B. No. 3245.

From the Chief Secy: to Government-

Extract from the Minutes of Consultation

Dated 8th November 1855.

Read the following Minute by the Right Honorable the President-

/ Here enter 8th November 1855 /

The Coonoor pass leading to the Neilgherry Hills is a very beautiful mountain gorge in which wood, rock, and water are blended in very fine proportions-

2. It will, when the railroad is completed

Fort St. George 15th November 1855.

completed, be the chief approach to the Neilgherry stations from the low Country-

3. The beauty of this pass is in process of being destroyed by the felling of the forests, and the establishment of Coffee Estates, or vegetable gardens on the sides of the Mountains-

4. There is no necessity for Government to allow this process to continue-

5. In a pecuniary point of view the sale or leasing of the land is little or no gain to them-

6. The profits from firewood, if the forests were well preserved and judiciously thinned, would probably produce a better return-

7. There is in addition no very legitimate advantage gained by individuals- the Coffee Estates in the pass having for the most part proved of no great value-

8. Even were there greater gain to Government, they are decidedly of opinion that it would

would be a duty to make some sacrifice to the beautiful, and to prevent the destruction of the Chief ornament of this fine gorge-

10. They therefore desire, that the Collector of Coimbatore be prohibited, through the Board of Revenue, from selling or leasing any more land within the limits of the Coonoor pass-

B. No. 692.

From the Collector of Bellary

Submitting Report on the revision of the assessment of Goollam Talook in the Bellary District-

Accounts appertaining to this report are sent in a separate packet by this day's Post-

Sir,

I have the honor to acknowledge the receipt of the Proceedings of the Board of Revenue of 31st Augt. last, accompanied by Minutes of Consultation 10

July- These papers are on the important subject of the general revision of the assessment, and will continue to receive that close attention which the whole subject requires, at present I purpose confining myself specially to the assessment of the Goollam Talook- For I am directed (See paras 7 and 8 Proceedings of the Board of Revenue and para 16 Minutes of Consultation) to resume the subject of the revision of the assessment of that Talook recommended by me in 1848 and 49.-

See letters to B. of Rev. dated 16th November 1848. & 31st July 1849.

2- The only point now to be determined on the subject of the Assessment of the Dry Black lands is the amount of reduction to be made- The necessity of a reduction seems to be fully admitted.-

The

Fusly 1251.	Amount Rupees.

64	151394

3. The revenue of the Goolleim Talook has continued to decline since 1251 (See Margin.) In fusly year 1263 it was only 50,389 Rupees, but the small revenue of that year is attributed to the disastrous season. From the effects of that unpropitious year however it has still to recover itself, and the present time seems to be peculiarly favorable for granting the relief so long sought for. The large revenue in 1262 preceding the disastrous year is attributable to Cowl lands coming under full assessment. The restrictions hitherto imposed upon the freedom of Ryots, though much modified of late years, have tended to keep up the Cultivation to the point it has yearly reached - These restrictions are to be now wholly taken off in conformity with the late orders of the Board; and the immediate effect of these orders will, I believe, result in a partial relinquishment of the higher assessed lands, not only from other causes, but simply because they are highly assessed, and it would, as it appears to me, be a judicious measure to check an unnecessary abandonment of these lands by reducing the assessment on them to

See Bds Pro: dated 25th Octr. 1854.

to such an amount as will readily ensure their retention if no other cause operates to induce an abandonment of them.-

4. I have just concluded the Jumabundy of this Talook, and have revised village by Village the rates proposed to be fixed by me in my letter of 31st July 1849, and after a careful reconsideration of the subject, I am not disposed to recommend any general alteration in the rates formerly proposed by me to be introduced, I still think that, as a general rate for this District, it will be found that 1/2 Rupee is the maximum rate that should be imposed on the generality of Dry lands. It is, if I am not mistaken, 50 per Cent higher than the assessment on the best Black land Districts of the adjacent Southern Maharattah Districts, and I should fear that the result of giving a more limited reduction would only lead to disappointment. To this rate I proposed to reduce the generality of the dry lands, not only in Goolleim, but throughout the District, which were assessed above one and half Rupee.

But

But there were some lands which I was aware could bear easily a higher assessment, and I therefore provided two higher classes for these, Viz^t. Rates of 1 3/4 and 2 Rupees. If the Board should, on a reconsideration of the subject, confirm recommendation, it may be at once carried out not only in Goolliem but every where.

5. I proposed also to combine all the existing rates into a small number, a principle now approved of by Government. But while I laid down eight rates into which I proposed to throw all the numerous rates of dry assessment in this District (Viz^t. in Goolliem 55 in the whole District 150 in Rates) I said it would be necessary to reconsider the matter again carefully before determining the rates finally to be adopted in each instance, and this course has been now done in the Goolliem Talook. It will be necessary to introduce even two more rates for the whole district, so as to embrace the assessment of those very low assessed Red Lands on the general scale without increasing the assessment on them, and this has been found partly necessary on the Goolliem Talook for the small quantity of such land found there also.

Of

Fort St. George 15th November 1855.

Of the assessment of the Goollem Talook I have preferred completing a set of accounts, showing distinctly the reductions I propose as a final measure of the existing rates in each Village, to submitting merely an Estimate of the same - The Rates of Reduction now proposed for each Village vary occasionally from those Estimated in 1258 fusly, but the principle adopted is the same as then proposed - I have also not merely confined my attention to the Black Lands, of which the Talook is almost entirely composed, but have also revised the assessment on the other Dry and also the few irrigated lands in the Talook and the proposition now submitted will therefore show the exact state of the proposed Assessment on the Circar lands for the whole Talook. I cannot recommend any alteration of the proposed measure which I hope will be approved by the Board and their sanction obtained for carrying it into immediate execution. That some few lands may possibly bear a higher assessment than I have now proposed is not improbable; and that in comparing the highest proposed rates

Fort St. George 15th November 1855.

rates with the assessment of dry land in other Districts it may be argued that my rates are too low, I do not doubt. But taking into consideration the position of the Bellary District - the extremely dry state of its atmosphere - the uncertainty of its rains - I think (and experience bears me out) that it is hopeless to expect the restoration of those higher assessed lands which have fallen out of Cultivation unless the assessment is reduced to a rate that will remunerate the Cultivator - It is not pretended that the measure now proposed is a perfect measure, but it is one that will, I believe, effectually meet the wants of the Talook until a more perfect Survey, conducted on practical scientific principles, can be made -

8- I beg to submit the following accounts which will shew in much detail the result of the proposed reductions -

No. 1 in 5 parts each containing the Villages of a separate Samut

1st The first account is a Statement showing the present and proposed Rates for all dry lands in each Village, and the result of the proposed reduction as it affects the assessment and revenue of each Village - The figures in Col.s 3 to 6 shew the Jerum Rates previous to the general reduction of the assessment authorized in 1824. Col: 7 the actual net rate as now existing

existing. I have entered the figures of that Col: as also Col: 23 in red ink, merely to assist the eye in readily comparing the actual existing rates with the newly proposed rates which are entered in Colm. 23. The rest of the Statement exhibits the Ayacut, the Cultivation at the time of the Survey and at other periods, when a Deet or Statement has been prepared (Col: 8 to 21). The rates proposed by me in fusly 1258 are also shown Col: 22 — and lastly the result as affecting the assessment on the whole Ayacut, on that portion sown in this present year fusly 1244 on the waste, is exhibited, and a comparison of the future and present revenue on that land is given —

Nos. 2 & 3. 2ndly There are two detailed Statements showing Deetwar for the whole Taluk the rates as now existing and the rate for each which it is proposed to substitute; One Statement for the Regud and one for the Wasab lands. It will be observed that the same rates have not in all cases been reduced to the same equivalent rate —

No. 4 & 5. 3dly Two abstracts of the foregoing accounts showing

shewing at once the 8 new rates for the Regud and 9 new Rates for the Wasab proposed to be adopted and the Cultivation of the Lands included in them respectively at different periods are sent —

No. 6. Lastly. I have sent one Statement of the Irrigated lands which it will be seen are a mere trifle. I have classed the 31 Deets that exist into six Classes and fixed the rates which I propose should be assessed on them. The present Ayacut assessment is on the whole reduced about Rs. a. p. —-8—6. per Cent only (336 Rupees).

The result of the Proposition now 9.
submitted for the Board's sanction is shewn in the annexed Abstract —

11. The total Reduction that will have to be made in the assessment of the Goolleum Talook as the result of this proposed measure is as follows-

	Rupees	Per Cent
On the Regud	68,623	20. 13. 6
—"— Masub	1,965	8 12 4
—"— Irrigated	336	. 8 6
Total	70,924	21. 1 .

But the actual loss to the State will be only 24,497 as

Rupees on the present Cultivation Viz:	Rs.	Per Cent
On the Regud	23,612	18 " 10
—"— Masub	759	7. 15 3
—"— Irrigated	126	7 6 7
Total	24,497	17 3 4

12. I may at the same time observe that I have had repeated assurances from the ryots of their desire to take up in many places land if the assessment is reduced, and altho' I would be careful in holding out the expectation of a great increase in the Cultivation, my opinion decidedly is that much valuable land now left waste will be taken up if the proposed measure of relief is carried out fully.

13. The same process will have to be applied to the Enam lands which will reduce them to a valuation much nearer their true value than the nominal value at which they are now assessed. A proprietor of Enam Land seldom gets more than one Rupee per acre for the very best land, and generally only half a Rupee or less. A Memo of the revision of the assessment of these lands is enclosed.

14. I have not deemed it necessary to revert to the arguments that I have, in former reports on the assessment of the Goolleum Talook, laid before the Board. The necessity of a revision seems to be fully admitted. Should the Board approve and sanction the proposition, I have the honor now to submit in a

Complete

complete state for the Goolleum Talook, it will form the basis upon which I would propose a reduction of all dry lands should be made in the Bellary District.

I have &c.

Bellary Collector's Office
on Circuit at Anum-
tapoor, 5th March 1855.

Signed J. Pelly
Collector.

Mouzewar.

Fort St. George 15th November 1855.

12. I may at the same time observe that I have had repeated assurances from the ryots of their desire to take up in many places land if the assessment is reduced, and altho' I would be careful in holding out the expectation of a great increase in the Cultivation, my opinion decidedly is that much valuable land now left waste will be taken up if the proposed measure of relief is carried out fully.

13. The same process will have to be applied to the Enam lands which will reduce them to a valuation much nearer their true value than the nominal value at which they are now assessed. A proprietor of Enam Land seldom gets more than one Rupee per acre for the very best land, and generally only half a Rupee or less. A Memo of the revision of the assessment of these lands is enclosed.

14. I have not deemed it necessary to revert to the arguments that I have, in former reports on the assessment of the Goolleum Talook, laid before the Board. The necessity of a revision seems to be fully admitted. Should the Board approve and sanction the proposition, I have the honor now to submit in a

No. 77

443

G. S. Forbes Esq.re
Acting Secretary to the
Board of Revenue
Fort Saint George

Bd. No. 2569

From the Collector of Bellary

Forwards a further Report on the necessity for a Revision of the assessment of his District specially with reference to the Irrigated Lands

Sir

In my letter of 5th March last I had the honor to submit my propositions for the revision of the assessment in the Talook of Goollem - and in the concluding Para of my letter of the 8th of the same month I intimated my intention of submitting some remarks on the assessment of Irrigated lands for the Boards information and Orders - I regret that from the Multifarious duties requiring my constant attention I have hitherto been unable to Command sufficient leisure for the preparation of this promised report until now.

2 A Remission of the assessment of the Irrigated lands is required as well as that of the Dry lands - The ayacut as per the survey accounts of Irrigated Lands including Dry Land brought

Fort St. George. 15. November 1855

Anjacut of 1247 Fusly

1837/38 A. D

Sarnd Assessed as

	Acres	Survey assessment
One Crop	140520	898698
Tow Crop	107809	908078
	248329	1806776
Iyen	222630	1662776
Dryirrigated	25699	154000

brought under Irrigation in this District is 248329 Acres assessed at 1806776 Rupees according to the accounts of 1247 Fusly. The assessment on some of these lands is exorbitantly high amounting even to Rs 7 8 — A 12 per acre - and the lowest is classed as low Rs 1 — A 2 — 4 per acre —

3 The general reduction of 25 per cent on all lands above 10 fanams / - Rs 2 — 14 — 8 / and 8 per Cent additional on Well Lands authorized in A. D. 1820 gave considerable relief. But it has still left the rates of some lands far too highly assessed. The highest rate being as heavy as Rs 5 g - 1 as per acre. This assessment could not be paid by the ryot were it not for the assistance derived from some favorably and low assessed lands held by him.

4 A general average of rates is not a safe Criterion to judge of the assessment of the Lands classed as Irrigated, which lie

Fort St. George 15th November 1855

Note
Total Cultivable area Circar and Enam of Bellary is 6,975,686 acres

Irrigated area — 285,775 —

Proportion — 4. Per Cent

over this vast District and comprize only 4 per Cent of the cultivable area; but it may be as well to mention the average and I will take a late period, but still one of the highest years Cultivation / Viz^t. 1262 fusly / which is as follows. —

Note
The Net Vasooly is entered after deducting the general remission. The Dry land brought under wet cultivation is included

Cultivation of — 1262 Fusly — Vasooly — average

	Acres	Rupees	as	₹	⊙

*

Iyen	867751
Hussul Jastee	75000
Revaz Jastee	11000
	953751

5 In proposing a Revision of the assessment of Irrigated Lands, I shall keep in view the principle of simplication, not only of Rates, as recommended in my plan for revising the Dry Land assessment but of classes of lands also. There are a variety of Heads 26 in Number / see margin /

Garden Land	By Tanks	One Crop	1
		Two Crop	2
	By Nalahs	One Crop	3
		Two Crop	4
	By Wells	One Crop	5
		Two Crop	6
Wet Land	Tanks	One Crop	7
		Two Crop	8
	Nalahs	One Crop	9
		Two Crop	10
	Wells	One Crop	11
		Two Crop	12
Plantations	Total	By Tanks	13
		By Nalahs	14
		By wells	15
	Detail	One crop	16
		Two Crop	17

Garden into wet	By Tanks		24
	By Nalahs		25
	By wells		26

Fort St. George 15th November 1855

under one or other of which Irrigated Lands or classes in the accounts of this District — I propose to abolish most of these - and to retain the whole under one general Head of Irrigated Lands, specifying only whether the land is irrigated by Tank Nalah - or Well and classing them as one Crop or Two Crop.

6 In making this last arrangement I purpose classing all the Lands under Tank or Nalah as One Crop - and all under Wells as Two Crop Land; at present there is each distinction under every Head, enumerated in the Margin above - If this arrangement is adopted, it indeed leaves but 3 classes of Land, Tank, Nalah, and well; as there will be no necessity to specify One Crop and Two Crop; it being understood at once that all land irrigated by two former sources is, as regards its assessment, One Crop; and all by the last is Two Crop Land, the former being liable to the Fusl Jastee when a second Crop is raised; and the latter never being liable to any further assessment

Re 18312
Well Land

Fort St. George 15th November 1855

The cause of my wishing to classify all Tank and Nalah Land as one Crop / subject when a second Crop is raised to Fusl Jastee / and well Land as two Crop, is, because I find in the Survey assessment the Tank Land for the most part is classed as — one crop, and Nalah Land, to one half its extent, as one Crop; while Well land is almost always classed as two Crop as follows.

Fusly 1247 — Rycut and assessment of Irrigated Lands

	One Crop		Two Crop		Proportion One Crop Per Cent		Two Crop per Cent	
	Acres	Vasooly	Acres	Vasooly	Acres	Vasooly	Acres	Vasooly
Tank	86615	419669	16233	108091	84	79	16	21
Nalah	36797	214498	27396	189150	58	53	42	47
Well	17108	56418	64180	357023	21	14	79	86
	140520	690585	107809	654264	57	51	43	49

7 I am of opinion that it will not answer in this District to Compound the assessment so as to rate all lands with one fixed assessment whether one or Two Crops are grown and I prefer giving the two classes one fixed rate for one crop and assessing them with

Fort St. George 15th November 1855

with Fusl Sastee when a second Crop is raised and I think this plan will be acceptable to the ryot.

8 It will probably strike the Board that there should be such a large quantity of Circar Nunjah Land waste even in the year of high cultivation before noticed 1262 fusly. about two fifths* of the ayacut.

* 1262 Fusly

	Acres	Per Cent Vasooly	Acres	Vasooly
Ayacut	257606	1384708	100	100
Sag	146681	899716	57	65
Bunjer	110995	484992	43	35

But I believe this is not to be attributed / except to a small extent / to high assessment. For although no doubt a good deal of Land has been left unoccupied on account over-assessment, and much more would have been abandoned if perfect freedom had been allowed, yet a large proportion, probably more than half of that 110000 acres is land either not in existence or else unfit for Cultivation, or for which there are not any means of irrigation

Fort St. George 15th November 1855

For I think from an inspection of the several Deetwar Statements that have at 3 different periods been prepared it may be gathered that about 78 per cent of that waste is land assessed below 6½ Rupees net per acre and yet has always been Bunjer. For according to the Deetwar accounts the quantity of Irrigated land, which was Bunjer at those periods, is proved to be as follows.

	Acres
At the Survey	95.256
In Fusly 1232	95500
In Fusly 1247	105000

and the quantity assessed below 6½ Rupees Vasooly remaining much the same. Viz:

At the Survey	83323
In Fusly 1232	76300
In Fusly 1247	85752

should this fact be adduced on investigation that most or much of this land is not properly speaking Nunjah land, it would appear quite unnecessary to retain it as such in our accounts. And carrying out the principle of simplification, I would propose to entirely strike

strike it out of the Nunjah or Irrigated, and enter it under the Poonjah or Dry Classes with suitable Dry Rates assessed upon it which would allow of its being cultivated on those terms.

9 That portion of Irrigated Land, which is classed in the accounts as Dry converted into wet since the survey, has been included in the ayacut of which I have been speaking: and in making a Revision of assessment I purpose entering all such land as is now generally under wet Cultivation in the permanent Irrigated ayacut excluding all the rest from it.

10 There are Deetwar Statements which were prepared at three different periods, Vizt. at the Survey in Fusly 1215, subsequently in Fusly 1232, and again in Fusly 1247 - another is now under preparation, but it will take some Months to complete it, as it is with so many rates and Various classes of Land a very difficult account to abstract My Remarks must therefore refer chiefly to the Statement made in 1247 Fusly

11 In the foregoing observations having provided for a general reclassification of the Irrigated Lands, by proposing to exclude from them all land that have no irrigation and again by classing them all either as one Crop, Tank and Nalah or Two Crop well Lands, I may proceed to notice the measure I would propose for revising the present rates on these lands. Firstly As in the Dry Lands, so in the irrigated I would fix first a Maximum rate and propose that this rate should be 12 Rupees the acre for a single Crop for Tank and Nalah Lands liable to a Fusl Tasty of one half when a second Crop is grown. To this Rate therefore would all the high rates be reduced at once without further investigation. The same rate also to be the Maximum of Well Land but with this difference that no Fusl Tastee would be assessable.

p. 18309

Secondly:- I would propose, after a investigation, to remodel the rates falling between 12 and 6 Rupees, and reduce them as may be found expedient

Thirdly

Fort St. George 15th November 1855

Thirdly— Below 6 Rupees it is probable that no reduction or very small reductions only would be found necessary, and all I propose for these rates is a simple adjustment, so as to allow of their falling into the fixed rates to be established.

