribed upwards of Rupees 450 a month for the purpose, so that no gratuitous distribution on the part of Government is required here.

Nellore, Magistrates Office, 24th Dec.r 1853.

/ Signed / F. B. Elton.
Magistrate.

To

Fort St. George, 16th January 1854.

To,

F. B. Elton Esqre

Collector & Magistrate of Nellore.

Sir,

I earnestly beg that will have the goodness to direct that one Pagoda's worth of rice may be sold to each Sepoy tomorrow at the rate of 21 or 22 Rupees the Candy several of the men now sent to aid the Tahsildar declared to me that they could not procure rice tho' ready to pay for it and some produced the pay they yesterday received untouched whatever may be the case with the population generally, it is obviously absolutely necessary that the Sepoys be enabled to procure a sufficiency of good rice, exposed as they are to be called out at a moments' warning on harrassing and fatiguesing duty, at all events, I only perform my duty in seriously stating to you that unless they are so, it will be physically impossible for them to act with energy should circumstances require it. I therefore beg you will have the goodness to give such directions as may ensure the men of the detachment being able to procure rice at an early hour tomorrow forenoon.

Nellore, ...
21st December, 1853.

(Signed) J. Beaver Captain
Commanding Nellore.

No. 192.

To, Captain J. Beaver
Commanding Nellore.

Sir,

In reply to your letter of this days' date

Fort St. George 16th January 1854.

I have the honor to inform you that I have issued orders to the Cutwall to see that the Sepoys are supplied with good rice at the Current selling rate which is 24 Rupees per Candy.

2. I regret that I cannot furnish it to them cheaper, but I am under the impression that Sepoys are entitled to compensation when the price of grain is beyond a certain limit.

Nellore, ...
Magistrate's Office,
21st December 1853.

(Signed) F. B. Elton
Magistrate.

(True Copy)

(Signed) T. Pycroft
Secretary to Government.

Para 1. With the above letter the Magistrate of Nellore forwards copy a correspondence with the Officer Commanding the Station relative to the supply of rice to the Sepoys, and in reference thereto, and to state of the grain market, requests that he may be allowed to get in grain from the District for the consumption of the Sepoys in communication with the Acting Deputy Commissary at Masulipatam.

2. In view further to defeat the assumed combination among the grain dealers, who according to Mr. Elton's opinion contemplate disposing

Fort St. George 16th January 1854.

disposing of their present Stock, and refraining for a while from procuring more, so that when an artificial scarcity has thus been occasioned they may enhance the price on the supplies eventually brought in, the Magistrate solicits authority to make advances to the extent of ten thousand Rupees to get in grain - such grain being disposed of by him at prices which will cause no loss to Government.

Letter Para 1.

3. With respect to the first of the above propositions, it is remarked that since the 21st Ultimo there had been no difficulty in supplying the Sepoys. Should any such difficulty be likely to recur, the Right Honorable the Governor in Council under the circumstances, will not object to arrangements being made by the Commissarial authorities for providing the Troops at Vellore provided the supplies be furnished from Madras so as to cause no disturbance in the Local Markets. The Commanding Officer will, if necessary place himself in communication with the Commissary General on the subject.

4 Mr. Elton's second proposal is utterly inadmissible - such an interference

Fort St. George 16th January 1854.

with the Markets of the District as his scheme contemplates would serve only to deter the local dealer, who could not enter into competition with the Government, and by paralyzing private enterprize, would greatly enhance the evil it was intended to abate. The Magistrate has already Extract Minutes of Consultation 27th Ultimo been warned that he is on no account to attempt to fix or regulate prices and that, whether directly by means of express orders or indirectly by bringing Government into the market to complete with the grain merchants.

