1
M. No 916
From the Collector of Madras
2d May 1855

Receive'd letter requesting to send a further Supply of 1000 Salt Rowannahs

1-2
Order thereon.

Ordered to be Supplied accordingly.—

Received the following Papers.

To. B. Lewliffe Esqre
Secretary to the
Board of Revenue.

3
A. After Bd No 1787
From P. Vencata Reddy

Sir

With reference to your Official Memorandum dated 1st Instant I have the honor to state that that these Vessels noted in the Margin have left Coringa on the Dates set opposite to their names as also the dates of their arrival at Calcutta — when the four last Vessels Viz: Stree "Budracalee" "Stree Ramaswamy" "Luckibalas" and "Stree Jaggunnaichooloo" were put back at Coringa on

Names of the Vessels.	Dates on which the Vessels left Coringa	Dates on which the Vessels arrived at Calcutta.
Stree Ramooloo	6th September 1854	
Stree Vencataswarloo	6th Do.	
Stree Budracallee	22d Do.	
Stree Ramaswamy	22d Do.	28th March 1855
Luckibalas	27th Do.	
Stree Jaggunnaichoo loo	27th Do.	28th March 1855

on the 1st. November 1854, information was given to the Collector who then ordered that the Salt thereon may not be landed in order that they may Sail again when the wind turns favorable in the meanwhile the Vessel "Luckibalas" was attached and was sealed by the Civil Court a Suit being filed by a certain party against the owner of that Vessel regarding a certain Sum of money due by him and the other three Vessels, Viz.t Stree "Budra Calee" Stree Ramaswamy" "Stree Jaggunnaicooloo" Set Sail again on the 27th. January 1855, out of which two Vessels Viz.t "Stree Ramaswamy" and "Stree Juggunnaicooloo" alone have reached Calcutta on the 28th. March 1855, and the other one Viz.t "Stree Budra calee" was again put back at the port in question about the 10th. February 1855 the Collector being informed of this news ordered that the Salt on her board be landed and Sealed and the Hoozoor Peons be watching at the heaps very carefully and the Vessel be repaired and so the Vessel Viz.t — "Budra calee" is under reparation and the Vessel "Luckalas is under attachment if due

permission

permission is given by the Board I shall adopt measures to Ship the Salt / which is on board the latter Vessel / on any other Vessel and to ensure her transmission with as little delay as possible as also the former one when she Completes her reparation the Vessels Viz.t "Stree Ramooloo" and "Vencataswarloo" were wrecked near Jaggunnauth by the stress of weather which may be ascertained on reference being made to the Collector of that District.—

Madras
4th. May 1855

/ Signed / P. Vencata Reddy

Sent the following Memorandum

3-4
Bd. No. 1082
To Vencata Reddy.

Memorandum

In the memo given to Vencata Reddy by the Secretary to the Board of Revenue he was requested to explain what had become of the following Vessels which were reported by the Board of Revenue in Bengal as not having arrived at Calcutta.—

1. Stree Vencata reddy
2. Stree Ramooloo
3. Stree Vencataswarloo

Brig

4 Brig Verabhadraswamy
5 Brig Bhadracally
6 Brig Luckybalas.

In this Petition he refers to the following Vessels -

Stree Ramooloo No. 2 above
Stree Veneataswerloo No. 3. Do.
Stree Budracallee. No. 5. Do.
Stree Ramaswamy ——
Luckebalas. . . No. 8 probably
Stree Juggunnaikooloo. . .

It thus appears that he has made no allusion in his Petition to the 1st and 4th Vessels on the Board's list and that he makes mention of 2 others Viz.t - "Stree Ramaswamy" and "Stree Jaggunnaichooloo" regarding which no enquiries were made. —

The Secretary to the Board requests that Veneatareddy will explain the cause of the discrepancy in the names of the Vessels as pointed out above and to furnish his reply immediately. :-

5
Bd. No. 1176
From the Collector of Madras. }

Sir

I have the honor to request that the Board will be pleased to inform me whether under the authority quoted in the margin, the "Parties might also perhaps be found at "Madras willing to accept contracts "for specific quantities at the same rate "/Rupees 38 per 100 maunds/ and on the same "terms as that lately entered into hire - If so, this Board would be glad to have the transport of 5 lacs of maunds provided for in this manner - " Extract Proceedings from the Board dated 8th February 1855. contents of which I am not sure that I understand I am at liberty to accept the tender just received from the Agents of the Ship "Marion" to convey to Calcutta 220 tons of Salt at the rate of 38 Rupees per 100 Indian maunds. -

Madras. }
14th May 1855 } /Signed/ H. Stokes
Acting Collector.

The

Bd. No. 1088.
Proceedings thereon.
5:6

The Board of Revenue observes that the Calcutta Board of Revenue have requested the Madras authorities to accept tenders for conveying Indent Salt to Calcutta "at a rate not exceeding 35 Rupees per 100 Indian Maunds." The Acting Collector is therefore not at liberty to accept tenders at a higher figure. The rate of 38 Rupees refers to large contracts such as those entered into by Venkata Reddy and the Bengal contractors.

7

Bd. No. 1189.

No. 314.

From the Secretary to Government.

Extract from the Minutes of Consultation under date the 5th May 1855.

Read the following letter from the Secretary to the Board of Revenue.

/ Here enter 3d May 1855 No. 1072 /

1. The Right Honorable the Governor in Council approves the orders passed by the Board of Revenue on the report from the Collector of Trichinopoly of the misguided and illegal Conduct of the Ryots of the Wet Talooks of his District. No claims so put forward could be attended to, and in the present case the

the claim is not only urged in an illegal manner, but has no good ground.

2. The Collector should make up the Ryotwar accounts and prepare Puttahs in the usual manner, and if the Ryots 〃 should refuse to sign the Chittahs and to receive the Puttahs, he should simply take the course prescribed by the Regulation for enforcing the demand. In the event of forcible resistence to authority, or 〃 imminent prospect of it he will of course be empowered as Magistrate to call on the Military authorities for support. Parties guilty of overt acts of violence or of instigating such acts should be duly brought to justice.

3. The Government presume that the Proclamation issued by the Board to the Trichinopoly Ryots of which a copy accompanied the letter under notice has been printed in Tamil a large number of copies should be sent to the Collector and one should be pasted up in every considerable Village of

Fort St. George 7th May 1855.

Governor in Council Sanctions the Estimates of Extra charges proposed to be incurred in Fusly 1264, in the Districts of Tanjore, North Arcot, Masulipatam Canara Madras and Tinnevelly with the exception of the items specified in the margin, to the aggregate amount of Rupees 41,343-10-8 forty one thousand three hundred and forty three, annas ten and Pice eight.—

Canara for 6 pairs of Scales for the use of the Peishcars Cutcherries Rupees 360 — —

Dr for advance for the purchase of paper 4532 — 6

2. With reference to the items omitted, large Scales are Sanctioned as recommended for the Tahsildars' Cutcherries as well as the two spare ones required As respects those for the Peishcars Sanction is suspended till the Government shall be informed whether those Officers have separate Treasuries and if so what is the usual amount of their Collections.—

3. With respect to the advance for the purchase

Fort St. George 7th May 1855.

purchase of paper, if as seems likely, the purchase when Completed is to be debited to the Sanderwared Sanction for the advance is not required as the whole fund allowed for the year is at the Collectors disposal.—

4. It is observed that some of the Estimates that of Tanjore, in particular, are encumbered with a variety of minute particulars, may be well omitted in future Estimates. Hereafter these Estimates should be prepared in the book form and on foolscap paper.—

5 Those Estimates which refer to esependiture to be incurred in the Fusly year 1264. which began on the 12th July 1854, only came before Government on the 16th March 1855. The Government resolve to call the attention of the Board of Revenue to this delay which is owing to the tardy arrival of many of the Estimates in their Office, and to direct that the Collectors be required to submit their Estimates at a much earlier period— Properly the whole ought to be before the Board prior to, or immediately after the Commencement of the Fusly

Fort St. George 7th May 1855.

of the four Taloocks.—

4. The Government are not informed whether the Circular and the notification on the subject of the Collection of Revenue sanctioned on the 2d February last have yet been issued—If this has not yet been done no time should now be lost and the cause of the delay should be explained.

To The President & Members of the Board of Revenue.

From the Chief Sec.t to Govt.

Granting permission for printing the Certificate of award for Indigo at the Government Gazette Press and drawing the Board's attention to the question whether the dates on which the several District Exhibitions are to be held may not be fixed at once.

No. 496

Extract from the Minutes of Consultation in the Public Department dated 17th April 1855.—

Read the following letter from the Secretary to the Board of Revenue.—

Rec.d enter 29th March 1855.

The Right Honorable the Governor in Council has perused with much interest the report of the Exhibition held at Innacondah on 19th February and concurs in opinion with the Board of Revenue that considering the novelty of the measure, and the short time allowed for preparation, the results that have been obtained are satisfactory in themselves and encouraging for the future.—

2. To the Gentlemen of whom the Committee of management was constituted and to whose exertions Government is mainly indebted for these gratifying results—His Lordship in Council desires to express the thanks of Government for the trouble they have taken and its congratulations on the amount of success which has attended their labours in the matter.—

3. The Government sanction the expenditure of the sum disbursed for prizes Viz.t Rupees (232) Two hundred and thirty two and grant permission

permission for printing the certificate of the award for Indigo at the Government Gazette press.-

4. It does not appear whether any sum in addition to that abovementioned was expended in connection with the Exhibition, but it is observed that sanction for expending a sum not exceeding Rupees (1,000) one thousand for the purpose of the Exhibition at Innacondah was given in anticipation in Extract Minutes Consultation dated 2d March last.-

5. It is very satisfactory to find that the Exhibition has brought to prominent notice an article Indigo - which is of very recent manufacture in the District of Guntoor and that the specimen exhibited was pronounced to be of "superior quality".-

6. Samples of this Indigo might with advantage be purchased on account of Government by the Collector, and forwarded to Madras for submission to the Chamber of Commerce.

7. The arrangements which the Board may propose for the exhibition at Innakondah in 1856 will meet with the liberal consideration of

Government

Government and they desire to draw the attention of the Board to the question of whether the dates on which the several District exhibitions are to be held may not with advantage be fixed at once.-

8. With reference to the difference of the seasons it may be necessary to hold them sooner on the western coast than on the Eastern or in the Inland Districts generally.

9. After receiving the report of the exhibition which has been lately held at Rajahmundry, Government will decide as to printing the two Reports.-

From the Secy. to Government

Fort St. George, 7th May 1855

No. 493

Extract from the Minutes of Consultation in the Revenue Department under date the 26th April 1855.-

The Right Honorable the Governor in Council has had under his consideration the Order of Government of the 22d July 1853 — No. 838 which directs that except in certain cases specified, no Enam alienated from the family of the original Grantee shall be continued on lapse, where the alienation is of more recent date than twenty years- His Lordship in Council is of opinion that such an order thus having retrospective effect is calculated to operate with great harshness on the holders of the property concerned and he is accordingly pleased to cancel the order,—

Para 3 of Extract Minutes of Consultation of Government dated July 4th 1848. No. 712 which prohibits the future alienation of Enams of the nature there referred to Viz. Enams held without grant and by prescription only, and which were undoubtedly given in the first instance for the personal advantage of individuals will still continue in force.

Bd No 1194.

From the Acting Collector of Ganjam ..... } Para 1. In reply to the Boards Proceedings dated the 6th July last I have the honor to state that poppy cultivation is not known among the people in this district, and that except the Sea Customs duty, when the drug is imported which is very seldom no revenue is realized from it.—

Reporting upon poppy Cultivation and Opium in his District.

2 Opium is used by the Natives of this district, as in other parts of the country and is sold to the Merchants in the principal towns from whose hands it passes to the petty tradesmen in the various Villages. From information collected thro' the district about 24 Maunds appear to be the quantity actually consumed in 1854 of this 10 Maunds was received at Chicacole, and 13 Maunds at Berhampore the

Fort St. George 7th May 1855.

rest was in store from former years

The prices at the principal towns are shown in the Margin-

	wholesale purchases per Maund			retail sales per Maund		
	Rs	A	P	Rs	A	P
Chicacole Nursanapetta	130	"	"	140	"	"
Berhampore	135	"	"	140	"	"
Ganjam Vcty	164	"	"	177	"	"
Goomsoor Rufsillcondah-	160	"	"	200	"	"
aska	140	"	"	150	"	"
Michapore Vcty Talooks	From 140 to 150			From 150 to 200	"	"

3 Ganjah is the only intoxicating drug produced to any extent in this district No revenue is levied on it, it is mostly grown by dervishes occupying Mutts on the Eastern part of the district inhabited by Oreyas, and in their backyards by other people habituated to smoke and use it, It is sold in small quantities to the bazar men The production is estimated at 18 Maunds per annum; the quantity received into the district from Vizagapatam is small, I have noted below the amount of trade carried on in it during the year - The Ganja leaf is also made use of by the people as an intoxicating drink, but this is never sold.—

Names

Names of Places		Trade during the year. Received from the neighbouring district	Produced within the district	Total	Consumption	Rate per Maund whole sale	Rate per Maund Retail
		Mds	Mds	Mds	Mds	Rs	Rs
Received into the district from Vizagapatam	At Chicacole	4	"	4	4	5	7
	At Purlah Kimedy	4	"	4	4	4	5
		8	"	8	8	"	"
Produced within the district	Berhampore and the neighbouring Zemindars	"	9	9	9	6	7½

BP. No. 1169
From the Actg Collector
Vizagapatam . . . }

Sir,

Para 1. In reply to the Board's Circular letter of the 30th November last, regarding the substitution of English figures in the public accounts for the vernacular and the discontinuance of Maratta as a language of account, I have the honor to state that this language was never used in this District. The accounts have always been kept in Telugoo and in English

2 If the Board are disposed to abolish the native Cutcherry and require English accounts only the abolition of the preparation of Statements and accounts in Telugoo will be a great relief to the establishment of the Collector.—

3 A very considerable portion of the native Officials employed in the Honzoor and Talook establishments understand English. Out of 143 individuals 13 understand it thoroughly 18 are tolerably apt scholars and 66 more are more or less conversant with English

Fort St. George 4th May 1855

English figures. Forty six Officials are at present ignorant of English figures. These are exclusive of village Curnums, few if any of whom understand English figures.

4 Accounts are not kept for reference by Government Officials and public servants only. The Talook accounts are needed for the Native Community and should, therefore, I think, be written in the language with which the Community is most Conversant. I deem it as absurd to keep a village or Talook account in English as in Mahatta, so long as the people at large understand neither tongue.

5 Reference is made by the Board to their desire to simplify the accounts It would, I think, be more desirable to restrict their number for they are multiplying in every department to a most extraordinary extent. The Land Settlement Report for the last Fusly to the Commissioner was accompanied by not less than 44 separate Statements and accounts in English and Telugoo independent of many others separately furnished to the Board at Madras. In the year 18[illegible] there were only eleven Statements forwarded in the whole. This requires a thorough reform. The proper preparation of the Statements now called for by the various Heads of Departments upon every conceivable subject would occupy a Collectors whole time to the exclusion of all other subjects.

B.R. 30/40
From the Jr. Collector
of Nellore

Setting forth grounds for urgent necessity of revising the present assessment upon Wet and Dry lands in this District and suggesting a course for adoption with reference thereto

Sir

I have the honor with reference to para 15 of Extract from Minutes of Consultation No. 806 under date July 11th 1854 to para 9 of Extract from Proceedings of Revenue Board under date 31st August 1854, and to the concluding para of my letter under date 9th current - to submit the following suggestions, for a temporary, or present revision of assessment upon the dry wet and / Metta and Magany / Lands generally - together with a Statement of the grounds which render such urgently called for.

As the most obvious, and unquestionable of the latter, I would observe, that, whilst Government has, in para 15 of Extract from Minutes of Consultation under date

date 20th June 1854 recorded its opinion, that an assessment of 50 per Cent of the gross Produce, is a tax which no district in Southern India can bear it is in this district 55 o/o of not of the gross, but the Net produce i.e, after deducting from the former 5 1/2 o/o for the fees payable to the Village Artificers and Servants.

2. If however, the above be considered oppressive, in itself, how much more so when, as here, that produce has in the case of Dry crops, been commuted to a money rate at prices, which until the past season of scarcity may be virtually termed fabulous the average, of those actually obtained, during the 10 years preceding Fusly 1262 for the 3 principal kinds of dry grain, grown in the district exhibiting a decrease of 33 o/o and during the preceding 24 years even inclusive as they are of two seasons of famine, with corresponding high rates of 27 o/o upon that at which the major part of the District stands commuted. This with the exception of 127

Villages -

Villages where it is Rupees 28 and of the Woodiagherry Talook more recently settled by Mr. Stonehouse where it is but Rupees 22 is Rupees 30 per Candy the average of the actual prices during the 10 years preceding Fusly 1262 having been but Rupees 20 and during the 24 years but Rupees 22. As regards Wet crops the comparatively equitable the average of the first of the above periods, shews a decrease of 13 o/o and of the second exclusive of the 2 years of famine of 10 o/o upon the commuted rate or Rupees 20 per Candy the actual average rates, having been more or less Rupees 17-6-0 and Rupees 18 respectively in the Principal Division, where, wet cultivation is mainly carried on.

3. As a further proof, if needful, of the pressure occasioned by this state of things and as one of its consequences I would point to the annexed Tabular Statements, the one, shewing severally the highest years, "Sittums" - that for Fusly 1262 - and that for Fusly 1263 - in some of the principal

7097 Fort St. George 7th May 1855.

The measure is I am aware, an apparently sweeping one; the prima facie and it may be even actual eventual diminution of Revenue serious; but its present necessity is sterling its very justice for of some such unquestionable, whilst I would solicit notice of the circumstance that I have "two" evils to deal with to, an "undue original grain assessment, and "an excessive commutation rate". The actual reduction of "assessment it would involve, is more or less Rupees 78,203-"-" of "Revenue", supposing extent of cultivation to remain as now i.e. as per Settlem of last fusly Rupees 387029-"-"-

That the impetus and life thus given would eventually, and that speedily not only cause such occupation of additional, and such resumption of relinquished cultivation as would fully make up the thus forgone revenue, but happily considerably augment it. I venture to express my decided conviction but, forbear entering upon Estimate or detail, to exhibit the same, is as much as the proposed measure is brought forward to meet a call for urgently required relief, not, as an experiment in fiscal policy.