Rates:

1st	12 Rupees
2nd	11½
3rd	11
4th	10½
5th	10
6th	9½
7th	9
8th	8½
9th	8
10th	7½
11th	7
12th	6½
13th	6
14th	5½
15th	5
16th	4½
17th	4
18th	3½
19th	3
20th	2½
21st	2
22nd	1½
23rd	1
24th	½

Fourthly— I would for the numerous rates now existing substitute 24 Rates commencing with 12 Rupees and decreasing in regular gradation ½ a Rupee each rate, the lowest rate being ½ Rupee.

Fifthly— There is an item in our accounts called Revaz Sastee assessed on some Betel and Cocoanut Gardens in addition to the Syen assessment. I had occasion to notice this extra tax on the Ryots improvements in the 20th Para of my report on the remissions on the survey assessment of Bellary, under date 23rd December 1853. This item must necessarily in the proposed revision of the assessment, be given up and very properly so. It is not noticed in the ayacut accounts of which I have been speaking. The

Fort St. George 15th November 1855

12 The result of these propositions upon the ayacut and upon the cultivation of Fusly 1247 / the year in which the last Deetwar Statement was drawn up / may be seen in the accompanying accounts which gives a general idea of the effect of the reduction of the rates upon the plan proposed by me. I have not noticed the Syen Survey Rates as they may be considered as abolished and referring to them would only lead to confusion. My references are to the Net Survey Rates after the general reduction of 25 and 33 per Cent made in 1820; which indeed are the true Survey Rates as recommended by Colonel Munro. Rates above 12 Rupees are reduced to that or a lower sum— Rates above 6 Rupees are reduced at about 25 Per Cent in this Estimate, but it is not thought that this per centage will be necessary to all Lands. it is put down as an Estimate. Rates below 6 Rupees are only corrected and adjusted, so as to tally with some of the Established rates; and the small amount of decrease shown on these rates as the result of this Correction / it is believed will provide for a sufficient reduction for them. Subjoined is an abstract of the Ayacut taken from that Statement

Enclosure No 1

Abstract

18317 — Fort St. George 15th November 1855

Abstract shewing the result on the Ayacut of the revision of the Assessment of the Irrigated lands in the Bellary District.

		Acres	Assessment or Demand Rupees	Per Centage			Average		
Ayacut as per Deetwar's account of Fusly 1247		248329	1344849	"	"	"	5	7	"
Deduction by the proposed Revision of Assessment	Of one third of the assessment of two crop land under Tanks and Nullahs now to be classed as one crop land	"	99081	7	6	"	"	"	"
	By reduction of Assessment — Reduction of Rates above 12 Rupees to that Rate	44366	"	"	"	"	"	"	"
	Do. of Rates from 12 to 6 Rupees	113404	168743	12	9	"	"	"	"
	Correction of Rates below 6 Rupees	10973							
		168743							
Total Decrease		"	267824	19	15	"	"	"	"
Remains Net Amount		248329	1077025	80	1	"	4		5 "
Deduct which Estimated amount of waste land that should be classed as Unirrigated Land	One fourth of waste land the assessment of which exceeds 6 Rupees	2865	22622	1	11	"	7		14 "
	Two thirds of land the assessment of which is below 6 Rupees	62306	192624	14	5	"	3		1 "
		65171	215246	16	"	"	3		5 "
Net Irrigation Ayacut		183158	861779	64	1	"	4		11 "

13 It will be seen that 99081 Rupees or 7 1/2 per cent Decrease arises from classing all Lands under Tank and Nalah as one crop instead of two crop, as some are now classed. But of course a great deal of this sum will be recovered in the actual

*Note Probably about 86600 Rupees on the reduced rates

18318 — Fort St. George 15th November 1855

Cultivation as Fusly Sasty. The amount to be given up by reduction of rates is 168.743 or 12 As – 9 As per cent and the two together amount to 267824 Rupees or nearly 20 per cent on the grofs. but nominal Nunjah ayacut. But from that Nominal ayacut I have estimated that about 65,000 acres assessed at 215246 Rupees should be entirely excluded from the Nunjah Ayacut as not belonging to it. This will reduce the Ayacut 16 per cent more leaving the probably real Ayacut of irrigated Lands at 183158 acres, bearing an assessment of 861779 Rupees being 64 per cent of the present Ayacut. It seems to me quite unnecessary to retain in the accounts a vast quantity of Land classed as Irrigated when there are no sources of Irrigation for it But the 36 per cent Decrease in the Ayacut is as observed more Nominal than real in point of Revenue. It reduces the Ayacut to its legitimate extent and assessment

14 But the proposition, as it affects the actual revenue will be better understood from the following Memo/ to which I beg to direct the Boards attention/

of

Fort St. George 15th November 1855

of the Revenue derived from Irrigated lands both in Fusly 1247, / the year already alluded to as the one in which the Beetwar statements were last prepared / and also in Fusly 1262 which is the latest good year we have had and in which the Revenue was higher than in preceding years I may here observe that there are many items of Remission which now exist but which may for the most part be done away with in the revision of the assessment. Viz.t.—

The following will certainly disappear.—

1 Moonasib Commee
1 Fesl Commee
1 Jeerva Commee
3

The following by arrangement will probably be struck out

1 Kundachar
1 Cuttoo Goottah
1 Dasavundum
3

The shrotreems must be retained

The rest are temporary Remissions and may be still retained when occasion calls for them

1 Cowle
1 Payamalee Cowle
1 Payamaly
1 Pulmust
4

Fort St. George 15th November 1855

Statement exhibiting the estimated actual Loss of Revenue in the Irrigated Lands of the proposed revision of assessment is made Compared with the Revenue of those Lands in — Fusly 1247 and 1262. —

	For Fusly 1247					For Fusly 1262				
	Acres	Ayen assessment	Fusul Sasty	Rewy Sasty	Total	Acres	Ayen assessment	Fusul Sasty	Rewy Sasty	Total

Total					114255					114,255
Total including additions					801059					806,513
Deduct Permanent Remissions					16,200					14.700
Items to be retained										
Net Demand retained					184,859					79,1813
Net Decrease for the Beriz of that Fusly					145107					161,938
Per centage					15—11					17—"

Thus

Fort St. George 15th November 1855

15 Thus it will be seen that the Net Revenue which in Fusly 1247 was 929966 Rupees, and in Fusly 1262 was 953751 Rupees will be by the operation of my plan reduced to about 788000 Rupees. The amount to be given up being in round Calculation about 150000 Rupees of Revenue or about 16 per Cent of the average of the two years

16 But it will be asked, will there not be any increase arising from increased Cultivation of the now over assessed unoccupied Lands? = edly there will, but only to a small extent where the high assessed waste Lands have been abandoned for the cause that they were too heavely assessed. But as the system which hitherto restricted freedom of Cultivation to the ryot has been, perhaps rather rigidly carried out in this District, and more especially in the Irrigated Cultivation, the ryot has not been able to get rid of so much heavy assessed Land, as he would, had perfect liberty been allowed him; and therefore it cannot be expected that any general increase above the

Beriz

Average of Estimated Demand of the two years is Rupees 941858

As now — 941858
To be — 788336
Decrease 153522
Rs a p
Percent - 16-4-5

* Note
It appears that there are about 12,000 acres of Land rated above 8 Rupees an Acre now waste. If one half of this is reclaimed, which is very probable there will be an increase of about 44,723 Rupees

Fort St. George 15th November 1855

Beriz of 1262 will result from a reduction of the Rates. But what may be reasonably = expected is, that the Revenue will be sustained; and the loss, which will, if the assessment is not reduced, assuredly arise from the very proper liberty now allowed to the ryot, will be prevented and recovered by the reduction. I speak not without data to go upon; for I am now receiving accounts of lands = relinquished by Ryots this year - and in one Talook Anantapoor where there is a great deal of high assessed Irrigated Land the Tahsildar has sent in accounts up to the end of June last which show that Ryots have given in Razeenamahs relinquishing Lands, now entered in their Puttahs, to no less an amount than 44,000 Rupees; of which 23,480 Rupees actually paid revenue last year or no less than — Rs 25 — As 12 per cent of the Beriz of that year and the Tahsildar had not then completed his Caboolaty. In a short time I hope to be able to prepare an account of the Razeenamahs received throughout the

District

* Dry — 11120
Tank — 12,822
Kalah — 6513
Well — 13545
44,000

* Beriz of Anantapoor Talook for Fusly 1264 Rupees 91080

Fort St. George 15th November 1855

District. That the Ryots are over assessed seems to be pretty well established by the above stated fact, for in a year when prices are so favorable to the Cultivator so much would not be thrown up if it were not a burden upon the ryot. The depriving the Cultivator of the soil of that freedom, which it seems so desirable he should enjoy to prosper has been a great draw back to the success of the Ryotwary in Bellary Colonel Munro was an advocate for freedom but the demands of the state forbad the sacrifice of Revenue that would have resulted had he proclaimed perfect liberty to the ryot. Colonel Munro tried the effect in I believe one of the most favorably assessed Talooks / Chennoor in the Cuddapah District / and the result was that some where about thirty per cent of his assessment was relinquished and from that time the standing principle of good and bad has been observed.

Note
I cannot just now lay my hand on the letter in which the exact amount is mentioned

But

Fort St. George 15th November 1855

17 But freedom has now been fully proclaimed and in estimating the loss of Revenue from the reduction of the assessment we must make the comparision on the prospects of the future and not retrospectively with the past. But this I am not able to do with any accuracy. I can only venture to predict that much land, to the mutual benefit of Farmer and Landlord, will be retained if the relief sought for is given: but that if the assessment is not reduced that land will certainly be abandoned and its Revenue lost for good.

18 The average rates of all the Lands cultivated in Fusly 1247 compared with the average rates upon them when reduced by my propositions would be as follows.

Assessment

18325

Fort St. George 15th November 1855

It will be observed that about one half the assessment will bear an average rate of 9-5 and the other half an average of 3-1 while the whole average is 4-5 per acre under cultivation of the 2d Crop assessment

Owned annually after 19

any abatement for reconnoitering a reduction of those exorbitantly high rates which are affected on some of our best Canals. As suggested would be necessary and authority was given for making such extra Reductions

Resumption of Rs per Cent would not be sufficient for such Land and that further but it was never completed. But it seems necessary that should show that a general Reduction amounting to about of the Revenue of the Revenue derived from Irrigated Lands is required

The

Fort St. George 15th November 1855

20 The amount of the Government share of the produce is laid down to be one third leaving two thirds to the ryot. The survey assessment of the Ceded Districts (Bellary and Cuddapah) was not fixed with reference to any calculation of the produce of the soil by Colonel Munro. The basis of his assessment was framed on a high estimate of the collections made under the former Government. The average Beriz of a period of 18 years seems to have been Colonel Munro's standard - which in including all sources of Revenue amounted to about [illegible] for the accounts of 3 Talooks are not completed [illegible] 26,64,545 Rupees. The highest Revenue under the survey [illegible] 1215 Fusly [illegible] amounted to 3,00,749 Rupees or 12½ per Cent above the average of the 18 years. The Survey Demand was assessed proportionately on Talooks and Villages - and then divided upon

Fort St. George 15th November 1855

upon the fields. This assessment was considered by Colonel Munro himself too high, in fact an "assessment that never had been "nor ever can be completely realized as long "as there are bad crops and poor Ryots" and 25 per Cent was recommended by him as a General remission with 8 per Cent extra on well Lands, in order that, according to Certain independent calculations made by Colonel Munro 33⅓ per Cent only should be taken by the Government and 66⅔ per Cent be left to the Ryot. This proposed reduction was, it will be seen, not on the average Collections, but on the high survey assessment. The calculations upon which Colonel Munro founded his opinion that his survey assessment should be reduced 25 per Cent, in order to rightly apportion the Government Demand, were made on the estimated return of the farmers whole farm, Containing Land of every description, and may have been accurate or not but the field assessment was not regulated

Colonel Munro to Board Revenue 15th August 1807 para 12

Fort St. George 15th November 1855

regulated by taking the average value of the Crop and Commuting it into a money assessment; and consequently we have no data in Bellary for Estimating the supposed produce of its fields But admitting that on the whole Colonel Munro made a pretty correct approximate, but still general, Estimate of the value of a Ryots Farm, and that 33⅓ per Cent would have been the Government share in his time had his recommendation been carried out, we may perhaps be able to form some judgment of the actual present state of the whole assessment, bearing in mind that the survey Ayen assessment less the reduction of 25 per Cent, must be assumed as the correct survey assessment which was made at the Commencement of the present century; notwithstanding this remission of 25 per Cent, recommended in 1807 was not given (as it should have been at once to better the condition of the ryot) until 13 years after when it became absolutely necessary, not simply for the improvement of the District, but to save it from imminent ruin It is now more than 30 years since the General remission was granted, but the Condition of the former has

Fort St. George 15th November 1855

has not improved to any ostensible degree. They are still poorly clad - poorly housed, and poor in their appearance. and there has not been a Collector who has not found it necessary to reduce or recommend the reduction of the assessment still further. Mr. Robertson and others * reduced in many instances the heavy assessed Lands, Mr. * Mellor recommended a General remission amounting in all to 188092 half for Irrigated Lands, and half for Dry, on the net Vasooly of the cultiva- tion of 1247 after the usual remissions from the Assessment; and the disposition evinced by the ryot to get rid of much Land

	Ayacut	Assessment	Reduction
Dry	67,381	202,710	53,534
Irrigated	2,966	62,115	14,512
	70,347	2,64,825	68,046
Of this say in fusly 1253	25059	120,266	28,706

* See Mr. Mellor's letters to Board of Revenue dated 25th July 1846 and 14th August 1847

* Note The sum of reductions made by former Collectors on the higher assessed land is as per my letter dated 16th November 1848 Para 8

* Note These deductions are recommended in general of land for a remission

land, shows that he is not now obtaining his proper proportion, Viz^t 2/3^ds of the produce. This is one and a powerful argument showing the necessity of a further reduction of assessment.

21. I am not able with any degree of confidence to declare what is the amount of produce of Irrigated Lands generally or in particular but am much inclined to believe that 12 Rupees for one Crop and 6 Rupees Fusul Tasty is a fair rate, and one that will amply remunerate the former for the best farmed Irrigated Lands, and it may be safely taken as the standard for first Class Land i.e. good Land improved by good farming. But as it would be a vain attempt to endeavour to ascertain with accuracy what is the produce of all the

various soils, it will be far better to take Colonel Munro's assessment as a general standard, and comparing the state of prices during his time with the prices of later years see whether the relief sought for may not be justly claimed on the ground of lower prices which now prevail.

22. Supposing that Colonel Munro's proposed deduction of 25 per cent had been made, which it was not when his survey was completed, and admitting that his Calculation was generally correct, that with this reduction the ryot would have two thirds and the Government one third of the produce of the land I will explain how the condition of the ryot has been changed for the worse by the fall of prices. The Board have already before them a Statement of Prices of Corn in this District for a long series of years. From that Statement the accompanying

× forwarded with my letter under date 2nd July last see Statement No. 2

18333

Fort St. George 15th November 1855

accompanying abstract of averages of Prices is compiled. The first average is from Fusly 1194 to 1214 an average of 17 years (as four are excluded as years of famine) Paddy was then 105 Rupees per Madras Garce. This period is the average on which Colonel Munro calculated his commutation prices when estimating the outturn of a ryots farm and therefore must be taken as one standard. It embraced 5 years of the Company's Government. It was on the averages of this period that Colonel Munro, I say, calculated that the Circar received, according to his high survey rates 45 per Cent of the produce and recommended a reduction of 25 per Cent in order to reduce the Circar Demand to 33 1/3 per Cent. Now during the next period of 17 years from 1215 to 1281 fusly) the year immediately preceding a

18334

Fort Saint George 15th November 1855

a return to Ryotwary (and when it was found necessary to give immediate relief to save the District from ruin), the prices had risen Considerably, Cholum, the Dry land produce, was 32 per Cent above Colonel Munro's commutation average and Paddy 14 per Cent; so that we may conclude that in reality the ryots indirectly but actually enjoyed during the leases a large proportion, if not the full benefit, of the 25 per Cent remission recommended by Colonel Munro, as they were obtaining for their produce 32 and 14 per Cent higher prices than Colonel Munro founded his estimates upon. and yet we know that even during this season of much more favorable prices, the District was brought down to a very low condition. the most substantial renters were ruined and in Jail. May it not be then fairly questioned, whether in reality the calculations of Colonel Munro did give the due proportion of the Circar and ryots share. a very general impression prevails, that in Bellary District (and I see Mr. Bayley in his Report

Fort Saint George 15th November 1835

[x] See Selections from the Records of the Madras Government No. VIII Page 15 Para 65.

Report on the Kurnool assessment notices — the same fact), the ryots and Circar share is equal and the former does not generally exceed a half instead of being, as it should be, two thirds.—

23— The next Periods in the statement are divided into 3 equal terms of 10 years each, and bring the statement down to a late period 1261 fusly — and it will be particularly observed how low the average of the last 10 years has been.—

The fair Comparisons to make are those entered at the bottom of the statement which as they affect irrigated Lands shew a fall

Of 8 per Cent between Colonel Munro's average of 17 years and the period of 30 years since the District returned to Ryotwary and the general remission was granted.—

Of per Cent between the average of 34 years embracing Colonel Munro's and the subsequent 17 years. Compared with the 30 years of Ryotwary above noted.—

Of 19 per Cent between Colonel Munro's average of 17 years compared with the last 10 years (1252 to 1261 fusly)

Fort St. George 15th November 1835

Of 25 per cent between the average of 34 years and the last 10 years.—

See Statement No. 3.

24— Another Statement based upon the foregoing averages will shew that the Circar has been receiving a much larger proportion of Revenue than its fair share — On the average prices during the 30 years from 1232 to 1261, it received 13½ per cent above its proper share, and during the last 10 years it took no less than 30 per cent over and above its due proportion.—

25— The amount (as the utmost, including the reduction of all those exorbitant high rates) which my estimate gives us the proportion of net revenue to be sacrificed is about 16 per Cent, (it will not I think amount to that,) but it does not appear to be more than required when taking into consideration the fall of prices as compared with the prices during the survey periods. Even granting that Colonel Munro's calculations did actually give 2/3 to the ryot which is very questionable.—

See Statement No. 4.

26— In another Statement is shewn the Reduction of the assessment that would be made in proportion to the average falling off of prices noticed

Fort Saint George 15th November 1855

noticed above— The proportionate reduction for the last period or the 10 years average of prices is 2,24,928 Rupees. my reduction amounts to only 153522 Rupees—

† Note on the cultivation of Fusly 1262.

27. It has been proposed elsewhere (in North Arcot) to class Well Lands under the Head of Toonjah— But I do not propose this for Bellary. The greater portion of Wells have always been classed as Circar property— and a heavy assessment has been fixed on them, I have proposed to give them relief by reducing the assessment about 54,000 Rupees which I trust will be sufficient: All wells constructed subsequent to the survey were to have been by Colonel Munro's plan, exempt from Extra assessment but that the Rule was not carried out during the Rents— There are 15310 Iyen Circar Wells assessed at 394982 Rupees Vasooly; 1776 wells dug during the Rents and assessed at 18459 Rupees Vasooly, and 16444 Private Wells assessed 11776 Rupees Vasooly in which no Extra assessment is made.