B.D. No. 202

From the Secy. to Government Stating that His Excellency the Governor of the French Settlements in India has been misinformed relative to the Collector of Tanjore prohibiting the export of Grain on account of the apprehended scarcity to whom reference will be made and directing the Collector of South Arcot to pay the French Government the revenue of the 4 Villages lately transfered in the vicinity of Pondicherry

No. 65

Extract from the Minutes of Consultations in the Revenue Department under date the 12th January 1854.-

Read the following letter from the Governor of the French Establishments in India.-

(Here enter 3rd Jan. 1854)

In the above letter His Excellency the Governor of the French Settlements in India represents the distress to be apprehended in the Town of Pondicherry in Consequence of the scarcity of grain and

invites

invites the British Government to cooperate with the French authorities in all matters calculated to afford relief and protection to the people. The measures particularly indicated are a special surveillance over the open and irregular frontier of Pondicherry and South Arcot, the extension to the French possessions of all Custom-House Regulations and other expedients adopted with a view to ensure the supply of food and especially the prohibition of the export of grain to any ports except those of the Continent of India. It is proposed that this latter measure be carried out simultaneously by the French and English Governments at their several Ports.

2 The Right Honorable the Governor in Council has learnt with much regret the distress which is likely to be experienced in the Pondicherry territory from the unfavorable nature of the past season and the dearness of grain. The Special agent for the Foreign Settlements to whom copy of His Excellency Admiral Fremenac's letter will be furnished thro' the Political Department will in his Capacity

Capacity of Magistrate of the District of South Arcot adopt in communication with the French authorities all practicable precautions to prevent Robbery and outrage on the Frontier and will assure His Excellency of the earnest desire of the Madras Government to preserve the peace of the French Settlements in common with that of their own possessions, being well aware that any serious popular turmoil in one will be sure to extend to the other.

3 With respect to the other steps referred to by His Excellency the Governor in Council is fully convinced that the only safe policy in the present crisis is to give the utmost possible freedom to the trade in grain by removing all obstructions and scrupulously abstaining from any attempt to dictate to the Dealers or to interfere with the markets. With this view he has already suspended the levy of import duty on grain at all the Ports under this Presidency. He regrets however that he cannot concur with the French Government as to the expediency of closing the ports to the export of grain to

place

places beyond India, such a proceeding would he cannot but fear, alarm the grain merchants and by embarrassing and Cramping their operations tend to aggravate the evil it was meant to mitigate.

4 The Right Honorable the Governor in Council cannot but suppose that His Excellency has been misinformed in respect to the orders said to have been joined by the Collector of Tanjore for prohibiting the export of grain. Reference will be immediately made to that officer on the subject through the Board of Revenue and if he should have given such orders he will at once recall them.

5 With regard to the Revenue of the four Villages in the vicinity of Mahé which have been ordered to be restored to the French Government, it is observed that under date 16th September last the Collector of South arcot in charge of the special agents Department was directed on the lands being transferred to report to Government through the Board of Revenue, the total amount payable to the

Ex. Minutes of Cons 11th September 1853

the French authorities on that account, calculated to the date of transfer. In as much as Mahé will now be desired to expedite the transmission of that report. Meanwhile it is Resolved that the accounts have already been made up to the end of Fusly 1257 and sanction given for the payment of the amount Rs. 83,433-3-3. The disbursement was delayed in Consequence of some further discussions which took place on the subject of the Land to be surrendered. The Government have recently learnt that the Villages have been made over and accepted by the French authorities. They therefore direct that the Collector will at once pay to them the above sum of Rupees 83,433 3-3 for the arrears due to the end of Fusly 1257 leaving the further disbursements on account of the interval from that time to the date of actual transfer to be made hereafter on the accounts being settled, which should be without loss of time.

Board of Revenue
Fort St. George

Sir.

(19)

B. No. 3163.

From the Collr. of Nellore

Replies to the several points on which the Board called for further information in their Proceedings dated 22d August 1853 on a review of the Jamabundy Report of this District for Fusly 1261.

I have the honor to acknowledge the receipt of the Board's Proceedings under date 22d August 1853 on a review of the Jummabundy Report of this District for Fusly 1261 and to furnish replies to the several points on which the Board call for further information.