Nellore Collector's Office

principal Villages in the several Talooks. the other, the total comparative "Dittums" of each Talook, for the 2 last Fuslies (1262 and 1263). These speak for themselves.

Tenure, as far as practicable, a compulsory matter in and until Fusly 1262, is rendered "optional," in Fusly 1263 the result being an instantaneous falling off, of Rupees "130878" in the Collective "Dittums" - and this, be it observed, is probably, by no means the full extent of what may be eventually relinquished under the existing state of things - now that both Ryots and Talsildars are fully convinced and the latter more generally aware of the bonâ fide nature of the orders issued on the subject, pursuant to the instructions conveyed in Paras 4 and 5 of Extract Minutes Consultation of 28th September 1852 which neither were, I conceive at the last Dittum; so thoroughly accustomed had both become the one to the imposition, the other, to the supporting,

of

of compulsory Tenure.

Having thus as I believe demonstrated the alleged urgency for relief, as well as afforded a basis for judgment as to its requisite extent. I would venture to suggest the following, as, in my opinion, the most proper means of its application, compatible with adequacy.

1st By assessing the Government share of the gross produce, as originally estimated, (and as now represented in money at the specified commutation rates,) at 40 % alike upon wet and dry lands; assuming that is, a deduction of 20 % from the gross produce - as an allowance to the ryot, towards meeting his "Kalavasavu," Seed, and sundry expenses, and an equal division to be made of the remainder. - and 2nd by commuting that produce to a money assessment, at the rates of Rupees 18 per Candy on the former and 22 on the latter, which I propose with reference to the average of hitherto actually prevailing rates, as already commented upon -

I shall

7097 Fort St. George 7th May 1855.

The measure is I am aware, an apparently sweeping one -; the prima facie and it may be even actual eventual diminution of Revenue I erious -; but its present necessity is sterm. its very justice / or of some such / unquestionable -; whilst I would solicit notice of the circumstance that I have "two" evils to deal with to, an "undue original grain assessment, and "an excessive commutation rate." The actual reduction of "assessment it would involve, is more or less Rupees 7,08,203 - - - of "Revenue", supposing extent of cultivation to remain as now i. e, as per Settlem of last fusly Rupees 3,87,029 - - - -

That the impetus and life thus given, would eventually, and that speedily not only cause such occupation of additional, and such resumption of relinquished cultivation as would fully make up the thus foregone revenue, but happily considerably augment it. I venture to express my decided conviction but, forbear entering upon Estimate or detail, to exhibit the same, is as much as the proposed measure is brought forward to meet a call for urgently required relief, not, as an experiment in fiscal policy.

Dated 19th inlcous 26th May 1853 No 1365.

Bd. No 1164

Proceedings thereon.— 1 In the 3 communications above noted, Mr Ratliff the Sub Collector (now Acting Collector) and Mr Elton the Collector of Nellore, present to the Board their opinions as to the assessment of the District, and propose such modifications as they consider to be immediately required.—

36-31

2. Before entering into a detailed consideration of their views and arguments, the Board deem it necessary for the information of Government with whom rests the eventual decision of the question, to give some account of the rise and progress of the assessment of Nellore, as ascertained from reference to the voluminous records on the subject now in their office. It would have saved considerable time and labour, had the local authorities in drawing up these Reports

on

on the assessment introduced a resume of this kind.

3. Previous to the cession of the Carnatic in July 1801 the District was rented out in large Taloohs and the Renters sub rented the Villages to the head Ryots.— Mr. Travers was the first Collector, and he endeavoured to introduce a Survey and assessment on some regular principle, but the results have not been happy. He employed natives styled "Surveyors" who measured the perimeter of each Village and computed the area no one knows how ◊ for such "Circular" measures (Goondoo Kelata) as it is now called, could give no accurate result unless the figure measured were perfectly regular, such as a circle, Square, or Rectangle.— The Surveyors then measured only

× The measuring Rod or Rope was 32 Cubits or 52½ English feet
1 Rod Sugare = 1 Coontah and 50 Coontahs or 137812½ Square feet = 1 Goortoo or 3.1637 Imperial acres.

◊ See letter from Collector 8th September 1825 inbons 12th Septr. "The Pymashdars measured "around every field, although "it was of various shapes, & fixed "the total Goortoos to which it "amounted They afterwards "deducted the difference on "account of the angles in "various ways according "to their own judgment, but not "as far as can be ascertained "upon any regular rule:—

only the cultivated land in the Village, and deducting this from the first Total, divided the remainder into "waste" and "Porumboke" (or uncultivable) by estimate; and be it observed, that even the cultivated land was not measured in fields but in "Tracts" of 50 and 60 acres each. the Compartment-field divisions of which were left to the ryots to arrange— even to these "Tracts" there were no boundary marks or definitions by which they can now be traced Mr Smalley when attempting a revision of the assessment writes (7th October 1825) "The accounts do not "exhibit the particulars of the fields, & there "is no information to be obtained which can "be relied upon."—

Inbons 10th Octr 1825.

4. Mr Travers in classifying the lands, instructed the Turrumdars not to have more than 4 classes for "Dry" and 4 classes for "wet" land in each Village, according to the following Scale.—

× From Nellore 28th May 1816. enclosing Mr Travers Instructions.— Inbons 16th June 1816.

"Dry" or Metta land that produces in 1 Goortoo	classes
From 30 to 20 Mercals is	I
From 19 to 15 Mercals is	II
That produces 10 Mercals is	III
less than 10 Mercals is	IV

"Wet" or Magany land that yields for 1 Mercal of seed	classes
2 to 1 Pooties (or 120 to 20 fold)	I
19 to 15 Mercals (19 to 15 fold)	II
14 to 10 Mercals (14 to 10 fold)	III
less than 10 mercals (less than 10 fold)	IV

The

The "Goortoo" is 3/8 acres. 16 Mountahs = 1 Mercal, (or as it is now generally called, a "Toom") 20 mercals (or Tooms) = 1 Pooty or as it is now called "Candy". The Pooty or candy is shewn by recent investigations to be very nearly 800 Regulation "Measures" of 100 cubic inches each or 1/4 Regulation Garce; 1 Toom = 40 measures In consequence apparently of each "clafs" Comprising different ranges of productive power, clafses I for instance, of one Village might include fields each yielding 20, 22, 23 Tooms of Drycs grain per Goortoo; where as in the next village the 1st clafs might Consist of fields yielding 21, 24, 26 Tooms. It is evident that different money rates would eventually be put on each of them, Consequently we find there were 15 money rates in Metta or Dry and 38 in Magany or wet, as will be again observed. It seems that though in the original Instructions to afsessors 1½ Tooms was supposed to be the maximum produce of Metta Land per Goortoo & 2 Pooties for

for a mercal, or 40 fold the maximum for Magany. yet some few exceptional cases were found where the maximum were 2 Pooties, in metta and 60 fold in Magany.

Vide appendix A

5. It will also be seen that whilst the Metta or Dry lands were clafsed according to their actual supposed out-turn per Goortoo, the magany, or "wet" were clafsed according to the proportion between the seed sown, and the produce resulting. Some apparent discrepancies occur, which cannot now be accounted for = For instance Turrum b is 20 fold, and Turrum 7, 50 fold, - but the terms is nearly the same. Possibly Turrum No 7 required more than twice as much seed as No. 6.

6. The first year Mr. Travers was at Nellore, he continued the old plan of Renting each village to the Cadeens, or Head Ryots, but he found so much reason to object to it that he determined on the "Muctah" or fixed afsefsment. His next proceſs therefore after Survey was to arrange what share of the produce was to be taken by Government,

Vide appendix B

Fort St. George 7th May 1855

The "Goortoo" is 3/8 acres. 16 Moontahs = 1 Mercal, (or as it is now generally called, a "Toom") 20 mercals (or Tooms) = 1 Pooty or as it is now called "Candy". The Pooty or candy is shewn by recent investigations to be very nearly 800 Regulation "Measures" of 100 cubic inches each or 1/4 Regulation Garce; 1 Toom = 40 measures In consequence apparently of each "clafs" Comprising different ranges of productive power, clafses I for instance, of one Village might include fields each yielding 20, 22, 23 Tooms of Dry grain per Goortoo; whereas in the next village the 1st clafs might consist of fields yielding 21, 24, 26 Tooms. It is evident that different money rates would eventually be put on each of them, Consequently we find there were 15 money rates in Metta or Dry and 38 in Magany or wet, as will be again observed. It seems that though in the original Instructions to afsessors 1/2 Tooms was supposed to be the maximum produce of Metta land per Goortoo & 2 Pooties for

Fort St. George 7th May 1855.

for a mercal, or 40 fold the maximum for Magany. - yet some few exceptional cases were found where the maximum were 2 Pooties in metta and 60 fold in Magany.

Note appendix A

5. It will also be seen that whilst the Metta or Dry lands were classed according to their actual supposed out-turn per Goortoo, the magany, or "wet" were classed according to the proportion between the seed sown, and the produce resulting. Some apparent discrepancies occur, which cannot now be accounted for = For instance Turrum 6 is 20 fold, and Turrum 7, 50 fold, but the teerva is nearly the same. Possibly Turrum No 7 required more than twice as much seed as No 6.

6. The first year Mr. Travers was at Nellore, he continued the old plan of Renting each village to the Cadeens, or Head Ryots; but he found so much reason to object to it that he determined on the "Muctar" or fixed afsefsment. His next process therefore after Survey was to arrange what share of the produce was to be taken by Government,

Government, and what left to the Ryot.
He appears to have adopted the general usage
of the Country, and assuming any quantity as
the "Gross" Produce, say 100 Pooties proceeded
as follows. —

	Pooties 100
Gross Produce	
Deduct Bandooloo, to Village Servants as Potter Smith &c. 6½ per cent.	6·5
	93·5

Of which To the Ryot 9/20 or
45% Cts. = 42·075.
To the Government 11/20 or
55 per Ct. = 51·425 } " 93·5

In estimating the "Gross Produce" the grain
return only was taken into account.
It never seems to have been usual in
any part of India in estimating Produce
as a guide to assessment to take the Straw
into Consideration. Its value may be assumed
from 1/5 to 1/3 of the grain especially where
Jonna is grown, for the Straw (Kurbee)
is excellent forage. —

7. The next process was to arrange at
what rate the Government share should be
Commuted

Inlosure 25th July 1803 — *para 40 of Report of 10 June 1803. See appendix B

Commuted into money Taking the lowest
prices of past years for —
Jonna / January / as the
standard for "Dry" grain. Mr Travers
fixed the Commutation prices as follows. —

"Dry" grain pooty.	"Paddy" per pooty
7. Madras Pagodas = 28 Rs.†	5 Madras Pagodas = 20 Rs.

8. As regards the assessment of Garden lands [2] they were merely all divided into 3 classes according to the labour of Irrigation.

[2] paras 60 61 62 of Report of 10 June 1803

The crops seem chiefly to have been Jonna and natcheny / Raggee /. The first class called "Cumma Bavooloo" or Solid wells cut in rock or stone deeper than 15 feet, and worked by Bullocks, paid 21 Rupees per Goortoo × 2⅔ Getna potaloo or Irrigation by Pacottahs from shallow wells or from banks of nullahs and tanks were assessed at 12 Rupees per Goortoo; * and the 3 class or Bhey potaloo on soils near the Coast where

† The madras Pagoda in which the Nellore accounts were formerly kept has for many years been reckoned at 4 Rupees, but at the old rate of exchange it was 100 Madras Pagodas to 385 Arcot Star Rs. or 1 Madras Pagoda = 3 Rs. 15 a. 0 7½

† From collector 23 January 1852 / Inlosure 9th Feby 1852.

‡ The present Rupee however is less fine than the old Arcot, as it contains 165 Goortoos of pure Silver to the others 166½. —

× Rs a. p. 6 12 0 per acre

* 13 8 0 per acre

where Small Springs are found under the Surface of the Sand, and drawn in pots by the hand, paid 23¾ Rupees per Goortoo These differences were made by allowing to the Ryot a larger per centage of produce according to the labour Thus. —

+7-10-0 per acre

1st class wells, much labour Ryots share 16/20 of the net produce. —

For 1 Goortoo, 2 Crops of Jonna, 2 Pooties.
each crop at 28 Rs a Pooty ——— 112 Rs

Village Servants fees 6½ per cent — 7½
101, 3/4

Ryots share 16/20 — Rs 83 3/4 } 101 3/4 Rs
Government share 4/20 — 21 }

2 class wells, less labour
Ryots share 12/20

For 1 Goortoo 2 Crops of Jonna 2½ & 1½ Pooties=
4 Pooties, at 28 Rupees = 112

Village Servants fees 6½ per cent — 7¼
101 3/4

Ryots share 12/20 — 62 3/4 } 101 3/4 Rs
Government share 8/20 — 42 }

3 class wells. Ryots share 14/20

The 1 Goortoo 2 Crops of Jonna of 2 and 1 Pooty
each = 3 Pooties, at 28 Rupees — 84

Village Servants fees 6½ per cent — 5¼
79¼

Ryots share 14/20 — 55½ } = 79¼
Government share 6/20 — 23 3/4 }

Mr Travers adds "The other Garden Cultivation

"Cultivation of these Districts formerly "distinguished as "Muetta" Gardens, and in which "is produced Sugar cane Turmeric, Betel, "Tobacco, and vegetables of various "descriptions, have their rates of assessment "already established by Custom, and do not appear "to require alteration." x These Muetta rates were according to the Species of the produce raised - when the ordinary kind of Vegetables were produced, the rates were more moderate than when Sugar cane, Betel, and Tobacco, &ca were produced. The ordinary Garden land was known as "Mooloom," but the higher rated land as "Jareeb" In the early years of the assessment about 3,000 Goortoos were cultivated as Mooloom and 1,000 as Jareeb, of late years about 5,000 & 700 respectively The Board have on their Records a Memorandum drawn up by Mr Travers of the estimated yield & ultimate profit to the ryot of a farm of 11 Goortoos of land, but as there are doubts of its correctness they have refrained from enlarging their present Proceedings by inserting it

x para 63 of Report of June 10th 1803.

9. There was another peculiarity in Mr Travers

× From Leolb. 9 July 1824. paras 124-27 Inhons 19th July 1824

Mr Travers' System × which it is necessary to notice, because the Board believe that it has affected the position of the ryots to the present day; and this was, to parcelled out the whole of each village both Cultivated and the waste- amongst the chief Ryots,* and consequently individual field assessments soon became nominal, and as the Board observe in their Minute of January 5th 1818* "while the Collector believed he had established "Ryotwar, the people continued to adhere to "their old System of the Village Settlement,- "and Share of the crop." The Board in the above minute state that they "have since "understood that much of this Ryotwar Settlement "of Nellore existed only in the accounts "of the Collectors Cutcherry-" The opinion of Mr. Smalley in 1821 & 1824 × of Mr. Orr in 1827 & and of Mr. Stonhouse in 1842 # will be given in the appendix- To revise an assessment formed on such a basis seems impracticable,

* Appendix B

* Revenue Selections Volume I Page 939.

× Appendix C
Appendix D
Appendix E

impracticable, and nothing short of Complete resurvey and re assessment would answer any but a temporary purpose-

10. Mr. Travers left Nellore in 1809, and was succeeded by Mr. Fraser just as the Triennial Rent was introduced. This was followed by the Decennial Rent from 1812 to 1822 During all this period "Lapses and "Turrums" were altered; and land once Cultivated given up and waste Cultivated without any regularity of record; so that on the expiration of the rent in 1823, Mr. Fraser was driven to several expedients- This arrangement generally was to obtain an agreement with the Chief Ryots- of each Village as to the total Beriz- and then parcel out the whole

whole lands among them, each puttah-dar being responsible for a certain sum and holding a defined extent of land partly Cultivated and partly waste. This was in fact a close approximation on Mr. Travers' System though the data for estimating the Beriz of the Village were different.—

11. Mr. Fraser died that same year, and Mr. Smalley was sent to Nellore with instructions to bring matters into some better form.— His first endeavour was to introduce a more accurate and detailed measurement in acres of all the lands in each village, and then to fix the assessment field by field. The details of a specimen village Punchadoo are given in his letter to the Board of 8th March 1825, and it will be necessary to refer to this, as it was the basis of his assessment

Inbound 17th March 1825

ment of the other 83 "Surveyed" Villages.

12 After the measurement was completed with a 33 foot chain as in the ceded Districts the Turumdar and Head inhabitants of the neighbouring Villages examined the soils and fixed the classifications of all the Land (except Perumbokè) upon a consideration of the "soil and produce." Mr. Travers had assumed that 2 3/4 Toms of Seed were required for a Garden (3/8 acres) of irrigated land whereas though 3 Toms are required for a Garden of poor soil 2 only are required for rich soils or an average of 2 1/2 At Punchadoo the produce of 1 acre was estimated as follows.—

Class	Unirrigated Toms	Irrigated Toms
I	3·2	20 or 1 Pooty
II	2·4	16
III	1·6	12
IV	0·8	9
V		6
VI		4

× Mr. Smalley seems at first to have deducted 6/8 in lieu of 6/12 for Village Servants &c. but it is now generally assumed at 6/12

The garden lands were classed according to their varieties of produce. The Division of shares between Ryot and Government was made on the principle adopted by Mr. Travers (See para 6 of those Proceedings)

Then

13 Then as to "Commutation rates" Mr Smalley in para 32 of his letter [8th March 1825] states as follows "The "price of the Government share of the "produce is fixed at 30 Rupees per Pooty "for dry Crops, 20 Rupees per Pooty for "wet Crops and 30 Rupees per Pooty for "garden crops, according to which the "Shist is formed but this will be found "detailed clearly in the New Rumah "or Table of rates No 3 On referring to the "Table of rates No 3rd it appears that for dry grain Mr Smalley took the prices per Pooty of Jonna, Vale, Raggy and anlos for 2 Fuslies only and these 2 fuslies are those 7 years previous to his Survey (probably no others could be depended on) They gave as follows.