28. Though the purport of this Report refers specially to Irrigated Lands it may be convenient to again allude to the remissions proposed for Dry Lands—

By

Fort Saint George 15th November 1855

29. By the Statement sent with my letter of 31st July 1849. I calculated that the effect on the Revenue, of carrying out the plan therein proposed of reducing the assessment on all Dry lands would entail a loss on the Cultivated lands compared with fusly 1247 (when the last Deetwar was Statement was made) of about 170,000 Rupees net Revenue; or 1½ per cent of the Revenue obtained from Dry Lands in fusly 1247 would have to be given up. But still in actually making the revision it may be found that some of the poorer sorts of Land may require the rates to be lowered which were not allowed for in that rough calculation and in framing an estimate it is desirable to state the full amount that may be required to be remitted. But the utmost will not exceed 15 per cent on the revenue of that year 1247 Fusly— In the statement that accompanies this, and which has been prepared with as much care as such an account can be in the Cutcherry, the following Estimate of the effect of a revision of the whole Dry Land assessment is obtained—

See Statement No. 5.

On

Fort St. George 15th November 1855

On the ayacut the gross Decrease of assessment is large amounting to 397,906 Rupees. But 93,506 Rupees is regained by increasing some of the lowest rates which comprise a vast number of acres so as to allow them, without sustaining an unnecessary loss to fall into some of the newly Established and limited number of rates and the Net loss on the ayacut is therefore calculated only to be 304,400 Rupees or 11 ¾ per cent. as however there is such a vast amount of waste land / a large proportion of which there is no probability of ever being cultivated / the real loss is much less being only 179,150 Rupees or not quite 7 per cent on the Cultivation of 1247 fusly and to this extent it is probable that, in carrying out my plan fully, revenue must be given up for a time. I say for a time for there can be little doubt but that in the course of time much land now left uncultivated will be taken up, fine land abandoned because too heavily assessed with reference to its remunerative Capabilities.

30. Any alteration in the rates proposed for Goolieem, where much & Minute attention has been given to the subject. I would regret and

Fort Saint George 15th November 1855

and on the same basis I would propose to carry out the revision in all the other Talooks, taking for my guide, as a Dowle only, the Statement now submitted for the Board's consideration whether it will be necessary to retain the rates of 6 annas and 10 annas which were not contemplated in my previous report may admit of question. But they have been introduced to avoid unnecessary loss in adjusting the reduction to the intermediate rates of 4 and 8 annas, and again the highest rate has been fixed at 1½ Rupee. But as in Goolieem some lands will bear a higher rate of 1¾ and 2 Rupees, of course, as in that Talook, so in others, when the measure is carried out, will similar lands be classed at those rates, but in making the estimate this has not been provided for, as it could not be done accurately, and perhaps the amount that will be saved by this Modification will be about 13,000 Rupees on the ayacut and half that on the present Cultivation.

The amount of Dry Land Revenue by a reduction, amounting at the most to 15 per cent, that would be lost in the Revenue of Fusly 1262 is 166,035 Rupees. The amount, calculating upon the prices of the last 10 years on the principle noticed in para 23 of this report would be 378,733 Rupees (see Statement No 4) and in proposing

proposing a remission of 15 per cent, I am of opinion that I am not asking too much for the former of this District. It is a poor and very thinly populated District less so than any other in the Madras Presidency, and it will require very many years of easy Assessment before it can be brought under what may be termed full cultivation. The seasons also are most uncertain and Capricious. I may say while writing, that there has been almost a complete failure of the early or Southern Western Monsoon rains for three successive seasons, and in that interval a failure also in one year of the North east Monsoon, situated between the two Monsoons at a distance from both Coasts, the rains are most uncertain - And Lands (Tauk Lands) watered in one year are frequently left unsown for two or more years. My apprehension is lest my present propositions should not fully meet the requirements of the District with reference to its future prosperity.

* 9 to the square Mile.

31. It is proposed as the Board are aware, to treat the Enam survey assessment in the same manner as the Circar. The present assessment is purely nominal being seldom realized by the Enamdars. Some Enams pay a Quit Rent and in the Western Talooks, this Quit Rent is

excessively high, and attached though the owners are to their Enams, they would in many instances relinquish them because unable to pay the Jodi. and it has always been found necessary to grant remissions of the fixed Quit Rent. In Irrigated Lands the Enams are comparatively small. The great Enams are in the Black lands. They undoubtedly assist in paying in some instances the high Assessment in Circar Lands - but this by no means generally the case, as many ryots Cultivate no Enams at all. and I am of opinion that all assessment in Circar Land should be made quite independant of Enam. If it is necessary to restrict the cultivation of Enam that should be done by direct interference with the Enamdar.

32. As respects the disposal of the Quit Rent question I would propose that when the Reduction on the Circar Lands is made, the Enam Lands of the same class be reduced in their nominal and survey value to the same assessment as the Circar Lands. That when the Jody now payable is found to exceed that assessment it be reduced at once to the new and lowered Land assessment. Whether a further reduction in some cases, in order to give a fair remuneration for services performed, should be allowed, or whether the owner should have the alternative of either paying that Jody regularly without any deduction, or of surrendering his Enam to the Circar for resumption, will properly form the subject of future discussion.

The

18344 Fort Saint George 15th November 1845

The

Fort Saint George 15th November 1834

33.

Sir

I have the honor to transmit herewith a statement of the amount of Assessment on property within the limits of the District of Fort Saint George for the year 1834-35 as per margin, and to request that you will be pleased to cause the Collector of Land Revenue to be furnished with a copy of the same, in order that he may be prepared to collect the amount when the Assessment shall be confirmed by the Government.

2. The Assessment has been made in conformity to the Rules and Regulations prescribed by Government in their Proceedings of the 15th January 1834 No 1 and 2, and I have the honor to report that the Survey of the Settlement and the Assessment itself have been completed to the satisfaction of the Collector and myself.

3. The Assessment will be found to exceed the Jumma of the current year by Pagodas 2,09,000 as per margin, but I am of opinion that the Collections will not exceed the Jumma of the current year by more than Pagodas 1,50,000 for the following reasons.

4. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

5. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

6. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

7. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

8. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

9. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

10. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

11. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

12. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

13. Fort Saint George 13th December 1834

I have the honor to transmit herewith a Statement of the Assessment on property within the limits of the District of Fort Saint George for the year 1834-35 as per margin, and to request that you will be pleased to cause the Collector of Land Revenue to be furnished with a copy of the same, in order that he may be prepared to collect the amount when the Assessment shall be confirmed by the Government.

2. The Assessment has been made in conformity to the Rules and Regulations prescribed by Government in their Proceedings of the 15th January 1834 No 1 and 2, and I have the honor to report that the Survey of the Settlement and the Assessment itself have been completed to the satisfaction of the Collector and myself.

3. The Assessment will be found to exceed the Jumma of the current year by Pagodas 2,09,000 as per margin, but I am of opinion that the Collections will not exceed the Jumma of the current year by more than Pagodas 1,50,000 for the following reasons.

4. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

5. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

6. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

7. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

8. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

9. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

10. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

11. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

12. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

13. The Assessment has been made on the Crop of the current year, which has been a very favorable one, and the Ryots have been induced to cultivate more than usual, in consequence of the Tanks having been filled by the heavy rains of October and November 1833, which rains have also enabled the Ryots to cultivate a large extent of Punjah land, which they would not have done, had they not been certain of a supply of water.

To

18347

Fort Saint George 15th November 1855

Extract Minutes of Consultation No 4 60 dated 23d April 1855 - See Selections from records of Madras Government No 12 papers relating to the reduction of assessment in North Arcot - See Statement No 6 -

34 -

The Government have desired to know a Statement shewing the probable diminution of Revenue during each of the next four or five years to be expected consequent on the measures proposed for a reduction of the assessment. I have the honor to annex the probable revenue of the next 5 years should my propositions be adopted compared with the revenue of the 10 past years - but in this Estimate no provision is made for the loss that will be sustained on the one hand, (if the assessment is not reduced) by the abandonment of lands, as noticed in paras 16 & 17 of this letter - nor on the other hand for the loss that will be arrested by giving the relief sought for - This though an important item cannot at present be ascertained -

35 -

In conclusion I would beg permission for giving some immediate relief, pending the final adjustment of the assessment, (whether sanctioned on the plan proposed by me or any modification of the same,) for the District has been, and is suffering much from adverse seasons - and the abandonment of lands seems clearly to point to the necessity of giving some immediate assistance to the ryot - If the Board would allow of it, I would propose now to reduce all the higher assessed lands to

18348

Fort St. George 15th November 1855.

to the Maximum recommended by me, and to give a reduction on a fixed per Centage / say 12+ per Cent / on the Second class of Lands whose assessment it is proposed to reduce, until the revision can be fully completed. The measure would be attended, I trust, with considerable benefit in these unpropitious times -

* 25 Per Cent is the Extent estimated for these lands. -

Bellary, ... Collector's Office, ... 24th August 1855

18354

To the Secretary to Government, Revenue Department.

Sir,

I have the honor to submit for the information of Government, a statement of the Proceedings of the Board of Revenue in this Presidency and the extent to which it has been found necessary to reduce the Assessment of the Country to prevent the Ryots from being harassed by Collectors in the Realization of Government Revenue. I am also to submit a statement shewing the Collections of the Bellary District for the last 10 years, and the Proposed Reduction of Assessment for the next 5 years.

2. The Board are of opinion that the Assessment of the Bellary District is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

3. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

4. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

5. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

6. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

7. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

8. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

9. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

10. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

11. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

12. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

13. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

14. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

15. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

16. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

17. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

18. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

19. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

20. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

21. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

22. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

23. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

24. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

25. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

26. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

27. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

28. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

29. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

30. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

31. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

32. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

33. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

34. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

35. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

36. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

37. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

38. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

39. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

40. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

41. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

42. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

43. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

44. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

45. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

46. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

47. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

48. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

49. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

50. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

51. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

52. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

53. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

54. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

55. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

56. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

57. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

58. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

59. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

60. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

61. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

62. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

63. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

64. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

65. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

66. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

67. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

68. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

69. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

70. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

71. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

72. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

73. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

74. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

75. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

76. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

77. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

78. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

79. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

80. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

81. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

82. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

83. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

84. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

85. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

86. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

87. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

88. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

89. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

90. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

91. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

92. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

93. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

94. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

95. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

96. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

97. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

98. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

99. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

100. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

101. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

102. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

103. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

104. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

105. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

106. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

107. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

108. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

109. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

110. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

111. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

112. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

113. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

114. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

115. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

116. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

117. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

118. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

119. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

120. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

121. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

122. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

123. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

124. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

125. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

126. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

127. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

128. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

129. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

130. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high, and that a reduction of 10 per cent on the Dry land, and 10 per cent on the Irrigated land, will be necessary to enable the Ryots to pay their Assessment with punctuality, and to prevent the Collectors from having recourse to coercive measures.

131. The Board are also of opinion that the Assessment should be reduced by 10 per cent on the Dry land, and 10 per cent on the Irrigated land, for the next 5 years, and that the Assessment should then be increased by 10 per cent annually, for the next 5 years, until the Assessment shall have been restored to the present standard.

132. The Board are of opinion that the Assessment of the Bellary District, and indeed of the whole Province, is too high,

briefly that his personal enquiries convinced him that the assessment on some of the more highly taxed lands did require modification, but he abstained from proposing any measures for the purpose, as the Collector was about to furnish some additional accounts and Statements when the general question would undergo the Board's consideration Mr Pelly's two reports dated 5th March and 24th August, have since reached the Board, and they resolve to lay them and the other letters noted at the head of these Proceedings before Government, with the following observations and suggestions.

+ Inl. Cons. 15th Nov. 1855

2. The first report alludes especially to the Godaveri Taluk which may be said to contain unirrigated land only and principally Regur or black soil. But as the measures proposed by Mr Pelly for its improvement are especially intended to be extended to the other Taluks his two communications of the 5th March and 24th August may be regarded as reports on the irrigated and unirrigated lands of the District with propositions for revising their respective assessments. Before entering on this subject, it appears proper to the Board to advert briefly to the correspondence

In Cons. 15th Nov. 1855

correspondence which has recently taken place regarding the past and present condition of the entire collectorate.

3 The field assessment of Bellary with forms the principal division of the Ceded Districts was fixed under the Superintendence of Colonel (Sir Thomas) Munro and is described in his printed letters to the Board, dated 26th July and 15th August 1807. His survey was commenced in 1802 and completed in 1807, the survey rates being brought into operation as the different Taluks were furnished, but in Fusly $\frac{1219}{1809}$ just when the entire work was completed the triennial lease which was followed by the Decennial, placed the Villages in the hands of renters and it was not until Fusly $\frac{1232}{1822}$ that the revenue administration of the Province came again under the Collectors direct Superintendence by the reintroduction of the Ryotwary System. Meanwhile however the failure of many of the renters had brought parts of the District (1,600 out of 2,758 Villages) under the Collectors management, and as the Survey rates were found to be injuriously high Government under date 8th September 1820. Sanctioned

Rayed or Black land — " - 9 - 4
Red land — " - 4 - 8
Nunjah & garden } 2 - 14 - 8

In Cons: 4th Febr 1808-

their being lowered to the extent of 25 per Cent on dry and wet land with an additional 8 per Cent on lands irrigated by wells- This reduction had been proposed by Colonel Munro in his Survey report of 15th August 1807 with a view to reduce the Government demand to one third of the gross produce, but on what data he founded the recommendation is not accurately known. No field accounts exist, shewing the rates of produce and its Value and Mr Petty understands that Colonel Munro made a calculation of the supposed outturn of a ryots entire holding, including lands of every description - Besides this general reduction, the object of which was to lower the Standard of the assessment enquiries had been commenced by Colonel Munro to relieve all Special " instances of Mistaken assessment and correct errors and inequalities in the Survey This Course was continued by some of the subsequent Collectors, principally by Mr Robertson but the work has not been fully carried out, The extent to which it has been completed and the amount of revenue thus relinquished are detailed in Mr Pelly's report to Board of 16th November 1848

In Cons 15th March 1849-

Such was the State of the assessment when in consequence of some remarks which he had made upon the deteriorated state of his District, the Collector, Mr Mellor, was called upon for detailed information on the subject- He responded to this call in his report to the Board of 25th July 1846, in which he admitted that he had neither to shew a decline of revenue cultivation nor population, but stated that there was an increased difficulty in realizing the collections and preventing the abandonment of land; that the cultivators had become poorer, and carried on tillage in a slovenly and imperfect manner, and that proofs of the depressed State of the province were to be found in the tendency shown by the ryots to neglect the higher assessed lands for the inferior Soils and in the failure of the anticipation that the 25 per Cent reduction carried out in 1820 would give to land a saleable Value. The following causes were cited by Mr Mellor, as having led to this unfavorable State of things The Survey assessment of Colonel Munro having been originally fixed too high- a continued fall in the price of agricultural " produce since its introduction a neglect to improve the irrigation works and communications of the province "the outlay

In Cons: 7th Decr 1846-

on

on works of irrigation having fallen from 6 lacs a year which at once reached in Colonel Munro's time to a sum seldom exceeding Rupees 30,000 per annum, while the great thoroughfares of the Country remain (with some exceptions) much the same as they were in his day;" and lastly the ravages of Cholera, as the District had become unhealthy in late years, and agricultural operations had been impeded by many of the leading families losing their principal members.

5 Mr Mellor confined himself to describing the State of his District without proposing any remedial measures, and his report was laid before Government on 7th December 1846. In their Secretary's letter of that date, the Board dissented from Mr Mellor's views and thought that the accounts submitted by him showed signs of progressive, though gradual, improvement. They stated that undoubtedly the recent fall in the prices of grain had caused some distress, but the extreme point to which they had fallen was likely to be only temporary, and there appeared nothing in the state of the Province to show it required a reduction of assessment more than other Districts. The Board gave a short

18354 Fort St George 15th November 1855

short detail of its revenue history to explain the causes which had prevented land acquiring a saleable value, and must continue to do so while a want of population prevents its full occupancy; and then pointed out that the quotations made by Mr Mellor from Mr Shakespear's report on the State of the Province dated 21st October 1813 were not applicable, as a reduction of 25 and 33 per Cent in the assessment of the dry and wet lands had been made since it was written.

In Cons: 29th Nov: 1813

6 Government directed (Extract from Minutes of Consultation 23d February 1847) that the observations of the Board should be communicated to Mr Mellor, with instructions to him to detail any specific measures which he considered necessary to improve the State of his district, accordingly in a report dated 14th August 1847, Mr Mellor repeated his former arguments to prove the depressed state of the province, and suggested that Sir Thomas Munro's reduction of 25 and 33 per Cent should be increased to 50 per Cent on all the higher classes of land. The effects of this measure would have been to give up in addition to the former remissions Rupees

In Cons: 4th March 1847

In Cons: 30th Sept: 1847

and which besides correcting original mistakes would adjust the rates of taxation to the changes that must have occurred from ordinary causes in the lapse of nearly half a century. But the Board refrained from proposing a new survey until the more pressing exigencies of other Districts had been first satisfied and a trained and competent agency was available for the work.

8. Here the discussion terminated but when reviewing the Summabundy report of fusly 1252, the Board in their Proceedings of 5th. December 1844 had called for information about the progress which had been made by Colonel Munro and subsequent Collectors in correcting the Survey assessment, and the best method of bringing those operations to a satisfactory conclusion. On the present Collector Mr. Pelly assuming charge of the District he found that this information had not been furnished, and accordingly wrote a report showing the reductions which had been made on the highly assessed lands chiefly by the Collectors Colonel Munro and Mr. Robertson since the Survey exclusive of the 25 and 33% general remission granted in 1820 Mr. Pelly at the same time repeated the opinion previously

From Bellary 11th in Cons: 26th October 1843.

16th November 1848. In Cons: 15th March 1849.

1835-4 Fort St. George 15th. November 1855.

previously expressed by Mr. Mellor that the highly assessed lands of the province required a general and immediate reduction to prevent a decline of cultivation and revenue and called particular attention to what he considered the unsatisfactory state of the Goolcum talook.

9. On receiving this communication the Board observed that though they were not prepared to take up the general question of the assessment while the resurvey of the Ceded Districts was under the consideration of Government, the condition of the Goolcum talook appeared from Mr. Pelly's representations to be so critical that they wished him to send a full report of the measures which he proposed for its amelioration, accompanied by detailed accounts to explain its present state. Mr. Pelly accordingly furnished a report dated 31st July 1849 which was reviewed by the Board in their Proceedings of 11th April 1850. These papers contain generally a repetition of the arguments advanced by Mr. Mellor and opposed by the Board regarding the operation of the Survey assessment throughout the District and as the Board attributed the state of the Goolcum talook to the reaction which followed an artificial stimulous given to its agricultural industry by

Board's Proceedings 11th June 1849.

In Cons: 11th April 1850.

by the Cowle system Mr. Pelly's measures were not recommended for adoption -

10. It is to this report that Government directed the attention of the Board, who accordingly called upon Mr. Pelly to state whether the experience of the last few years has led him to modify the opinions which he expressed in his letters of 1848. and 1849. regarding the depressed condition of the District more especially the Gooleum Talook, and he was instructed to detail the measures which he thought necessary to promote its prosperity and place its land revenue on a sound footing - Mr. Pelly has replied to this call in the letters noted at the head of these Proceedings in which he observes that his views remain unaltered and submits plans for modifying the assessment of the dry and wet lands. The Board now proceed to notice his proposed measures under the above two heads.