The 1st enquiry is what is the proportion of a field which if left waste for sufficient cause will be deducted as Shamilat Bunger. Not having myself made a Settlement in this District beyond one or 2 Taluks, I am unable to answer this question from personal Knowledge, but from the enquiries I have made on the subject there appears to be no definite or well defined System of assessing Shamilat Bunger with the exception of the Village of Allore in which Mr. Collector Stonhouse introduced the following rule. If in a

a field engaged for, any thing under 1/4 is cultivated Shist is to be charged for the 1/4 if the cultivation exceeded 1/4 and was less than 1/2 the 1/2 field was to be assessed, and so, on. Some of the fields in this District extend to 200 or 300 acres each and the whole of such fields are frequently not in the possession of one Ryot; the Shanmlat Bunger is only understood of the fractional parts of the portions engaged for, not fractional parts of the whole field. The ryots circumstances, the state of the Season the means of irrigation and generally the causes of the land being left waste appear to have formed the grounds of regulating the deductions allowed. In my opinion the deductions on account of Bunger very much depend on the way the Dittums are framed by the Tahsildars. I understand that thousands of Rupees worth of land have been included in them which were never bonafide taken up for cultivation by the Ryots nor their signatures obtained for the same. If Dittums are fairly framed and not attempted to be artificially kept up little or no reduction will be necessary afterwards, except such as the

the state of the Season or other accidents may require.

2d The Board wish for information regarding cultivated Cheyroot and the assessment charged on land cultivated with this kind of crop. The Cheyroot is cultivated at the Sea side in low Sandy places unfit for other cultivation. The Seed is here sown and irrigated generally by hand, but in some places by means of the Pecottah The sites where it is cultivated are not permanent, when they may become covered with Sand they are abandoned and other low grounds are selected. During the time of the Mohommedan Government a fourth of the Cheyroot cultivated was received in Kind from the ryot which was sold and the proceeds carried to account under the head of Nagadyat. This was more or less the practice till Fusly 1254 from which period Cheyroot is generally rented out and there are but few places in which the Shist on what has been cultivated is levied according to certain rates, which

2 Buddapoody	Ramiapatam	37	8	"
	Chackecherla	37	8	"
	Caradoo	37	8	"
3 Cranvara Mellore	Canoopurty	38	8	"

which vary in different places, as shown in the Margin and appear to have been fixed with reference to the quality of the soil, and the prices prevailing at the time.

3d Information is also required regarding the mode of assessing fruit trees, and on what descriptions it is levied. These trees consist chiefly of Tamarind and Mango, as also of Guava and Cluppa they are generally rented out unless where the Ryots prefer paying the Mucteah dist as settled in Mr Smalley's time when he is at liberty to do so. No additional tax beyond this is levied upon them, but the above cannot be considered as the fixed assessment

assessment of the land, irrespective of the fruit trees growing on it.

4th The Board express their surprise at the small extent of Sugar cane cultivation in this District, and wish to be informed whether there are any peculiar circumstances in the soil or climate or in the mode of assessment, which have tended to limit this description of cultivation. The present assessment on Sugar cane in former years was Rupees 232 per Gorto, and as no profit could be derived under such an impost, its cultivation was altogether discontinued. In Mr Collector Bishop's time some modification of the assessment took place, so far as charging it with 1/2 Mogany dist, when cultivated in Mogany or Mooloom lands, if cultivated in Jarcah lands the dist to be the same as before. This however does not appear to be sufficiently favorable terms to grow Sugar cane at a profit to the Ryot. It does not thrive well here, perhaps from being excluded from the best lands by the Jarcah dist as Sugar cane is understood to require to be planted in lands of the best description, well ploughed and manured. There is also reason to suppose from

Fort St George 10th January 1854

a late experiment in 1820 that the soil and climate are not favorable. The supply for the District is derived from the Ceded District and Mysore.