	Jonna	Vale Raggy	Anlos
	40	40	24
	32	22	24
Average	36	31	24

and $\frac{36+31+24}{3} = 30\frac{1}{3}$

With the prices of Paddy more years were taken The average of the 10 years ending Fusly 1232 gave the following averages of price per Pooty.-

* Vale or Vyel Raggy is that kind grown without artificial irrigation

Fine Paddy	Coarse Paddy	Cars Paddy	Average.
22 4/15	18 1/15	19	20.

In Consultation 4th June 1827

14 On the 23d May 1827 Mr Smalley reported the result of his survey of 82 more Villages comprising the whole of the Sungum and Caleghery Talooks and 10 Villages of the Nellore Talook &c &c He states that "The rules observed in measuring and clasing the lands were the same as those forwarded with my Report upon Pinchadon" The Total number of Villages measured and classed in this manner is 86 +

+ Sungum — 36
Caligherry — 36
Nellore — 13
Talamuchy — 1
86

From Nellore 26 June in Consultation 9 August 1827 Proceedings 12 Nov. 1827.

15 But subsequently Mr Smalley adopted a more expeditious, but less detailed method of reviewing the assessment, and it is that which now prevails over nearly 2/3ds of the District. It is described as "Mucta Ryotwar" in his settlement Report for Fusly 1230, and in the Boards Proceedings on that Report. No measurements were made, those Villages that had paid their revenue according to Mr Fraser Surveys up to Fusly 1233 were not interfered with, but as to the others (which constituted the majority) Mr Smalley had two accounts prepared for each

each Village. The first shewed the extent of land, dry and wet, cultivated annually for each of the preceding 18 years. also the produce of these lands and the Circar share (1/10 after deducting Village fees) converted into money according to the current prices of each year. An average of this money share was calculated and being divided by the average number of Goorties cultivated, gave the assessment per Goortie in the Village. The second account shewed the extent of land and produce for the previous 6 years but the Circar share calculated in a different way. i.e. at a fixed rate of 20 Rupees per Pooty for Magany (wet) produce, and 30 Rupees per Pooty for Metta (Dry) and this was divided by the number of Goorties, to give the rate per Goortie in the Village. "The Total assessment has then been fixed for such quantity of land as the ryots agreed to take according to the average Shist." It is generally assumed in Nellore that the commutation prices observed by Mr. Smalley were 20 Rupees 30 Rupees per Pooty. If so it would appear that these were the results "of the current rate" for the 18 years account. This however is not

not borne out by the list of Prices in Appendix G. But where the average Shist upon the produce of the last 18 years differed from Mr. Travers assessment, it was partially trimmed to suit it. The confidence to be placed in an assessment thus made on the account of crop produce in each Village may be conceived when the Collector and Sub Collector speak of them as follows: Mr. Smalley states "It must be admitted that these statements cannot be implicitly trusted but where the difference was considerably more than the Ryoti allowed, a reference was made to the average produce of neighbouring lands, and the actual past Collections and to the best informed head Ryots." Mr. Ott states the accounts "were on all hands admitted to have been so loosely and incorrectly taken, especially during the Decennial lease that little or no confidence could be placed in them"

The next matter after obtaining the average rate per Goortie for the whole Village was to apportion it fields by fields. Mr. Smalley says para 11 "in apportioning the average Shist of 18 years upon the lands of

19 Mr Stonhouse then proceeds
to notice the Mustah Settlement as it is
called of Mr Smalley in Fusly 1235 †
He believes the accounts of produce
on which it was based to be "untrust
"worthy subsequent experience has proved
it "The Revenue, he says, "has suffered
"in two ways first by false accounts
"of produce, secondly by false classi=
"fication which was left entirely
"to the Ryots The first lowered the
"rate of assessment, the 2d placed
"the worst lands of the Village under
"the higher classes, and brought
"the best lands both in point of
"situation and fertility under the
"lower & & & & classes." When it is
considered that the greater part
of Nellore is assessed under
this system something more
than partial reform seems
necessary.—

20 Mr Stonhouse then
proceeds to denounce the "Ryotwar"
system in general, and proposes
"the introduction of a gram Patent
to

† Para 15 of these Proceedings.—

†† The Board suppose this to mean a fixed amount of grain named &c

"some Villages, the Ryots from their
"inability to distinguish rich, medium, and low soils, took the assessment
"at so much per Goorsu on a fixed Unetta and
"divided it for each field. The
"Ryots of some Villages not being
"able to arrange the increase and
"decrease in the current years assess-
"ment with reference to Mr. Travers
"Turrum, fixed the classes of land
"with reference to the state of the
"produce, and the Shists were appor-
"tioned accordingly. In other Villages
"the Ryots fixed the Shists by adding
"to or reducing the assessment
"fixed by Mr. Travers on each medium
"and poor soils, the increase or decrease
"in the Current years Settlement."

The Board in their Proceedings of 12 November 1827, on this Settlement, state "the actual settlement has in fact "been reduced to a discretionary "assessment on each Village. The "apportionment of the aggregate "demand was left to the inhabitants."

In their Report on the Settlement of Fasly 1237 (12 August 1828) Mr. Smalley reports that he has

has continued the system of the
previous year and no changes have
since been made.

17 Mr. Smalley left Nellore in
1830 and Mr. Whish was Collector
till 1835. The Board do not find any
record of further assessment investi-
gations during this period. In 1835
Mr. Stonhouse was appointed to
Nellore and the Board some time
after† in consequence of some observa-
tions of the Court of Directors†† called
upon him for a detailed opinion
as to the state of the Assessment.—

18 On the 8th August 1842 Mr.
Stonhouse submitted the result of
his investigations and deprecated not
only Mr. Travers assessment, but "Survey"
those of Mr. Smalley both "Survey"
and "Unetah" With regard to Mr.
Smalley's '86 "Surveyed" Villages Mr. Ston-
house shews that however able might

"Boundary marks of the several fields. In re:
:gard to the assessing of the lands. I am of
"opinion that as little should be left
"to Native Agency as possible, and that
"the cumbrous and escpensive machinery
"made use of in the Ceded Districts although
"it looks well in paper, is in practice of no utility
"whatever."-

22 Thirteen years have elapsed since this was written, but nothing has been done to place matters on a better footing. No reply to Mr Stonhouse's letter is recorded in the Board's Office though one Member (Mr Goldingham) drew up a Minute on the subject

subject with a view apparently to justify the Proceedings of Messrs. Travers and Smalley from the censure passed on them by the Principal Collector. But the question was permitted to drop.

23 In the year 1839 the Jaghire of Woodiagherry was resumed by Government. It comprised an area of about 330 Square Miles and composing 72 Government Villages. The land actually in cultivation was about as follows.

	Goortoos	Fusly 1263
Metta (Dry)	6,000	5,395
Magany (Wet)	1,000	231
Mooloom (Garden)	1000	1,010

and the Net Settlement about 7,70,000 Rupees[x]

In his Report of 27th February 1841 para 17 Mr. Stonhouse states that he had all the cultivated lands measured under the supervision of some Tahsildars of the Government Talooks who in concert with the ryots had fixed money rates on the fields. He would not recommend a permanent assessment to be formed on this measurement, and hopes that "measures will shortly be "adopted for the general Settlement of the land Revenue

[x] From Collector 12th in Cons: 19th April 1841
In Cons: 3d March 1841.

Revenue of the whole District" - till which any further remission might lie over. Further details as to the method of classification are given in the appendix to these Proceedings - It appears that the average gross produce of a whole Village was calculated, and an average struck per Goortoo. In para 5 of Mr. Stonhouse's Settlement Report of Fusly 1250[x] he states that in arranging the share of produce to the ryot and Government, he adopted the general System, i.e deducting 6½ per Cent from the "Gross" produce, and leaving 9/20 of the remainder to the Ryot, as explained in para 4 of these Proceedings. He took as his "commutation price" the 5 years preceding average of the neighbouring Government Talooks of Calagherry and Pavoor as he could obtain no authentic price list from Woodiagherry. "The averages came to 22 Rupees "per Candy for Dry grain, and 18 Rupees per "Candy for Paddy. For the Mooloom and Jareeb "lands the rates of assessment prevailing in the "Government Talooks were adopted" xxxx The "rates on Metta (Dry) lands for the whole "Talook are 55, and on Magany lands 51. They do "not in any Village exceed (in number) 5 for "metta and 6 for Magany. The metta rates "vary from 0-12-4 to 11-5-0 per Goortoo, "and the Magany from 4-10-1 to Rupees "37-0-5-"

24 The Government in passing orders on these arrangements in Extract Minutes, Consultation 30th November 1841 remark that they do not object to the rates of assessment suggested, but "with refer-"ence to the general question of the reform "of the assessment of the Nellore District, "the proposed rates will hereafter be sub-"jected to more careful revision, and "settled upon more definite and better "ascertained data".-

25 The only other change that has occurred in the District since the assumption of Woodiagherry is the purchase by Government of the Jagheer of Sydapoor which now forms a Talook of the District. It fell into arrear of Peishcush and was purchased by Government for 20,000 Ru-pees in 1841. The Peishcush was 32,984 and it now yields about 18,000 Rupees a year only. No new assessment was intro-duced 41 Villages are rented as they were before, and 11 are under amany the crop being divided and the Government share taken at the current price. There are also 57 Shrotriem Villages. From the time the Woodiagherry Jagheer was assessed no attempt at a revision of assessment has been made except in the Village of Palcoor

palcoor in the Dewagoodoor Talook. frauds in changing Mr. Travers assessment had been detected and the Collector on examining the lands found there was an utter confusion of accounts. The whole was measured and re assessed in 1850 as it was useless to try and detect individual cases of fraud in the accounts. It was not expected that the totals would exhibit much difference. The old measurement gave 5,000 acres, the new 5304. By the old measurement the culturable land was 5993 acres by the new 6492 on an increase of 9 per Cent. The new Commutation rates proposed by Mr. Purvis were 22 Rupees for Dry Grain and the same for Wet. Mr. Smalley's having been 30 for Dry and 20 for Wet. He found that the prices of average Paddy, and average of Dry grains gave very nearly the same results and the Board do not doubt but that they ap-proximate more nearly than either Mr. Travers or Mr. Smalley estimate. When Mr. Purvis assessed the Village in Fusly 1260 Prices had been low for some time, yet still he considered 22 an average. The computation however might have been only for that Village or Talook.-

From Collr. 31st Augt in Cons 2nd October 1843 Bds Proc: 8th April 1850.

26. Another matter necessary to notice in the past assessment of the District, is the "Poollary" or Grazing tax. The Northern and Western Talooks of Nellore have for many years

Appendix K

years been famous for their breed of cattle and this profit from the waste grazing lands has no doubt materially assisted the Ryots in meeting the Land Revenue Demand. Mr. Travers in his Report of 10th June 1803 states that in the Nawabs time it had been usual to collect Grazing tax at so much per 100 head of Cattle. In 1803 it yielded 63,700 Rupees. Mr. Travers altered the System and when he apportioned out the waste land of each Village among the ryots at a low rate he imposed a Mucta or fixed sum as Pollary to be paid by each Village, and this was paid among the Ryots in proportion to the waste land held by each. The old System of counting however gradually crept in again, and the Board on the 17th January 1843 issued orders to introduce the Mucta. This was done, but not with any great regularity. There is not much waste land for pasture in the South Eastern Talooks, and then the remission was made whilst in the Western Talooks the amount was increased or more generally the "Mucta" was fixed not with reference to the pasture land but to the total assumed number of Cattle in the Village. This amount remained unchanged

unchanged and the Ryots divided it among themselves. As considerable changes had occurred in the Stock at different localities, In Cons: 31st October 1850 the Collector on the 17th September 1850 urged a revision of the whole every two or three years. The total amount being about 1½ lacs of Rupees. The Government also in Extract Minutes Consultation under date 17th December 1850 objected to a periodical scrutiny though they did not prohibit readjustment, when shewn to be clearly necessary in special cases. To this view the Honorable Court In Cons: 13th Jany 1857 gave their assent in para 50 of General letter 10th November 1852 No. 16 Revenue Department. If however a general revision In From Govt 22d February in Cons: 4th April 1853. of the assessment takes place, the Board think it would be advisable to reconsider this subject.

27 The Board have gone through all the previous detail of the rise progress of the various assessments in Nellore, with the sole view of ascertaining if it were possible to find some previous acknowledged and safe data on which to found a revised scale of assessment or even of modification of existing teerwas and rates and they will now offer their opinion upon the reforms proposed by the present Civil authorities of the District.

In Cons 21st April 1853. 28 On the 13th April 1853 we

Fort St. George 7th May 1855.

Mr. Ratliff the Sub Collector in charge of the Collectorate submitted a reply to the Board's Circular of November 8th 1852 on the subject of commutation rates in which they requested Collectors to give their opinion as to affording relief should the present prices be considerably below those rates. Mr. Ratliff observes that "Dry" grain commuted by Mr. Smalley (whose rates apply to most of the District) has fallen from 30 Rupees the Candy (or Pooty) which was the commutation rate to 19 Rupees or 36½ per Cent, Mr. Ratliff states that according to the rate of Division of produce between Government and the Ryot (as shewn in para 6 of these Proceedings) out of every 100 Pooties of gross produce the Ryot got 42.075 Pooties which at 30 Rupees a Pooty gave him 12[illegible]/4 Rupees, but now at 36½ per Cent decrease it is only worth 80 Rupees. With regard to Paddy it is stated that the prices have kept up in the Sub Division Taloks, where there is little "Wet" cultivation but they have greatly fallen in the Principal Division, Mr. Ratliff proposes a remission of the assessment on the basis of commutation rates

Fort St. George 7th May 1855.

rates of 22 Rupees per Candy for "Dry" and 17½ for "Wet" grain instead of 30 and 20 respectively.-

In Cons: 26th May 1853

29 Mr. Elton the Collector having returned to Nellore desired to offer his opinion and in his letter of 19th May 1853 states that "Dry" grain has fallen from 30 to 18 (Mr. Ratliff said 19) or 40 per Cent, consequently the Ryot who formerly out of 100 Rupees gross produce got 40-9-10 Rs a P x now gets 40 per Cent less or 24-5-3. In "Wet" grain the fall is from 20 to 15½ Rupees a Pooty or 22½ per Cent, and the Ryots share which was worth 42-1-2 is now consequently only worth 32-9-7. Mr Eltons' proposition is "to reduce the assessment of each field "to a grain demand at the commutation rate. "convert it again into money at the current "market prices and fix that as the present "assessment" and this adjustment to current prices to be made annually, like the Dolungoo assessment in Tanjore and Tinnevelly. Should this not be approved he wishes to "recommend a remission of ¼ "of the present commutation rates on the "same principle as was done by Sir, "T. Munro in the Ceded District xxx trusting

x Mr Elton has made an error in deducting 9¾ Calavas sum instead of 8½ The Ryots share is 42-1-2 (see para 6 of these Proceedings)

"trusting that increased cultivation will
"ultimately make up for the immediate
"loss of Revenue." The amount of Revenue
to be foregone by either arrangement is
stated as follows.-

Land actually cultivated in Fusly 1261
(1851) 52) exclusive of Gardens

	Goortoos	Assessment		Reduction
"Dry" --	83942 -	443728	Rupees 40 per Cent	177953 Rs
"Wet" --	31171 -	599969 -	22½ per Cent	134993 Rs
	115113 -	1043697	Total Decrease	312946.

Or by the other arrangement to strike of ¼ of
the assessment would be to forego
annually $\frac{1043697}{4}$ 260924 Rupees. Mr Elton
thinks that even the larger Decrease of
3/8 Lacs would be made up by increased
cultivation in 10 years. half of it in 5 years
and the other half of it in 5 years more.
He observes that the price of Paddy has
kept up in the Sub Division Talooks.

30 On the 18th July 1854, the Govern-
-ment called upon the Board to take
steps to introduce if possible some relief
of assessment however general in such
Districts as were shewn to need imme-
-diate revision, Copies of the Extract Mi-
-nutes Consultation were circulated on the

31st

31st August 1854, and Mr Ratliff then
again in charge of the Nellore Collectorate
dated 28th September in Cons: 7th May 1855 replied to it. He remarks that Government
have given it as their opinion that 50 per Cent
of the gross produce is too great a share
to take on the part of Government whilst
in Nellore it is 55 per Cent after deduct-
See para 6 of these proceed-ings -ing 6½ per Cent for Village perquisites
and that though the last few months
on account of scarcity the price of Grain
has risen, yet for the 10 years preceding
Fusly 1262 (1851) 52) the price of 3 Kinds
of Dry Grain taken on average was 33⅓
per Cent below the commutation rate
or a fall from 30 to 20 Rupees a Candy;
and the price of "Paddy" has fallen from 20
to 17-6-0, in the Principal and 18 in the Sub
Division, or 13 per Cent and 9 per Cent
respectively.-

31 As a proof of the "pressure
occasioned by the state of things" Mr
Ratliff forwards Statements shewing the extent
of "Dittum" or land engaged for cultivation in
Fusly 1262 and also in 1263 in which year greater
freedom was ordered by the Board as to Ryots
cultivation. The consequence was that the

Dittum

1262 - - 1389944
1253 - - 1259066
130878.

Dittum decreased by 130878 Rupees.

32 The remedy Mr. Ratliff proposes is this. He would reduce the "share" of Government of the Gross produce by deducting first 20 per Cent towards meeting of "Calawasum" or fees to Village servants, seed, and sundry expenses and divide the remainder equally thus.