11. To illustrate the state of the Dry lands of his District and more especially the Regad or black Cotton soils Mr. Pelly has selected

selected the Gooleum talook being of opinion that the evil consequences of over assessment are there most strickingly displayed - The details of its lands are as follows -

	Sircar. Acres.	Assessment.	Enam. Acres.	Assessment.
Regad or Black land —	190384 —	310005.		
Mixed and Reed ———	36540. —	22444.		
Irrigated ———	937. —	4382 -		
Total —	227861 —	336831 —	14785 -	302419

The Black soils are now divided into 55 Classes assessed at rates varying (after the 25 per cent reduction) from Rupees 4-6- to Rupees -a- 2-4 per acre -

The Mixed soils consist of 35 Classes ranging from Rupees 5-6 to Rupees -a- 2-4-

The irrigated lands are very insignificant and need not here be adverted to Mr. Pelly's scheme provides for reducing the number of classes as well as for modifying the present assessment. He proposes that there shall be hereafter 8 Classes only of Black and 7 of mixed soils, with rates of assessment varying from Rupees 2 to annas 4 for Black and to annas 2 for mixed soils. The standard maximum per acre is however only Rupees 1 1/2 per acre as the two higher rates of Rupees 1 3/4 and Rupees 2 are exceptional and to be applied only to some lands with peculiar advantages of situation as well as soil such for example as the beds of

old

old tanks and natural hollows. It will thus be observed that the plan is virtually the same as the one which Mr. Pelly laid before the Board and Government on the former occasion.

12. The irrigated lands of the District including dry converted into wet consist according to the Jyacut of Fusly 1247 of 248329 acres originally assessed at Rupees 180776 which gives an average of Rupees 7/4 per acre. The Survey rates ranged from Rupees 78-12 to Rupees 0-2-4 per acre, so that the remission granted in 1820 of 25 per Cent on tank and Channel irrigated lands and of 33 per Cent on well lands afforded in many instances an altogether inadequate relief the highest assessed land still bearing the enormous burden of Rupees 59-1-0- per acre. The Cultivation in Fusly 1262 a recent and favorable year consisted of 146681 acres paying an assessment of Rupees 953751 at an average of Rupees 6-8-0 per acre. Two fifths of the irrigated Jyacut, or 110995 acres appear thus to be waste, but Mr. Pelly considers that over assessment although often is not always the cause. He is of opinion that one half of that land has been neglected from its having really no irrigation, or being unfit for Cultivation from the effects of floods and other causes.

At

13 At present the Irrigated lands are entered under 26 Heads in the district accounts and are divided into 881 Classes, each with a different rate of payment both for single and double Crop lands. Mr. Pelly proposes to simplify this system, as well as to modify the assessment, and suggests the following arrangement. Irrigated land to be separated into the 3 Heads of Tank, Channel, and well. all tank and Channel lands to be rated as Single Crop, and to be liable to fusul Jastee, or an additional half teerwah, when a second Crop is raised. a Consolidated assessment would not suit the District. Mr. Pelly observes, or be equally acceptable to the Cultivator. all well lands are to be considered double Crop or rather they are to be free from fusul Jasty when a 2d Crop is raised. The Board do not object to the spirit of this last arrangement, as the same rates of reduction are to be applied to irrigated lands.

See Para 5 of Mr. Pelly's Letter of 7th August 1855 Sel Cons 15th Nov 1855 No 2369.

surely the assessment is not on the new land

lands of all descriptions while the Cultivators of Well lands have the labour and expense of raising water; but they think it would be better to confine the distinction of Single and double Crop assessment to tank and Channel lands and simply declare that the fusul jasty rules do not affect well lands, as otherwise remission might be expected when from any cause a Second Crop was not raised upon them. Mr. Pelly's proposal to revise the Syacut accounts, bringing permanently under the head of "irrigated" dry land which has been converted to wet, and removing to the head of "unirrigated" with a suitable change of assessment such lands as shall be found to posses no means of irrigation are approved.

Mr.

14 Mr. Pelly next proposes that the assessment on all the irrigated lands should be modified as follows. Land which now pays more than Rupees 12 per acre for a Single Crop to be brought down to that Standard. tank and Channel lands being chargeable with an additional half assessment when cultivated with a Second Crop. Lands now paying less than 12 and more than Rupees 6 to undergo a rateable reduction, the extent of which is not to exceed 25 per Cent, but the details will depend on future enquiry. The above rule regarding fusel Jasty, for a second Crop, will apply to these lands also.

Lands now assessed at less than Rupees 6 are not expected to require a revision of assessment, except in a few instances, and the chief alteration which Mr. Pelly proposes to make in them after his enquiry is with the intention of reducing the number of classes.

classes.

In carrying out the above measures Mr. Pelly wishes to do away with the present inconveniently numerous Classes[x], and bring all irrigated land under 24 rates commencing with 12 Rupees as the highest and descending by a regular gradation of half a Rupee to Right annas for the lowest.

[x] Survey rates.

Classes	Highest Rate Mr. A P	Lowest average Mr. A P
Garden	232 - 16	10 - 8
Wet	331 - 78	12 - 5
Droogpye	131 - 43	12 - 2
Dry into Wet	130 - 33	8 - 8
Garden into Wet	67 - 37	14 - 8
	881	

5 - 10 - 6	2 - 4 - 7	1 - 8 - 6
5 - 6 - 17	1 - 1 - 11	
4 - 8 - 8	2 - 4 - 7	1 - 8 - 6
4 - 8 - 8	2 - 4 - 7	1 - 8 - 6
1 - 7 - 4	1 - 1 - 11	

Mr. Pelly properly proposes to take this opportunity of abolishing an extra tax levied under the name of Jasty on some old Betel and Cocoanut gardens. This item was specially alluded to by Mr. Pelly when recently reporting on the assessment of his District, and its objectionable nature as a direct tax on the industry and improvements of the Ryot needs no comment.

Report dated 29th Nov. 1854 & Cons. 15th Jan. 1855 Para 20 Nos. 48.

13

The revenue which would be given up by Mr.

Mr. Pelly's measures is to be considered in two points of view. The decrease on the dry land under occupancy, and the decrease on the total Tyacub including the waste.

To shew the 1st point, or the abandonment of present actual revenue which would ensue, Mr. Pelly has chosen Fasly 1267, the last year in which a Statement detailing the Cultivation and waste in each Class was drawn up from the Village accounts for the entire District. as that year was a favorable, but not unremarkable one, there is no objection to taking it as a guide. The reductions on the land then under cultivation would amount to Rupees 3,02,695 - as follows.

Unirrigated land		Decrease per Centage
Black or Regud	96,014	13 1/8
Mixed or Masab	14,136	16 1/2
Red Land	33,970	19 1/2
	1,44,120	Mr. Percentage 14 3/4

Irrigated Land[x].

Tanks	41,417	
Channels	44,650	
Wells	37,178	
	123,245	10
	302,695	

The reductions on the Tyacub or total cultivable area (excluding Enams) would -

[x] Note. In making this Calculation Mr. Pelly allows a reduction of 25 per Cent on Lands paying between Rs. 12 and Rs. 6 per acre. It is also supposed that the future charge for Fasal Jasty will be equal to the revenue now gained for 2 Rs. 8 ps. from double Crop Land.

would be much larger, and to exhibit them Mr. Pelly has properly taken not the original Survey rates, but the rates which came into force after the 25 and 33 per Cent reduction of 1820 and nonfurnished the Government demands.—

The gross reduction in the Ayaub would be Rupees 8.80,976 as follows according to Mr. Pelly's figures, but a portion of this is nominal, as will be presently explained.—

On Unirrigated lands — 3.97.906

On Irrigated —— Do. —— 1.83.070

8.80.976

With regard to the unirrigated lands Mr. Pelly limits the effect of his measures to a reduction of Rupees 3.04.100 as Rupees 93.806 were to be added to the Demand by increasing slightly some of the lower rates to amalgamate them with others, but as the Board do not recommend this measure until the Assessment of the District is

Letter dated 21st August 1855 P. 29 in Cons. 15th Nov. 1855.

is thoroughly re-organised after a new Survey, the total results of Mr. Pelly's reductions has been shewn.

On the Ayaub of the irrigated land the direct effect of Mr. Pelly's reductions may be thus estimated in the Board's opinion.—

	Rupees
Loss by reduction of rates —	1.68.743
Possible loss of 2d Crop Assessment Calculated at one third —	32,000
	2,00,743

Out of the remaining portion of the gross reduction shewn above. Rupees 67.000 (in round numbers) will be recovered by the Collection of usual Jasty which has been taken out of the Ayaub Assessment, but is to be levied when a Second Crop is raised on tank or channel lands and Rupees 2.15.240 is the Assessment on waste Nunjah lands which appears to have no irrigation and is to be transferred to the head of "unirrigated" after enquiry

1.83.070 Rs

on.

on this point a part of this revenue will be recovered when these lands are newly tasked as unirrigated and brought under Cultivation, but what this amount will be cannot now be ascertained and the point is not one of importance on this occasion as the clearly just and necessary measure of relieving these lands from a Nunjah Assessment would have had to be carried out even if no other reforms were contemplated. The real decrease therefore in the Jyacut Reiz to be expected from Mr Pelly's proposed reductions of Assessment may be thus calculated.

	Rupees
On unirrigated land	3,97,906
On Irrigated — Do —	2,00,743
	5,98,649

16 The next point to consider is the probable extent to which this loss of revenue will be made good by an extension of

of cultivation under the modified rates. It has been observed in Para 6, that Mr Mellor, when proposing less extensive reductions expressed a conviction that new tracts of land would be brought under tillage to such an extent as to prevent any loss to Government. Mr Pelly is not equally sanguine. With respect to the wet lands he advocates the reduction chiefly to prevent the total loss of revenue which would follow the abandonment of the highly assessed classes now that full liberty is allowed to the ryot though he expects, that a portion[x] of the Amount given up would be recovered. With regard to the dry.

	Rupees	
[x] Probable amount of reduction on lands now Cultivated	1,23,545	
Probable recovery.		
Half of 12,200 acres now waste, expected to be Cultivated	44,723	
By abolition of some present Remissions-Mumaul Cummy &c	20,000	
	64,723	
Remaining loss		5,8,822

dry lands, it is Mr. Pelly's opinion that the surrender of revenue will be temporary only as there is "much fair land abandoned because too heavily assessed" which is then likely to come under cultivation.—

17 Before proceeding to offer remarks on the above propositions, the Board will briefly detail the manner in which the assessment of the District was settled for while they differ in some respects from their predecessor's views and concur with Messrs. Mellor and Pelly that the higher classes or both of the wet and of dry lands, require liberal reductions, they do not attribute the backward state of the District

and.

and more especially its dry talooks, so almost exclusively as those two Officers do to general over assessment, whether arising from an error in fixing the survey rates or from a subsequent fall in the value of agricultural produce - In the opinion of the Board other causes have exerted an unfavorable influence, the effect of which is still felt though the cause itself has been removed or is in course of removal - Such for example are the want of roads and the errors of our revenue administration which by introducing the renting system ruined the leading ryots and deprived the District of its agricultural capital to an extent which it still seriously feels - Some influence must also be ascribed to the accident of unhealthy and unfavorable seasons, the effects of which cannot be entirely obviated by any system of assessment - To arrive at a correct opinion regarding the present assessment it is essential to keep these disturbing causes in view.—

18. The mode in which Colonel Munro's assessment was fixed has been so fully described in his reports,[x] and formed the subject of so much subsequent

[x] Dated 26th July and 24th August 1807

subsequent discussion, that it will be sufficient here to point out its main features. All land excepting hills and rocks, were measured and every field was entered in the survey registers, with a specification of its class, name, dimensions, and assessment. But although enquiries were made regarding the amount and value of the produce which the various descriptions of land would yield, the assessment was ultimately settled by the Collector, fixing a sum for the entire District or Village after scrutinizing the former Collections under our own and the native Government, and comparing them with the calculations, of the assessors. The sum so adopted was distributed over the lands of each Village according to their several classes. On this point, the Principal Collector Mr. Robertson, afterwards observed. "In fixing the assessment, no estimate of the produce was made. The assessment was fixed on a district or Village in the lump after reference to former collections, aided by the

Answers to the questions of the Governor General Lord Wm. Bentinck 30th September 1834.

From Bellary 20th June in Cons: 24th August 1835.

the survey measurements and enquiries. When the gross amount was so fixed for a Village the ryots settled the field details." The survey records do not therefore show the produce of the lands, nor was any commutation rate fixed for converting into money that portion of the gross produce which was taken from the cultivator on account of the public revenue.

Letter of the Col. Wm. Pelly to Bd. dated 22d. November 1853 Inclt. 8th Octr. 1853.

19. On completing his survey operations, Colonel Munro represented that his assessment appeared to him too high, and one that never could be completely realized as long as there were bad crops and poor ryots. He therefore recommended a general remission of 25 per cent on all west and dry lands except the very lowest classes, with an additional 8 per cent on all lands, watered by wells. He calculated that this reduction would diminish the Government demand to one third of the gross produce and give land a saleable value, but according to Mr. Pelly × no details are forthcoming of this calculation which appears to have been based.

Colonel Munro's Report to Board 15th Augt. 1807 Para 12. Do. Do. 4th Feby. 1808.

based on the supposed out-turn of entire farms containing land of every description,

Mr. Pelly to Board 24th. August 1855 Para 20. Encl. 15th. November /55.

Mr. Pelly remarks. "It may have been accurate or not, but the field assessment was not regulated by taking the average value of the crop and commuting it into a money assessment, and consequently we have no data in Bellary for estimating the supposed produce of its fields."

20. Unfortunately this recommendation of Colonel Munros was not

Letter from Chief Sec.t to Bd. 8 Encl. 11th. Sept.r 1820.

carried out for 13 years or until 1820, when it came too late. The agricultural stock of the District had then nearly disappeared, and many of the principal ryots had been put in jail, as defaulting renters, under the triennial and Decennial basing system which was introduced into the District as against Colonel Munro's opinion in 1808 just as the survey was completed and proved to be quite unsuited to it. The reduction which had been originally proposed to promote the prosperity of the Province, was at last required to save it from

18354. Fort St. George, 15th. November 1855.

from ruin in its altered state, and surprise cannot therefore be felt that the measure, when introduced under such changed circumstances had not all the beneficial results which its proposer anticipated when recommending it in 1807. after the evils of the renting system many years with favorable seasons and steady prices were required, besides a reduction of assessment to restore the District to its previous condition and the District has not had all these advantages scanty monsoons and visitations of cholera have been frequent and prices have fluctuated much.

21. The relief given by this reduction produced to a certain extent beneficial consequences. It did not make land saleable because much good unappropriated land is to be obtained on application without purchase but it rendered the assessment light on the middling classes of land and has increased cultivation so as nearly to make good the revenue given up. The reduction was

not

not however carried sufficiently far on the higher classes of land, and the fall which has since taken place in the prices of agricultural produce renders it now imperatively necessary, in the Board's opinion, to grant that additional relief which Mr. Thackeray had in view, when writing his report of 21st October 1819 (see Paras 6 and 10) Rates of assessment which in their unmodified state, range to Rupees 59 per acre for irrigated land and to Rupees 7–10–6 for unirrigated would evidently require to be further lowered, even if the point was not demonstrated by the cultivation gradually shifting from the superior to the inferior soils. The present Board consequently concur with Messrs Mellor and Pelly to this degree, that there is a considerable extent of over-assessed land in the District for which an immediate remedy is required, as this land comprizes the finest soils

In Cons. 29th Nov. 1819.

soils, and much of it remains uncultivated instead of adding to the capital and prosperity of the province.

22. But Mr. Pelly's reports, besides attributing the stagnant state of the District to the one cause of over-assessment, tend by their arguments to show that the over-assessment must be universal. The Board therefore will record a few remarks on this part of the subject, because if Mr. Pelly's arguments are admitted to be correct, it would be proper to extend relief to all the lands, a measure which the Board do not consider necessary and which in reality Mr. Pelly himself does not propose disappointment would also ensue, for expectations would be raised that a large increase of cultivation would immediately result when the one supposed great obstacle to it was removed. That much additional land will be taken up under the extensive reductions which the Board are about to propose on the higher classes

classes of lands, may be confidently expected, but as a considerable quantity of moderately assessed land now lies waste from want of population and capital, the spread of cultivation must be gradual, and will be neither so rapid nor so extensive as if general over-assessment had been the sole great disadvantage under which the District labours.-

23. It will be observed on referring to appendix B that the prices of agricultural produce which prevailed before our occupation of the Ceded Districts, and which Colonel Munro must have had chiefly in view, when fixing his assessment, do not much exceed those of the present time. Afterwards from various causes, they rose considerably during the triennial and Decennial leases, and Mr. Pelly argues that this increase was an advantage equal to that which the ryots received by the 25 and 33 per cent reduction afterwards granted to

Letter to B. of R. 24th. Augt. 1855 Para 21. In Cons. 15th Nov. 1855.

to them, and that consequently the ruin brought on the ryots during the leases is attributable to the weight of the Survey money rates which the renters were authorized to collect. In this reasoning, the Board cannot concur, because it is known that the survey rates were not adhered to, notwithstanding the stipulation entered in the cowles of the renters, whose extortions and exactions are freely commented upon in the records of that period.-

24. The mode in which the rents were given has been described by Mr. Thackeray-

Report of 7 I. of Oct. 1819 In Cons 29th Nov. 1819 Para 9 at Seq.

"The Villages were rented to the highest bidder and emulation was purposely existed among many candidates who bid up for the Village as much and often more than it was worth, especially when the Potails were competitors, which was frequently the case, in consequence of their reluctance to see their Villages made over to strangers-

Mr. Thackeray proceeds to observe "the system.

Fort St. George, 15th November 1855

System was altogether unsuited to the country and in Villages which were rented at a notoriously low rent, the same evils have at last been felt as in those highly rented. The explanation of this fact is to be found in the extortions of the renters to which such frequent allusion is made. Remissions were not given by them to the ryots for waste land or without crops, and according to Mr. Chaplin, they exacted a tuffreck, or extra assessment. In short, as observed by Mr. Thackeray in Para 2. of his above quoted report. "The renter always endeavoured to drain the ryots before he gave up, and in general may be considered to have impoverished them before he became a bankrupt himself." Although therefore the Board do not dispute that Colonel Munro's original rates were higher than was advisable even under the favorable prices which prevailed during the renting period, they must consider that those rates were not then really in force, and that one great cause of the ruin of the District was the introduction of the Village bases, which led to the extortions of the renters, the impoverishment of the smaller ryots, the disappearance of agricultural capital and the bankruptcy of the leading families. The effects of these evils yet remain and

Letter to Board of 6th Dec. 24th Oct. 1811 Para 7.

Fort St George 15th November 1855

and the question to be now solved is this, what has been the result of the Survey rates since they were modified in 1820/1230 and brought into actual operation by a return to ryotwary management and are further reductions still required?

25 In considering this point, Mr. Pelly justly lays great stress on the decline which has since taken place in the price of agricultural produce.