5th The Board express their hope that I will not lose sight of the plan suggested for granting the Infted Shrotriums on Joint Village Rents I can assure the Board that the system of Joint Village Rents both for the Shrotriums and other Amany Villages is receiving my attention but in the latter alone have I had an opportunity of commencing the introduction of the system. It is not understood here by the body of the Ryots, and can only it appears to me be introduced through the Head Villagers at first. Had the season been favorable it is probable that most of the Infted Shrotriums would have been taken back by the Shrotriumdars after the Balances were reported on, and my first endeavours were to induce them to do so. In so remarkably unfavorable a year this is not likely to be the case

F.B.E.

Fort St George 16th January 1854.

case generally, the head Ryots will therefore be encouraged to take up the Villages. & granting shares to the whole body of cultivators amongst themselves, which seems the nearest approach that circumstances will permit to the Joint Village Rent system, and to be more in accordance with the Board's views than renting them out to the highest bidder, as has usually been the case.

Ordered that the following letter be sent in consequence.

(21.22)

B. of R. No. 89.

To the Collector of Cuddapah.

To The Collector of Cuddapah.

Sir

I am directed by the Board of Revenue with reference to the tabular report of lapsed Enams in your District for the 4th quarter of 1851, Case No. 382, to request that you will be pleased to inform them whether Venkata Casavalu, the adopted son of Venkataroyapak the last holder of the Enam, is in any and what way related to his adoptive father: the continuance of Enams to adopted sons, being, as you are aware, except under special circumstances, restricted to cases where the party adopted is near of kin to his adoptive father.

B. No. 3296.

From the Collector of Chingleput.

Sir

Para 1.

Reporting on the Settlement of the Extra Sources of Revenue for Fusly 1262.- A.D. 1852/53.

Submit the following Report together with the prescribed Statements explanatory of the Settlement of the Extra Sources of Revenue for Fusly 1262. A.D. 1852/53.

*Enclosures A to D from No. 1 to 4 and H to M and a printed Statement in Triplicate with Mahratta Statements.

2.

The results of the Settlement are exhibited in a comparative form in the following Abstract Statement shewing an increase of Rupees 48,824-9-11 above the revenue of the preceding year.

Particulars	Beriz of Fusly 1261			Beriz of Fusly 1262			Comparison of Fusly 1261 and 1262 Increase			Decrease

There

Statement M.

3. There has been a considerable augmentation in the sales of Salt at the several pans with the exception of those of Pyenpoor, Soonnapagoontah and Poongolum attributable to a partial failure of supply at the adjoining Depôts of Mercanum in South Arcot and Madras. In the former the inland sales ceased entirely from March and in the latter, they fell off considerably in February, March and April.—

4. The increased sales at Vadasemmunjary and Covelong on the one side and Cheyoor in the other direction affected the Salt transactions at Pyenpoor, whilst the Salt at Soonnapagoontah and Poongolum was towards the end of the Fusly reserved to meet the demands of Madras to which depôt 200 Garces were eventually supplied from Poongolum. The Salt revenue derived from the Chunambut Pans though higher than in Fusly 1261 is much below that as usually

usually realized. Compared with Fusly 1260 it presents a great falling off of Rupees 42,942-14-5 arising from the failure of the Salt in Store in February.—

5. Taking together the Salt transactions of this district with the inland sales of Madras and Mercanum, there is but little fluctuation as compared with Fusly 1261, the increase in the two former districts, being counterbalanced by the great falling off at Mercanum.—

	Fusly 1261. Rs	a	p	Fusly 1262 Rs	a	p
Chingleput—	263764	1	9	310808	2	2
Madras—	283779	4	10	326429	1	8
Mercanum—	199386	-	-	124226	11	3
Total	746929	6	7	761463	15	4
Increase	14534	8	6	-	-	-
Per Centage	1	15	-	-	-	-

6. The inland sales have considerably increased in respect to supplies for Salem district, which being in a material degree dependant on the Pans of Mercanum had this year to obtain the Salt required for its consumption from the Pans of Cheyoor.—