Gross Produce - - - -		100
Deduct for Calawasum		
Seed	} - -	20
Labour		
		80
Government share - -	40	
Ryots share - - - - -	40	} - - 80

and this share of Government he would "commute" at 22 Rupees for "Dry Grain" and 18 for "Wet". He adds "The measure is I am aware an apparently sweeping one. The "prima facie, and it may be the eventual, "diminution of Revenue serious - but its pre: "sent necessity is stern - its very justice "(or of some such) unquestionable" x x x x "The actual reduction of assessment it "would involve, is more or less 7,68,203 "Rupees of Revenue, supposing extent of cul: "tivation to remain as now i e as per Dittum "of last Fusly 387029 Rupees". It is his decided conviction, that the impetus and life this given, would fully make up the thus foregone revenue.

The

33. The methods proposed to be adopted by Messrs. Elton and Ratliff, are short and summary. There is no attempt to shew that the higher rated lands have fallen out of Cultivation, or that the extent of Land annually brought under the plough, has gradually decreased - The Board do not intend to deny that the price of grain at the time Messrs. Elton and Ratliff wrote was much lower than the Commutation rates, but it was than at its very lowest ebb, and it is hardly correct to compare the commutation prices with this minimum - During the two last years prices have greatly improved, and though probably this may not keep up, it may in like manner be inferred that the very low prices of 1853 will not be a permanent standard of value. The other ground on which these Gentlemen urge a heavy reduction is the fact, that when the Assessments were made, the share of the "Gross Produce" left to the Ryot was only 41 per Cent† - But it is to be remembered that the share of Government was not 59 but 55 per Cent, the odd 6½ being paid to the Village servants for

† para 6 of these Proceedings.

for duties rendered to the ryots and not to Government. Besides the distribution of share between Government and the Ryot, and the rate at which the commutation price was fixed, there is another important element in these Assessments, on which the Board would have wished information, and this is the actual produce on which the other two elements are founded. Though Messrs Travers and Smalley had it in their power to fix the "Warum" and the Commutation rate according to their own will and pleasure, yet if these were computed on Short returns of produce, the weight of the Assessment would be materially lessened, and it is impossible to read the extracts from the Board's records referred to in paras 9 & 16 of these Proceedings, without observing how entirely dependant their rates were on returns of Produce furnished by the Ryots themselves, and the Currums, which were of course made as short as possible.

34. Mr Elton in his letter of 19th May asserts that as regards "Dry grains" not only has the price fallen 40 per Cent and

and thus reduced the ryots share from 40 ¼ to 24 ¼ per Cent of the Gross Produce of his fields; but that he has to bear an "additional loss" in converting his share into money, which reduces his share to 4 1/3 only per Cent! What this "additional loss is," the Board do not understand. It is presumed that the rate at which the Ryot sells his grain stands in the same proportion to the Price lists furnished by the Collector as it did to the Commutation rates fixed by Messrs Travers and Smalley. Mr Elton states that on an average Dry grain has fallen 40 per Cent, and therefore in some Talooks it must be below even 18 Rupees a Candy*. In these cases the Ryots would be going on from year to year obtaining some 2 or 3 per Cent only of the produce of their fields. In appendix I is given the extent of land actually cultivated in Nellore, every year, for 10 years. Mr Elton wrote in Fusly 1261, and looking at this Table for that year and the years preceding, i e. the years of very lowest prices, the Board have considerable hesitation in admitting that the Cultivators of Dry grain lands (about 70 per Cent of the

* In the Talook of Rovoor it was 18 ½

the

the whole area of land under the plough / have been so pressed as to leave the Ryot only 4½ per Cent of their produce to pay the expenses of husbandry, and maintenance of their families. as regards the Irrigated lands, Mr. Elton on the same ground asserts that the share received by the Ryot is only ⅕ of the original 100! When Statements such as these are made, which are tantamount to asserting that the District is and has been in a state of ruin and distress beyond even the result of former native mismanagement and tyranny, it is but due to those vested with the administration of the Country that full and complete proofs of the assertion should be forth coming, especially when there is prima facie evidence from the Collectors own Records Returns that the Cultivation of the Country has been increasing rather than diminishing.

35. Another point to be noticed by the Board in connection with the letters before them is, that both Mr. Elton and Mr. Ratliff proposes what the latter calls a "sweeping" reduction at an uniform rate all over the District, and this although

although they both allow that prices of "Wet" grain have hardly fallen even in the worst years below the commutation rate, and the prices of Dry grain have averaged 10 per Cent more in the Talooks of the Sub Division than in the Talooks of the Principal Division and not only this, but the Commutation rates vary in different parts of the District, as the following abstract will shew.—

127 Villages Settled at Mr. Travis's rates 20 & 28 Rs. per Candy
86 " at Mr. Smalley's rates 20 & 30 " "
389 " Mudaliar Settled Villages 22 & 30 " "
67 Villages by Mr. Monhouse 18 & 22 " "
1 Village by Mr. Purvis 22 & 22 " "
43 Villages Rented
13 held under Amanny.

726
36.

The Grain prices" in the Principal and Sub Divisions" are reported by Mr. Elton as follows: in Rs per Candy.

In many of these Villages Mr. Smalley retained Mr. Travers's Tarrums see para 15 of these Proceedings.

Taluks.	Principal		Sub-	
	Wet	Dry	Wet	Dry
1252	14¼	18⅛	17¾	11½

The

The Board therefore considering the variety in modes of assessment, and difference of prices in the 2 Divisions are not prepared to recommend the "general" reduction proposed by Mssrs Elton and Rattliff.-

37- Without entering into the merits of an "Oolungoo" Assessment as in Tanjore and Timerally, which Mr Elton recommends, it is only necessary to observe that this would require a thorough revision of field Assessment - The actual position and area of each field are too vaguely known in Nellore to admit of the above proposition being carried out without a detailed survey and investigation, which is not the object of the present reference, however necessary it may be hereafter - Failing this, Mr Elton proposes a reduction of 25 per Cent all round as in Bellary and Cuddapah - But in these Districts the Teerwahs were not calculated by reference to Commutation prices, and there was a correctness and regularity of Survey and Assessment, admitting of a 'general' reduction much better than the loose and uncertain data on which the Nellore Assessment is made, neither was

was the ¼ reduction on all Lands. Besides, if as Mr Elton states "Dry" grain has fallen 40 per Cent, and "Wet" 22 ½, a general reduction of 25 per Cent would not by his own shewing meet the wants of 70 per cent of the Cultivation of the Districts. And while Mr Elton assumes the price of "Wet" grain to have fallen to 15½ Rupees a Candy in his calculation of 1,34,993 Rupees necessary reduction in Nuniah Assessment his own Enclosures 3, shews that the average of 10 years is 17½ in the Principal and 19½ in the Sub Division or 12½ and 2½ respectively. Under these circumstances the Board can hardly be expected to recommend a reduction calculated at a fall of 22½ per Cent.

38- Whilst on the subject of "prices" the Board would draw attention to Appendix G which shews the prices in Rupees per Candy of 2 kinds of Paddy and 3 kinds of Dry grain taken from Mr Rattliff's letter of 13th April 1853, the last 2 years being filled up from the Returns in the Board's Office. It will be observed that the average for the 10 years preceding and inclusive of fasly 1261 (when

(when Mssrs Elton and Ratliff wrote,) is
18 ℔ for "Wet" and 19½ for "Dry" grain. In a few
years of scarcity, such as fusles 1215, 1222,
1234 and 1242, the use was great and sudden,
but there has not been that gradual decline that
marks a deepseated error of assessment.
39. Mr. Elton's explanations as to
the cause of this depreciation in the
price of grain does not seem to square
with the views expressed in other parts
of his letter. In place he states
that the cause is the "superabundance of
grain" owing to increased cultivation
and yet he recommends Government to
give up 3,13,000 of the present annual
revenue, and assumes that it will be made
up in 10 years by increased cultivation of
waste. In one place he speaks of the
"difficulty with which cultivation
itself is kept up", and at the same time
encloses a statement to shew the "greatly
increased production of grain."
40. With regard to Mr. Ratliff's
letter of 28th September 1854, it would
have been more satisfactory if he had
shewn

shewn the effect of the great pressure of
the assessment, by exhibiting what quantity
of land had been left waste under
each Turrum. It was in consequence
of there being conclusive evidence of
this kind and the fact that these classes
of land were known and distinguishable
in the field, as well as in the accounts,
that the Board in the case of North and
South Arcot were able without difficulty
to apply some remedy that would meet
the most important point. But in regard
to Nellore, it is neither shewn, that the
higher assessed lands have been thrown
out of cultivation, nor even that the
extent of Cultivation has itself declined.
Judging from the Records in the Board's
Office,* the contrary would appear to
be the case neither does Mr. Ratliff's
Statement which is true enough in itself,
namely the falling off in the Dittum,
prove the fact of the pressure of assessment
as he supposes. The falling off in the
amount of "Dittum" or extent engaged
for was owing to the late orders of the
Board

* Appendix L

* Appendix L

Board requiring that more liberty should be allowed to the Ryots to throw up land than was permitted before. There is no doubt that had this freedom been given 5 or 6 years ago, the result would have been the same. If it is the continued difference between the Dittum, and the actual Cultivation year after year, that Mr Ratliff alludes to this is no guide, as in Bellary and Cuddapah, generally considered the lightest assessed of all the Districts the difference was & always still greater. The Dittum estimate till lately has been all but nominal. The pressure of the Assessment is not to be ascertained at all by reference to the "Dittum" accounts. Mr Ratliff should have referred to the actual "Cultivation" accounts. The one is merely an estimate of what the Ryots say they are going to Cultivate, the other shews what extent they actually do Cultivate, and here as before shewn, there is little or no falling off.

41 Next with regard to the new arrangement of allotting the produce between the Government and the Ryot proposed by Mr Ratliff, as explained in

in para 32 of these Proceedings, the Board observe Mr Ratliff proposes to divide equally the value left after Village fees, and wages of labour are deducted: i. e. the "Net" Produce to be divided equally between the Ryot and the Government. This "Net" produce, Mr Ratliff assumes to be 80 per cent of the Gross produce. This would give Government 40 per Cent of the Gross produce, and the Board are inclined to agree with Mr Ratliff that this is about the proportion to be taken, but then it is requisite that the quantity of produce should be first ascertained correctly and the commutation rate fixed fairly; & Mr Ratliff in a few brief words states, that the reduction it would involve would be about 7,68,203 Rupees, but has altogether omitted to shew the process by which this result is computed.

42 The Board however for want of more specific information would estimate the effect of Mr Ratliffs proposal to be 3,71,700 according to the Returns of Fusly 1251, adverted to in para 29 of these Proceedings, the Assessment on the cultivated land in that fusly was.

Dry land 4,43,728 Rupees
Wt Do. 5,99,969 Rupees
The Government share according to the

do

Fort St George 7th May 1855

old rates is, as shewn in para 6 of these Proceedings, 51¼ 25 per Cent of the Gross produce. This would have to be reduced to 29·3 per Cent on the "Dry" & 36 on the "Wet" land. Hence the reductions on the above 2 items would be

51¼ : 29·3 : 4,43,728 : 252,942 for "Dry"
51¼ : 36 : 599769 : 4,20,212 for "Wet"
67,3154
Present demand 10,43,697

Difference 3,70,543 or 38¾ per Cent

If the whole "ayacut" or cultivable land including "Waste" is taken, excluding Modoom Jaheeb we have,

51¼ : 29·3 :: 10,17,000 : 6,35,000 for "Dry"
51¼ : 36 :: 11,07,000 : 7,75,000 for "Wet"
14,10,000

Total Ayacut 21,24,000
Diff. — 7,14,000

43. The want of detailed information as to the boundaries and descriptions of the different classes of land, and the absence of any regularity or trustworthy accounts, owing to the constant changes of assessment from time to time introduced in the Nellore district, prevent the Board from acting with that confidence which they experienced in dealing with the Districts of North and South Arcot. From a careful consideration of the records connected with former Surveys and Assessments, it appears clear that the assessment of Nellore is exceedingly irregular, but that it is so burdensome as to require that sacrifice of revenue, that Messrs Elton and Ratliff propose is not so evident. The Board perceive from the Reports of Messrs Smalley and Stonhouse that

51¼ to 40 and 40 reduced as 30 to 22 = 29·3 —

51¼ to 40 : and 40 reduced as 20 to 18 = 36 —

Fort St George 7th May 1855

that the want of defined boundaries and specific accounts render it possible for Curnums, and heads of Villages to alter the Turums to cultivate land originally low assessed as waste at the same rate, and extend cultivation without check, and no doubt many of the original hardships of the assessment have been counter balanced by these devices. It would be of little use to lower all the higher classed land, a certain percentage when it is very possible that the high rates have been transferred to lands formerly low assessed and vice versa. Another matter that militates against the good result of any regular Turum reduction is that it would hardly be possible to find the specific fields to which specific turums belong for there has never, except in the 86 Villages of Mr. Smallen, been any field Survey.

44 The Board believe that the practice which openly prevailed many years in Nellore prevails now, namely the chief ryots of the Village cultivating

cultivating the land in common and arranging their shares of assessment among themselves This is known as "commutum" It is referred to in para 21 of the Sub Collector's Settlement report for fusly 1266* and described in detail in para 18 of Mr Smalley's report of 23d May 1827° and in para 88 of Mr Stonhouse's Report of 8th August 1842+ These Kind of arrangements make it hopeless to expect that if any large amount of reduction is sanctioned it will in any material degree tend to equalize the Surcum rates.

45 Mr Travers rates do not seem to be so exorbitant in comparison with other Districts as his commutation rates would lead many to infer. The amount of each rate and the cultivable land under it is shown in Appendix A the 2 first classes are evidently mere exceptions and the highest class of land may be considered about 6 Rupees an acre and the lowest 1 Rupee. The 10 classes from 3d to 12th both

* Appendix D

° Appendix M

+ Appendix N

both inclusive of arable land including "waste" comprise 126,329 Goortoos paying 244147 Madras Pagodas which gives an average of 7-11-6 Rs per Goortoo, or 2-7-6 Rs per acre. The average of the whole 130,670 Goortoos of Metta arable gives 2-8-9 Rs per acre. an average teerwa of 2½ Rupees is equivalent to an average estimate of produce of 11 Toons or 440 Seers Regulation Measures per acre, which seems to be high for an average.

46 Again as regards the estimated "Gross Produce" on Irrigated lands which formed the foundation of both Mr Travers and Mr Smalley's assessments. It is to be observed that Mr Travers did not apparently regulate his Surcums + according to the actual produce but according to the return made for 1 Mercal of Seed. It becomes therefore necessary for the purposes of comparison with other Districts to ascertain what the actual amount of Produce appertains to each Surcum Mr Smalley (see para 11 of these Proceedings) criticizes Mr

+ Appendix A para 5 of these Proceedings

Fort St George 7th May 1855

Mr. Travers for assuming 2¾ Toorns of seed required for 1 Goortoo of "Wet" land and Sir V Stonhouse the same in his Report of August 8th 1842; But it appears that this was only for the very few Goortoos of Class I which were supposed to yield 3 Pooties to a Toorn or 60 fold. Hence 2¾ Toorns of seed would yield 8¼ Pooties At 20 Rupees a Pooty; this=165 Rupees from which the assessment would be formed, as follows.

Appendix E para 77

Total Produce — 165

Deduct 6½ per cent Village fees — 10·3

154·7

Of which 11/20 to Government* or a teerwa of 85 Rupees which corresponds with Turrum 1st in Mr Travers's List. para 6 of these proceedings

Appendix A

47 The first 15 classes of "Wet" land seem to be mere exceptions The 10th may be considered the type of the highest class land and although the actual produce per Goortoo is not stated, in any of the District correspondence it may be calculated,

Fort St George 7th May 1855

that is, the Teerwa in Rupees per Goortoo for any class being known we may find the assumed Produce per acre in Madras Regulation measures by multiplying the teerwa per acre by 25·9. The following are the data—

I The Teerwa (t) in Rupees per Goortoo.

II The Government share of the Gross produce is 5/7 t 25.

III Mr Travers's commutation price for Paddy is 20 Rupees per Pooty

IV 1 Pooty = 800 Madras Regulation Measures.

V 1 Goortoo = 3⅛ Acres.

Whence

Produce in "Measures" per "Acre"

$$= \left(\frac{5/7\,t\,25}{3{\cdot}125} \div 20\right) + 800.$$

$$= \frac{t + 800}{10{\cdot}285 \times 3{\cdot}125}$$

$$= \frac{t + 800}{32{\cdot}14}$$

$$= t + 24{\cdot}9$$

So all that is necessary is to multiply the teerwa per Goortoo in the last column of appendix A by 24·9. Thus class I teerwa 8·49 Rupees gives 2,116 Regulation measures* an acre. This no doubt was the

* = 8¼ Pooties

the estimate for double crop, and does not appear high for an extreme class comprising only 105 Goortoos of the whole arable irrigated. In Tanjore Chungleput, Cuddapah and other Districts 1000 measures per acre is about the yield of Superior land for one crop. Taking Class 16 as the type of the superior land in Nellore, we have 42'4 + 24'9 = 1056 "Measures" per acre and the land under the class only comprises 1/5th of the irrigated arable. The average of the 11 classes beginning with N° 3 & ending with N° 12 gives 32741 Goortoos bearing a teerwa of 22,640 Madras Pagodas or 276 Rupees per Goortoo which being multiplied by 2'9 gives 690 Regulation "measures" as the yield per acre which cannot be considered high for irrigated land.

28- The commutation rates for Dry grain seem to be the weakest point in the present assessment. 30 Rupees a Pooty is 120 Rupees per Garce a rate far beyond the average of the Districts of this Presidency.

The

The Commutation price for Paddy 20 Rupees a Pooty or 80 Rupees a Garce is not unusually high. In Chungleput it was 70 Rupees in North arcot 85 Rupees and in South Arcot 78 Rupees. It is about the usual price — — on an average of all the Districts. The amount of Produce estimated for the different Classes of Dry grain is high but not so for Irrigated land As to the Share payable to Government of 57'2 25 per cent, it is theoretically too high. but there is reason to believe that in practice it is less — owing to the manner in which the Produce estimates were made. Moreover it will be well to consider as some test, the actual resulting teerwa in money as now paid.