But his argument, that Government have in consequence been receiving from the cultivators more than it is entitled to and more than was intended by the framer of the Survey assessment, might lead to an inference that the proper remedy would be to grant relief to all lands at a uniform rate to indemnify the cultivators for the loss which they have all sustained from this general cause. Such a course would be injurious by granting unnecessary remission in some cases, and insufficient relief in others, and the Board will therefore

Letter of 24th August 1855 In Cons. 15th Nov. 1855 Para 24.

therefore point out the reasons for which it was not proposed by them nor indeed by Mr. Pelly himself, Colonel Munro's assessment was fixed on the average of former collections and it does not appear that the price of produce was taken directly into the calculation, but as far as the subject was considered the prices of the period before our rule when they were comparatively low, must it appears, have been in view, as the first years of our administration were too unfavorable in their Seasons to be fair guides. again the reduction proposed by Colonel Munro in 1807 to lower the Government demand to one third of the gross produce was not fixed in reference to the produce of fields, no accounts existing for the purpose, but appears to have been founded on a gross calculation of the probable outturn of entire farms or holdings. The Board therefore consider that the proper course to be now adopted, is to scrutenise the effect of the present rates of

see appendix A

Mr. Pelly's letter of 21st August In Cons. 15th Nov. 1855

of assessment on the different lands and to afford such varying degrees of relief as their state requires. In regulating this relief the present prices of agricultural produce, in comparison with what they have been at former periods and their probable future range will form an important subject of consideration.

26 The Board are impressed with the advisability of proceeding in this manner because Bellary possesses lowly assessed as well as highly, lands, and the details of its assessment show in the Boards opinion a moderate average and prove that the reform needed is not a general reduction but a modification of the higher rates so as to augment the capital and prosperity of the District by bringing its superior soils into Cultivation. The cultivated or culturable area assessed to the revenue at the survey consists of 54,3163 acres

bearing

bearing an assessment previous to the 25 and 33 per Cent reduction of Rupees 50,543/8 one third of the above sum or Rupees 16,857/5 is on irrigated land / Nunjah and Garden / and yet the average of the original rates is only Rs. 0 A. 14 P. 11 per acre. If the Cultivation of the 2 recent fusleis 1261 and 1262 is taken the average rate per acre of the occupied land, deducting the 25 per Cent remission does not exceed Rs. 0 A. 15 P. 6 and it thus appears that the Culturable area of the District must contain a considerable extent of moderately assessed land and that from various causes including an insufficiency of capital and population, all that land is not yet under cultivation.

Rate per acre	Rs.	A.	P.
Dry land	0	10	1
Wet Nunjah	7	0	11
Garden	4	11	6
General average per acre	0	15	6

27 The above details do not however show in its full extent the moderate amount of revenue which Government receive from the land under occupancy in the province. The Enam lands

18354 Fort St. George 15th November 1855

lands which are either rent free or held on an easy quitrent / Jody / are very extensive and it is well known that these grants were made in many instances by the former Government to assist the cultivators and lighten the pressure of the assessment. On this point it is sufficient here to refer to the authorities quoted in the Margin. The total extent of Enam land amounted according to the Survey ayacut to 15,62,323 acres, the assessment of which at the ordinary rates would be Rupees 20,22,893 and the resumptions since the survey up to fusly 1261 are only Rupees 2,13,25. In 1261 the Enam Cultivation consisted of 10,63,491 acres, or more than 50 per Cent of the Circar Cultivation and the quit rent levied on the portion of it not altogether rent free amounted to Rupees 1,74,998. The entire Cultivation of that fusly is entered in the margin and shows that the total sum paid to Government averaged only Rs. 0 A. 11 P. 9 per acre, although

Mr. Thackeray's Report 21 October 1819 Para 6 in Cons. 29th Nov. 1819
Letter from Govt. to Bd. 8th in Cons. 11th Sept. 1820
Dt. of Coll. Mr. Mellor to Bd. 14 augt. 1847
P. 11812 In Cons. 30th Sept. 1847

Acres	Rupees	Per acre
Circar land	1,89,579.	1.-.10.
Enam -	1,99,669.	1.-.2.7
	10,63,491	
	17,499 8	
Total	29,52,920.	2,74,627.-.11.9.

although as already observed a third part of it is levied on irrigated land. If under such circumstances the province is retrograding it appears to the Board that the people must be so wanting in industry and resources that they would be poor under any assessment. But the Board dispute the fact of retrogression although from several causes besides the over assessment of the superior lands the accumulation of Capital and extension of Cultivation have been slow and unsatisfactory.

28

The Board have entered into this detail because the reports of the last Collectors tend to convey an impression that the District suffers from general over assessment the natural remedy for which would be a general reduction while in reality much moderately assessed land now lies waste from the want alone of labour and Capital. at the same time the Board fully agree with Mr Pelly that the superior lands are assessed too high, and that this cause has

x To give one out of numerous examples In the Goolcondah taluk there are 41688 acres of black lands assessed at a Rupee and under on which Mr Pelly does not propose alterations except for the purpose of

of amalgamating some of the classes

Of this land 139[illegible] acres forming a third of the whole are now waste-

has aided in retarding the improvement of the District For a province to make any essential advance in prosperity it is necessary that its best lands should be so assessed as to be in regular tillage and augment its stock and Capital. but in Bellary this is not the case much good land being waste which under a lighter assessment would be in request. It is to be regretted therefore that the reduction made in 1820 was not carried to greater extent on the superior lands, so as to afford them the same relief which the middling and lower soils then received. Measures for this purpose are now of still more pressing necessity, because a decline in the prices of produce has virtually added to the land taken and the ryots have been relieved from the rule which obliged them when resigning land to give up bad and good, or in other words lowly and highly taxed fields in equal proportion under the liberty thus accorded to them there

is

is no doubt that much superior land in present occupancy will be abandoned unless the Government demand upon it is lowered.

29 The Board therefore propose to limit reductions to the superior clases of land, and it will be found that the arrangements which they recommend for this purpose, agree with Mr. Pelly's for the Wet and Garden lands, and differ to no very considerable degree for the dry. The lower clases of land will thus be left in their present state for though the Board appreciate the advantage of diminishing their present inconvenient number and introducing more simplicity and uniformity of system as proposed by Mr. Pelly, they consider that the necessary arrangements for this end can be most safely and effectually made after a new survey. When this proposed reduction on the superior lands is carried out, the Board feel confident that the eventual

18354 Fort St. George 15th November 1855

eventual result will be an augmentation of the public revenue and the enrichment of the province since this encouragement aided by the wise rules of giving the ryots full freedom of cultivation and resigning to them all the profits of their own improvements must stimulate agricultural enterprize. But even if seasons should offer no impediment, the available land is more than sufficient for the present population and agricultural stock is still scanty. for although the losses caused by the leasing system have been partly repaired it takes long to remove the effect of such a disaster, as the ruin of the chief land owner of a District. The benefits of the reductions now recommended may therefore come into view gradually and it is advisable not to form too sanguine an expectation

of

of an instantaneous result.

30 For some years and especially under the administration of Mr Robertson the want of capital was in some degree supplied with advantage to Government by advances of tuccavy to respectable ryots. These advances then exceeded a lack of Rupees per Annum and were repaid with great regularity. Latterly they have deminished till in 1263 they only amounted to 12000 Rs. The Board are disposed to reject this change for although they are entirely opposed to petty advances to small cultivators in ordinary ryotwary districts and have ordered their discontinuance, Bellary is an exceptional case. Considerable means are required to break up and clear its deep black lands and until Capital and agricultural stock are more plentiful the system of aiding respectable land owners with advances seems advisable

31 Other disadvantages under which the District labours will be diminished, as an extension of irrigation works wherever practicable, lessens the evils of occasional drought

brought and new roads and the railway facilitate communication with adjoining Districts and increase the value of its lands. The Board are sanguine in anticipating great improvement from this latter cause. Besides an easier outlet being given for the produce of the District, the ignorance, apathy, and slovenly agriculture which now prevail will gradually disappear as Communication with the Surrounding Countries increases the knowledge of its people and brings to it strangers of enterprise and wealth.

32 Having thus explained their general views, the Board proceed to recommend reductions for the higher classes of the unirrigated lands. To illustrate the subject, they attach to these proceedings statements (appendices B & C) showing the annual Settlement of each Talook and the average rate of assessment in this and other Districts.

33. In proceeding to offer their suggestions for

Fort St. George 15th November 1855

for the revision of the assessment, the Board will commence with the unirrigated lands. To illustrate the measures which he considers necessary for the dry lands of the entire District Mr. Pelly has selected the Goolcum talook - the reason for his choice being the alleged heavy of its assessment. But it is proper to explain that the rates are not heavier in Goolcum than elsewhere, and that its average assessment per acre is high only because the greater part of its land is of superior quality and therefore comes into the first classes. From its position and physical characteristics this talook forms a good representative of the black lands of the District. It is situated in the midst of the great Regad plain, in the heart of the District, and its irrigation is no more than sufficient to supply the domestic wants of its inhabitants. In an area of 720 square miles there are only 14 tanks and 14 wells, and the nature of the country prevents the formation of irrigation works.

Its

Fort St. George 15th November 1855

Its cultivable (Sircar) lands consists of 227,861 acres, of which 937 only are under wet cultivation, of the remainder 190,384 acres consists of black soils.

34. The annual land revenue of this talook is detailed in appendix B and has been as follows:-

	Rupees
Average of 9 years under amany and Ryotwar management from 1210/1800 to 1218/1809	107,968
Average of 19 years under Lease. 1219 to 1231	123,819
Average of next 14 years under Ryotwary 1232 to 1246	124,430
Average of next 13 years 1247 to 1259	178,406

In Cons 15th Novr 1855

In his report of the 5th March 1855 the Collector shows the settlements of the last 14 Fuslies as follows:-

	Rs.
1251	20,30,25
1252	20,18,48
1253	19,44,55
1254	19,31,91
1255	17,61,88
1256	19,87,34
1257	19,48,83
1258	18,51,11
1259	16,62,19
1260	16,98,77
1261	17,19,80
1262	18,05,42
1263	50,389
1264	15,73,94

It

Fort St. George 15th November 1835

It thus appears that the revenue reached its highest point of Rupees 20,30,25 in 1251, after which it declined to Rupees 16,67,19. in 1259 when it began to rise again until checked by the disastrous drought of 1263. Mr. Pelly observes that the settlement of 1262 was increased by some Candy lands coming under assessment, and that these and other highly assessed lands are likely to be thrown up under the full liberty now given to the Ryot. This is undoubtedly true but at the same time the above details give an encouraging view of the State of the Talook and support the Board's opinion that the reform wanted in the District is not a general abatement of assessment, but a modification of the higher rates, so as to bring the superior soils into regular cultivation. It seems impossible to dispute that the resources of the talook must have considerably increased, when in the late Fasly notwithstanding

Fort St. George 15th November 1835

notwithstanding the great drought of the previous year the Settlement shows that the Cultivation, allowing for the 25 per cent remission of 1820 exceeds that of the period before the Leasing System by upwards of 70 per cent. The revenue Continues to be realised with remarkable punctuality and readiness, and as in the time of the Principal Collector Mr. Robertson* "the sale of property for arrears of revenue is not resorted to, once in many years together."

35. This result is, the more gratifying in the hope it inspires for the future progress of the Talook, since the cultivation of 1264, must be looked on as voluntary. The order giving the Ryots full liberty was then Commencing to have practical effect, and the loss of cattle and interruption to cultivation caused by the drought of 1263 gave the Ryots a plea for only taking up such land as they really wished to cultivate. But while the result of this year shows that the agricultural resources of the Talook are greater than was supposed, experience equally demonstrates the necessity of lowering the assessment on the superior soils

*See Mr. Robertson's replies to Lord W. Bentinck's question in 1834. dated 20th June in Cons 21st August 1835.

Fort St. George 15th November 1855

soils to prevent their further abandonment. The following table shows how cultivation has gradually shifted from the better to the poorer lands, and unless an early remedy is applied the Board agree with Mr. Pelly that the change will continue to the detriment of Government, and the Ryot - especially when agriculture has not the same stimulus of high prices as in the past year.

Class of land	Extent or ayacut	Turum Say	Cultivation of		
			1217	1258	1262
1	2	3	4	5	6
	acres	acres			
Paying above Rs 3	3533	2,886			
" Rs 2	52,688	30,188	1,713	1,638	1156
" Rs 1	96,702	47,373	29,474	29,632	20,049
" Rs ½	48,648	14,902	69,905	59,124	56,517
Below Rs ½	25,353	6,753	36,132	33,826	32,982
Total	226,924	102,102	14,721	14,605	15,790
			151,945	129,825	126,524

Note.

The Turum Say in Column 3 is the land under occupancy at the time of the Survey but it includes fallow land which is now deducted from the annual Settlement under the head of Caboolaty Buyer / See Boards' letter to Government 9th October 1848 Para 6 / In the Gooleum taluk the average Caboolaty buyer Consists of 29,000 acres and Consequently that extent of land must be deducted from the Turum Say to contrast the cultivation at the time of the Survey with modern years.

St.

Fort St. George 15th November 1855

+	acres
1217	151,945
1261	126,524
	25,421
o	
1262	178,995
1217	169,776
	9,219

It will be observed that the land under cultivation in 1217 esceeds that of 1262 by 25,421 acres while appendix B shows that the Settlement of the latter year is the higher of the two by Rupees 9,219. The explanation of this anomaly is to be found in the Cowle System, the remission granted for Cowle lands in 1217 being no less than Rupees 77,971, while in the year preceding 1262 it had fallen to Rupees 8,230. Under the reductions now recommended Cowles will not be required to such an estent and the remissions thus saved forms an important item in Considering the advantages of the proposed reform.

36. The nesct step is to consider the estent of reduction which the Superior dry lands require Mr. Pelly proposes Rupees 1/2 per acre as the future Standard Maniem, except in a few occasional instances, where both Situation and Soil are peculiarly favorable, such as Superior land in a hollow or the bed of an old tank. Two main arguments are adduced in

Fort St. George 15th November 1855

soils to prevent their further abandonment. The following table shows how cultivation has gradually shifted from the better to the poorer lands, and unless an early remedy is applied the Board agree with Mr. Pelly that the change will continue to the detriment of Government, and the Ryot - especially when agriculture has not the same stimulus of high prices as in the past year.

Below Rs ½	25,353	6,753	36,132	33,826	32,982
Total	226,924	102,102	14,721	14,605	15,790
			151,945	129,825	126,524

Note.

The Turrum Sag in Column 3 is the land under occupancy at the time of the Survey but it includes fallow land which is now deducted from the annual Settlement under the head of Caboolaty Buyer / See Boards' letter to Government 9th October 1848 Para 6 / In the Gooleum taluk the average Caboolaty buyer consists of 29000 acres and consequently that extent of land must be deducted from the Turrum Sag to contrast the cultivation at the time of the Survey with modern years.

It.

Fort St. George 15th November 1855

	acres
+ 1217 —	151,945
1261 —	126,524
	25,421
-	
1262 —	178,995
1217 —	169,776
	9,219

It will be observed that the land under cultivation in 1217 exceeds that of 1262 by 25,421 acres while appendix B shows that the Settlement of the latter year is the higher of the two by Rupees 9,219. The explanation of this anomaly is to be found in the Cowle system, the remission granted for Cowle lands in 1217 being no less than Rupees 77,971, while in the year preceding 1262 it had fallen to Rupees 8,230. Under the reductions now recommended Cowles will not be required to such an extent and the remissions thus saved forms an important item in Considering the advantages of the proposed reform.

36. The next step is to consider the extent of reduction which the Superior dry lands require. Mr. Pelly proposes Rupees 1½ per acre as the future Standard Maniem, except in a few occasional instances, where both situation and soil are peculiarly favorable, such as Superior land in a hollow or the bed of an old tank. Two main arguments are adduced in

Fort St. George 15th November 1855

in support of this rate the rent which Enamdars are said to receive from the cultivators of their lands and the Survey rates lately introduced into the Deccan provinces of the Bombay Presidency. On the first point Mr. Pelly observes that Enamdars seldom receive more than one Rupee per acre and generally less, but the Board are of opinion that the rent paid for Enam land can only be taken approximately as a criterion of what the Government assessment should be as the restrictive rules placed on the cultivation of Enam land keep down their rent by lessening the number of Competitors for them, and Cultivators would naturally pay less for land from which they are liable to ejectment at the will of the Enamdar than for Puttah land which they can hold in proprietary right and improve on their own account. On the second point also, the Board consider that though Mr. Pelly has very properly preferred to

Fort St. George 15th November 1855.

to the Deccan provinces his remarks call for some observation.

37. After recommending Rupees 1½ as the future Maximum Mr. Pelly observes "It is, if I am not mistaken 50 per cent higher than the assessment on the best black land Districts of the adjacent Southern Mahrattah Country" Here Mr. Pelly is under some misapprehension, for if he alludes to the Collectorates of Poonah and Sholapoor where the average assessment is about 8 annas per acre they cannot be termed fertile Districts, although possessing much black land. They form a part of the Southern Mahrattah Country much of which is described as "exceedingly barren, perhaps the most sterile after the great ajimere desert of any of our possessions in India" and their Ryots are said to be still "poor and embarrassed" under their "fabulously low rates" In Candeish, where the soils and rocks are pronounced by Captain Wingate to resemble those of the Deccan and the same products are grown—

Cotton,

Letter of 5th March 1856. Luleons 15th November 1855. Para 4.

The Deccan ryots and their land tenure Page 19.

Ibid Page 38.

Fort St. George 15th November 1855.

cotton oilseed - Juwary - wheat, the Survey rates give an average of Rupees 2 - 9 - 4 for unirrigated land, while the best Soils pay Rupees 3/2 - under this assessment, the province though further from the Sea ports than Poonah, is highly flourishing Besides cash and an ample agricultural Stock, most farmers have their pleasure Carriages, and Captain Wingate's report mentions that farm labourers are paid in money instead of in grain, an unusual sign of advancement. -

38. So much thus depends on the general advantages of a District as well as on its Soils that any Comparison must be made with caution On the whole the Board think that Dharwar which is the nearest of the Bombay Districts to Bellary, may be best [illegible]

Fort St. George 15th November 1855.

selected for the purpose. It also contains black cotton land of superior quality and in both the principle of assessment is the same - No attempt was made to calculate nicely the produce of a field but a sum was taken for a Village or District according to the experience gained from past collections and distributed on the different fields according to their size and soil - In Dharwar the result appears to be that the best dry land pays Rupees 1/2 per acre and that the average rate on the recent cultivation is 14 annas - In Bellary it has been shewn in Para 26 that the average sum paid for dry land under occupancy in fuslies 1261 and 1262 is 10 Annas per acre and the following table taken from Mr Pellys report of 5th March 1855 Para 6 shows the range and average of the original survey rates for dry land in each Taluk but it must be remembered that all these rates except the very lowest have been since reduced 25 per Cent -

On

Fort St. George 15 November 1855.

39 On the whole therefore Bellary possesses a great extent of land more lightly assessed than in Dharwar, while its superior soils bear an assessment which is there unknown amounting in some instances after the reduction of 25 per Cent to Rupees 7-10-6 per acre. This strengthens the Board in their opinion that while a want of labour and capital have led to the non Cultivation of much land in Bellary which is really moderately assessed, the stagnation of the District is owing in a considerable degree to the high taxation of the best soils which have been inconsequence neglected instead of contributing to the wealth of the ryots—

40 In considering how to remedy this evil the first step is to fix what the best dry land is to pay, and the Board think that in so large a province as Bellary consisting of 13,000 square Miles, it will not answer

Fort St. George 15th November 1855.

answer to have one uniform rate as proposed by Mr. Pelly since the talooks are differently favored in respect of season and proximity to markets and also of soil. Caution is the more requisite in this respect as it is not found that the talooks where the assessment is highest are always in the least satisfactory state. Thus with respect to the black lands the Gooleum talook where the average rate per acre is highest, has shown the greatest increase of Cultivation, and in Sadparty which comes next, 93 per Cent of the land is under occupancy.