7. The Abkarry farm has been rented out from Fusly 1262 to 1264 at a sum of Rupees 79,550 per annum, which is the highest revenue derived from the above source in this District, being Rupees 1440 above the

the rent of the preceding three years.-

8 No collections were realized under the head of sea Customs. There has been a decrease of Rupees 843-5-- in the revenues from Stamps.-

9 The Moturpha has been settled at an advance of Rupees 412-13-10 above the demand of Fusly 1261 arising entirely from a further augmentation of looms in the District.-

Rs. 856-8-- 10 The Revenue from the Small Farms presents an improvement of Rs. 771--8 resulting principally from an increase of Rupees 1,810-6-5 in the toll levied on fire wood cut at the Streeharicottah Jungles against a falling off of Rs. 564---- in the rent of Chunam 2nuts. -ries. The latter result is consequent on the 2 varries of Yalavoor in the Sullavaddy division not having been rented out in the year under report, the offers being considered inadequate.-

11 The demand Collection and Balance of Extra Revenue are exhibited in Statement D. The balance at the end of the Fusly was Rupees 17,637-15-5 (22 1/8 per Cent) in Cutkarry, Rupees 5,933-5-2 (30 3/8 per Cent) in small farms, and Rupees 10,556-3-6 (33 1/4 Per Cent) in Moturpha, which several Items were reduced on the 5th Instant to Rupees 1,883-11-3 (2 5/16 Per Cent) Rs. 1,942-9-3 (9 15/16 Per Cent) and Rupees 895-10-9 (2 4/16 Per Cent) respectively. The instructions of the Board

Board contained in their Proceedings of the 31st March 1853 for the more punctual realization of the Moturpha revenue will be strictly attended to. The Cutkarry balance has arisen from the difficulties which the renter, who newly entered on the undertaking, had necessarily to encounter. He has however evinced every anxiety to meet his engagements and will, there is every reason to believe, liquidate the arrears within a short period. The balance of small farms is partly due by the renters of Jungles, who being at the same time cultivators of lands experienced difficulties in the year under review in the payment of the tax to which they were liable, and partly by the renter of Chaya root, to whom the produce which is gathered in from January to June being delivered at the close of the Fusly; some time inevitably elapsed before he could make arrangements for the discharge of the rent. He has however furnished the necessary security which affords sufficient guarantee against any breach of engagement on his part.-

12 The balances of the past Fusties were reduced on the 5th Instant to Rs. 282-13-9 in small farms, and Rupees 224-13-7 in Moturpha, of which Rupees 100-12-2 will hereafter be adjusted. I beg to recommend that the remaining Rs. 406-15-2 particularized in the Margin, which I consider irrecoverable, may be written off the accounts.-

M Johnson
Collector

1103 Fort St. George 16th January 1854.

Order thereon

(23.24) Ordered to be brought forward at a future Meeting.

Read the following letter

No. 104

To W. H. Bayley Esqre
Secretary to the
Board of Revenue
Fort St. George

(25)

B. No. 3216

From the Collector of Tanjore — Sir,

I have the honor to reply to the 5th paragraph of your letter of the 5th of July 1852.

I have ascertained from the Collector of Madura that the endowment at Ramiswaram is properly conducted, and the accounts obtained from the Tamboran superintending it agree with those received from the Veroopaxendal Muttum in Tanjore the Tumbaran of which is considered as the Chief.

The expenditure is for feeding pilgrims, for establishment at Ramiswaram and for a small establishment to manage the lands in Tanjore with which the charity is endowed.

Tanjore Vellum 9th December 1853 — / Signed / H. Forbes Collector

Order thereon — Ordered to be recorded

Deduct Increase — 35,804 5 "

Net Decrease — 80,045 9 8

Fort St. George 16th January 1854.

Salt.

2. The collections on account of Salt amounted to Rupees 4,59,641-14-8 or Rupees 16,466-8-9 in excess of the previous year.—

3 In the Home consumption there was a decrease of Rupees 7,539-11-4 while in the Inland trade there was an increase of Rupees 24,006-4-1.