The following is an abstract for fusly 1262 when cultivation was more "free" than formerly.

Lands.

the estimate for double crop, and does not appear high for an extreme class comprising only 105 Goortoos of the whole arable irrigated. In Tanjore Chungleput, Cuddapah and other Districts 1000 measures per acre is about the yield of Superior land for one crop. Taking Class 1 as the type of the superior land in Nellore; we have 42'4 + 24'9 = 1056 "Measures" per acre and the land under the class only comprises 1/5th of the irrigated arable. The average of the 11 Classes beginning with No 3 & ending with No 12 gives 32741 Goortoos bearing a teerwa of 226490 Madras Pagodas or 276 Rupees per Goortoo which being multiplied by 259 gives 690 Regulation "measures" as the yield per acre which cannot be considered high for irrigated lands.

28. The commutation rates for Dry grain seem to be the weakest point in the present assessment. 30 Rupees a Pooty is 120 Rupees per Garce a rate far beyond the average of the Districts of this Presidency.

The

The Commutation price for Paddy 20 Rupees a Pooty or 80 Rupees a Garce is not unusually high. In Chungleput it was 70 Rupees in North arcot 85 Rupees and in South Arcot 78 Rupees. It is about the usual price — — on an average of all the Districts. The following is an abstract for fusly 1262 when cultivation was more "free" than formerly.

Land.

Fort St George 7th May 1855

Land and assessment.

Dry			Wet	
	Acres	Rs.	Acres	Rs
Ayacut	62,0000	101700	1,76,700	11,07,000
Waste	38200	58,100	77,700	4,95,000
Cultivated	258000	4,36,000	99,000	6,12,000
			Waste	cult^d.
"Dry" land average per acre			1-8-"	1-11-"
"Wet" D^o D^o D^o			6-6-"	6-3-"

The Board consider Rs 1-11-a " to be a high but not exorbitant average per acre for "Dry" cultivated land but 6-3-" is not at all high for Irrigated at least nothing in itself to call for immediate interference: and it seems that in "Dry" land the portion left uncultivated is assessed lower than that taken up which would tend to shew that the throwing up of highly assessed lands does not prevail (unless it has been done fraudulently and the accounts altered) Finally the general extent of cultivation in Nellore has not fallen off even in the years where prices are so much complained of.

one

Fort St George 7th May 1855

49 one step has already been taken in the revision of the Assessment, which though but temporary pending a more thorough and accurate survey assessment of the whole District and though comprising comparatively a small extent of land will it is hoped relieve the people from a burden which has hitherto checked the progress of a branch of agricultural industry remunerative to the ryot and this is the late arrangement proposed by the Board and sanctioned by Government, with regard to the "Garden" land Hitherto this has been divided into "Mooloom" and "Jeerab" the former subdivided into rates ranging from 12 to 3 Rupees a Goorto and Jeerab 62 rates varying from 26 7/2 to 15 3/4 Rupees per Goorto the rates fluctuating with the Kind of crop, and land once yielding a higher class of

38,250 = 119532 acres. Jurwa 10,62,328 P24

N.B. Out of this "arable" land the following was the average cultivation for the first 3 years.

	Goortoos	acres
Dry	57000	178,000
Wet	26,000	81,000
Modos and Garebs	14,000	12,000
	87000	271,000

Appendix B

Extract from Mr. Travers's Report dated 10th June 1803.

36 In the preceding year's settlement, from the Estimation I had then formed of the resources of the Inhabitants, applicable to cultivation, I am convinced they are not equal to the cultivation of the whole, of course it follows, that the present year's settlement could only be found upon a proportion, and that the remainder whatever may be the quality of their soil, can only for the present until the interest of the Inhabitant stimulates his Industry, be considered but of nominal value to Government. * under this consideration, I deemed expedient to admit, by a division of the whole of the lands, among the Inhabitants, Individual right, as well in the lands on which the resources of the year have been calculated, as in those supposed to be beyond the Inhabitants means of cultivation this being in my opinion the speediest mode of establishing to Government their real value, from the admitted fact, that private property is better looked after than public property in which light these

* Note by the Board 1855. See Sundries / of Mr. Travers report of 10th June 1803 (given in appendix A) he estimated the Dottum or arable lands put upon the Pyots at 108,920 Rs. for "Jutta" or Dry and 10,2328 for "Mogary or wet Jutta." 8 Rs. but he remitted 90,340 Rs. as being "lost and their heads of cattle." leaving 18,9308 Rs. as the Demand. Besides this 900 Rs. for garden, 2,3580 for "murdel" garden Poddy and Mottapha Total 10,4852 Rs.

these Lands would be considered were they not thus appropriated

* * *

38 To secure the advantages to result by this appropriation of the whole of the lands among the Inhabitants, I deemed it further necessary to establish a rate of assessment for the portion beyond their means of Cultivating, at what is fixed for the worst of the arable lands at present under cultivation, in the Villages to which they belong, and to remit this amount for the present settlement, as it will induce the Cultivator, on whom this assessment may eventually fall, on a future settlement to consider his interests in the land and it will do away an idea, that might otherwise be entertained, that such lands by not having a value might be considered, as before, the general property of the Village.

39. The value of the lands on which the settlement of this year has been established is rated from information obtained by the survey, as well as what is admitted by the Inhabitants, to be the average Gross produce of the different soils, to the land measure of the District / the Goortoo / from this produce a deduction of 6½ per Cent made for

for Bandaloo, or the admitted fees of the Curnums, Artificers, &c. other servants of the Village; after this deduction the remainder being the Net produce of the Goorloo, was in supposition divided between Government and the Inhabitants, to the latter a share of 9, to the former 11, in 20 and the share of Government converted into money at for dry Grain 7 Madras Pagodas and for Paddy 5 Pagodas the Pooty, thus establishing a valuation to the Goorloo of land

40 The prices that have been fixed for the produce, are the lowest which have existed in these Districts for many years, and those that I think would obtain in a season of large produce, should the whole of the lands on which the present years settlement has been formed be cultivated—

41 The Dry Grain produce being in general Jonnaloo, I allowed the price of this Grain to govern the rest of the prices of dry Grains, though the prices of some are much higher, particularly shell grain, but then their produce

produce is less, and of those that are more productive their price is less—

42 I did not think it necessary in forming the rates of valuation for the soil, to allow any advantage to the Inhabitants, beyond their limitted average share of the produce, 9 in 20, as it is to be supposed that they will have profit from the whole of the lands being divided among them, and the settlement of Government only formed upon a portion, for Individual Interest will always extend the means of cultivation beyond the estimation formed by Government, so long as they have advantage therefrom—

43 Having arranged under these considerations, the rates of Assessment for the different soils, the Inhabitants of each Village were assembled in the respective Talooks, and the survey accounts laid before them, in order to determine the extent & quality of the whole of the arable lands at the disposal of Government, when a division took place between the whole of the Cadeam

for Bandaloo, or the admitted fees of the Curnums, Artificers, &c. other servants of the Village; after this deduction the remainder being the Net produce of the Goorloo, was in supposition divided between Government and the Inhabitants, to the latter a share of 9, to the former 11, in 20 and the share of Government converted into money at for dry Grain 7 Madras Pagodas and for Paddy 5 Pagodas the Pooty, thus establishing a valuation to the Goorloo of land

40. The prices that have been fixed for the produce, are the lowest which have existed in these Districts for many years, and those that I think would obtain in a season of large produce, should the whole of the lands on which the present years settlement has been formed be cultivated—

41 The Dry Grain produce being in general Tonnaloo, I allowed the price of this Grain to govern the rest of the prices of dry Grains, though the prices of some are much higher, particularly shell grain, but then their

produce

produce is less, and of those that are more productive their price is less—

42 I did not think it necessary in forming the rates of valuation for the soil, to allow any advantage to the Inhabitants, beyond their limitted average share of the produce, 9 in 20, as it is to be supposed that they will have profit from the whole of the lands being divided among them, and the settlement of Government only formed upon a portion, for Individual Interest will always extend the means of cultivation beyond the estimation formed by Government, so long as they have advantage therefrom—

43. Having arranged under these considerations, the rates of assessment for the different soils, the Inhabitants of each Village were assembled in the respective Talooks, and the survey accounts laid before them, in order to determine the extent & quality of the whole of the arable lands at their disposal of Government, when a division took place, between the whole of the Cadeem-

Inhabitants, and such of the Poyacarries as wished to participate determined the quantity & quality of Land to each in proportion to their Ploughs and a Cowle given to each Cultivator to esta=blish his right therein, and the rates of assessment, as also on what portion of his land, this years settlement was fixed, on which was of course settled with him according to his admitted means of cultivation —

44 It was also published for general information, that the prices fixed for the first class of soils, being calculated on the highest produce of the lands, of the Village to which it belonged, it would limit the demands of Government thereon, whatever might be its produce, so long as it was continued under Caroo Cultivation, but that as it was expected, that the value of the lower soils might increase they were still to be consider=ed at the disposal of Government until their valuation rose to the rate limitted for the best land of the Village under Caroo Culti=vation, that the valuation of the lower soil would be formed from public appraisement created by competition, and that on its disposal, the first proprietor would be entitled to the preference

preference, further that on all cases the produce on the land should be severed to the proprietor at the rate of valuation, at which he held the land —

45 These restrictions, I thought a necessary reservation in the hands of Government, to ascertain the value of their right, and I do not think it will be of material consequence to the cultivator as he never will bestow expensive improve=ment on the land, unless it is well capable of bearing the assessment of Government, and in all cases he has the option of making it his own, nor in limitting the demands of Government upon the fixed price of the best soils, I hope, I do not commit their Interest, from a consideration of the very small proportion this first class of soil bears to the rest, it is necessary I should also observe, that in these Districts in very few instances indeed, the soil is made pro=ductive twice in a year, in such case it is however provided for, by a double assessment upon the first value —

Appendix C

Extract from the Settlement Report of Nellore for Fusly 1230 Dated 12th June 1821. In Cons. 21st June 21.

Para 11. + + + A field which was classed as

as first sort in Mr. Travers management may now appear after so long an interval to belong to the last class, and another which was then classed among the last may now belong to the first class.—

12 Under the circumstances above enumerated of the inequalities in the classification, from a quantity of waste Land which has not been classed in Mr. Travers's time having since been brought under cultivation, and on which a classification is now required, and from its happening that in some instances, formerly classed Metta Land, has now been converted into Magany and Maugauny into Metta, a new classification of the Lands, according to the present state was deemed by the Inhabitants indispensably necessary—

14 The Inhabitants aware that money rents will only be collected from them for such Lands as they cultivate have, it is apprehended, thrown some part of the Land which cannot be brought under cultivation every year unless the Tanks receive their full supplies into a higher class while those Lands which can easily and annually

be

be cultivated they have reduced to a lower class, by this means intending to throw on the Circar the loss arising from the more highly valued Land ne=cessarily remaining uncultivated × × ×

Extract from Mr. Smalley's Settlement Report for Fusly 1233, dated 9th July 1824.

Para 25 + × × × In some of the Put=cut Villages the ryots have been allowed to enter the "Waste" land as "arable," and the best as "Pasture," and afterwards to cultivate the "Pasture" land without any additional tax + × × × The ri=ghts of the inferior ryots are not defined, so that this Putcut Settlement seems to have all the errors of the Village Settlement, without any of its advantages.— × + +

27 Mr. Travers' settlement ap=pears to me to have been misunderstood, and he certainly has not himself clearly explained it What he says in one part, he seems to contra=dict in another; but as far as I can judge, Mr. Travers never intended either to make a field Assessment or an individual Ryotwar settle=ment His plan was to divide the whole lands of a Village, arable and pasture, amongst the

whole

whole Cadeem Ryots and as many of the Pya=
=Karries as were sufficiently substantial, upon
fixed rents according to the soils and productive
powers of the Land, which was ascertained by
the requisite quantity of seed grain, and the
~~~
~~~

from the imperfect data afforded by the Nabobs Records, there can, I should suppose, be but little doubt that from the more accurate information we have now obtained of the Capabelities of the District, a resurvey could be made much more correctly than his ever was, I am aware of the objections which may be urged to a new survey where it can possibly be avoided, but I conceive that in this part of the District it will be found essentially necessary to a correct introduction of a proper field Mucta Ryotwar assessment and for the following reasons.—

1st Mr Travers survey seems to have been intended rather for a farm than a field assessment as the measurements were made on large fields or portions of ground consisting of 20 or 30 Goortoos, and which often contained several different classes of soils, however neither these fields nor their different soils were ever defined by stones or any other permanent land-marks, nor was it even mentioned in the accounts on which side of the field the different soils were

were situated

2d These fields were not numbered but entered in the accounts according to the names by which they were known to the Ryots, and although these fields or tracts at the time of the survey were perhaps each possessed by one cultivator, they are now often occupied by two, three or more; and it is at present not only impossible to ascertain the boundaries of the different classes of soil, but even some times to discover the fields themselves, which are often from subdivision no longer recognised by the names by which they were originally entered in Mr Travers survey accounts.—

3d It is calculated that in this part of the District from 20 to 25 per Cent of the land at present under the plough was never surveyed or assessed by Mr Travers at all as it was then laying waste, a part of this has been since entered in the accounts and assessed with reference to the surrounding lands but a large portion, I have reason to believe, has never been entered in the accounts at all having

having been gradually encroached upon by the neighbouring cultivators, and is at the present day partly occupied by Circar Ryots and partly by Hundrecadars, Nanniwundars, Enamdars and others, but without paying any Revenue and as there are no land-marks without a remeasurement, it is impossible to ascertain the quantity in excess occupied by each.—

4th The want of boundary marks to distinguish the different soils renders it at present extremely difficult satisfactorily to ascertain what deduction or addition of the Revenue payable by a Cultivator should be made, on his wishing either to give up a part of his farm or to augment it; and lastly that it is at present from the irregularity of the accounts impossible to prevent the Curnums from altering the soil at their pleasure lowering them when they may wish to favor or the reverse to those against whom they may wish to shew enmity.—

19 For these reasons I consider Mr Travers Survey for every practical purpose now

now of but little use. In several Villages I found that although the Ryots considered the field assessment in the aggregate correct and all readily took their Puttahs, yet that they immediately afterwards amongst themselves formed a Veesabady distribution of the whole Village bareez according to the actual cultivation and resources of each individual. This although different to the intended settlement, I did not consider myself at liberty to interfere with as I found it was a custom which had long obtained and with which all parties appeared perfectly satisfied.

21 × × + The cultivation which is chiefly Metta in this part of the District is carried on by more hands and in a much more petty manner than in the Mangany Villages where it is in general conducted either by Curnums or pretty exclusively by wealthy individuals as is shown by the marginal comparison of the number of Ryots and Puttahs in the Angole Division under me with the rest of the District

Appendix E

From Mr. Stonhouse to the Board 8th augt. 1842

76 Mr. Travers' Survey if it can with propriety be called a survey, was simply a measurement of the lands actually under cultivation when the measurement took place. The remaining lands if measured at all were measured in very extensive tracts and must have been done in a very loose way. Travers' accounts would lead to the supposition that these lands were measured, but although so entered in the accounts, it is quite clear that they never could have been measured. I have no doubt that it was Mr. Travers intention that the waste as well as the cultivated lands should be measured, but the real fact seems to have been, that the extent of waste was merely estimated and entered in the accounts as measured.—

77 During the triennial and De=cennial rents great changes took place in the cultivation of the several lands. Much of the land in cultivation, in Mr. Travers' time, was relinquished and new lands brought into

cultivation

cultivation. Dry lands were converted into wet, Mosloom or Jareeb, and vice versa. The names of the fields have been since changed, in some Villages those of the old fields are not to be found in the accounts, and if to be found have been in many cases given to other fields. It not unfrequently happended that in Mr. Travers' time a portion only of a field was cultivated, where this was the case, the cultivated portion only was measured, classed and assessed. Not only has the remainder of the field been since cultivated, but adjoin=ing waste land also, and taken in as a part of the original fields and assessed under other rates. The original measurement and classification cannot therefore agree with the measurement and classification of the fields as it now stands. I should mention also that I believe Mr. Travers' measurement to have been extremely inaccurate, in the first place, it was conducted by the Curnums and in the

next

next place the mode of measurement was such as to make it necessarely inaccurate. It was the Native mode, that of circular measurement and not by squares. Nor did Mr. Travers, it would appear, fix boundary marks to the fields, not even where there may have been natural boundaries as watercourses, &c. is any mention made in the accounts of what those boundaries were. A field was classed under two mere sorts or turums, but in which side or quarter of the field the first turum land or the 2d or 3d turum land was situated was not stated in the accounts or in any way described, and it is impossible to ascertain this now. I believe his rates of produce to a given quantity of seed to be as nearly accurate as such accounts can be. He took vast pains to ascertain the productive powers of the lands in the several villages

+ + + +

To Bt 8th March 1855

Mr. Smally states that he reduced the extent of land proportioned to the quantity

of seed sown from 2 3/4 toams, which it is stated to have been in Travers's time, to 2 1/2 toams per Goortoo. It was this error in Mr. Travers's survey which led to his fields assessment being high. His rates of produce were very moderate, but he gave too much seed to a given extent of land, and though his highest rate of produce for Wet land was only 3 Posties to the toam of seed, still if he calculated that a Ryot ought to sow 2 3/4 toams in a Goortoo of land, it would give to that extent of land a larger produce than it would yield with the usual and ordinary quantity of seed sowable in it which rarely exceeds 2 toams.—

Extract from the Settlement of Woodiaghetty Jaghire for Fusly 1249 dated 12th April 1841