Talooks.	Average per Acre Rs.	A.	P.
Bellary	1	"	"
Adony	1	1	3
Gooleum	1	8	"
Cunchapellium	"	"	6
Gooty	"	"	7
Yadakey	-	13	3
Rayadroog	1	"	8
Sadparty	1	4	3

Note
These are the survey rates with one fourth deducted for the remission made in 1820-

41 To commence them with the Gooleum talook. In Para 11 the Board have detailed the measures proposed by Mr Pelly with the double object of reducing the assessment and bringing all the lands-

Fort St. George 15th November 1855

lands into a smaller number of Surnms. In modification of those measures the Board recommend the following arrangement-

All dry land now assessed above Rupees 2½ to be reduced to Rupees-

——D°——between 2½ and 2——"——1¾

——D°——"——2 and 1½——"——1½

——D°——"——1½ and 1¼——"——1¼

——D°——"——1¼ and 1——"——1

In lands assessed at Rupees 1 and under no change is proposed. This arrangement would affect 152923 acres out of the 226924 acres comprised in the Ayacut reducing their assessment by Rupees 50661. as shown in appendise D and lowering the average of the Taloo R per acre from Rupees 1-7-5 to R° 1-3-10. The financial result as compared with Mr Pelly's Plan would be as follows-

	Acres	Present assessment	Estimate assessment
A per Estimate	152923	284239	233577
Below 1 Rupee	74001	48210	48210
Average per acre	226924	332449	281787
	"	1-7-5	1-3-10

Mr Pelly's Plan

	Reduction on Cultivation Rupees	Reduction on Waste Rupees	Total Reduction on ayacut R°
Black land	23612	45011	68623
Red D°	759	1206	1965
	24371	46217	70588

Fort St. George 15th November 1855

Boards Plan

	Reduction on Cultivation	Reduction on Waste	Total Reduction on ayacut-
	R°	R°	R°
Black land	17603	31874	49479
Red D°	627	551	1182
	18232	32428	50661

In both plans the Maximum rate is Rupees 2 per acre, and the principal difference in their result arises from more land being included by the Board, than by Mr Pelly under the two highest rates of Rupees 2 and Rupees 1-12. These rates were preserved by Mr Pelly for particularly favored plots of land, while the Board Considered it advisable under the general circumstances of the Taloo R to proceed in the reform of its assessment by making reduction on a general principle-

Land to be assessed		
	R°2	R° 1-12
	Acres	Acres
Boards Plan	22153	33206
Mr Pellys	1495	11380

In

Fort St. George 15th November 1855

lands into a smaller number of Surnos. In modification of those measures the Board recommend the following arrangement-

All dry land now assessed above Rupees 2½ to be reduced to Rupees-

——Do.—— between 2½ and 2 —— " —— 1¾

——Do.—— " —— 2 and 1½ —— " —— 1½

——Do.—— " —— 1½ and 1¼ —— " —— 1¼

——Do.—— " —— 1¼ and 1 —— " —— 1

In lands assessed at Rupees 1 and under no change is proposed. This arrangement would affect 152,923 acres out of the 226,924 acres comprised in the Ayacut reducing their assessment by Rupees 50,661. as shown in appendise D and lowering the average of the Taloor per acre from Rupees 1-7-5 to Rs. 1-3-10. The financial result as compared with Mr. Pelly's Plan would be as follows-

	Acres	Present assessment	Estimate assessment
		Rs.	Rs.
As per Estimate	152,923	284,239	233,577
Below 1 Rupee	74,001	48,210	48,210
Average per acre	226,924	332,449	281,787
	"	1-7-5	1-3-10

Mr. Pelly's Plan

	Reduction on Cultivation Rupees	Reduction on Waste Rupees	Total Reduction on ayacut Rs.
Black land	23,612	45,011	68,623
Red Do.	759	1206	1965
	24,371	46,217	70,588

Fort St. George 15th November 1855

Boards Plan

	Reduction on Cultivation	Reduction on Waste	Total Reduction on Ayacut
	Rs.	Rs.	Rs.
Black land	17,605	31,874	49,479
Red Do.	627	554	1182
	18232	32428	50661

In both plans the Maximum rate is Rupees 2 per acre, and the principal difference in their result arises from more land being included by the Board, than by Mr. Pelly under the two highest rates of Rupees 2 and Rupees 1-12. These rates were preserved by Mr. Pelly for particularly favored plots of land, while the Board considered it advisable under the general circumstances of the Taloor to proceed in the reform of its assessment by making reduction on a general principle-

Land to be assessed	Rs. 2	Rs. 1-12
	Acres	Acres
Boards Plan	22,153	33,206
Mr. Pellys	1,495	11,380

In

In proposing Rupees 2 as the future rate for the best land in Goolcam, the Board have kept specially in view the survey rates fixed in Dharwar and Khandeish the assessment hitherto paid for some dry lands during a series of years in both divisions of the Ceded Districts and Kurnool and the carefully compiled Statements of produce given in the Government Agent Mr. Bayley's report on Kurnool. Mr. Bayley expresses doubts whether any reduction will be really efficacious which leaves a higher rate than Rupees 1/- on the best dry land, and the Board are aware that Bellary must be treated liberally in Consequence of the uncertainty of its rains and the difficulty of improving its dry lands more particularly the black soils. by the ordinary means of sinking wells and planting trees. But they believe

see Printed selections from the Records of the Madras Government No. 8

believe that the rates now proposed by them will leave to the Cultivator fully three fourths of the profits produce calculated on the most liberal spirit that is

According to the table at Para 14 of Mr. Bayley's Report on Kurnool the produce of slovenly cultivated black land of the 1st class was found to range from 450 to 310 Madras measures per acre assuming it to be 400 Measures and taking 25 per cent as the Government share the assessment would be Rupees 2 at a commutation rate of 50 measures for a Rupee. In Bellary 37 measures are the average and the ryot has only had to give 50 measures in occasional years.

It will be observed that the Board's scheme would affect 4 out of the 6 classes into which Mr. Bayley devides the Black lands.

The Board have no accounts of the produce of dry lands in Dharwar but if this correctly estimated at an average of Rs. 2 per acre (see "The Deccan Ryots" Page 102) it is much less than in the ceded Districts and Kurnool.

is to say taking the returns of unmanured and Slovenly cultiva=ted land and Converting produce into money, not on the average of Several years, but at the rate to which prices have occasionally fallen in years of depression —

So.

so as to give the ryot the entire benefit of any superior husbandry he may employ and secure him against fluctuations of the market — Under this arrangement the best lands which after the 25 per cent reduction now pay Rupees 5-6 and Re 4-6 as per acre will receive a further reduction of 60 and 53 per Cent: and it seems advisable to try the effect of this modification before giving up more of the Government demand since modifications in Bellary must affect Cuddapah and Kurnool it is almost impossible to raise rates once lowered: and the Railways and other improvements of communica=tion may give a great additional value to land even in the present state of the District the Board believe that the reductions now recommended will effect the end in view of making the superior lands in request and stimulating Agricultural enterprize It is also to be remembered in instituting any comparison between Bellary and the Deccan Provinces, that in Bellary Government takes the principal risk and loss of bad seasons by

by foregoing demand for assessment for one year when dry land is not cultivated an ancient practice which it would be difficult to alter but in Dharwar and the other Deccan Provinces a ryot is called upon to pay for every field which he retains in his name in the Village books, "without reference at all the circumstance of its being waste or cultivated" The Bellary ryot has thus an advantage as he is equally permitted to resign land before the Fusly commences by a formal Razeenamah.

See Revenue Rules republished "The Deccan ryots" Pages 28 & 34

43 If the arrangement thus proposed for Gooleum is approved by Government, the Board propose to extend it to the dry lands of the following Talooks

1 Punchapollium
2 Gooty
3 Adony
4 Bellary
5 Worponelly
6 Havendahoogly
7 Kumply
8 Hoodleghy

The first four of these Talooks surround Gooleum and consist like it principally

principally of black plains. The other four are situated near the Dharwar frontier and posses lands of various descriptions.

44 The Ryadroog Talook, appears from its very depressed state to require a greater degree of relief It is situated to the South of Bellary and contains principally black lands which, either from inferiority of Soil or greater uncertainty of season, have been extensively abandoned while in the Bellary and Gooleum Talooks a considerable increase of cultivation has occurred - Its unfortunate condition is specially alluded to in the Principal Collector Mr Thackeray's report of 21st October 1819, and no improvement has since taken place. Its land revenue in 1214 and 1215 exceeded 2 Lacks of Rupees, and gives an average of Rupees 1,64,169 from 1210 to 1218 F. while in 1262 F. the late ordinarily favorable year, the settlement was only Rupees 1,17,773 The decline in its cultivation as will be apparent from the following Cabooleaty account or Statement of its dry

See Appendix B

In Cons 29th Nov. 1819

by foregoing demand for assessment for one year when dry land is not cultivated an ancient practice which it would be difficult to alter but in Dharwar and the other Deccan Provinces a ryot is called upon to pay for every field which he retains in his name in the Village books, "without reference at all the circumstances of its being waste or cultivated" The Bellary ryot has thus an advantage as he is equally permitted to resign land before the Fusly commences by a formal Pazeenamah.

dry

dry lands under occupancy at two different periods.—

	Black	Mixed	Red	Total
	acres	acres	acres	acres
Fusly 1216	69347	12935	91894	174175
" 1262	31979	6285	60298	98562

Such a series and long continued decrease of cultivation argues that the lands of this Talook are under a greater disadvantage than elsewhere and stand in need of more extensive relief. The Board therefore recommend reductions to the full extent proposed by Mr. Pelly though in this somewhat altered form With the exception of the few favored pieces of land to be assessed at Rupees 2 and Rupees 1¾ per acre the Board propose to make Rupees 1½ the Maximum rate, and to regulate the reductions in the following manner

All land now assessed above Re. 2 to be reduced to Re 1 ½
Ditto from Re. 2 to Re 1½ to be reduced to Re 1¼
Ditto from Re 1½ to Re 1 Do. to Re 1

On lands which now pay less

less than Rupee 1 no alteration is intended

45 There still remain the 2 Talooks of yadaky and Tadpurty on the Cuddapah frontier containing principally black land and 5 Southern Talooks where the mixed and red soils prevail. In the two former, cultivation is regular and extensive, and their comparatively prosperous condition agrees with the favorable account which the Collector of Cuddapah gives of the black land portions of his District Their state shews that they require less reduction than Goolcum, and it is necessary to wait for the detailed Deetwar accounts and the further information which the Collector is preparing before proposing any definite arrangement for them and the Southern Talooks but the Board are of opinion that no dry land in Bellary should be assessed at more than Rupees 3 per acre They therefore propose that the Collector should be authorized at once to bring down to that rate all lands which exceed it and also to grant a temporary

Para 10

temporary remission of 10 per Cent on lands now paying from Rupees 2 to Rupees 3 an acre. This latter measure would give some immediate relief and check a tendency to seek cheaper land in the adjoining Talooks.

46 Judging by the result of their proposed measures in the Goolum Talook the Board estimate that their general result would lower the Govern=ment demand on the dry lands in present occupancy by a lack of Rupees, while the estimated decrease under Mr Pelly's plan is Rupees 179,150 The un=occupied dry lands of this District forms so vast an area that under the stimulus which would thus be given to agriculture, the Board expect that this decrease of Revenue would be soon made up by an increase of cultivation

47 The irrigated lands next call for attention and the Board will first observe that they propose now only to reduce the assessment on lands which appear overtaxed, postponing until a new Survey as to the

18354 Fort St. George 15th November 1855

the dry lands, any general reclassification with a view to diminish the present defects or classes.

Mr Pelly's first proposal is to make Rupees 12 per acre the highest rate for a single crop or irrigated land, whether now registered as Nunjah or Garden. The Board strongly support this recommendation as such an assessment appears to them ample for a single crop on irri=gated land in Bellary, where neither the discriptions of Nunjah & Garden produce, nor the prices obtained for them afford valid reason for the enormous rates which now exist on the superior lands

For lands paying between Rupees 12 and Rupees 6 Mr Pelly proposes to recommend future reductions which he estimates generally at 25 per Cent But pending a detailed enquiry into their condition he requests sanction for giving a temporary remission of 12 per Cent, and the Board concur in this recommendation

For

For lands paying less than Rupees 6 the only change now contemplated is to transfer such as are found on examination to have no means of irrigation to the head of unirrigated on a suitable as=
=sessment.—

The proposed rules for taxing a second crop are as follows: Half the assessment to be charged when a second crop is grown on lands irrigated by a tank or channel but well lands are to be exempt from such a charge. This dis=
=tinction appears to the Board just, as much labour is required to raise water from wells, and they recommend the arrangement as one which will simplify and greatly improve the present system

48 To carry out the reform fully and remove all special taxation upon particular produce, it is necessary to give up an item termed "Rivaj Jasty" consisting of a tax on some old Betel and Cocoanut Gardens in addition to the Iyen assessment. It is not levied on Gardens planted since the survey and

From Colln 29th Nov. /53
In Cons 15th Jany /55)

and this extra demand on the old gardens is often from necessity omitted at the settlement under the head of Mamasil Cummey - The sum to be given upon this account may be esti=
=mated at Rupees 20,000. and as the tax is partial as well as founded on a highly injurious principle the Board recommend its immediate abolition - On the subject of dividing the lands into the two heads of irrigated and unirrigated Mr Pelly observes he has considered it necessary to place well lands under the former head (except where the wells are private property) because the wells belong to Government and form valuable sources of irrigation He also proposes to bring under the same head lands which have been furnished with irrigation since their original Assessment and now appear in the accounts as "dry" "converted into wet" The Board approve both these ar=
=rangements.

It has appeared unnecessary

49 to

to enter into a discussion of the supposed produce of the wet lands, because there is nothing to distinguish them from similar lands in other Districts and the rates which have been sanctioned by Government for North and South Arcot justify Mr. Pelly's recommendation. The present high rates could not be realized even if it was expedient to do so, now that the ryots have received full freedom of cultivation and are allowed to throw up any particular fields at pleasure, without abandoning an equal quantity of what was termed surus Nirus or highly and lowly assessed land Mr. Pelly shews that already they are very extensively availing themselves of this privilege and in a Country exposed to drought like Bellary the public interests require that no irrigated land should remain uncultivated. It should be so assessed as to be always in request and while enriching its owners should add to the general stock of the Country, and assist the dry districts with forage and grain when the local rains on which they depend unhappily fail

In Cons 15th Nov 155

Having

50 Having thus expressed their views for modifying the assessment on the irrigated and unirrigated lands, the Board proceed to notice that part of the reformatory arrangements submitted by Mr Pelly under which the assessment on the Enam lands is to be reduced to the same extent as the Jyen. The Board are not prepared to recommend such a measure as when Enam lands lapse to Government the collector may be empowered to reduce their assessment on the scale sanctioned for the Jyen lands of the class to which they belong and measures of relief can be proposed on individual cases where an Enam does not give a fair remuneration for service performed or where the Jody or quit rent demanded is unduly high and amounts to overtaxation. To reduce the assessment on the Enam lands generally would, as far as the measure had any practical effect, be to bring them into more powerful rivalry with the Jircar lands and this result is to be deprecated. The measure might also lead to an idea on the part

Collector's letter
of the 24th augt
In Cons 15th Nov 155
Para 32.

part of the Enamdars that new lands ought to be given to them to raise their Enams to the original amount. The Board therefre omit entirely on this occasion the subject of Enam lands, concurring in an observation of the Collector that the assessment of Sircar lands is to be fixed independently of Enams according to its own value and productiveness. The question of the Enam lands with the restrictions to be continued or newly placed on their cultivation naturally forms a distinct subject

° Letter from Collector of 24th augt in Cons. 15th November 1855. P. 31

51 To enable the Collector to proceed with the revision of the assessment it appears to the Board essential that he should have the aid of a special Assistant to relieve him of a portion of his ordinary duties. They also strongly recommend that measures should be taken for re-writing the land registers of the District those which now exist shew the assessment in the absolete currency of

of Canteroy Pagodas, and contain only the rates originally fixed at the Survey. There is consequently much unnecessary annual labour in converting the settlement demand into Rupees annas and pice and entering in the Puttahs both the original assessment and the demand (or wassoly teerwah) after deducting the per centage of 1/4 and 1/3 remitted in 1820 another consequence of this practice which has attracted the unfavorable notice of Government is that an annual remission of several lacks of Rupees appears in the Settlement Reports on account of a reduction which has been permanently made in the assessment and ought therefore to be entirely excluded from the annual demand To rewrite these registers will entail considerable labour and expense but the Board consider that it should be done both in Bellary and Cuddapah, to simplify the annual settlement and make the people distinctly acquainted with the limit of the assessment for which their lands are answerable. The Board think that the new Register should shew the Original Survey assessment both in Canteroy Pagodas and Rupees, annas

Pice

Vice - That all subsequent authorized re-
-ductions should be entered in them in the
latter currency only and that the reduced
assessment, which now forms the real
demand, should alone be entered in the
Ryots Puttahs

52 In conclusion the Board are
led to hope that the orders of Government
may soon be received, as the prospects
of the season are again unfavorable
in Bellary and any new stimulus
given to its agricultural energy will
be of great importance. This is
particularly the case with the
irrigated lands much of which
will be abandoned according to the
Collectors report now that full
freedom of cultivation has been given
if their present enormous assessment is
not reduced and the circumstances
of the District require that no

means

DG

18355 Fort St. George 15th November 1855

No. 226.

To G. S. Forbes Esqre
Acting Secretary to the
Board of Revenue
Fort St. George

(445)

Bd. No. 2648
From the Collector of Chingleput.

Submits correspondence with the Major General Commanding St. Thos' Mount regarding the right of the Zemindar of Palaveram to rent certain lands in the Cantonment

(From Dy. Asst. to the Offg. Comg. Mount & Dy. Asst. to the Offg. Comg. Mount & Asst. to the Offg. 1855.)

Sir

Para 1 I have the honor to forward the correspondence noted in the margin with the Major General Commanding the Mount, relative to the right of the Zemindar of Palaveram to levy rent from his tenants in the Cantonment, from which the Board will perceive with reference to their instructions conveyed to me in Mr. Sim's letter of the 7th July last, that the preliminary enquiry regarding the matters at issue and the conclusive evidence of the Zemindars rights afforded by my investigation have failed to satisfy the Major General who continues to refuse the aid of the Military Police to the Zemindar and persists in depriving him of his long established and heretofore recognized rights under the plea of their being infractions of G. O. G. 30th October 1819 and Section V Regulation VII of 1832. and I have accordingly the honor to request that the Board will be good enough to submit the whole

Fort St. George 15th November 1855

whole of the correspondence for the consideration and Orders of Government, in view to their putting a Stop to the present and future objections of the Major General and his Successors in the Mount Command, and recognizing the Collectors revenue accounts and Records alone as the only definite authorities for disposing of disputed rights to land within the Cantonment.

2. The Board will perceive that in opposition to the voluminous and Satisfactory evidence I have afforded of the Zemindars' rights, Major General Blundell has not attempted to advance any though the Records of the cantonment Office must I presume Contain all the Orders of Government Conveyed in Minutes of Consultation and accompanying Correspondence regarding the various acquisitions of land in the Cantonment, shewing whether they had been made by purchase and remission of Peishcush for Government use or only for purposes of Police and local Convenience without deprivation of existing proprietary rights and would have enabled him to prove that the Zemindars' rights to the land now in dispute had been purchased of him by Government for Military requirements if such had been the case, I therefore request under the Circumstances the favor of the Board's expediting the reference to Government with as little delay as practicable, as the matters at issue are of great importance to the Zemindar who has frequently applied to me for a Settlement of his claims and [illegible] being

Fort St. George 15th November 1855

so long kept out of his legitimate and accustomed rents.