4. The increase in the sales for Inland Consumption occurred chiefly in the new Cotay of Pane Mangalore, and at the Tannahs of Wandasy Gursippa, Keatigal and Castergode. The enhanced sales in Keatigal is attributed to the facility the road affords for carriage and in that at Castergode to the opening of the new junction road, where it is stated the sales has been progressive ever since.—

5. The decrease in Home consumption arose principally in the Talooks of Mangalore, Bekal Buntwal and Cundapore, and is ascribed in a great degree to the frauds practiced by the Boatmen during the transmission of Salt. The Board fully approve of the Proceedings of the Collector as reported in para 15

Fort St. George 16th January 1854.—

15, and they trust that the measure adopted by him, of making the Boatmen liable for the full monopoly price, for such Salt as they may fail to deliver, will tend to check the smuggling hitherto carried on with almost impunity.—

6. The quantity of Salt available for the year was Indian Maunds 12,26,575 from which the quantity sold, Viz:- 4,60,278 being deducted, there remained a balance in store at the close of the Fusly of Indian Maunds 7,66,297.—

7. The places to which Salt was Exported during the year, were Mysore, Coorg, and the Southern Mahratta Country under the Bombay Presidency. From the Statement attached to Para 5, it is observed that upwards of 6 Garces of Salt were sold at Rupees 24 and 25 par Garce. The Board presume this was Salt sold to the Islanders of Ameendevi, which should however have been stated in the report.—

Land Customs. 8 The increase of Rs. 16,760-7-3. observable under this head, arose mainly from the duty on Goa Salt.—

Sea Customs. 9 The Collections in Sea Customs amounted to Rs. 55,618-4-8 or Rs. 32,68-10-7. below the preceding fusly, and is ascribed to the fall in the Rice trade, chiefly with Arabia.—

10. It is satisfactory to notice the large increase in the Exports of Cotton and Coffee in

Fort St. George 16th January 1854

Abkarry — Ferry Farms Small Farms Moturpha

in the former the excess was Candies 32,341 and in the latter Candies 1,158 — —.

11. The decrease of Rs. 859-12 Rupees 73-4-« and Rs. 70-13-6 under these several branches of Revenue call for no remark.

12. The Revenue derived from Moturpha amounted to Rupees 17,574-13-4 or Rs. 279-1-9 above the previous year — —

13. The Board concurring in the opinion of the Collector respecting the abolition of the tax on the Manufacture of Sugar from Toddy alluded to in Paras 31 and 32, beg to recommend that it may be discontinued at once, in accordance with his request. The amount is only Rs 324-2-8 and levied on 864 persons they are stated to be very poor — —.

Tobacco Stamps

14. In Tobacco there was a decrease of Rupees 1,11,577-6-7 and in Stamps an increase of Rupees 1,685-1-6. The decrease in the former arose from the abolition of the Monopoly, and the increase in the latter is attributed to the Establishment of the Principal Sudder & Ameen's Court at Honore, by which a great number of stamps have been sold in the Talooks of that Division — —

Ameendeve

15. The increase of Rs. 613-1-9 in the Ameendeve Islands, requires no remark — —

16. Of the total demand Rs. 90,223 8-5-« were collected within the Fusly, and Rupees 21,681-15-6. Subsequently, leaving a balance of Rs.

Fort St. George 16th January 1854 — —

Rupees. 1,298-6-10 — —.

17. Under the circumstances stated in Paras 37 and 38, the Board beg to recommend that the balance due by the Contractor of the Ferry at Feringapett, amounting to Rupees 19-8-« may be remitted and Sanction granted for writing off in the accounts, the sum of Rupees 3-4-« being the greater part due by an individual who has fled from the country — and 4 annas the amount of over assessment — —

18. The whole of the Collections including Current, Extra and Arrears, within the fusly amounted to Rupees 9,17,799-11-« from which the charges being deducted Viz^t. Rupees 1,54,391-10-1 there remained a net revenue of Rupees 7,63,408-«-11. or Rupees 33,523-10-4 above that of Fusly 1261 — —

Ordered that a copy of the foregoing Extract with the annexed Comparative Statement of the Collections, Charges and net Revenue be submitted to Government and a transcript of the same be furnished to the Collector of Canara — —.