38 The Ryots were first required to class the several fields according to their productive powers. With this account, the Tahsildar proceeded to an inspection of each field examined the classification, confirmed or modified it as seemed called for and at the same time formed his own estimate of what would be the produce per Gorstoo for a given quantum of seed. He then called upon the Ryots to give their account of what would be the gross produce of each class per Gorstoo. The Tahsildar at that rate calculated the total produce for the whole field and so obtained the total gross produce for the whole Village as stated by the Ryots. This produce was then calculated on the extent of land, and an average per Gorstoo struck. The produce of former years, as far as accounts could be produced were then taken, such accounts however did not shew the extent of land cultivated in the respective

Fort St George 7th May 1855

respective years, except where there had been money payments, and in these the extent of land was entered together with the produce, and therefore the average produce per Gorstoo of the dry and garden lands was, in most cases, procurable, but not of the wet lands which had been almost invariably settled on a division of the crop. as regards the Magany, the only means of ascertaining the actual extent of cultivation in former years was the concurrent statements of the most respectable Ryots of the Village, and the Curnams and the produce of the respective years was then divided on the fields which they admitted to have been cultivated in those years. This it must be admitted was rather a loose and unsatisfactory method of ascertaining the average produce per Gorstoo of former years, but it was the only one which from the absence of regular accounts of cultivation could be adopted. It was in short the best information procurable. This average was then compared with the average of the present produce given by the Ryots. The three averages were then compared, Viz^t, that formed upon the Tahsildar's own judgment on an inspection of each field. That given by the Ryots themselves as already noticed

noticed and lastly the average of former years.
In many cases there was a striking correspondence,
in others where the discrepancy was material the fields
were again inspected and finally settled upon the
judgment of the Tahsildar. Till we have had
some further experience of the productive qua-
-lities of the lands in Woodiaghetty no means
exist of obtaining a more correct money as-
-sessment on the lands than that which has
been formed, and as the system of a division
of the produce is attended with so much
annoyance to the Ryots in the estimation and
detention of their produce, is so open to dis-
-honesty in the framing of those Estimates
and to the clandestine removal of the pro-
-duce, I would respectfully suggest to
the Board the adoption of the money as-
-sessment, I have thus formed till the
general measures shortly to be adopted
in regard to the revenue assessment
of the whole District have been deter-
-mined upon.—

Extract

Appendix K

Extract from Mr Travers's Report dated
June 10th 1803.—

57 In the formation of the pre-
-sent settlement, the "Poollary" or Tax on Cattle
for pasture, was regulated as in former years
according to their number, but in the ensuing Settle-
-ment, I propose that I may be allowed to do away
the collection under this head, and to establish
it upon the arable lands, as the whole are now appro-
-priated to the Inhabitants. Those possessing large
flocks by the present mode of assessment, have, as
I am suspicious derived a considerable advantage
from the facility of deceiving Government by giving
in false Statements of the number and description of
each kind, and owing to the difficulty of checking
such account of cattle appertaining to each village.—

58- This tax being assessed upon the
lands, according to the proportion of amount now paid
by each individual will still secure to Government the
same amount of Revenue, at present derived, with the
advantage of giving to the Proprietor of the land the
amount which Government in this respect have hitherto,
I suspect, been deceived in, and this will tend to
increase his means, as from what I can at present
judge many of the Head Inhabitants will be ob-
-liged to arrange with the lower class for a pro-
-portion of land, on which Government have
not formed the present year's resources, and his
interest will naturally prompt him to make the
best advantage of it.—

that this District has been under the British Govern-
-ment, and for 28 years out of that period Ryotwar Puttahs
have been issued, and yet what has been and is the
actual state of things. In most Villages the Veesabadey system
still prevails, a system totally incompatible with the Ryotwar. There are dif-
-ferent kinds of Veesabadey, but in all there is a community
of interest. In some Villages all the lands are di-
-vided into 4 or 5 Cummatums, and the lands of each
Cummatum are cultivated jointly with the ploughs
of that Cummatum and the shares in the Cummatum
share the produce, and pay the Government assessment
and Village expenses, according to their ploughs; and
a periodical division of the lands is made every
3-5-or 10 years according to the established cus-
-tom of the Village, or as they may mutually agree
upon. In other Villages, although the lands are
divided into Cummatums, still the Cummatum lands
are parcelled out among the Shares who pay for
their respective portions, but only for a limited
period, a new apportionment of the lands among
the Shares taking place every 3 or 5 years.-

89 In other Villages, each Ryot in
each Cummatum holds a share in every field in
the Village.-

90 In other Villages all the lands
of the Villages are cultivated jointly by all the
Ryots, who share the produce and pay the
Government assessment and Village expenses,
according to the number of ploughs apper-
-taining to each.-

Appendix M.

Extract from a letter from the Collector of Nellore, Mr E. Smalley, dated 23rd May 1827, in Consultation 4th June 1827.-

18- X X In Magany Villages the cultivation is almost always either conducted by Veesabuddy or Cummatums that is a joint participation in rich Medium, and low soils; or joint cultivation. If the survey is very incorrect, the Ryots will not conform to it in Veesabuddy or Cummatum Villages. There are Cummatum Villages where there is no Veesabuddy, and in these the Ryots do not change or divide the lands, but they divide the produce and pay the revenue in proportion to their ploughs. There are a few Villages which consist wholly of dry lands where the cultivation is carried on by Cummatums, but these form an exception to the general state of the case. Partial error in the assessment of Magany lands may produce no injury, but in Mettah it must injure the Ryot and eventually diminish the revenue. In some Villages the Cummatums have only regard to the Magany

lands which derive irrigation from river channels where a division of labor is so useful, but in other Villages the Cummatum embraces Mettah Magany and Garden lands.-

Extract from the Settlement Report of Fasly 1237. Dated 12th August 1828.-

13- X X Most of the wet lands are held by the cultivators under Cummatum or Copartnery, and many of the dry land Villages are held under the Veesabady tenure. The Cummatums however are not all held precisely alike. In some the members of the Cammatum have all an equal share, and divide the profit and loss. In some Villages the Ryots cultivate separately their dry land and jointly their wet land, dividing the produce equally and paying the public assessment in proportion to the quantity of grain. In some Villages the lands of a Cummatum are divided upon the number of Ploughs. The rich Medium, and low soils to which each Plough is entitled, is accordingly divided, and the Ryot cultivates his land and pays his assessment separately.-

Appendix N.

Circular No. 7/55.

To The Tahsildar of

Sir

I am requested by the Board of Revenue to transmit to you for the information of the Inhabitants of your Division the accompanying Statement of Salaries and Rewards which the Board have sanctioned for the Police Establishment of the Nellore District, and to request that you will cause the Rewards and Salaries to be paid to the Persons entitled to receive them.

I am &c.

(Signed) J. Ratliff
Acting Collector

are perpetrated by the Tahsildars and their subordinates under cover of forming the Dittum Having represented this to the Board and recommended among other things the discontinuance of the practice, in a communication dated 17th January 1855, we now proceed to pass the following orders grounded on their Proceedings of the 15th Ultimo.—

1. To coerce the Ryots on pretence of making Dittum is not only unjust but is productive of no good. The system is therefore henceforth entirely abolished and it is to be clearly understood that each Ryot will hereafter be held responsible for the lands entered in his preceding years Puttah unless Durkhasts and Istifas are intermediately sent in, both to the Kovzoor and Talook Cutcherries for enlarging or contracting his holding as he may wish.—

2. The limit fixed for sending in Istifas is now the end of June but Ryots wishing to give up the whole or a part of their lands should give Notice hereafter before the 1st of June, while those who may wish to take up lands for cultivation may do so at any time from

from the commencement of the fusly to the end of December, as the cultivation season in their District extends to the month of February following.—

3. It is to be clearly understood that a ryot giving Istifas for any land in his possession is to be considered as having forfeited his right to that land.—

4. Any ryot failing to send in his Istifa before the 1st of June as above stated and who proves himself unable to cultivate his holding and pay the Circar dues, will be dispossessed of his land in the following year.—

5. On the presentation of Istifas or Durkhasts for the contraction or extension of holdings, the Talook authorities shall pay immediate attention to them and after making the necessary inquiries take care to make known in the several Villages by beat of tom tom within the 15th of June individual and fieldwar particulars of all abandoned lands and affix also a List of such lands to the Village Choultry. In the case of Durkhasts for land

the

the Tahsildars should settle all Takavars, if any, and send thro' the Peshcars clear and explicit orders to the Villagers in each case, to put the applicant in possession

6. In all cases in which the Tahsildars may consider themselves precluded from giving immediate orders and deem a reference to the Hoozoor necessary such reference should at once be made and our orders obtained for any neglect and delay on their part to dispose of applications for land, by interfering with its cultivation in proper season, will render the Tahsildars amenable to severe notice while by immediate attention to the Durkhasts the responsibility of cultivating and paying for the land will be fixed on the applicant

7. If any Ryot should apply to the Moonsiffs, Head Canpoos and Curnums of a Village for any unoccupied land, such Canpoos and Curnums should at once make over such land to the applicant provided there is no objection

objection to their so doing, reporting at once their proceeding to the Peshcar and Tahsildar such of the Village Officers as fail to act up to this injunction will be liable to dismissal.

8. A Book should be kept in the Talook Cutcherry in the accompanying form showing in the order of their dates the Istifas and Durkhasts received and within the 5th. of each succeeding month an Extract from this Book showing the entries for the preceding month should be forwarded to the Hoozoor, accompanied with your Mazee, for examination here

9. The lands cultivated by the Ryots will as heretofore be measured and examined by the Talook Officers and Peshcars, and the usual Cultivation and Aymaish Returns will continue to be sent

10. You will take measures to cause Istifas and Durkhasts to be

be presented in duplicate, one Copy to be presented to the Hoozoor and the other to you that when the monthly Extract from the Talook Book is received, it may be verified by a reference to the application received in the Hoozoor. The object of this being the better to secure the interests of the Ryots, they should be exhorted to attend to the above requisition.

11 The Government having thus conceded considerable relief to the Ryots, it should be their (the Ryots) duty to act honestly. If it should be found that any body takes up land surreptitiously, without presenting a Durkhast and obtaining due permission such party shall be liable to the payment of double the assessment of such land.

You should make the contents of this order duly proclaimed to all the Ryots in each Village within your range.

5th April 1855. (Signed) I. Ratliff
Acting Collector

No. 69.

To
B. Cunliffe Esqre
Secretary to the Board of Revenue
Fort St. George

(36)
Bd. No. 1043.
From the Collector of Nellore

Sir,

With reference to the Circular from your Office dated 25th January last No. 183, calling for a statement of any religious charitable and personal grants paid by deductions from the Kistbundy Beriz in this District, I have the honor to state that no such exemmunities are allowed in this Collectorate by remissions from the tarum assessment. The items referred to by the Board are, I presume, such as those embraced under the head of "Customary" remissions in No. 14 of the new Jummabundy forms. If so, it will be seen from that Return as furnished with the settlement Reports for Fusly 1262 and 63 that there are no grants

grants in this District of the Nature in question.—

2 I think it right, however, to mention, that there are certain Manuims in the District known as Ashtabhagum and Chatoorbhagum Enams, charged, that is to say, with the payment of 1/8th and 1/4th respectively of the value of the land as originally fixed. This demand is fixed, except in one Taluk, in which it varies with the actual outturn and the current prices at which the grain is commuted and is brought to account under the head of "Ready Money Collections" but as these Enams do not involve any deductions from the Kistbundy Beriz, I presume they do not come within the meaning of the Board's Circular.—

B.S No 1138-

Sir,

From the Collector of Salem - - - -

Adverting to your Circular letter dated the 11th January 1855, requesting me to report without delay whether I have acted or am acting on the orders conveyed to me in Extract from the Minutes of Consultation which were circulated with the Board's Proceedings of the 31st August last, regarding the reduction of the assessment where exorbitant; I have the honor to state that the instructions contained therein have been duly complied with in the two Villages of Vadaghetty, Chittoor and Tetoomalanamasamoodrum in the Saramathy Talook; that forms of accounts

* Dated 10th July 1854.

* To BS dated 26th April 1855 No 50.

Fort St George 7th May 1855

accounts have been prepared and submitted for the Board's approval for the purpose of shewing in a graduated scale the proportion between cultivated and waste in the Nunjah, Pooonjah, and Pooonjah garden (not under wells) lands in the Salem District; and that I have recommended the immediate reduction of the highest rates of assessment on Nunjah and Pooonjah lands, in the former case to Rs 12-9-7 per acre, and in the latter to Rs 5-10-0 per acre. Having already given a full explanation on the subject of these forms, and the measures I advocate for revising the assessment, in my * letter of the 14th Instant, it is needless for me now to say any thing further on the subject.-

* No 46.

2 In regard to the Board's question whether I have taken measures to give the fullest publicity throughout the District to the intentions of

Fort St George 7th May 1855

of Government to moderate the de-
-mand wherever it is required",
I beg to state, that as I have proceed-
-ed from Talook to Talook during
my present Jummabundy tour, I have
personally explained to the Ryots
the views of the Government rela-
-tive to the reduction of the high
rates and the measures I have taker
to give effect to those intentions,
and that the same course will be
followed in the Talooks which
still remain to be settled.-

52

Bd No 937

From the Collector of South Arcot--

Sir,

I have the honor to acknowledge Extract from the Proceedings of the Board of Revenue dated 22nd ultimo, and with reference to Para 2, in which I am directed to consider whether it will be advisable, when transferring Poonjah lands cultivated with Nunjah Crops into Nunjah Tarums, in the 10 Hoobloos Talooks, to make a distinction between them as regards Fasal Jastee, such as already exists between registered "Single Crop Nunjah lands" and "Double Crop" or "Doubtful of two Crop" lands in those Talooks, or whether it will be best to declare that all such lands so transferred will be liable to a charge for a second crop when actually raised, I beg leave to observe that hitherto it has not been customary in this District to tax Fasaljastee, and that I am of opinion

States in reply to Board's Proceedings dated 22nd ultimo that it is not customary in this District to tax Fasul Jastee, and recommends that all lands transferred to the Nunjah Tarums should be treated as single crop land and Fasul Jastee charged when a second crop is actually raised on them by means of Government water.

opinion that the introduction of such a measure would be inexpedient, and likely to prove injurious both to the interests of Government; and of the Cultivators.-

2. As it is well known that two Crops are raised on a large extent of the Nunjah land registered as single crop, it appears to me that it would be invidious to apply the rule proposed to only that portion of the transferred Poonjah lands on which two Crops are usually raised, especially after it has become so generally believed among the people that the object of Government is to put a fixed assessment upon their lands and to relieve them as much as possible from all interference and examinations on the part of the Talooki and Village Officers.-

3. I venture therefore respectfully to

to submit that it will be best to treat all the lands, to be transferred to Nunjah tarrams under the orders of the Board contained in the Extract to which I am now replying, as single crop ones, unless the Board determine on declaring that all Nunjah lands throughout the District will be liable to a charge for Jasti Jastee when a second crop is actually raised upon them by means of Government water.-

4. I am so convinced that the best way of giving full encouragement to the Ryots, and of saving them from all vexatious interference is to fix a consolidated assessment on all lands that I desire to put my opinion on the subject strongly before the Board, at the same time I beg leave to observe that I do not wish to be understood as advocating the principle of exempting from taxation second crops when raised by Government water, which on the contrary, I think, should be taken into consideration when calculating

Fort St George 7th May 1855

calculating the productive capabilities of the Soil and be assessed as I endeavoured to point out in my letter to the Board of the 11th September last.-

South Arcot, Collectors Circuit Cutcherry, Chinnapettah, 5th April 1855. (Signed) H. Hall Collector

52-53

Bd No 1127

Proceedings thereon.

Communicating the Board's views on the question of classifying the Joonjah lands in the Hoolcos Talooks lately brought under irrigation by Government worked as single and double Crop.-

In the Survey Settlement of the Hoolcos Talookes of South Arcot the Nunjah Lands were divided into two Classes as respects irrigation - 1st Double Crop land including lands which were termed doubtful of 2 Crops - and 2ndly single crop land. On the 1st Class a consolidated teerwah was fixed, and the 2nd class was exempted from any extra cess when a second crop was grown, it being considered that as the irrigation supplied by Government according to the Land Register was only sufficient for a single Crop the cultivator ought not to be taxed additionally when the Ryot succeeded in raising a second Crop by his own exertions.-

One

Fort St George 7th May 1855

2 One object of these rules was to free the land holders from the interference of the Talooke Servants, and the Board concur with Mr Hall, in the importance of attaining this end as far as possible - But experience has shewn in South Arcot as well as in other Districts - that objections are made by land holders to paying a consolidated Teerwah in years when a 2nd Crop is not cultivated, and much of the Double crop land has in some localities remained waste.

It was therefore resolved

3 to bring this land under a single crop assessment, with a proviso that Fasulgasty is to be paid when a second Crop is raised.- Registered single crop land was allowed the same exemption from Fasulgasties as heretofore, thus continuing its freedom from scrutiny and interference

on

Bd No 1127

Proceedings thereon.