3. I enclose the map of the Cantonment shewing the boundaries of 1811, and 1822 in elucidation of my letter to General Blundell of the 8th Instant No. 161, and which I request may afterwards be returned to me.

Chingleput District Collector's Cutcherry
Sydapet, 11th September 1855. } (Signed) C. I. Shubrick
Collector

No. 1
No. 161

To
The Brigadier
Commanding St. Thos' Mount

Sir,

I have the honor to forward the accompanying Copy of a letter from the Board of Revenue of date the 7th July 1853 Communicating their Sentiments on the correspondence which recently passed between this Office and yourself on the Subject of the right of the Zemindar of Palaveram to levy rent on certain lands in the Village of Parthevanken within the boundary Stones of the Cantonment The Board you will observe desire that before a reference is made to Government I should apprize you of the evidence which appears on my records in favor of the right claimed by the Zemindar. I could have furnished you with this information at a much earlier date, but as I have since received another Complaint from the Shrotriumdar of Adumbakum of his being likewise prohibited from levying rent

on

Fort St. George 15th November 1855

on his lands apparently under the same belief that you formerly expressed of all the lands in the Cantonment being the property of Government, I have deemed it advisable to extend my enquiries and as well as I am able clearly define to you the lands belonging to private Proprietors which have been included in the Cantonment without Compensation and from which the Proprietors have in Consequence a right to derive a Revenue. As these lands were not distinguished in any maps of the Cantonment. I had to collect the necessary information from the voluminous records of my Office and some Papers furnished to me by the Deputy Quarter Master General of the Army, and I shall endeavour to give a resume of the whole Correspondence, so that all the various alterations and enlargements of the Cantonment limits may be placed in a clear light, and admit of ready reference for the future.

To-

Fort St. George 13th November 1855

2. To avoid any Confusion on this Subject I shall in the first place premise that there are two different kinds of rights in lands One the right of the Ryot or the tenant to the occupancy of the lands which in the Cantonment were partly purchased by Government and partly not, but with which I have nothing to do at present, the other "the Proprietary right" so called, that is the right of Government to derive a revenue from all lands, and which both the present and former ruling Powers have alienated in favor of the Zemindars and Shrotrimdars for purposes of their own, and whenever it suited them to do so in virtue of which the Proprietors became entitled to Compensation whenever their lands were afterwards taken away from them whatever they might be, whether irrigated or dry Cultivated, or waste.

3. The Cantonment of St. Thos' Mount as defined by the present boundary Stones

Comprizes

Fort St. George 15th November 1855

Comprizes as you are aware the lands of 6 different Villages, Viz, Nundambaukum, Meenumbaukum, Palavuntongal, Alundoor, Parithivaukum, and Adumbaukum. The first three originally included in the boundaries of Codumbaukum Palaveram and Velacherry having reverted to Government, there are no proprietary or private rights concerned in them, of the others Alundoor and Parithivaukum belonging to the Zemindar of Palaveram and Audumbaukum is a Shrotriem Village. The lands claimed by the Proprietors in these Villages are all situated with one single exception, the Paddy fields referred to in Para 8, to the South east of the Bengalee Bazar Road.

4. The first mention of the boundaries of the Cantonment which occurs in my records is in 1805. In that year Mr. Hepburn the collector marked out the limits of the Cantonment by boundary stones according to what "had usually been considered its ancient limits" which he believed were excluded from the estates sold to the Zemindars in 1802. He also furnished a Plan of these limits to the Board of Revenue copy of which is not forthcoming on my records but this is of less consequence as the limits in question were subsequently found to be objectionable comprizing within them the lands of certain Zemindars and a considerable portion of the area of Adumbaukum which had for a long time anterior to 1802 and even before our acquisition of the Country been held on Shrotriem tenure.

5. Accordingly the Board of Revenue on the 8th September

× Letter to Board 2d May 1805

Letter to Bd 10th Dec 1811
From Do 25th June 1812 Para 5.
To Do 25th Jany 1813.
From Do 11th March Do Paras 7 & 8
Do 4th June 1812 P2
To Do 25th July 1813

Fort St. George 15th November 1855

September 1814 issued instructions to the then Collector for ascertaining the claims of the various Parties interested in the above lands and about the same time the limits of the Cantonment were enlarged

From Bd 21st March 1814,
To Do 3 Sept 1814,

by the addition of 171 Cawnies of land situated to the northwest of the Palaveram Road and a small Hill, required for the exercising ground of the Horse Artillery and Solitary cells. Accounts of all these lands were prepared by the Collector and Submitted to Government who sanctioned the necessary remission from the Peishcush of the Zemindars, and Shrotriumdars in Minutes of Consultation dated the 21st June 1817 and 18th March 1819.—

× To Bd 2 June 1816
From Do 3 July 1817
Do Do 24 Sept 1818
To Do 10th Oct 1818
From Do 28th Dec 1818
To Do 11th Feby 1819
From Do 29th March 1819

6 The extent of ground thus Compensated for and the amount of annual remission allowed for the same are shewn below.—

Names of Villages	Extent of land occupied Cs	As	Annual remission Sanctioned Rs	As	Ps
Alundoor	21	12	38	1	"
Parithwaukum	11	"	19	4	"
Adumbakum	133				
Do for the Drill ground of the Horse Artillery	5				
	138	"	111	3	11
Meenumbakum for the Drill ground	11	14	6	11	5
Palavuntangul	15	7	22	6	4
Nungumbakum for Do 113 12	288	12	288	2	4
Do for other purposes +					

Fort St. George 15th November 1855

The remission of Course is now only granted on the three Villages still belonging to private proprietors. Besides the above 288 3/4 Cawnies in the Village of Alundoor were also included in the Cantonment for which no Compensation was necessary as they had been excluded from the assets on which the Peishcush of the Zemindar was fixed in 1802.—

7. All the subsequent enlargements of the Cantonment limits were made without Compensation to the Proprietors and solely for Police purposes. The first of these additions was made in 1821 and 1822 Consequent on the enactment of Regulation VII of 1821 for vesting the Commissariat Officers at Military Bazar Stations with police authority and happily the limits of the Cantonment as they had previously stood up to that period, and the additions then made to them are distinctly shewn in the maps prepared by the Collector and Colonel Hayes, Commanding the Mount, with which I have been furnished by the Deputy Dr. Mr. General of the Army. The one prepared by Colonel Hayes being the best and clearest, is herewith forwarded

Fort St. George 15th November 1855

shewing the boundaries of the Cantonment prior to to 1822 ie of 1814, the lands of which had received Compensation, and which are shewn by a Red line; and the addition proposed to be made in 1822 for Police purposes by a Green line, and for which no Compensation was paid.—

8. You will observe that Commencing from Sahibs Choultry at the entrance of the Cantonment the Red line which defines the "former boundary" excludes a quadrilateral figure now occupied by Paddy fields situated between the direct Road to Ft. Thos Mount and the Bengalee Bazar Road, and which belongs to the Zemindar.—

9. Then intersecting the Bengalee Bazar Road at the Spot where that Road and a Road running towards the Race Course meet, the boundary line takes in a triangular piece of ground belonging to the Village of Parithwaukum now occupied by a Paracherry and chuchlers Huts, and bounded by the Bengalee Bazar Road, a Road leading to the Adumbaukum Paracherry, and a street, which you will find marked in pencil in the large Map of the Cantonment prepared by Mr Vanderspeett herewith forwarded x. The Zemindar would appear to be in the receipt of rent from 3 small Gardens Comprizing 3/8 of a Cawny within these limits whether he

x To be returned

Fort St. George 15th November 1855

he is absolutely entitled to them or not, can be ascertained by measurement if necessary, though this is scarcely so, for present purposes as they are not among the lands discussed in the former Correspondence. The lands of Parithiwaukum for which the Government granted Compensation being only 11 Cawnies any excess within the boundary stones would be the property of the Zemindar and liable to pay him rent.—

10. The red line then runs along the Bengalee Bazar Road to the late Sayer Chowkey at the other end of the Cantonment separating the lands of the Zemindar of Palaveram and the Shrotriumdar of Adumbaukum from those of the Government, and then turns off to the North excluding the Drill Ground of the Horse Artillery occupying 17½ Cawnies for which Compensation was paid in 1814, and which therefore ought to have been included as stated in Mr. Smalley's letter of the 9th November 1821 to the Secretary to Government, but which Colonel Hayes sanction or other seems to have left out.— Beyond the line enters on Government land where it need be followed as no proprietary rights are affected by it

× Vide Para 5.

Fort St. George 15th November 1855

11. It is thus clearly established that all the lands within the Bengalee Bazar Road from Sahibs Choultry to the late Sayer chowky, together with the triangular piece of ground in Parithiwaukum excepting the 3 Gardens therein, which remain for future enquiry and the Paddy fields referred to in Para 8, belong to Government, and that the boundary Stones beyond include lands for which the Proprietors have received no Compensation and which they therefore retain under their own management, the Cantonment jurisdiction extending over them only for police purposes.— In proposing the enlargement of the Cantonment in 1821, Mr. Smalley wrote as follows to the Secretary to Government.

"There is still an addition required to render the Cantonment perfect in a police point of view. This will be done by marking off a piece of ground on the South east side of the Cantonment which is occupied by the Military Lascars &c. and a Pariah Village inhabited by persons connected with it."

12. The subsequent additions are quite unimportant

unimportant. In 1827 certain lands were purchased from the Meerasidars and other occupants in Government Villages for extending the Artillery

To Bd 25th July 1830
Fy Do 18th July 1831

Practice Ground, and in 1830 additions were made to the Karkhana lines. The addition of

Fy Bd 23 Decr 1852.

Noble Pettah or Noble Parachery was also intended, but was not carried out. This was done in 1853 but it was at the time distinctly explained that the addition was only for the convenience of the Camp followers and for Police purposes and was not to interfere with the proprietary rights of the Shrotriumdar of Adumbaukum in whose Estate the Pettah is situated and to whom the inhabitants paid rent.

13. Having thus laid down what appears from my records to be the boundaries between the Government and Zemindary and other private lands within the Cantonment, I have only to observe that they seem to accord with the rights that have hitherto been generally exercised by the Zemindar and Shrotriumdar, and which I therefore request you will infuture be good enough to continue to them

them without let or hindrance - These Individuals hold Moochilkas from their tenants on the land in question of various dates extending so far back as 1826, affording ample proof of their having exercised their rights uninterruptedly to the present time, and for the Continuance of which I have again the honor to request the aid of the Military Police whenever it may be necessary to assist them in realizing their rents, whether from Camp followers, Sepoys, or private Individuals of any kind.

Enclosure No. 2.
No 1148

To
C. J. Shubrick Esqre
Collector of Chingleput

Sir

I have the honor to acknowledge the receipt of your letter of the 8th Instant No 1161, and after careful perusal of the same, I regret to say I am unable to coincide with your view and must again refer you to G.O. G. 30th October 1819 and

18368

Fort St. George 15th November 1855

and Section V Regulation VII of 1832. From these, it appears to me that I am not justified to enforce the payment of ground rent with the aid of the Police, as the parties who occupy these houses and Shops are registered Bazar men and Camp Followers and the Ground in question has been allotted to them from time to time to build houses under the orders of the Officer Commanding the Station, which is within the Military Bazar limits. Should Puttahs have been given by certain Individuals to the Zemindar and Shrotrimdars I am of opinion that they might have done so through ignorance not being aware of the Regulations above quoted. From the foregoing circumstances, I would suggest the advisability of Zemindars and Shrotrium Farms suing such parties at the Civil Court if they think they have right to certain land defined within the Military Bazar limits. The 2 Plans are herewith returned.

Fort St George 15th November 1855

To
G. S. Forbes Esqr
Acting Secretary to the
Board of Revenue
Fort St George

(446)

Bz No 3276

From the Collector of Chingleput

Sir,

With reference to the Endorsement of the Board of Revenue dated 31st October 1855 on the accompanying Petition No 2975 of 1855 from the Shrotriemdar of Atdiambakkum, complaining of the interference of the Police at St Thomas' Mount with his collection of rent on his Shrotriem Lands, I beg to refer the Board to my report dated 14th September last on which I await their early orders.

Chingleput District.
Collector's Cutcherry
Sydapet, 10th November 1855.

(Signed) C. J. Shubrick
Collector

Bz No 3043.

Proceedings thereon.

Submitting letters from the Collector of Chingleput and requesting Government to direct an enquiry to be made by the Military authorities in conjunction with the Collector and to state what portion of the Lands of the Zemindar of Pallaveram is required for public purposes and to purchase the same from him.—

(445-447)

The Board of Revenue resolve to submit the above letters with their enclosures for the orders of Government.—

2

It appears that the Zemindar of Pallaveram, who is stated to be the Proprietor of certain Lands situated within the Cantonment of St Thomas' Mount being desirous of distraining the property of his tenants for arrears of rent, the Major General declined to allow him to do so, and the Zemindar in consequence complained to the Collector that he is thus deprived of a portion of his income.—

Mr Shubrick contends that the grounds

3

ground for which the Zemindar claims rent has never been purchased by Government for military purposes, and represents that the Zemindar has in some instances been accustomed to receive rent and holds Moochilkas from his tenants on which they engage to pay fixed annual sums.—

4. The Major General argues on the other hand that the parties called on to pay rent (or at least a portion of them) are Registered Bazarmen and camp followers and occupy ground within the Military Bazar limits allotted to them from time to time under the orders of the Officer commanding the Station — consequently they are not liable to be called upon to pay any ground rent according to G.O.G. 30th October 1819 and Section V Regulation 7 of 1832.—

5 The Board concur with the Collector that the question turns on the point whether the land belongs to Government or to the Zemindar. If to the latter, he would be authorised to demand rent for it, and to realise his claim by summary distraint if the ground was given for cultivation on a puttah, or otherwise by a Civil suit. The G.O. and Regulation to which the Major General refers are only in force with respect

respect to ground the property of Government, and cannot debar a private Proprietor from the enjoyment of his rights.—

6 But as it would be manifestly inconvenient for the Civil authorities, whether of the Revenue or Judicial Department, to execute process of distraint and sale in a Military Bazar, and the present correspondence does not shew in detail what portion of the disputed ground is virtually used for Military purposes as the site of a Bazar or otherwise; it occurs to the Board that Government may see fit to direct an enquiry to be made by the Military authorities and the Collector in conjunction, to ascertain this point. Government may deem it advisable to purchase from the Zemindar such part of his land as is within the Military lines and Bazars, while they leave to the ordinary Jurisdiction of the Civil authorities all his other land which though not required for Military purposes happens to be within the Police limits of the Cantonment. If this suggestion should be acted upon, the Collector might be authorized not to press the Collection of a suitable portion of the Zemindar's peishcush until this enquiry is completed.—

Read again return from the Collector of Madura, of public Servants suspended during Quarter ending 30th September 1855 of 30th September and entered in My Consultation 6th November 1855.—

The

Fort St George 15th November 1855

Bd No 3038
Proceedings thereon

448

The Board object to the indefinite suspension of public Servants except in Cases where they are suspended pending inquiry. They therefore request the Collector to fix a definite period for the suspension of Ramasawmy Pillay entered in this Return.—

449

Read again List dated 6th October and entered in My Consultation of 12th October 1855 of letters addressed to the Board from the Collector of Tinnevelly

Bd No 3036
Proceedings thereon.

The Collector is requested to omit from his future arrear lists his letter dated 8th December 1848, as no further orders appear necessary with reference to the papers noted in the Margin. He is also desired to strike out his letter dated 2nd September 1854, as the number of the copies of the work referred to was distributed according to the orders of Government. Mr Bird is informed that the books are public property and are to be attached to the office and not to the Officer.

Bc. No. 2909

From the Asst. Collector of Canara

I have the honor to submit the following Report upon the Land Revenue Settlement and Extra Sources of Revenue of this District, for the past Fusly 1264 / 1854/55 as required by the Board's Circular letter under date the 21st June last and to forward the respective accounts and Statements as noted in the Margin. This Report is drawn up in the form made use of last year, and as much in accordance with the Boards Circular of the 14th September 1854 as the circumstances of the District permit.-

General Report in the Revenues of the District for Fusly 1264. - A.D. 1854/55.

Land English Bc. Nos. 4 to 8, 12 to 15, 17-19 22 to 24 & D. No. 23.

Vernacular D. No. 24

Extra Sources English Nos. 1 to 15 & A B & C

2.- The following portions of the district were settled by Mr. Malleby, Viz.t Mangalore Talook at Mangalore; Bekul at Munjeishwar and Cafsergode; Buntwal at Bettrungaddy and 4 Moganies of Pootoor at Operungaddy.-

3.- Mr. Pelly the Head Assistant Collector made the Settlement of the remaining 8 Moganies of the Pootoor Talook at Pootoor; of Bodipy at Bodipy and

18379 Fort St. George 15th November 1855.

and of Barcoor at Brahmawer.-

4. Mr. Robinson the additional Sub Collector settled the Talooks of Cundapoor at Cundapoor, Nagody, and Byndoor, the Talook of Honore at Honore, Coompta and Moordeshwer and that of Ankola at Ankola and Sadashigur.-

5.- The Settlement of the Balaghaut Talooks was made by me, Viz.t that of Soopah at Yellapoor, Moonegode Hullial and Jungle patt that of Soudah at Sircy and Bunwassy- and that of Bilghi at Bilghi and Siddapoor.-

Irrigation. 6. The sources of irrigation in this district, with the nature of which the Board are well acquainted were so fully brought to notice in last year's report, as to need no description now. The next Return of these works will be due in 1268.

General Statistics 7. The General Statistics regarding agricultural stock, Population &c. will also be given in 1265. when the censes will be again taken. No comment is therefore considered necessary on this head in the present report.

Season. 8- Except in the Ballaghaut, the rains were more abundant than in the previous Fusly, and there the decrease exhibited.

Fort St.e George 15th November 1855.

exhibited is partly owing to the Pluviometer being removed from Sircy to Buinwassy, which being 15 Miles further inland is not subject to such heavy rain as other places near the edge of the Ghaut. The Marginal Statement exhibits a Comparative view of the fall of rain in the different Talooks during the past and previous year.-

1263	3329	399	3728
1264.	3068	908	3976

9. The annexed Statement exhibits the number of deaths from Cholera and Small pox and the latter decease appears to have been more fatal in Fusly 1264 than in the previous year. These epidemics prevailed chiefly in the Payenghaut Talooks

F. 1263. 10356.
1264. 13950.

10. The loss of Cattle has been considerably greater during the past than in the previous year

Fort St.e George 15th November 1855.

year. This is to be attributed to the early close of the Monsoon, and the consequent deficiency of pasture throughout the season.-

Prices App.x No. 6.

11. The prices obtained for the staple produce of the District has been very favorable to growers. That of rice especially has been particularly high.

12. In the report for last year, Mr.r Maltby observed that the price of rice was then higher than it had been for 14 years; but during the present year a still further rise has taken place. This is to be attributed to unusual demand, whilst the imports from above the Ghauts were not so extensive as heretofore. The subjoined table exhibits the prices of the last year, as compared with those of Fusly 1263, as well as the average of the five previous years.-

The

Fort St.t George 15.th November 1855.