Canara.

No. 170

To W. H. Bayley Esqre.
Secretary to the Board of Revenue
Fort St. George

(35)

B. No. 39

From the Coll.r of Malabar }

Sir,

The Board permitted me on the 6th January 1849 to expend 2865 Rupees in copying old accounts from Cadjan to paper.

+ Dated 24th Dec.r 1853

I have the honor to forward a + Memorandum from my Head Sheristadar shewing what has been, and what remains to be done.

The work has proved more extensive than was at first thought would be the case, and 1000 Rupees more are required to complete it satisfactorily.

There has been, I can assure the Board no lack of economy the extra cost is simply owing to extra works of its importance there can be no question.

Malabar, Collector's Office, Calicut, 24th December 1853 } /Signed/ H. Connolly Collector.

No. 1

The indispensible necessity of having the old cadjan accounts copied into paper in consequence of their decayed state having been represented to the Board they approved of the measure and ultimately sanctioned the expenditure of Rupees 2865 for the purpose.

8th July 1848
14th August
6th January 1849.

purpose. The number of Cadjans, for the copying of which this Estimate was framed was 492,896 but subsequent researches both in the Salook Cutcheries and Huzzoor Office brought the number to 597,312 or 104,416 Cadjans over and above the number originally found. Many of these are documents of much Value including Mr Grame's survey accounts.

The copying of the accounts commenced in March 1849 and continued till November last, a period of 4 years and 9 Months and the number of Cadjans already copied amount to 270,400 and the expense incurred to Rupees 2858. The number of Cadjans is 326,912 and at the lowest computation 1000 Rupees will be required to complete this important work.

Extra Goomastahs ——— 2,432 " "
Stationary ——— 244 " "
Recopying Hundivi } 182 " "
Accounts ———
Rupees ——— 2858 " "

It may be proper to explain here that the Cadjans first taken up for transcription were those which were in the worse condition of decay as if they were kept longer they would have become unavailable. It had been intended to have saved some expence by having these copies compared when a responsible servant could be spared

spared (in the lighter season) but their extreme state of decay made it needful to do this work at once.

The number remaining to be copyed being in the most part in a better condition will require less time and labour so that the work may I think be executed in two years at the expense above mentioned Vizt 1000 Rupees.

I may add that the importance of having these old accounts put in a thorough state of order was also treated of in your letter to the Board 3d November 1848. and noticed by them in their Proceedings

Para 19
Para 13
dated 9th July 1849.

Ordered that the foregoing letter be submitted with the following address

No 18.

35-36

To The Chief Secretary to Government

Sir,

Bd No 95

To the Chief Secy to Government

Para 1.

I am directed by the Board of Revenue to submit for the information and orders of the Right Honorable the Governor in

Submitting with the Board's recommendation a letter from the Malabar Collector of Malabar requesting sanction for the expenditure of

of an additional Sum of Rs. 1000 for Copying the old Summaburdy accounts from Cadjan to Paper.

In Cons 22d Jany 1849

Letter 10th Jany 1854

in Council the accompanying letter from the Collector of Malabar dated 24th December 1853 requesting sanction for the expenditure of an additional Sum of Rupees 1000 for Copying the old Summaburdy accounts from Cadjan to Paper.

2 On the 6th January 1849 Government Sanctioned an Estimate of Rupees 2865 for the above work but it appears that this Estimate did not provide for 10,2,16 Cadjans, which were subsequently found in the Nagpoor and Talook Cutcheries.

3 The number of Cadjans Copied amount to 2,70,400 leaving 3,26,912 - which it is stated will occupy a further period of two years.

4 The Board recommend that sanction be granted for the above disbursement of Rupees (1000) one thousand and the Collector will be instructed to submit a Statement of actual charges for the whole amount so soon as the work is completed.