Communicating the Board's views on the question of Classifying the Poonjah lands in the Hoolcos Talooks lately brought under irrigation by Government works as single and double Crop.-

In the Survey Settlement of the Hoolcos Talookes of South Arcot the Nunjah lands were divided into two Classes as respects irrigation- 1st Double Crop land including lands which were termed doubt-ful of 2 Crops- and 2ndly single crop land. On the 1st Class a consolidated Tarwah was fixed, and the 2nd class was exempted from any extra cess when a second crop was grown, it being considered that as the irrigation supplied by Government according to the Land Register was only sufficient for a single Crop the cultivator ought not to be taxed additionally when the Ryot succeeded in raising a second crop by his own exertions.-

One

2 One object of these rules was to free the land holders from the interference of the Talooke Servants, and the Board concur with Mr Hall, in the importance of attaining this end as far as possible- But experience has shewn in South Arcot as well as in other Districts- that objections are made by Landholders to paying a consolidated Tarwah in years when a 2nd Crop is not cultivated, and much of the Double crop land has in some localities remained waste.-

It was therefore resolved

3 to bring this land under a single crop assessment, with a proviso that Jasuljasty is to be paid when a second Crop is raised.- Registered single crop land was allowed the same exemption from Jasuljastee as heretofore, thus continuing its freedom from scrutiny and interference on

on the part of the Talook Servants.-

4 In bringing the newly irri-gated Poonjah lands under a Nunjah assessment, the Board deem it advisable to follow the same principle, both for the pur-pose of retaining similarity of system in the Hoodoor Talooks and because no other arrangement which is at present practicable seems to have equal advantages. Mr Hall will therefore separate the newly irrigated Poonjah lands into two classes as respects their irrigation- these lands which are so well supplied with water as to yield ordinarily two crops should be registered as double crop land and pay Fasal jasty when a second crop is obtained. all the other lands should be registered as Single Crop and declared free from Fasal Jasty-

5 The Board cannot concur with the recommendation contained in Para 5 of Mr Halls letter- If the newly ir-rigated lands which ordinarily bear two Crops by the aid of water obtained from public

public reservoirs were exempted from Fasal Jastee, Government would lose revenue to which it is justly entitled and the holders of the old two crops lands would complain that they were not allowed the same privilege.-

6 By registering, as single crop after a local enquiry, such lands as have limited means of irrigation, and declaring them exempt from Fasal Jasty, their proprietors are freed from the interference of the revenue servants and encouraged to such wells or otherwise im-prove the irrigation of these lands at their own expense.-

7 The Board observe that in Para 2 of his letter Mr Hall remarks- "It is well known that two crops are raised on a large extent of the Nunjah land registered as single crop"- but he does not explain how far this is with the aid

Fort St George 7th May 1855.

aid of the numerous private wells which have been always encouraged in South Arcot by being allowed exemption from taxation and which are referred to in Board's Proceedings of 17th July 1854 Para 8. If through fraud at the time of the survey any particular lands which have regular irrigation for 2 Crops and now yield 2 Crops without the aid of private wells (such for example as lands under Cirkar Spring channels) were classed as single crop, these cases can be enquired into and reported upon according to the Merits of each individual case.-

Ordered that the following letter be sent in reply.-

54.55

Bd No. 1119
To The Collr of South Arcot

Judl. 4 May 1855 No 1022

To The Collector of South Arcot.

Sir.

With reference to your letter of 11th April 1855, transmitting 26 baskets of various Soils, the Board desire me to state that they would wish before imposing the very heavy extra labour of so extensive an analysis on the Professor of Chemistry, that every means should be used to ensure the selection of such Soils as shall truly indicate marked varieties of Soil and the peculiarities of which may give a general idea of the Soil of the Talook or District. The packages now sent seem to have been selected by some native, who it may be supposed is altogether ignorant of the object of selection or the value of any chemical enquiry. The Board do not think it too much to expect that Captain Priestly or Lieutenant Hessey should select, the Specimens themselves, and for the present the Board would limit the number to 5 or 6. The points to be considered in making the selection are the peculiarity of the Soil as to Colour, texture and fertility - its native name /as Serovel, Kursul - puddagay, Sowd &c.a/ Whether it is a

Common

Common soil in that part of the district; in what localities it is generally found, such as in open plains near hills or beds of rivers or in patches- whether generally mixed with stones, or not- what kind of grain or other produce it is considered best adapted to- Whether it is ever irrigated and if so, if the produce is slightly or very greatly increased- Whether it requires much manure, whether it is retentive of moisture what the depth of soil, and nature of Subsoil and other points which a person interested in the matter would supply without previous Specification- The Specimens should be taken with the exception of Soda earth, from the best Soils at a foot under the Surface and not more than one in each Village, and a field not actually under Cultivation at the moment, is preferable to one on which a crop is growing. The name and number of the field should be entered, and none should be taken at present from any manured field or from any field not marked in the new Survey- The teerwa per acre of the field should be given and it should be stated whether it is considered taking the Village altogether as 1st 2nd 3rd or worst sort, or whether it is the best of its kind in the Talook.-

2. Every one of these points may not perhaps be

be noted. but as a guide, the Board forward a Specimen report on a soil Common and generally valuable in the ceded Districts as follows.-

No 1 Soils Native name Regur- Colour black tesicture firm- It is a Common Soil in the northern and eastern part of the District.- It spreads out over vast plains, when hardly a tree is to be seen, though the small bush known as the jungle Erindee is abundant on it, where the land has not been Cultivated it is over run with a grass called "Nutt" the roots of which run wide and deep, and make it difficult to plough when first Cultivated. It is quite free from stones, but nodules of kunkurs are frequently found: the soil itself varies in depth from one foot to 5, and under it is Compact lime stone, but this is only assumed from a limited number of observations, as the ryot seldom looks deeper than a foot It is seldom or ever irrigated, and generally lies on a higher level than the irrigated land. It is a retentive of moisture that it is a valuable soil in a Tropical climate, and probably is too clayey to be irrigated with success- It never requires manure, and may be cropped year after year- The grain generally

generally grown on it is cholum /Sawary/ and occasionally Wheat. Its teerwa is generally about 2 Rupees per acre, the field whence the present Specimen was selected was assessed at 1 12 0 per acre It is in the Village of No in the Map; and was redeemed from long Waste last year. It is considered 2d sort out of the 3 sorts of Regur known in the Talook. It is sometimes called "black cotton soil," but cotton is not so much grown upon this as upon the soil marked Specimen No

South Arcot.

Sir

Para 1 I am directed to acknowledge your letter of the 16th ultimo reporting on Petition No 56 of 1855, presented by various inhabitants of your District, and to inform you that the Board have passed the following Endorsement upon it—

"Petitioners are informed that the reductions sanctioned by Government in the Hooloos Talooks are limited to the Tarumwar Iyacut lands, the assessment on these being higher than on the Survey Waste and Porumpoke lands" If however you see Cause hereafter to propose some modification of the Teerwa of these lands also the Board will be prepared to take your suggestions into Consideration.—

2. The Board observe that the above Petition encloses one addressed to you by a man named Valoo Moodelly of Chellumbrum, which bears your Endorsement.

Fort St. George 7th May 1855

Endorsement to the effect that under the Boards' order Porumpoke lands were excluded from the remission in consequence of their having been assessed at an average rate /Manool Sarasary/

In your letter under reply, you also refer to the Boards Proceedings of the 12th October last, in connection with Petition 56, although those proceedings relate solely to the 2 Southern talooks of Cuddalore and make no allusion to Porumpoke land.—

3. In the Hooloos talooks the modification of the assessment was limited in the first instance to the Tarum lands, because much land which was waste at the Survey, was then classed and prospectively assessed in the expectation of its future Cultivation although it was not included in the turumwar Iyacut— under the impression that this land was neglected on account of its inferior quality the assessment placed upon it was lighter than on the Turumwar lands, and if any reduction is found necessary upon it, the rate of relief will consequently have to undergo separate Consideration.—

4. But in the 2 Southern talooks the Board understand that Porumpoke land when taken

Fort St. George 7th May 1855

taken up for Cultivation has been assessed at the rate of adjoining lands of a similar quality or in such a manner as places it upon an equality with them— In this case the Board see no objection to the remission Sanctioned in their proceedings of 12th October last being extended to all the lands under Cultivation in Manargoody and Chellumbrum, and they wish for opinion on this point.—

Board of Revenue
Fort St. George

Sir

Para 1 As Directed by Extract from the Proceedings of the Board of Revenue dated 19th Instant. I have the honor to inform you that I am despatching by Banghy the Maps and papers as noted in the Margin of the Survey of the Cusbah of Cuddalore and of the adjoining Village of Chellencoopum.—

Cusbah of Cuddalore	
1	Land Registers
1	Field Book
1	Boundary Do.

1	Map.
3	

2. These are the only Survey Documents received from Captain Priestley of the Villages in question.—

3. Up to this time, Captain Priestley has sent to me, in all the Maps and Books of

of 39 Villages in Palliemoottah, of 8 in Hollamalay and of the two Cuddalore Villages which I am now forwarding to the Board.—

4. I have applied to him to know when he thinks it likely that he will be able to proceed with the Survey of the Cuddalore Talooks in case it should be determined that the remaining Villages are to be brought under his operations.—

5. Upon receipt of his reply, I will do myself the honor to address the Board again.—

Collectors Circuit Cutcherry
Panrootty . . . .
27th April 1855 . . . .

/Signed/ A. Hall
Collector.

Bd. No. 1107
Proceedings thereon.— The Board observe that Chellacoopum does not appear to have been surveyed field by field after the Khusreh or any other method, and it has the appearance of being a very well executed topographical survey quite useless, except as to the Village boundary for any Revenue detail. No field book accompanies it, and this leads to the inference that the above view of the Board is correct. In sending Maps and books for inspection, the Board expect that some explanation as to what they are meant to be, should be submitted, also as to when the work was executed, whether before or after the Board's Proceedings reviewing Captain Priestley's Survey dated 27th February 1854.— and the list of papers sent to the Board should be inserted in the letter and not on a separate Slip.—

58.59

2. No information is afforded as to whether the scale or the method of colouring has been altered from what it was a year ago. The Maps now sent appear to be in the 12 inch scale. The Board also wish to know if Fair copies of all the Registers and Field Books and Plans are preserved on the Collector records.—

Bd. No. 1202
From the Collector of Trichinopoly . .

Reporting with reference to his letter of the 28th ultimo that 129 Villages of the Saul. goody Talook have taken their Puttahs & the others still hold out notwithstanding his proclamations.—

Para 1 In furtherance of my letter of the 28th ultimo, I have the honor to report for the information of your Board that, after much wrangling and persuasion, I have induced 129 Villages of

7249 Fort St. George 7th May 1855

of the Laulgoody Talook to take their Puttahs.-

2. The remaining 102 Villages still hold out notwithstanding my proclamations pointing out to the ryots the unreasonableness of their claim for reductions, and of their opposition to the Circar. And that a continuance of such conduct will only lead to their injury and a prompt realization of the lawful demands of Government.-

3. I have issued this proclamation to the other three Web Talooks, and hope to find the Ryots as willing to take their Puttahs in Moosery, Vilvoocutty and Conaud.-

I regret to have to state to the Board that the balance of kist due in these four irrigated Talooks up to the end of April is Rupees 94,507.-

The Ryots have no good and sufficient reason for thus withholding the revenue due, as the harvest has been most abundant, and prices are extremely high every where for grain of all kinds.-

5 Notice of the general statistics and of the Rent Roll of the District is here omitted being required only quinquennially.

6 The season both for Cast and Peshaumm of the Fusly under consideration was in a high degree unfavorable from seed to harvest time and the consequence has been deficient Cultivation and failure of crops to a great extent. This circumstance having been frequently brought to the notice of the Board in my several reports on the state of the Season. there seems to be no occasion for entering into any further particulars at

at this time.

7 No violent outbreaks of epidemic disorder occurred in this District during Fusly 1263. but as might have been expected Cholera showed itself in various places at different times. The loss of Cattle by sickness was not remarkably great considering the long continued want of rain.

8 The following Statement No 4 which is derived from the new form No 6 ordered in Board's Circular of 13th June 1853 shows an increase in the prices of grain of Fusly 1263. over those of the preceding year. The remarks contained in para 7 of my Report on the settlement of Fusly 1262 explain how this table is prepared.

the 4 following items.

1st. Portions of waste lands brought to account in excess of the previous year agreeably to the Moochilkhas executed by their proprietors or others binding themselves to pay the Teerwah assessable thereon whether the land be cultivated or not, with a view in the case of proprietors to prevent the intrusion into their lands of Strangers and in that of others to acquire free possession of lands to the exclusion of owners.

2.dly Portions of waste lands brought to account in excess of the previous year agreeably to the Moochilkhas executed by their proprietors agreeing to pay the assessment thereon whether Cultivated or not, on condition of their Tanks &c. being repaired at the public expence.—

Portions

Fort St. George 7th May 1855

3rdly Portions of waste lands included in Zalitah Coosle.

4thly Portions of Mamool or regular Crop lands left waste but brought to Account in consequence of their owners having agreeably to the rules laid down in the Hookoomnamah of the District founded on the instructions given in Para 16 of Board's Proceedings dated 27th September 1847 paid the demand thereon in order to entitle them to remission of the Teerwah on the 2nd crop raised by them on their one crop Lands—

Remarks.

Net Increase 183799 3 10

7269

Fort St. George 7th May 1855

11 From the foregoing Statement No. 6 it will be observed that notwithstanding a falling off in the Cultivation of both Wet and "Wet garden," there is an increase in the Beriz debitable to them respectively in consequence of the highness of Nerruck, the necessary effect of an unfavorable season. The increase of Beriz under the heads "Seerwah and Fysul Jastees" is owing to the same reason. The increase both in Cultivation and Beriz of land under Wells exhibited under Item No. 5 is attributable to the deficiency of water of irrigation which induced the Ryots to extend their cultivation under this head.

12 - There is a considerable decrease it will be seen in Item No. 6 in both the Cultivation and revenue of the dry lands for these are not assessed with reference to Current prices of the year.

13 The extent of Caboolaty Buyer composed of the 4 Items referred to in the 10th paragraphs is shewn in the following Statement No. 7

No. 7

Fort St. George 7 May 1855

Mamool-Occasional-

on

18 On reference to the foregoing Statement No. 11 it will be seen that the remissions granted on account of Drought and short produce in the year under report amount to Rupees 3,42,598-4-9 exceeding those of the previous year by Rupees 3,42,168-14-4 which is solely attributable to the unparallelled adverse state of the Carr and Peshanum season of Fusly 1263. These remissions were given after strict inquiry into the extent of loss suffered by each claimant by failure of his cultivation and in those instances only in which the loss of each Ryot was ascertained to have exceeded the proportion of 30 percent laid down in the Hookoomnamah of the District. The full remissions for Shanavan favorably assessed lands and remissions for withered and scanty crops on progressive Cawle lands allowed by the Board in Proceedings dated 13th March last are also included in the above sum of Rupees 3,42,598-4-9-

The

19 The existence of withered crops to the extent reported by the Tahsildars was ascertained by personal inspection by myself and my Subordinates. The Reports of the latter on the subjects were communicated to the Board on the 12th June 1854. My own inspection embraced the Talooks of Nellore, Timbalum, Vedoogrammum, Punjahmal and the portion of Streeny goontum which is situated South of the River, the northern part of the same Talook having been inspected by Mr. Swinton. The Villages which I visited were in a deplorable state, the whole of the Peshanum cultivation having been lost in some. These Talooks it will be observed by the Accounts were those which suffered the most.—

There

Fort St. George 7th May 1855

20. There is a decrease under the head of Zahilah Cawle owing to the revenue of seizable on portions of the Cawle lands having been remitted in Consequence of those portions having been ascertained to have been left waste for want of water and not through any neglegence on the part of the Cawledars

21. The amount of remissions of 3/4th of the Nunjah and 1/2 the Poonjah and Bagayet Seemah allowed on lands Cultivated from and after the 16th of February 1854, the date on which the Board's orders on the Subject dated the 6th Idem were received, is Rupees 28,098-13-1 as shewn in the Statement under

D.S.

Notice

Fort St. George 7th May 1855.

notice. Want of sufficient rain unfortunately prevented the well meant measure of relief under notice from proving so successful as was hoped for.-

22. The Decrease of Rupees 7,382-8-9 under the head of Customary Enams was occasioned partly by deficient Cultivation of wet and dry lands, from which a portion of these Enams are derived, and partly from certain Enams which are usually deducted from the Beriz in fixed sums having been during the year under notice remitted in proportion to the Beriz in consequence of a considerable deficit having occurred therein from decreased Cultivation, Drought, and short produce-

Net amount	195,723	8	11	200,789	7	8	5,065	14	9			

The

25. The demand on account of the ready money Collections realized from the several Items enumerated in the foregoing Statement No. 13 amounts for fusly 1263 to Rupees 2,36,674-6-1 exceeding for the undermentioned reasons, that of the previous year by Rupees 13,748-14-3. From which deducting the increase in the deductions on account of Enams and remissions for Shawy &ca amounting to Rupees 8,682-15-6, the net Increase is left at Rupees 5,065-14-9.-

26- The increase under the heads of
Items No. 1 & 11. Jodee of Enams and Teerwah jasty in Enam lands both consisting of grain the former only in part, is due to an increase in the Seruck at which the grain received on account of Government was commuted into money.-.

27. The decrease under each of the Items No. 2-3-9 and 12 is owing to diminished

diminished Cultivation (resulting from the unfavorable nature of the season) with which the revenues derived from these Sundry sources vary-

28- The Chokimpulty Aumany
Item No. 4. Villages which were rented in the previous Fusly having been in the past transferred from that head to Aumany in consequence of the Ryots not having consented to the renting system is the cause of the decrease here shown.-

29- The result of the Pyredoopoo
Items Nos 5 & 6. examination of Tope and Tandbund trees made in Fusly 1263 having shown a greater number of productive trees under both heads in the past than in the preceding year is the cause of the increase in the revenue obtained from these Items.-

30- The decrease of Asma 1 and
Item No. 7. piece 7 is ascribable to the death of a Cuttoogoottadar

Cuttoogosttadar paying that sum-

Item No. 8. 31- The increase under the head of Hill rent amounting to Rupees 1231-15-5. is ascribable to the biddings for the same having been more advantageous in the co past than in the preceding Fusly.-

Item No. 10 32- The decrease under Coray co rent arises from the revenue derived from this source having been assigned by co Government as communicated in the co Board's Circular of 27th June 1853 to road repairs- The Collections are therefore now carried to the head of Deposit-

Item No. 13 33. Some more tracts of land producing thornbushes having become liable to teerwah in the past year is the cause of the increase under the Head of Woodengaud-

34- The increase of Rupees 431-3-5 in the deductions on account of the customary Enams on several of the Items particularized

particularized in the Statement above referred to is chiefly owing to the Tope and Tank-bund revenues, with which the Enams co derived therefrom fluctuate, having been co greater in the past than in the preceding year. That of Rupees 8257-12-1 in the co occasional remissions on account of Drought &ca is composed of the following 4 Items Viz.