14. The increased price of Pepper is to be attributed to the lowness of the Stock on hand consequent on the large exports of last year.—

15. The present value of these products when compared with that which they had attained previous to the abolition of the Howlut duties are given below. they account for the improved condition of the people and show the value of good roads. Prices have hitherto risen steadily notwithstanding the increased quantities of these valuable products which each year brings to Market.—

	Betelnut per Candy			Pepper per Candy			Cardamams per Candy		
	Rs	A	p	Rs	A	p	Rs	A	p

Per Centage	28	6	"

16. The Statement in the margin shews a great increase in the price of Cocoanuts, whether compared with the previous year, or the average prices of former years. This rise would seem to have been occasioned by demand in European Markets, which has occasioned large exportations and at the same time operated against imports by sea.-

Fort St. George 15th November 1855.

21. The several items of additions and reductions made during the Settlement are shewn in the Statement No. 13. The amount of reductions not being unusually large this item calls for no explanation.

Appendix No. 15 Vol.

22. The revenue derived from the Cultivation of Coomry Amount to Rupees 12735-5-11 and exceeds that of the previous year by Rupees 1377-13-10. This however is to be attributed rather to cultivation being more correctly brought to account under the present System, than to any increase in the area Commenced.

1263 - 11357-8-1
1264 - 12735-6-11
Increase 1377-13-10.

2. The Marginal Statement gives the extent of land cleared for Coomry during the year both on private Estates and along the sides of roads. we cannot place much dependance on the Betul accounts perhaps, but a Considerable reduction in the Kind of Cultivation has probably taken place in that Talook.

Fusly	Betul Talooks		other Talooks		Total	
	Nool	acres	Nool	acres	Nools	acres
1262	416	9,936	1352	2,318	1,768	12,254
1263	91	4,336	1331	2,448	1,422	6,784
1264	161	5552	1582	3,100	1,743	8652

			16,081 "	298	27

The

Fort St. George 15th November 1855.

24. The Huckle or dry cultivation is certainly increasing. The Talook wardetails are exhibited in Statement No. 15. Huckleland is mostly assessed at 8 annas per acre. The increase in the present year occurs chiefly in the Talooks of Soopah and Bilghi. The Ryots of Bilghi Talook used to complain that the above rate of assessment was too high. The present increase in this Talook, where Huckle land is not abundant shews that this cultivation is attracting more and more attention among the Ryots every year. The extent of Huckle Cultivation is exhibited in the annexed Table.

Fusly

1839 | Fort St. George 15th November 1855.

25. The amount to be collected this year as per last years account, is Rupees 1257-15-4 out of which Rupees 1159-1-8 have been brought to account, the balance Rupees 98-13-8 having been allowed on due enquiry to stand over. The readiness with which Coolmot and Hosiary land is now taken up for Cultivation on Vadahs less favorable by far than those granted to the old estates shows that landed property is daily becoming more valuable and gaining favor as affording a safe investment for capital.

	Total amount of Instalments			Instalments brought to			Not realized		
	Rs.	a	P.	Rs.	a	P.	Rs.	a	P.
Radern Estates as per Statement No. 17 — (1st) —	474	11	8	416	4	5	58	7	3
Hosiary Estates as per ditto No. 17 — (2d) —	783	3	8	742	13	3	40	6	5
	1257	15	4	1159	1	8	98	13	8

26. The assessment being regulated by the capabilities of the land, has no doubt had much influence on the spread of Cultivation but the value of land is rising every where.

Sugar Cane

27. In table No. 19 is exhibited the Sugar cane Cultivation. The Board are aware that Indigo and Cotton are not cultivated in this district, but some experiments are being made by private individuals in the Neighbourhood

Neighbourhood of Mangalore, which I hope will turn out sufficiently well to encourage further attempts. The cultivation of Sugar cane is extending rapidly in the Northern part of the district, and considerably elsewhere. This itself evident to any one frequently moving about the country, and if no great confidence can be placed in the Talook returns, they seem in some way, to be confirmed by the export accounts, though, doubtless a large quantity of Dharwar and Mysore Jaggery is included in these entries.

1264 ... 40257- 9- 8
Decrease 39743-6-4

29. This is entirely in the item Land,- Department, Forests. The causes contributing to this falling off, which does not represent a reduced income, as it arises chiefly from what may be termed a decreased sale of Stock which still remains available, have been fully explained in a separate Report submitted to the Board under date the 29th September last. The total decrease indeed in the Forest department, is Rupees 39743-6-4 but this has been reduced by an increase under the Head of Stamps and other items as shewn above.-

Advances for Cultivation appx. No. 25.

30. The amount advanced as Tuccavy during the year is Rupees 12903 of which Rupees 12,018-8-" have been recovered within the Fasly, and of the balance Rupees 884-8-" Rupees 859-8-" have been subsequently collected

Fort St. George 15th November 1855.

Extra Sources of Revenue

collected, leaving Rupees 25 to be realized.

31 I now proceed to report on the Extra Sources of Revenue.—

32 The annexed Statement gives the financial result for the year under review—shewing a falling off as compared with the receipts of the previous Fusly to the extent of Rs. 58764-2-0.

There-

Fort St. George, 15th November 1855.

34 There is a decrease under this head amounting to Rupees 106,317-4-1. This is to be attributed to the admission of Goa Salt under circumstances already explained to the Board which nearly closed our northern depôts, and made a reduction in the monopoly price throughout the District absolutely necessary; and also to the demand for the inland markets being affected by the late continued bad seasons. The actual deficit in revenue is of course no criterion of the state of the Salt trade, whilst the accounts furnished do not give a correct idea of the consumption during the Fusly as all Salt that has paid duty is entered as sold, whereas this is certainly not the case.

Sales of Fusly 1263		4,108-232
Deduct Sales 1st & 11th July 1263	4,018 - 297	
Sales of 30th June	69 - 121	
Sales of the year under Report	3,948-324	
Addition admissible on the investigation of Goa Salt by Sea on account of difference between weight & measurement @ 80 Parrahs per Garce	111 - 308	
	4,108 - 232	4,108-232
Difference	85 - 340	

35 The apparent difference between the quantities of Salt sold in Fusly 1263 and 1264 is only 85-340 For the reason above stated, this cannot be correct, though not so far from the truth as the calculation made of home consumption on the data afforded by the Sales at our Cotaurs.

36 In the Southern parts of the District where the Goa Salt was only introduced in small quantities, the decreased Sales for inland trade are clearly traceable to the late bad Seasons. A reference to the Marginal Statement will shew the Samahs at which the Sales have chiefly declined.

37 Had no other influences been at work, I see no reason to doubt that the Salt revenue would have suffered considerably from the general State of the interior of the Country, and the division of the Mysore grain trade from its usual course, during the Scarcity.

Fort St George 15th November 1855.

Scarcity that prevailed in Bellary and the neighbouring Districts.

38 I therefore consider that we must suppose the demand for the inland market to have been considerably less than in the previous year. Indeed I believe all falling off in the trade may be put down to this branch of it, and that the consumption in the home market which has been so largely supplied from Goa has probably been greater than during any former period. We cannot tell however what Stocks may be on hand or what portion of the Salt imported was consumed in Canara. Considering however the prosperity of the Country which has been increased rather than diminished by the misfortunes of neighbouring districts, I conclude that the people here reaped nearly all the advantages derived from the introduction of Goa Salt on terms which admitted of its Sale at rates very considerably below the Monopoly prices, and that the Sales for the inland Market have have not greatly exceeded those made at our Colours.

The

Fort St George 15th November 1855.

Land Customs.

39 The revenue realized from this branch during the year under report falls short of that of the previous year by Rupees 5.794-4-11, but exceeds the average of former years by Rupees 5.671-2-2. This decrease is to be attributed chiefly to local circumstances, the still disturbed State of the Goa territory, and disease among the Cattle in the Months of April and May having affected the trade.

Fort St. George 15th November 1855.

Scarcity that prevailed in Bellary and the neighbouring Districts.—

38 I therefore consider that we must suppose the demand for the inland market to have been considerably less than in the previous year. Indeed I believe all falling off in the trade may be put down to this branch of it, and that the Consumption in the home market which has been so largely supplied from Goa has probably been greater than during any former period. We cannot tell however what Stocks may be on hand or what portion of the Salt imported was consumed in Canara. Considering however the prosperity of the Country which has been increased rather than diminished by the misfortunes of neighbouring districts, I conclude that the people here reaped nearly all the advantages derived from the introduction of Goa Salt on terms which admitted of its Sale at rates very considerably below the Monopoly prices, and that the Sales for the inland Market have have not greatly exceeded those made at our Colaurs.

The

Fort St. George 15th November 1855.

Land Customs.

39 The revenue realized from this branch during the year under report falls short of that of the previous year by Rupees 5,794-4-4, but exceeds the average of former years by Rupees 5,671-2-2. This decrease is to be attributed chiefly to local circumstances, the still disturbed State of the Goa territory, and disease among the Cattle in the Months of April and May having affected the trade.—

Ferry Farms

48 The total demand under this head has amounted to Rupees 9106 - 14 - 0 of this sum Rupees 6699 - 13 - 5 were collected within the fusly leaving a balance of Rupees 2706 - - 7 outstanding at its close. The amount realized has been laid out in the construction of roads, as shewn in the accompanying Memo. and a separate Report on Receipts and outlay as required by Extract Minutes of Consultation dated 15th June 1865. Department Public Works No. 285. will be submitted to the Chief Engineer. —

marked A

49 This item has been still included under the head "Extra Revenue" the Boards' order dated 16th April not having been carried out for reasons explained in the Monthly Statement of demand Collections and Balance sent to the Board for May 1865. —

Small Farms

50 The marginal table exhibits the revenue derived from this branch the past year as compared with the preceding. The amount falls short of the demand for Fusly 1263 by Rupees 8695 - 6 - 5 but exceeds that of fusly 1262 as shewn in the margin. The decrease is to be attributed to a smaller quantity of Jungle timber having been felled in the upper forests during the year under review in consequence of the old stocks not having been cleared.

	Rs a/p
1262	12395 - 14 - -

1809 Fort St. George 15th November 1865.

Sir

I have the honor to transmit herewith the Abstract of the Land Revenue collected during the year ended 31st July 1865 together with the Statement of Balances remaining to be found to have been realized at that date.

This is owing chiefly to the accounts of Lower Bund Canal not having been closed on the 30th June 1865 and to the Collectors not having furnished the Returns of the Collections made in the month of July as directed.

The subsequent Collections to the end of September have been entered in the Abstract and the Balances carried to the account of Arrears.

The balance against Land is now more than Rupees 62,45,-6-8 against Rupees 19,99,994-16-2 at 4½ per Cent. and on that against Salt Rupees 1,09,344-14-10 at 4½ per Cent.

I have &c

Sd/-

Sd/- Geo. Stokes

Secy to Govt

To add the following Statement of the Arrears of Land Revenue and Extra Sources now outstanding and the Amount recoverable and irrecoverable.

Fort St. George 15th November 1865.

Fort St. George 15th November 1865.

58 Of Rupees 2659-14-7, the total assessment outstanding Rupees 641-13-8 will mostly be recovered by the sale of the defaulters' lands. In one case the permission of the Board has been already obtained, and further applications will be soon submitted to them.—

59 Of the irrecoverable balance above shewn, amounting to Rupees 1895-1-1, sanction has been recently received for writing off Rupees 15·75, on account of small farms, and this amount will be so adjusted in the accounts for the current month. The irrecoverable balance will thus be reduced to Rupees 320-1-1 of this sum Rupees 234-3-4 have already been recommended to be written off in the accounts in the Land and Extra Revenue Reports for the previous fasly 1263. but the Boards' Orders have not been received; I have now to apply for the sanction of Government upon the remaining sum of Rupees 85-13-9 Viz.—

64. A comparative view of the several charges in the Land department classed

according the form prescribed by the Board is given below.—

	Fusly 1263			Fusly 1264			Increase			Decrease		
	Rupees	A	P	Rupees	A	P	Rupees	A	P	Rupees	A	P
I Charges Collection and administration	207115	11	"	186995	7	5	"	"	"	15120	3	7
II Pagoda and Mosque allowances, Pensions and Charitable allowances,												
Village Sibbendy &c.	217376	11	5	207327	4	4	"	"	"	10049	7	1
III Works of Irrigation	"	"	"	"	"	"	"	"	"	"	"	"
Total	419492	6	5	394322	11	9	"	"	"	25169	10	8

65. The decrease appearing is chiefly nominal It arises from the closing of the accounts on the 30th June instead of the 11th of July Hence the pay of the establishment and pensions for June entered in the accounts of the previous fusly, do not appear in those of the past year.

66. I beg to add a Statement* shewing certain Tusdeek to Devastanums which have lapsed to Government under the Rules prescribed by the Boards Circular of the 7th December 1854. These allowances have not been disbursed for a period of more than 12 years, the Pagodas or institutions for which they were sustained not being in existence.—

	Rs	A	P
Total Tusdeek Sanctioned 13th August 1819	132,12	"	1
Lapsed to Govt as now reported	94	8	9
Remaining	132,317	7	4

* marked B

I

Fort St. George 15th November 1855

67. I have the honor to forward Mr. Robinsons' report on the Payenghaut Taloks forming the Division. Having made the Summabundy of the Sub Collectorate myself no separate report is furnished.

68. I would observe however that this portion of the District affords opportunities for storing water in Tanks and perhaps alone requires such Stores, and I propose hereafter to lay before the Board some statistics regarding such old works as may, I think, be repaired with advantage at the expense of Government.

69. These would consist of works beyond the means of any individual Ryots, and which remain in ruins, because it is not the habit of the people to unite for the purpose of carrying out a speculation, however promising it may be.

70. I quite concur in Mr Robinsons views of the value of Extra Survey Establishments but unless the Taloks Cutcherries are strengthened the

Fort St. George 15th November 1855

the work of this description done in each Talook must be limited to an amount which the Tahsildar can efficiently supervise, without interference with his other duties. The subject will have my early attention, and I shall be anxious, if posible, to arrange so as to keep pace with the demand for land, as the early settlement of applications is both of importance to the people and to Government.

71. Mr Robinsons remarks on Cultivation are but too true, and [illegible] the Tahsildars to inspect the [illegible] legal means of work as it proceeds I will make Revenue are evidently into the subject at large [illegible] this District, and submit a separate report [illegible] people against Cultivation at an early date [illegible] gratifying

72. The probability of advantage to be taken of the ruling referred to in para 6 of Mr Robinsons report has been already pointed out: but I trust that all difficulties will be obviated should the Board see no objection to the proposal made in my letter of 31st July last.

x No 78

73. But one other subject

Fort St. George 15th November 1855

in the additional Sub Collectors report, calls I think, for my remark - I allude to the settlement of the Garden Magony of the Anbola Taluk.

74. Mr. Mattby, acting on the orders of Government directing revision wherever the presence of assessment prevented the cultivation of the soil determined the extent to which reductions were necessary fixing the demand at, from 4 to 6 Rupees per acre Mr Robenson was directed to carry out this revision during the Jummabundy, and the manner in which he has done so, is well calculated to attain the object in view, and bring into cultivation a considerable quantity of land formerly very productive but long lying more or less waste - I beg to recommend to the favorable consideration of the Board the settlement made, and the extra vaidah which in one instance it has been found necessary to allow as also the distribution of Mooliputtahs as requested.

75 The annexed statement gives the general financial Results for the Fusly under report.-

										Net Decrease	4	1

Fort St. George 15th November 1855

76. Though the Total Revenue from all arrears exhibits a falling off as compared with that of Fusly 1263, it is at any rate gratifying to see that this is not caused by any misfortune having overtaken the district or by the failure of any Source of Revenue - On the Contrary our land revenue is buoyant and rising steadily and satisfactorily, and a Considerable amount of the Comparative deficit, resulting from diminished Sales of Timber, is more nominal than real whilst whatever may have been the loss of income in the Salt department, the full amount has been transferred directly to the pockets of the people.

77 Whilst strictly legal means of realizing both rent and Revenue are evidently sufficient for the purpose in this District, and therefore a protection to the people against oppression, it must, I think be gratifying to Government to see that resort to legal measures for the recovery of Government dues is so seldom necessary.

78. The Board are aware of the paucity of European Officers in this district

Fort St. George 15th November 1855

and of the urgent necessity that exists for strengthening our hands when opportunity offers, and I need not press this Subject on their attention.—

79 Mr. Robinson has since June last, been in charge of both the Sub Collectorates, and I need hardly say that I can always depend on every thing being done in his charge for the interest of the district that zeal and activity can effect.—

80. Mr. Binny, the acting Head assistant, has had a considerable charge on his hands, and by his application to business, was I fear prevented from attaining the position he would under ordinary circumstances have taken at the last examination.—

From

Fort St. George 15th November 1855

81. From the Head Sheristadar Bonefacio Fernandes as well as from the Nail. Soorapah and Division Sheristadar Roodrapah, I have received all the assistance which these Zealous and experienced officers are so well able to afford.—

Mangalore, 13th October 1855

/Signed/ W. Fisher
Acting Collector.

1809 Fort St. George 15th November 1865.

Sir

I have the honor to transmit herewith the Abstract of the Land Revenue collected during the year ended 31st July 1865 together with the Statement of Balances remaining to be found to have been realized at that date.

This is owing chiefly to the accounts of Lower Bund Canal not having been closed on the 30th June 1865 and to the Collectors not having furnished the Returns of the Collections made in the month of July as directed.

The subsequent Collections to the end of September have been entered in the Abstract and the Balances carried to the account of Arrears.

The balance against Land is now more than Rupees 62,45,-6-8 against Rupees 19,99,994-16-2 at 4½ per Cent. and on that against Salt Rupees 1,09,344-14-10 at 4½ per Cent.

I have &c

Sd/-

Sd/- Geo. Stokes

Secy to Govt

To add the following Statement of the Arrears of Land Revenue and Extra Sources now outstanding and the Amount recoverable and irrecoverable.

Fort St. George 15th November 1865.

Fort St. George 15th November 1865.

58 Of Rupees 2659-14-7, the total assessment outstanding Rupees 641-13-8 will mostly be recovered by the sale of the defaulters' lands. In one case the permission of the Board has been already obtained, and further applications will be soon submitted to them.—

59 Of the irrecoverable balance above shewn, amounting to Rupees 1895-1-1, sanction has been recently received for writing off Rupees 15·75, on account of small farms, and this amount will be so adjusted in the accounts for the current month. The irrecoverable balance will thus be reduced to Rupees 320-1-1 of this sum Rupees 234-3-4 have already been recommended to be written off in the accounts in the Land and Extra Revenue Reports for the previous fasly 1263. but the Boards' Orders have not been received; I have now to apply for the sanction of Government upon the remaining sum of Rupees 85-13-9 Viz.—

Moturpha Rs. "-8-"
Sevoy Jumma Rs. 4-12-10
14-4-10

Of this the sum of Rupees 71-8-11 is recommended for remission in the land and other departments being due in petty sums by poor and indigent Ryots. The remainder Rupees 14-4-10 is the amount lost by a Shanbogue in the Ankola Taluk in a stream which he attempted to cross when it was much flooded.—

60 Besides the above sum of Rs. 85-13-9 I have to request the sanction of Government for writing off Rupees 10 on account of a loss incurred in reselling a ferry farm in the Mangalore Taluk on the failure of a party who had obtained it at the public sale for the fasly under report. but proved to be utterly without means.—