Items.	Fusly 1262.			Fusly 1263.			Increase.		
Remission of three fourths of the Pottom and Porapoo co assessment	"	"	"	1708	7	6	1708	6	6
Full remissions for Shavy on Pottom and Porapoo lands	"	"	"	4443	5	2	4443	5	2
Amount of Nellavary remitted on the extent of Ayen land which became Shavy	"	"	"	2045	6	3	2045	6	3
Do of Do remitted on the Zabitah Cowle lands and on Caboolaty Bunjer not charged to the Ryots	"	"	"	54	10	2	54	10	2

The

Fort St. George 7th May 1855.

35. The increase under the 1st of the above heads was produced by the measures of relief accorded in Board's Proceedings of 6th February 1854 having been regarded as applicable to Pottom and Poroopoo as well as to Ayen—

36. Full remissions for withered Crops on the above descriptions of lands Viz.t Pottom and Poroopoo having been agreeably to the orders of the Board of Revenue dated 13th March last allowed for the past Fusly only is the cause of the increase under

Item

Fort St. George 7th May 1855

Item No. 37—

37 The increase in the amount of Remissions under the two last Items which are usually allowed in seasons of scarcity has been occasioned by the unfavorable character of the season—

Land Revenue -

Collr

Fort St. George 7th May 1855

41 The above statement No. 17 which is derrived from statement No. 23 and 24 with the packet, exhibits the balance at the Commencement of Fusly 1263 on account of Arrears of Land Revenue and Exctra Items from Fusly 1218 to 1262 the amount adjusted within the Fusly under report the subsequent Collections upto 30th November last and the balance on the latter date-

42 Coercive process has been adopted in the Collection of Revenue of the Fusly under report only in the case of certain Ryots of the Cuslaks of Sharemmadamy Talook who refused to take their Puttahs unless remissions were given on all their unthered and light crops irrespective of any per centage of such on their whole cultivation and who withheld payment of the Teermah charged on such crops- The balance against the defaulters is in the Course of Collection by attachment and sale of a portion of their moveable property under the orders of the sub Collector to whose Division that Talook belongs.-

The

Fort St. George, 7th May 1855.

43. The irrecoverable balance of Rupees 1,734-2-3 entered in Column 11 of Statement No. 17 being composed of the following Items, I have the honor to request that the sanction of Government may be obtained for writing off the accounts the said sum less Rupees 73-4-11 which requires to be refunded to the party from whom it was collected for reasons hereunder shown.-

	Rs. A P
Land Revenue Arrears-	
Amount of teerwah on certain Lands formerly in dispute between the Government and certain Zemindars but now proved on investigation to belong to the latter	1261 2-5
Amount of protested demand customarily remitted in the Village of Aurovnoozamungalum in the Talook of Streevygoontum.	203-12-0

Amount of Teerwah on lands found deficient in the extent promised by the Ryots in their Maramut Koochilkas to be additionally brought under the plough on condition of their Tanks being repaired at public expence — 195 14 11

Amount being a portion of Carr Teerwah collected and held in deposit in Fusly 1262 in consequence of the ryot having objected to pay it on the ground that the land on which a demand is made at the Carr rate, is properly liable to be assessed at the Peshanum rate from its being cultivated in the Peshanum season only. — x 73 - 4 - 11

1734 2 3.

x This sum is included in the Irrecoverable balance, as it must be refunded to the party who paid it in consequence of its being the difference between the former high Carr Mailwarum and that to which it is now reduced agreeably to the instructions given in para 7 of Board's Proceedings &c dated 2d August 1854.

From

No. 18.

Advances of Cultivation &c. for Fusly 1263.

Items	Sanctioned Amount	amount actually disbursed to the ryots	amount recovered to the end of Fusly 1263.	Balance to be recovered.
	Rs.	Rs.	Rs	Rs.
Advance for Cultivation	4000	175	175	"
Do. for reconstructing Houses destroyed by fire	2000	100	"	100
Total	6000	275	175	100

44 From the Marginal Statement it will be seen that the sum actually advanced to the Ryots on account of the 2 Items therein mentioned falls far short of the sanctioned amount, which is owing to the Ryots not having needed the Government aid to the extent anticipated at the time of submitting the Estimate for sanction. The amount advanced for reconstructing houses will be recovered in due course.

48. On reference to the foregoing Statement it will be seen that the total extent of all descriptions of land viz.t Dry, wet & and Garden occupied for the cultivation of Cotton in Fusly 1263, and the revenue obtained therefrom fell off, the former by Acres 8,570 51/64 and the latter by Rupees 4321-12-11 below last year. This decrease both in cultivation and bariz is solely attributable to the unfavorableness of the season

49. The deficit in cultivation of the product under notice has occasioned a decrease in the Exports of Cotton during the past year of 16,795 Candies as shown in the Margin

		Candies
Fusly 1262		42,515.
	From the Port of Tutacorin.....	23.196
" 1263.	From the Do. of Pypaur	1142.
	To Travancore through the frontier Chowkey.	1382.
		25,720.
	Decrease	16795.

50. The produce of Fusly 1263 is reported to have been of a better quality than

that of the previous year owing to the weather having been clear during the time of picking. From the same cause the Cotton Crops were heavier and the yield was greater than in the preceding year.-

51. No complaint has been heard of adulterations having been practised in the Fusly under notice.-

52. The prices paid by the European Merchants for the 1st and 2d Sort Cottons produced in this District for Fusly 1263 ranged from Rupees 54 to 61 and Rupees 50 to 57 respectively whilst that paid by the Chetties was only from Rupees 42 to 57 for the first sort. This difference in the price is ascribable to the Chetties having entered into contracts with the producers for the growing Cotton Crops.-

53. Very little Cotton of Foreign varieties was raised in the District during the past Fusly and Mr. Lees, the only European Planter who remained in the District, finding his enterprize unremunerative abandoned most part of his cultivation

Fort St. George, 7th May 1855

cultivation in the Fusly under report and has since left the country for England.

54. Mr Whittingham having left the District before the accounts of the Immmahbundy of his Division were in readiness, the report herewith submitted on the Settlement made by him has been drawn up by the Head Assistant Mr Child whom I have placed in charge of the Sub Division pending the arrival of Mr Levinge.

55. It only remains to add that the Sub Collector Mr Whittingham the Head Assistant Mr Child and 2d Assistant Mr Swinton have conducted the duties of their respective charges during the Fusly under review with

continued

Fort St. George 7th May 1855.

continued zeal and ability and advantage to the public interests.

Tinnevelly 1st January 1855

The lands entered against No. 10 in the Register sent to the Board on the 22 Nov. 53 should be transferred to the name of one of the 2 minors therein stated to named Veerasa Row. The said individual having attained his majority the Collector was enjoined on him.

The lands entered against No. 11 in the Register sent to the Board on the 30 January 1854 belong also to Mannicona Perumaul & Ellay the Son of Sara mauney Pillay, who was since appointed as the Regular of the Estate till Rec.

Tinnevelly 11th July 1857. E. E. Pte. / Signed / Co. Bird Collector

7359 Fort St. George 7th May 1855.

No. 22

To,

C. J. Bird Esqre

Collector of Tinnevelly

Sir,

Para 1. I have the honor to report upon the settlement for Fusly 1263 of the 4 Talooks of Shermadavy Brum=madasam, Shenkerninarcovil, and Streevilly pooltoor, forming the Sub Collectorate of Tinnevelly, and to forward the accounts numbered from 1 to 21 prepared according to the forms received with the circular letter dated 13th June 1853 from the Board of Revenue.—

No. 1

Fort St George 7th May 1855

Decrease	"	7	2	"	"	"	"	"	"

2 Table No 2 shews the number and description of the Villages in this Division as they stood at the close of the Fusly under report. The difference between the Statements of Fusles 1262 and 1263, have been caused by two of the Chockumpully Villages, in the Shenkernenar cowil Talook, which were rented for one year in the last Fusly having been this year brought under Cumany, and by 7 Pottom Villages, which were before entered under the head of "Oloongoo Villages" having been in the year under report entered under their proper head

of "Shrotriem &c. Villages".—

3 The Carr season of Fusly 1263 was tolerably favourable in the Sub Division, though such was not the case with the Peshanum season. From a failure of the N. E. Monsoon, there was a great defficiency of water both in the rivers and Tanks, which was felt particularly towards the end of the season, and in consequence it was necessary to grant remissions on drought and short produce to a considerble extent. The Poonjah crops were also very inferior. Though from the rise in price both of wet and dry grains, the poorer classes have suffered considerable hardship, the distress has not been so great, as might have been expected.—

Though in detached places cholera broke out with severity, it was not general over the Division.—

Fort St. George 7th. May 1855.

5 Durkasts to cultivate waste lands were given by certain parties, who entered into Moochilkahs to pay the teerwah on those lands whether cultivated or not and certain persons, who were desirous of having their tanks repaired at Government expense executed Moochilkahs agreeing to cultivate so much additional land, and to pay teerwah whether such lands were or were not cultivated. These lands together with those taken by parties on the general tenure of Zabitah Cowles, and left waste by them are exhibited in the foregoing Statement.

Inconsequence of the general adverse state of the season the Demand on those Moochilkahs has this year been remitted

Fort St. George 7th. May 1855.

The

Fort St. George 7th. May 1855.

6 The rains which fell in the Sub Division in Fusly 1263, were not seasonable for Poonjah cultivation There was in consequence a decrease in cultivation of chains 7174 9/32, and of Revenue Rupees 16129-2-4 under this head notwithstanding the additional chains 2610 15/64 cultivated subsequently to the 16th February 1854, and charged with 1/2 Teerwah under the orders of the Board of Revenue dated 6th February 1854 and chains 576 21/32 cultivated in the two Chockumputty Villages, which as explained in Para 2 have been brought under Amany Management in the Fusly under report.—

Fort St. George 7th. May 1855.

					Net Increase		468 6 3¼	2925 2 "				

There is an increase of

7

C. C. 492-14-2⅞ in the cultivation under the head in the Shermadavy, Brimmadasem Shenkernenarcoil, Streevilly poattoor Talooks. The remarkable increase of C. C. 483-12-1⅝ in the last mentioned Talook is attributable to the Ryots having extended their garden cultivation in consequence of a good season of their Punjah and Punjah crops having failed or yielded short produce.

The increase in Revenue

notwithstanding a decrease in cultivation of C. C. 21-8-2⅛ in the Shenkernenarcoil Talook is owing to highly assessed produce having been more, and highly taxed produce having been less cultivated in the than preceding years.

The decrease in cultivation has been caused in the foregoing years -

partly from the water in some Wells having been used by the Ryots to advantage their Punjah crops endangered by the failure of water from the ordinary source and partly by a deficiency of water in certain Wells. -

Fort St. George 7th May 1855.

Fort St. George 7th May 1855.

8. Though the Season was tolerably favourable for Carr Cultivation of Fasly 1263, nevertheless the failure of water in tanks &c. at the close of the Season occasioned drought and short produce of S. C. 38-2 5/8 and S. C. 101-19 2 3/8 respectively in parts of the Brummadasem, Shenkerninarcovil, and Streevellyputtoor Talooks. From the failure of the N. E. Monsoon, the rivers and channels did not receive their usual supply of water, and the ryots were unable to carry on their Peshanum Cultivation to a full extent in the river fed Talooks of Shermadavy and Brummadasem, which exhibit therefore a decrease in the Cultivation of the Punjah Lands. There was also a great want of rain in the Streevillyputtoor Talook causing a decrease

1374.

Fort St. George 7th May 1855

decrease in the wet Cultivation But the heavy burst of rain which fell at the Commencement of the Season, filling the large Poonacolum tanks in the Shenkerminarcoil Talook, enabled a larger Surface of land than ordinary to be brought under Cultivation, the Nunjah of that Talook being principally under Poonacolam tanks, and an increase of S. C 821-7-4 is exchibited.

The Continued failure of rain at the latter end of the Season, prevented the ryots from taking advantage of the Board's Orders of the 6th February 1851, to any considerable exctent.—

Notwithstanding the decrease in Cultivation and the large amount of remission granted to the ryots for drought and Short produce in the present year, there is on the whole an increase of Rs. 92278-3-4 in the revenue under this head, which is ascribable to arise in the Merruck price as above mentioned.—

1375

Fort St. George 7th May 1855.

Net Increase ——— 71,477-4-8

Fort St. George 7th May 1855.

12 The unfavourableness of the Season in the Fusly under review cause d an increase of Rupees 5,516-4-6 in the remission on the 1st item.—

The remission in Fusly 1263 on the 2d item shews a decrease of Rupees 1050-15-7 as compared with the last year, which is attributable to some Cowle lands having been left waste in Consequence of the adverse state of the Season.—

The increase in the 3d item is explained in Para 5.—

The increase in the 4th item has been caused by the land Cultivated subsequently to the 16th February 1854. having been favourably assessed by order of the Board of Revenue.—

The remission on the 5th 7th & 10th items in which payment is partly made in grain shew an increase over last year, which is ascribable to a rise in the Nerruch prices.—

The decrease in the remissions granted on the 6th 8th 9th 11th & 12th items is attributable to the decrease in Cultivation in the present year, with reference to which the remissions are made.—

Fort St. George 7th May 1855.

13 The decrease in the Cotton Cultivation is owing to the failure of rain in parts of the Sub Division during the month of December 1853.

The Cultivation of Sugar Cane and Indigo in the Sub Division is very small and only for Home Consumption and fluctuates according to Circumstances.—

Sugar Cane, Cotton & Indigo being Cultivated on wet, dry, and Garden lands, the revenue derived from these items is included under those heads.—

Net Increase										1755	7	1

Fort St. George 7th May 1855.

11. There is an increase in the 1st item as the offers received this year were higher than before

The increase in the 2nd, 3d 6th and 10th items has been Caused by an increase in the Nerruck.—

There is an increase in the 11th and 12th items under the heads of Topes and Taukbunds.

Fort St. George 7th May 1855

Tankbunds amounting to :-

Rupees 1032—9—7 and Rupees

79—10—4 respectively, caused

chiefly by a great number

of Tope trees having come

to bearing in the present

Fusly, and by two of the

chocumpatty Villages which

were rented for one year in the last

Fort St. George 7th May 1855.-

Fusly, having been brought under

Dumany in the Fusly under

report.-

The decrease in the 4th, 5th, 7th, 8th,

and 15th items is owing to a decrease in

Cultivation.-

The decrease shewn in the 9th

item, is attributable to the two ChocKum=

=patty Villages which were rented for

one year in the last Fusly having

been this year brought under Dumany.-

There is a decrease in the

14th item caused by the Amount of reed

rent, which was hitherto carried to

the head of Iyen Beriz having

been this year carried to the account

of discretionary road funds.-

There

17. There was a balance of Rupees 30465-9-10 at the close of the Fusly under report, as will be seen from Statement No. 16. Of which, Rupees 28622-7-6 have been since collected, and Rupees 1843-2-4 were outstanding on the 30th November 1854. Of this sum, Rupees 229-12-6 have been collected and carried to the head of Deposit pending Adasal dispute, and another sum of Rupees 131-7-6 has not been collected as it is in dispute between the Government and certain Zemindars—

Of the remaining balance of Rupees 1481-14-4, Rupees 770-6-5 are due by certain Defaulters in the Shermadany Cutbah and 4 adjoining Villages, and is explained in the succeeding

Para

7386 Fort St. George 7th May 1855.

Para, leaving a balance of Rupees 711-7-11 due by certain parties, for the collection of which the necessary orders have been issued.

18. For the collection of revenue no coercive process whatever have been necessary except in the instance of certain ryots of Shermadany Cutbah and 4 other adjoining Villages, who owed a balance of Rupees 3992-10-5 at the close of the Fusly under report. This balance has not arisen from any inability on the part of the ryots to pay their dues, but entirely from a determination on their part to do their utmost to obtain remission on the score of deficient produce according to their own idea of what should be remitted, and not according to the rules laid down by the Board, and acted on throughout the District.

This

1380

Fort St. George 7th May 1855.-

Sir

I have the honor to acknowledge the receipt of your letter dated the 29th ultimo, forwarding a list of the Jummabundy Statements in the Province of Tinnevelly for Fusly 1263.

2. In reply I am directed to state that the Statements are received.

3. The Board observe that the Statements are not complete, and that the Collector has not reported the reasons why the Statements of Villages Nos 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 & 17 have not been forwarded.

4. The Collector will be requested to report the reasons why the Statements of Villages Nos 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16 & 17 have not been forwarded.

I have &c.

No. 39.

To B. Cunliffe Esqre
Secretary to the
Board of Revenue

7°

B. No. 1182
From the Collector of Coimbatore.

Forwards a list of the number of copies of Tamil and Canarese Regulations required for the use of the Curnums and Monigars in the District.

Sir,

I have the honor to acknowledge the receipt of Extract from the Proceedings of the Board of Revenue 26th February 1855 No. 420, with the Papers noted in the Margin, and as therein stated to forward a list of the number of Copies of Regulations IV. V and XI of 1816, in each of language required for distribution among the Monigars, Monigars and Curnums in the District

2 The number of Copies is estimated with reference to the number of Monigars and Curnums and any that may left undistributed will be kept in the Office to supply eventual demand arising from loss or other accident.—

3 It appears fair that the first supply should be issued gratis, but copies eventually required to replace those that have been mislaid or lost by the Village Officials, should be paid for by them.—

There

4 There are some Mongars who are quite illiterate, but every effort will be made to render them as efficient as may be practicable.—

5 It is my intention to call on every "Mooniff Monigar" who can read and write Canarese, to submit an abstract or purport of the Regulations furnished to them, written in their own hands, which I trust, will be the means of making them better understand the nature of their duties.—

6 The orders contained in para 3 of the Board's Proceedings under reply will be duly attended to:—

Coimbatore Collector's Office
Camp Coonoor, 30th April, 1855.

Signed E.B. Thomas
Collector
